H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 29th January 1890.—Whereas a notification dated the 27th September 1889, declaring the intention of the Lieutenant-Governor to extend the provisions of Act IV (B.C.) of 1865 (an Act for the prohibition of the practice of inoculation) to the whole of the district of Chumparun was published at page 217, Part IB. of the *Calcutta Gazette* of the 2nd October 1889, and whereas no valid objection has been raised within one month from the date of the publication of the notification within the district, it is hereby notified that, in the exercise of the powers vested in the Local Government under section 3 of the Act, the Lieutenant Governor declares that the provisions of the Act be extended to the said district.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Dr. E. Bovill, Civil Surgeon of Chumparun, to be a Commissioner of the Motihari Municipality in that district, *vice* Dr. R. D. Murray, transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Sudder Local Board, in the district of Bhagulpore, under section 29 of Act III (B.C.) of 1885, of Baboo Kanai Lall Singh to be their Chairman, *vice* Mr. C. P. Carpenter, C.S., transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that the Lieutenant-Governor approves the election, under section 27 of Act III (B.C.) of 1884, by the Commissioners of the Narsingunge Municipality, in the district of Dacca, of Mr. W. Rattray to be their Chairman, *vice* Mr. H. F. Wilson, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—It is hereby notified that the Lieutenant-Governor approves the election, under section 27, Act III (B.C.) of 1884, by the Commissioners of the Manicktollah Municipality, in the district of the 24-Pergunnahs, of Kumar Gopendra Krishna Deb Bahadur, C.S., to be their Chairman, *vice* Mr. Kedar Nath Roy, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd February 1890.—Whereas a notification, dated the 18th October 1889, declaring the intention of the Lieutenant-Governor to sanction the imposition, under section 85 *b*), Act III (B.C.) of 1884, by the Commissioners of the South Suburban Municipality, in the district of the 24-Pergunnahs, of a rate on the annual value of all holdings situated within the Municipality, in lieu of the tax upon persons under clause (*a*) of the said section now imposed, was published at page 226, Part IB of the *Calcutta Gazette* of the 23rd idem, and whereas no objection has been raised to the proposed measure, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 85 of the said Act, and in accordance with the recommendation of the Commissioners of the South Suburban Municipality made at a meeting, the Lieutenant-Governor sanctions the imposition by the Municipal Commissioners of the said rate within the limits of the said Municipality.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd February 1890.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of Act III (B.C.) of 1884, and in accordance with the recommendation of the Commissioners of the North Dum-Dum Municipality, in the district of the 24-Pergunnahs, made at a meeting, to extend the provisions of Part IX of the said Act to the villages of Kadihatti and Nimta in Wards I and II respectively of the above Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal

NOTIFICATION.

The 3rd February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Mr. J. Windsor, C.S., to be the Chairman of the Bettiah Municipality, in the district of Chumparun, *vice* Mr. H. Luson, transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 3rd February 1890.—It is hereby notified for general information that in accordance with the recommendation of the Commissioners of the Garwah Municipality in the district of Lohardugga, made at a meeting, and in the exercise of the power conferred on him by section 9 of Act III (B.C.) of 1884, the Lieutenant-Governor intends to revise the southern and eastern boundaries of the said Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality. The revised southern and eastern boundaries are as follows:—

On the South.—From Jhanukia Ahar to the northern boundary land-mark of pucca terrace of mouzah Tenar on the right bank of the river Danroo, and thence along the right bank of the same river to the point where it meets and is crossed by the Gurwa-Peska village road.

On the East.—The Hariyara Sote from the trijunction of villages Sone Purwa, Bhoratia, and Chetna to the junction of the Hariyara Sote with the Danroo river, and thence straight to the point of Jhanukia Ahar, where it meets the southern boundary.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

ERRATUM.

The 4th February 1890.—In the notification dated 7th January 1890, containing the names of the elected and appointed members of Local Boards in the Bankoora district, published at pages 6 and 7 of Part IB of the *Calcutta Gazette* of the 8th idem, *for* "Baboo Soron Chandra Pal" *read* Baboo "Poran Chundra Pal."

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 30th January 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dacca Municipality for a public purpose, viz. for the extension of the Jubilee Street in Uari, in the town of Dacca, pergunnah Jahangirnagar, zillah Dacca, it is hereby declared that for the above purpose a piece of land, measuring more or less, 3 cottahs of standard measurement, is required. The land is bounded on the North by Uari Khal; on the East by Jagabandhu Karmakar's house; on the South by Bhojohari Shaha's Street; and on the West by Dwarika Nath Chakravarti's land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 5, 1890.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Port Commrs.' Office, Calcutta, the 1st February 1890. (3500—1) G. H. SIMMONS, Vice-Chairman.

Notice.

IN continuation of notice, dated the 9th October 1889 published at page 1656, Part II of the *Calcutta Gazette* of 30th October 1889, regarding the Barque *Grosvener*, it is further notified that the said vessel, with all her masts, sails, gear, and appurtenances which may be on board her on the 19th day of April 1890, will be sold by auction to the highest bidder on Saturday, the 19th of April 1890.

The sale will be held at the Port Office, Chittagong, and will commence at 3 P.M.

Terms—25 per cent. on fall of the hammer if desired by Receiver of Wrecks: the balance within a week of sale and before taking delivery. If the purchaser fails to pay the balance within seven days from date of sale, the vessel will be re-sold at his risk and expense. The vessel can be inspected at Chittagong by application to the Receiver of Wrecks.

E. GOOD, Receiver of Wrecks.

(3498—4)

WANTED a Sub-Overseer for the District Works, Maldah, on Rs 40 pay and Rs. 10 horse allowance. None need apply who is not a passed Sub-Overseer and has sufficient practical experience in road works. All applications, with copies of testimonials, must reach the undersigned on or before the 10th February 1890.

JOGENDRO NATH GHOSE, District Engineer.

(3478—2)

Notice.

WANTED a Record-keeper for the Maldah Collectorate on a salary of Rs. 40 rising to Rs. 60 by biennial increments of Rs. 2.

No one need apply who has not had previous experience in a similar post. The selected candidate is to furnish security to the extent of Rs. 500, either in Government Promissory Notes or in cash.

Applications will be received up to 25th February next.

POORNO CHUNDRA CHATTERJEE,
Deputy Collector in charge.

Excise.

NOTIFICATION.

1. The right of retail sale of the Liquors and Drugs specified below will be put up to auction at the Onium Sale-room, Board of Revenue, 2, Bankshall Street, on Tuesday, the 11th February 1890, and subsequent days, in the following order :—

Name of article.	Date of sale.
Country Spirit	Tuesday, 11th February 1890, commencing at 11 A.M. Wednesday, 12th ditto ditto ditto. Thursday, 13th ditto ditto ditto.
Rum and Imported Liquor by glass ...	Friday, 14th ditto ditto ditto.
Ganja, Siddhi, Charas, Majum ...	Monday 17th ditto ditto ditto. Tuesday, 18th ditto ditto ditto.
Opium, Madak, Chandu	Wednesday 19th ditto ditto ditto. Thursday, 20th ditto ditto ditto.
Tari	Friday, 21st ditto ditto ditto. Saturday, 22nd ditto ditto ditto.

2. A complete list of all the shops for which licenses will be offered and a copy of each form of license are open to general inspection at the Office of the Superintendent of Excise Revenue, 4, Bankshall Street, and the number of these shops is not under any circumstances to be increased during the term of three years ending the 31st March 1893, except under the sanction of the Commissioner of Excise, Bengal, in each case. The Superintendent of Excise Revenue, however, reserves to himself the right, in case of combination, or for other cause, to transfer, before its settlement, any shop from the locality specified, to some other locality in the neighbourhood, being within a distance of 150 yards from the advertised shop or premises, provided that in cases of re-sale the transfer does not bring the shop within a quarter of a mile of any other similar shop which has been settled at any previous sale and the term of whose license is unexpired.

3. It is not at present intended to open any other shop during the term of the license; but the Superintendent of Excise Revenue does not absolutely bind himself in this respect. On special cause shown, and with the sanction of the Commissioner of Excise, Bengal, in each case, the number of shops may be increased: provided, however, that, whenever a new shop is opened, it will be optional to the holder of a similar license for the sale of Liquor or Drugs, if his shop is within a quarter of a mile of the new shop, to surrender his license without forfeiting his advance, when the Superintendent of Excise Revenue is to re-settle the shop by auction or otherwise.

4. The right of retail sale of the Liquors and Drugs is to be put up to auction at upset prices sanctioned by the Commissioner of Excise, Bengal.

5. The right of retail sale of the Liquors and Drugs is to be put up to auction in separate lots of one or more shops either in the order specified in the list, or in such other order as the officer conducting the sale may deem fit. When one lot has been sold, the next lot is not to be put up until the sum payable in advance on account of the lot already sold has been actually paid: provided, however, that where the sum payable exceeds Rs. 25, a promissory note may be taken from any respectable and well-known purchaser in lieu of cash payment.

6. The purchasers of the right of retail sale of Country Spirit, Rum, and Imported Liquors are entitled to sell Imported Liquors by the glass only, the liquor to be drunk on the premises.

7. The auction is to be held subject to the following conditions :—

(*a*)—That the Superintendent of Excise Revenue does not bind himself to accept the highest or any bid.

(*b*)—That the settlement with each accepted purchaser will, in Calcutta and the Suburbs, be contingent on the production by him of the usual Police certificate or license as the case may be, viz.—

For Excise licenses for—
- Doasta ...
- Rum ...
- Imported Liquors by glass
- Tari ... ...
- Ganja ...
- Siddhi ...
- Charas ...
- Majum ...

If to be held in Calcutta, a Police certificate in the form prescribed by section 36, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police certificate in the form prescribed by section 19, Act II (B.C.) of 1866, must be produced.

For Excise licenses for—
- Opium ...
- Madak ...
- Chandu ...

If to be held in Calcutta, a Police license in the from prescribed by section 39, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police license in the form prescribed by section 22 of Act II (B.C.) of 1866 must be produced.

(*c*)—That the person accepted as the purchaser is to state in writing, within seven days from the date of settlement, in what building he purposes to open his shop, and is at the same time to submit a plan showing clearly and distinctly what building or portion thereof he desires to be covered by the license, it being understood that the removal of shops to other premises than those named in the list attached to this notification will be contingent on the approval of both the Excise and Police authorities, and that any sum which has been paid as an advance of the license fee under the provisions of clause (*d*) of these conditions will be returned to any person to whom a license may be subsequently refused for Police reasons.

(*d*)—That the term of the license is to be for three years ending the 31st March 1893, and that, except in the case of Tari, the license fee for that period is to be paid in advance in the following instalments:—namely, the sum equivalent to the fee for two months, at the time of sale, and one month's fee on the date on which the currency of the license commences, and one month's fee on the 1st day of every succeeding month, until the whole of the fee due on the license shall have been paid. In the case of Tari only one month's fee is to be paid in advance at the time of sale, and fifteen days' fee on the date on which the currency of the license commences, and the rest of the fee in half-monthly instalments, viz., on the 1st and 16th day of every month, until the whole of the fee due on the license shall have been paid. This condition is to be strictly enforced in future, and failure to comply with it is to be met by immediate cancelment of the license.

(*e*)—That the purchaser is not to be entitled to receive back any portion of his advance in the event of his shop being closed before the expiration of the term of the license on violation of any of the conditions of the license, or his being convicted of a non-bailable criminal offence, or of any offence against the Excise laws or rules; and in the case of the surrender of a license under Act VII (B.C.) of 1878, the licensee is to give fifteen days' previous notice in writing to the Superintendent of Excise Revenue, and pay a sum equal to the license fee for fifteen days, over and above the amounts already paid in advance; and in the case of the surrender of a license under Act I of 1878, the licensee is to give one month's previous notice in writing to the Superintendent of Excise Revenue, and pay such fine not exceeding six months' license fees as the Superintendent of Excise Revenue may adjudge, over and above the amounts already paid in advance.

(*f*)—That the currency of the license is to commence on the 1st April 1890 on which date the purchaser is to open his shop, in all respects prepared for the accommodation of customers, to be certified by an Excise Officer—failure to comply with this condition is to be met by the immediate cancelment of the license and the forfeiture of the deposit, except in the case of delay caused by the non-issue of the Police certificate or Police license, for which a reasonable extension of time may be allowed upon application and cause shown to the Superintendent of Excise Revenue.

(*g*)—That where the amount of the sum payable in advance is required to be paid at once in cash, and the bidder fails to make such payment, the officer conducting the sale is either immediately to put up the lot again for sale, or after the other lots in the list have been disposed of, or he may postpone the sale to such future date as he shall then and there notify; and the defaulting purchaser is to be debarred from bidding for such lot or for any other lot, and he is not to be allowed to remain in the auction-room; and that the defaulting purchaser will be liable for any loss that may accrue to Government in case it becomes necessary to re-sell a lot at a lower rate either in consequence of his failure to deposit the sum payable at the time of sale, or to redeem his promissory note on or before 4 P.M. on the day following that on which the note was signed.

(*h*)—That the purchasers are to adhere to all the provisions of the Opium, Excise and Police laws, and of the rules which have been or may from time to time be prescribed by the Board of Revenue.

8. All sales subsequent to the date of the triennial sale in March are to be held subject to the conditions contained in this notification, so far as they may be applicable.

9. Any further information regarding the auction may be had on application at the Office of the Superintendent of Excise Revenue.

D. G. BONNERJEE,

Superintendent of Excise Revenue,
Calcutta, the Suburbs, Howrah, and Bally.

OFFICE OF THE SUPDT. OF EXCISE REVENUE; 4, BANKSHALL STREET, CALCUTTA, *the 15th January* 1890.

Notification.

IT is hereby notified that under section 46 of the Local Self-Government Act III (B.C.) of 1885, the District Board of Dacca have at their Special Meeting, held on the 11th January 1890, determined to levy the road cess in this district for the ensuing financial year 1890-91 at the maximum rate of one-half anna or six pies in the rupee on the annual value of lands.

L. HARE, Chairman.

Dacca District Board's Office, the 11th January 1890.

NOTICE is hereby given that Mary Stephen, who obtained a decree *nisi* on the 23rd January 1890 in the High Court for dissolution of marriage against her husband S. S. Stephen, has revoked and cancelled the power-of-attorney which she executed in his favour, and that the said S. S. Stephen has no authority to act as her attorney in any matter whatsoever. Any payment of money therefore to the said S. S. Stephen on account of the said Mary Stephen will not be recognised.

GOVESH CHUNDER CHUNDER, Attorney for Mary Stephen.

Calcutta, the 27th January 1890. (3494—3)

Stolen.

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observation taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal, Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,
Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1886.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage. Rs. A. P.	With postage. Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, (*inclusive of postage in India*) ...	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.

	For town. Rs. A. P.	For mufasil. Rs. A. P.
For the Calcutta Series per copy ...	0 8 9	0 10 3
„ each of the Madras, Bombay and Allahabad Series per copy	0 5 3	0 6 9
„ the Calcutta Series. For the year ...	7 2 6	8 6 3
„ each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Reports should apply to—

Superintendent, Government Press, Madras.
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.
„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1889 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.*

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance—

	One page.	Half page.	Quarter page.
For one issue ...	Rs. 20	Rs. 14	Rs. 9
„ three issues ...	„ 55	„ 36	„ 24
„ six „ ...	„ 100	„ 68	„ 45
„ nine „ ...	„ 145	„ 96	„ 64
„ twelve „ ...	„ 180	„ 120	„ 80

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set. An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole set.

*** *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 6 (6*a*.) each. General Index to Volumes I to XXIII. Rs. 6 (6*a*.)

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 31st January, 1890:—

No. 3 OF 1890.

A Bill to Amend the Indian Factories Act, 1881.

WHEREAS it is expedient to amend the Indian Factories Act, 1881; It is hereby enacted as follows:— / of 1881.

Amendment of definition of "factory" in section 2, Act XV, 1881.

1. For the words "one hundred" in section 2 of the said Act the word "twenty" shall be substituted.

Amendment of sections 4, 5, 6 and 16, Act XV, 1881.

2. For the word "seven" in sections 4, 5, 6 and 16 of the said Act the word "nine" shall be substituted.

Addition to section 4, Act XV, 1881.

3. To section 4 of the said Act the following shall be added, namely:—

"or for more than the time allowed by this Act for the employment of women."

Amendment of section 7, Act XV, 1881.

4. (1) For the first clause of section 7 of the said Act the following shall be substituted, namely:—

"No woman shall be actually employed more than eleven hours, nor any child more than nine hours, in any factory in any one day."

(2) In the second clause of the same section, before the word "child" the words "woman or", and between the words "allowed to" and the word "him" the words "her or" shall be inserted.

(3) In the last clause of the same section, for the words "A child shall not be deemed to be employed" the words "A woman or child shall not be deemed to be actually employed" shall be substituted.

Substitution of new section for section 8, Act XV, 1881.

5. For section 8 of the said Act the following shall be substituted, namely:—

Allowance of holidays to women and children.

"8. Every occupier of a factory in which women or children are employed shall, before the beginning of each month, fix, according to the castes or classes to which such women or children belong or otherwise, not less than four days in such month to be observed as holidays by each woman or child employed in the factory, and shall forthwith give notice of the days so fixed to such officer as the Local Government may, from time to time, appoint in this behalf.

"An occupier of a factory may, with the previous sanction of the Inspector, substitute, for any day fixed under this section, another day in the same month.

"A woman or child shall not be employed in such factory on a day fixed under this section as a day to be observed as a holiday by the woman or child, unless when another day has been substituted for such day as hereinbefore provided, in which event the woman or child shall not be employed in such factory on the day so substituted."

Amendment of section 9, Act XV, 1881.

6. In section 9 of the said Act, before the word "child" the words "woman or" shall be inserted.

Amendment of section 15, Act XV, 1881.

7. (1) In clause (*a*) of, and the second proviso to, section 15 of the said Act, between the words "any" and "each" respectively and the word "child" the words "woman or", and in the same proviso between the words "two or more" and the word "children" the words "women or", shall be inserted.

(2) For clauses (*e*) and (*f*) of the same section the following shall be substituted, namely:—

"(*e*) neglects to fence any machinery or mill-gearing in any factory;

(*f*) neglects to maintain a supply of water for the use of persons employed in any factory;

(*g*) neglects to ventilate any factory or to keep any factory in a cleanly state and free from effluvia arising from any drain, privy or other nuisance;

(*h*) suffers any factory to be so overcrowded, while work is carried on therein, as to be injurious to the health of the persons employed therein; or

(*i*) neglects to give any notice or furnish any return,".

Amendment of section 18, Act XV, 1881.

8. (1) For clauses (*b*), (*c*) and (*d*) of section 18 of the said Act the following shall be substituted, namely:—

"(*b*) the water-supply to be maintained for the use of persons employed in factories;

[1 Vict., c. 3, s. 61 (1).] (*c*) the ventilation of factories and their cleanliness (including lime-washing, painting, varnishing and washing) and freedom from effluvia arising from any drain, privy or other nuisance;

(*d*) the prevention of such overcrowding of factories, while work is carried on therein, as is likely to be injurious to the health of the persons employed therein;

(*e*) the obligation of occupiers of factories to furnish true returns, occasional or periodical, on and in accordance with the requisition of the local Inspector or the Local Government;

(*f*) the inspection of factories;

(*g*) the manner in which appeals under this Act are to be presented and heard; and

(*h*) otherwise carrying out the purposes of this Act."

(2) To the same section the following shall be added, namely:—

"Before making rules under clause (*b*), clause (*c*) or clause (*d*) of this section, the Local Government shall publish in such manner as may in its opinion be sufficient for giving information to persons interested a draft of the proposed rules, with a notice specifying a date at or after which the draft will be taken into consideration, and shall consider any objection or suggestion which may be received from any person with respect to the draft before the date so specified."

References to Act XV of 1881 to be read as references to that Act as amended by this Act.

9. A reference in any enactment or document to the Indian Factories Act, 1881, shall be read as a reference to that Act as amended by this Act.

[Cf. Ir Act X 1887, s Bom. 1888, (2): an Act IV ss. 10 (iii) a (1).]

IV of 1

STATEMENT OF OBJECTS AND REASONS.

THE Government of India, having recently had under its consideration the reports of Local Governments on the operation of the Indian Factories Act, 1881, and the proceedings of the Commission appointed in 1884 to consider the working of factories in the Bombay Presidency, is of opinion that the Act of 1881 should be so amended as to—

(*a*) bring within its scope any factory in which not fewer than twenty hands are employed,

(*b*) raise from seven to nine years the age below which a child may not be employed in a factory,

(*c*) limit the hours of work for women to eleven in any one day,

(*d*) extend to women the provisions of the Act with respect to the allowance of holidays to children, and enable occupiers of factories to fix such days as holidays for the women and children employed therein as, having regard to the different classes or castes to which they belong, may be most convenient for them,

(*e*) authorise Local Governments to make sanitary rules suited to local requirements, and

(*f*) render it obligatory on occupiers of factories to furnish such statistics as may from time to time be required by the Government.

The object of the Bill is to amend the Act accordingly.

Among the enactments which will be incidentally affected by the Bill (section 9) are the Electricity Act, 1887, the City of Bombay Municipal Act, 1888, and the Indian Merchandise Marks Act, 1889.

A reprint of Act XV of 1881, with the proposed amendments set forth in italics, is appended to this Statement.

The 31st January, 1890. ANDREW R. SCOBLE.

APPENDIX.

ACT No. XV OF 1881.

(As amended by the Bill.)

An Act to regulate labour in Factories.

Preamble. WHEREAS it is expedient to regulate labour in factories: It is hereby enacted as follows:—

Preliminary.

Short title. 1. This Act may be called the Indian Factories Act, 1881.

Local extent. Commencement. It applies to the whole of British India, and shall come into force on the first day of July, 1881.

Interpretation-clause. 2. In this Act, unless there is something repugnant in the subject or context,—

"factory" means any premises (other than indigo-factories or premises situated on, and used solely for the purposes of, a tea or coffee plantation) wherein is carried on, for not less than four months in the whole in any one year, any process for, or incidental to, making, altering, repairing, ornamenting, finishing or otherwise adapting for use, transport or sale, any article or part of an article; and "factory:"

(*a*) wherein steam, water or other mechanical power is used in aid of any such process; and

(*b*) wherein not less than *twenty* persons are on any day simultaneously employed in any manual labour in, or incidental to, any such process; and

every part of a factory shall be deemed to be a factory, except any part used exclusively as a dwelling:

"child" means a person under the age of twelve years: "child:"

"mill-gearing" includes every shaft, whether upright, oblique or horizontal, and every wheel, drum, pulley, rope, driving strap or band, by which the motion of the first moving power is communicated to any machine: "mill-gearing:"

a child who works in a factory, whether for wages or not, either in a manufacturing process or handicraft, or in cleaning any part of the factory used for any manufacturing process or handicraft, or in cleaning or oiling any part of the machinery, or in any other kind of work whatsoever incidental to, or connected with, the manufacturing process or handicraft, or connected with the article made or otherwise the subject of the manufacturing process or handicraft therein, shall be deemed to be employed therein within the meaning of this Act. "employed."

Inspectors and certifying Surgeons.

Inspectors. 3. The Local Government may in its discretion, by notification in the official Gazette, appoint such persons as it thinks fit to be Inspectors of factories within such local limits as it may assign to such Inspectors, and may suspend or dismiss any person so appointed.

In default of such appointment, the Magistrate of the district shall, in virtue of his office, be Inspector of all factories (if any) in the district.

Such Inspectors shall be deemed public servants within the meaning of the Indian Penal Code; and shall be officially subordinate to such authority as the Local Government may, from time to time, indicate in this behalf.

Powers of Inspector. 4. An Inspector of factories may, within the local limits for which he is appointed,—

(*a*) enter, with such assistants (if any) as he thinks fit, any factory whenever he has reason to believe that any person is employed therein;

(*b*) make such examination of the premises and machinery, and of the registers hereinafter prescribed, and take on the spot or otherwise such evidence of any person, as such Inspector may deem necessary for carrying out the provisions of this Act;

(*c*) order that any person shall not be employed in a factory when he has reason to believe that such employment would be in contravention of this Act—

until the age of such person has been certified, in the manner hereinafter provided, to be above *nine* years; or,

for more than the time allowed by this Act for the employment of children until his age has been so certified to be above twelve years; *or*

for more than the time allowed by this Act for the employment of women.

Certifying surgeons.

5. The civil surgeon or such other person practising medicine or surgery as the Local Government may, from time to time, appoint in this behalf for any local area (hereinafter called the certifying surgeon) shall, at the request of any person employed or desirous of being employed in a factory situate in such local area, or of the parent or guardian of such person, examine such person and grant him a certificate, stating whether his age, as nearly as it can be ascertained from such examination, is above or below *nine* years, or twelve years, as the case may be.

Women and Children.

Age *for* employment *of children.*

6. No child shall be employed in any factory if he is under the age of *nine* years.

Hours of employment for *women and* children.

7. No *woman* shall be actually employed *more than eleven hours, nor any child more than nine hours, in any factory* in any one day.

And no *woman or* child shall be employed in any factory on any day without an interval, or intervals, amounting in the whole to at least an hour, being allowed to *her or* him for food and rest.

The times at which such intervals shall be allowed, and the length of each interval, shall be fixed by the Local Government for each factory, after ascertaining, as far as possible, the existing practice in such factory and the wishes of the occupier thereof.

The occupier shall set up and maintain, in some conspicuous place in the factory, a printed or written notice, in English and the languages of the district in which the factory is situate, showing the times at which such intervals shall be allowed and the length of each interval.

A *woman or* child shall not be deemed to be *actually* employed within the meaning of the first clause of this section during any interval allowed for food or rest.

Allowance of holidays to women and children.

8. *Every occupier of a factory in which women or children are employed shall, before the beginning of each month, fix, according to the castes or classes to which such women or children belong or otherwise, not less than four days in such month to be observed as holidays by each woman or child employed in the factory, and shall forthwith give notice of the days so fixed to such officer as the Local Government may, from time to time, appoint in this behalf.*

An occupier of a factory may, with the previous sanction of the Inspector, substitute, for any day fixed under this section, another day in the same month.

A woman or child shall not be employed in such factory on a day fixed under this section as a day to be observed as a holiday by the woman or child, unless when another day has been substituted for such day as hereinbefore provided, in which event the woman or child shall not be employed in such factory on the day so substituted.

Prohibition of employment of woman or child in two factories on same day.

9. No occupier of a factory shall employ therein on any day any *woman or* child who has to his knowledge already been employed on the same day in any other factory.

Prohibition of employment of child in certain dangerous work.

10. No occupier of a factory shall allow any child to clean any part of the mill-gearing or machinery of such factory while the same is in motion, or to work between the fixed and traversing parts of any self-acting machine while such machine is in motion by the action of the steam-engine, water-wheel or other mechanical power, as the case may be.

Register of children in a factory.

11. The Local Government may direct any occupier of a factory to keep, in such form and with such particulars as such Government may, from time to time, prescribe, registers of the children (if any) employed in such factory, and of their respective employments.

Fencing.

Fencing.

12. (*a*) Every fly-wheel directly connected with a steam-engine, or water-wheel or other mechanical power in any part of a factory, and every part of a steam-engine or water-wheel,

(*b*) every hoist or teagle near which any person is liable to pass or be employed, and

(*c*) every other part of the machinery or mill-gearing of a factory which may, in the opinion of the local Inspector, be dangerous if left unfenced, and which he may have ordered to be fenced,

shall, while the same is in motion, be kept by the occupier of such factory securely fenced.

Any order under clause (*c*) may be set aside, on appeal or otherwise, by the Local Government or such authority as it may appoint in this behalf.

Notices.

Notice to be given of accidents.

13. When any accident occurs in a factory causing death or bodily injury whereby the person injured is prevented from returning to his work in the factory during forty-eight hours after the occurrence of the accident, the occupier of such factory, or, in his absence, his principal agent in the management of such factory, shall send such notice of such accident to such authorities in such form and within such time as the Local Government may, from time to time, by rule, direct.

Person beginning to occupy factory to give notice.

14. Every person shall, within one month after he begins to occupy a factory, send to the local Inspector a written notice containing the name of the factory, the place where it is situate, the address to which he desires his letters to be addressed, the nature of the work performed in such factory, the nature and amount of the moving power therein, and the name of the person (if any) under whom the business of the factory is to be carried on.

Penalties.

Penalties.

15. Any person who, in breach of this Act, or of any order or rule made hereunder,—

(*a*) employs any *woman or* child in any factory;

(*b*) neglects to set up or maintain the notice required by section seven, or to fix the days referred to in section eight;

(*c*) allows any child to perform the work forbidden by, or to work in contravention of, section ten;

(*d*) neglects to keep a register in manner prescribed under section eleven;

(*e*) neglects to fence any machinery or mill-gearing in any factory;

(*f*) *neglects to maintain a supply of water for the use of persons employed in any factory;*

(*g*) *neglects to ventilate any factory or to keep any factory in a cleanly state and free from effluvia arising from any drain, privy or other nuisance;*

(*h*) *suffers any factory to be so overcrowded, while work is carried on therein, as to be injurious to the health of the persons employed therein; or*

(*i*) *neglects to give any notice or furnish any return,*

shall be punished with fine which may extend to two hundred rupees:

Provided that—

1st, no prosecution under this section shall be instituted except by, or with the previous sanction of, the local Inspector; and

Only one penalty for same kind of offence on one day.

2nd, no person shall be liable under this section to more than one penalty for any one description of offence committed on the same day, except where two or more *women or* children are employed contrary to the provisions of this Act, in which case one penalty may be imposed in respect of each *woman or* child so employed.

Burden of proof as to age.

16. Where an act or omission would, if a person were under *nine* or twelve years of age, be an offence punishable under this Act, and such person is, in the opinion of the Court, apparently under such age, it shall lie on the accused to prove that such person is not under such age.

Certifying surgeon's declaration in writing.

A declaration in writing by a certifying surgeon that he has personally examined a person employed in a factory, and believes him to be under or over the age set forth in such declaration, shall, for the purposes of this Act, be admissible as evidence of the age of that person.

Occupier primarily liable for breaches of Act.

17. Every occupier of a factory shall be deemed primarily liable for any breach therein of the provisions of this Act; but he may discharge himself from such liability by proof to the satisfaction of the local Inspector, before prosecution therefor, that such breach was committed by some other person without his knowledge or consent; and the person committing such breach shall be liable therefor.

Miscellaneous.

Power to make rules.

18. The Local Government may, from time to time, make rules consistent with this Act, to provide for—

(*a*) the fencing of machinery and mill-gearing in factories;

(*b the water-supply to be maintained for the use of persons employed in factories;*

(*c*) *the ventilation of factories and their cleanliness (including lime-washing, painting, varnishing and washing) and freedom from effluvia arising from any drain, privy or other nuisance;*

(*d*) *the prevention of such overcrowding of factories, while work is carried on therein, as is likely to be injurious to the health of the persons employed therein;*

(*e*) *the obligation of occupiers of factories to furnish true returns, occasional or periodical, on and in accordance with the requisition of the local Inspector or the Local Government;*

(*f*) *the inspection of factories;*

(*g*) *the manner in which appeals under this Act are to be presented and heard; and*

(*h*) *otherwise carrying out the purposes of this Act.*

Such rules shall be published in the official Gazette, and shall thereupon have the force of law.

Before making rules under clause (b), clause (c) or clause (d) of this section, the Local Government shall publish in such manner as may in its opinion be sufficient for giving information to persons interested a draft of the proposed rules, with a notice specifying a date at or after which the draft will be taken into consideration, and shall consider any objection or suggestion which may be received from any person with respect to the draft before the date so specified.

Crown factories.

19. This Act shall apply to factories belonging to the Crown: provided that, in case of any public emergency, the Governor General in Council or the Local Government may, by an order in writing, exempt any such factory from this Act to such extent and during such period as the Governor General in Council or the Local Government, as the case may be, thinks fit.

S. HARVEY JAMES,
Secretary to the Government of India.

PART I.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 161A.

GENERAL.—*The 24th January* 1890.—Baboo Bhoirub Nath Palit, Deputy Collector is appointed to perform the functions of a Collector under the Public Demands Recovrey Act VII (B.C.) of 1880 in the district of Julpigoree.

The 29th January 1890.—Mr. M. Finucane, Director of Land Records, Bengal, acted in the first grade of Magistrates and Collectors from the 14th to the 19th instant, both days inclusive.

Mr. W. Fiddian, Magistrate and Collector, Pubna, acted in the first grade of Magistrates and Collectors from the 14th to the 19th instant, both days inclusive.

Mr. B. Dé, Officiating Magistrate and Collector, Khoolna, acted in the second grade of Magistrates and Collectors from the 14th to the 19th instant, both days inclusive, *vice* Mr. W. Fiddian.

The 31st January 1890.—Mr. J. B. Worgan, District and Sessions Judge, Cuttack, is allowed leave for fifteen days, under article 308 of the Civil Service Regulations, with effect from the date on which he availed himself of it.

Baboo Hurry Mohun Sen, Deputy Magistrate and Deputy Collector, Dacca, is allowed leave for six months, under article 369 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 23rd September 1889.

The 3rd February 1890.—Baboo Gossain Das Hazra, Sub-Deputy Collector, Barh, Patna, is allowed leave for three months, under article 291 of the Civil Service Regulations, with effect from the date on which he may be relieved.

Moulvie Fazlar Rahman, Sub-Deputy Collector, Alipore, Julpigoree, is transferred to Patna, and is posted to the Barh sub-division of that district.

In modification of previous notifications, Mr. R. C. Sterndale is hereby appointed substantively *pro tempore* Cantonment Magistrate of Dum-Dum, and to have charge as Sub-divisional Officer of the villages outside Cantonment limits which constitute the Dum-Dum sub-division.

Mr. C. H. Vowell, C.S., reported his departure from India on furlough on the 19th January 1890.

The 4th February 1890.—Captain W. H. Chase, Northern Bengal Volunteer Rifle Corps, is allowed leave of absence for eight months, with effect from the 1st instant.

Mr. F. J. Monahan, Officiating Joint-Magistrate and Deputy Collector, Serajgunge, Pubna, is vested with the powers of a Collector under Act X of 1870 in that district.

POLICE.—*The 3rd February* 1890.—In modification of the order of the 28th January 1890, first class Inspector E. Robertson, of the Calcutta Police, is appointed to act for Mr. J. E. Millard, Superintendent of the Detective Department, but will remain in charge of the First Division, Town Police, during the absence of Mr. J. Costello, on leave, or until further orders.

Mr. J. E. Millard, Superintendent of the Detective Department, Calcutta Police, in charge of the Third Division, Town Police, is appointed to act for Mr. James Costello, Superintendent of the First Division, Town Police, during his absence on privilege leave. Mr. Millard will, however, continue to hold charge of the Third Division, Town Police.

The 4th February 1890.—Mr. W. H. Cornish, District Superintendent of Police, Maldah, is allowed leave for two days, under article 291 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 17th December last.

Mr. W. A. Gayer, Officiating Assistant Superintendent of Police, Moorshedabad, is transferred to Backergunge.

REGISTRATION.—*The 31st January* 1890.—Moulvi Gowhar Ally, Deputy Magistrate and Deputy Collector, Maldah, is appointed to be also Sudder Sub-Registrar of Maldah, with retrospective effect from the 22nd May last, *vice* Moulvi Zakir Hossein, transferred.

EDUCATION.—*The 4th February* 1890.—Baboo Madhu Sudan Das, Law Lecturer, Ravenshaw College, Cuttack, is allowed leave for six weeks, without allowances, with effect from the 24th ultimo.

Baboo Jogneswar Chandra is appointed to act as Law Lecturer, Ravenshaw College, Cuttack, during the absence, on leave, of Baboo Madhu Sudan Das, or until further orders.

The following notifications are republished from the *Assam Gazette* :—

No. 434*G.*—*The 23rd January* 1890.—Mr. E. Muspratt is appointed to act as Commandant of the Naga Hills Military Police Battalion during the absence, on medical leave, of Lieutenant D. C. F. Macintyre, with effect from the 1st May 1889.

No. 435*G.*—Mr. J. Kennedy, C.S., Deputy Commissioner of Sylhet, was employed on special duty at Shillong from the 1st to the 5th September 1889, both days inclusive.

This reduces the amount of privilege leave granted to Mr. Kennedy in General Department notification No. 239, dated the 12th July 1889, by five days.

No. 1.—*The 23rd January* 1890.—Baboo Nritya Gopal Chatterji, B.L., Extra Assistant Commissioner, made over the executive charge of the Cachar Treasury to Mr. H. Le Mesurier, C.S., on the 31st December 1889.

No. 2.—Mr. L. St. J. Brodrick, Assistant Superintendent of Police, made over the executive charge of the Naga Hills Treasury to Surgeon W. W. White, M.D., on the 31st December 1889.

No. 4.—Mr. R. R. Pope, C.S., reported his return to duty from furlough in the forenoon of the 7th January 1890.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT—(OPIUM).

NOTIFICATION.

The 4th February, 1890.—In consequence of the retirement of Mr. G. Field, Sub-Deputy Opium Agent, second grade, the following promotions are made, with effect from the 28th September, 1889:—

Mr. H. F. Campbell, Sub-Deputy Opium Agent, third grade, to be a Sub-Deputy Opium Agent of the second grade.

Mr. H. J. Lloyd, Sub-Deputy Opium Agent, fourth grade, to be a Sub-Deputy Opium Agent of the third grade.

Mr. P. J. Luard, Sub-Deputy Opium Agent, fifth grade, to be a Sub-Deputy Opium Agent of the fourth grade.

Mr. J. Christian, Assistant Sub-Deputy Opium Agent, first grade, to be a Sub-Deputy Opium Agent of the fifth grade.

Mr. W. T. Ryves, Assistant Sub-Deputy Opium Agent, second grade, to be an Assistant Sub-Deputy Opium Agent of the first grade.

Mr. C. S. Delmerick, Assistant Sub-Deputy Opium Agent, third grade, *sub. pro tem.* in the second grade, to be confirmed in that grade.

Mr. G. W. Dick-Lauder, Assistant Sub-Deputy Opium Agent, third grade, to be an Assistant Sub-Deputy Opium Agent, second grade, *sub. pro tem.*

Mr. C. H. S. Burt, Assistant Sub-Deputy Opium Agent, Probationary grade, *sub. pro tem.* in the third grade of Assistant Sub-Deputy Opium Agents, to be confirmed in that grade.

Mr. O. O'Donnell, Assistant Sub-Deputy Opium Agent, probationary grade, to be an Assistant Sub-Deputy Opium Agent, third grade, *sub. pro tem.*

Mr. E. C. Godfrey, Assistant Sub-Deputy Opium Agent, probationary grade, *sub. pro tem.*, to be confirmed in that grade.

Mr. G. W. Oliphant, Officiating Assistant Sub-Deputy Opium Agent, to be an Assistant Sub-Deputy Opium Agent, probationary grade, *sub pro tem.*

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th February, 1890.—In consequence of the death, on the 2nd January, 1890, of Mr. W. Cracroft, Sub-Deputy Opium Agent, fourth grade, the following promotions are made in the Opium Department, to take effect from the 3rd idem :—

Mr. C. Paterson, Sub-Deputy Opium Agent, fifth grade, to be Sub-Deputy Opium Agent, fourth grade.

Mr. J. E. Hand, Assistant Sub-Deputy Opium Agent, first grade, to be Sub-Deputy Opium Agent, fifth grade.

Mr. W. H. T. Howey, Assistant Sub-Deputy Opium Agent, second grade *sub. pro tem.*, to be confirmed in that grade.

Mr. R. W. Pyne. Assistant Sub-Deputy Opium Agent, third grade, to be Assistant Sub-Deputy Opium Agent, second grade, *sub. pro tem.*

Mr. C. J. C. Ricker, Assistant Sub-Deputy Opium Agent, third grade *sub. pro tem.*, to be confirmed in that grade.

Mr. E. A. Gennoe, Assistant Sub-Deputy Opium Agent, probationary grade, to be Assistant Sub-Deputy Opium Agent, third grade, *sub. pro tem.*

Mr. F. W. Harris, Assistant Sub-Deputy Opium Agent, probationary grade *sub. pro tem.*, to be confirmed in that grade.

Baboo Keshri Narain, Officiating Assistant Sub-Deputy Opium Agent, to be Assistant Sub-Deputy Opium Agent, probationary grade, *sub. pro tem.*

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th February 1890.—The following rules framed by the Board of Revenue under clause (*c*), section 9 of the Sea Customs Act VIII of 1878, to provide for the weighment of salt by licensed weighmen at the Port of Calcutta, having received the sanction of the Licutenant-Governor, are published for general information :—

I. From the date of the publication of these rules, no person, other than a weighman licensed under them, shall be employed to weigh salt either on board importing vessels or at the Sulkea warehouses.

II. A weighman includes an assistant.

III. The duty of supplying licensed weighmen may be entrusted to contractors or sirdar weighmen, who will be appointed on the recommendation of the Superintendent of the Preventive Service and receive a license. Contractors and sirdars who have not been licensed by the Collector of Customs will not be recognised by Customs officers.

IV. Any person wishing to become a licensed weighman will be supplied, on application to the Collector of Customs, with a form which he will be required to fill up, and such application should ordinarily be supported by a recommendation from some person directly interested in the importation and weighment of salt. If he is considered suitable, a license will then be granted to the applicant.

V. A licensed weighman, who is guilty of refusal or neglect of duty, may be suspended or dismissed.

VI. Licensed weighmen will make their own arrangements with those persons who require their services, and in this respect Government will not exercise any control over them ; but they are strictly prohibited from receiving any reward or present from the buyers, or their representatives, under penalty of dismissal and of a criminal prosecution.

VII. When on duty a licensed weighman will be required to wear a brass badge, and will be bound to produce his license if asked to do so.

VIII. A complete list of licensed contractors, sirdar weighmen, and weighmen will be supplied to any person interested in the weighment of salt upon application.

Form of Contractor's License.

A. B. is hereby appointed a licensed contractor for the supply of licensed weighmen under the rules prescribed by the Board of Revenue.

Form of Application for Weighman's License.

I, , son of , resident of in the district of , at present residing at , desiring to obtain a license authorizing me to weigh salt on board ships as well as at the Sulkea warehouses, beg respectfully to submit this petition.

I undertake to perform my duties faithfully to Government, and to obey any lawful commands that I may receive.

Form of Weighman's License.

A. B. is hereby appointed a licensed weighman under the rules prescribed by the Board of Revenue.

K. G. GUPTA, *Offg. Secretary.*

BOARD OF REVENUE, L.P.; CALCUTTA.

DECLARATION.

The 31st January 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of the proposed central distillery at Khoolna, in the village of Tootpara, pergunnah Hogla, zillah Khoolna, it is hereby declared that for the above purpose a piece of land measuring, more or less, 3 beegahs 9 cottahs and 10 chittacks of standard measurement, bounded on the North by the house of Ram Charan Ghose; East by the Strand Road on the bank of the river Roopsa; South by the land of Ram Charan Ghose and others; and West by Kali Charan Boona's land, is required within the aforesaid village of Tootpara.

A plan of the required land may be inspected at the Collector's office.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 31st January 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for a distillery in the village of Bankoora-Rampore, pergunnah Bishanpore, thana Bankoora, zillah Bankoora, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 beegahs and 4 gandas of standard measurement, bounded on the North by Dasu Bauri's house and a piece of waste land; East by Jagat Baishnabi's garden; South by waste *debattar* land of "Raghu Nath Jieu"; and West by the tank called "Duber Band," is required within the aforesaid village of Bankoora-Rampore.

A plan of the required land may be inspected at the Collector's office.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 162A.

The 30th January 1890.—The following gentlemen are appointed to be Honorary Magistrates of the Bench at Khoorda, in the district of Pooree, and are vested with the powers of a Magistrate of the third class:—

Chowdhury Aziz Mohamed. | Pandit Jogobandhu Mohapater.
Baboo Khrustna Mohan Patnaik.

The Lieutenant-Governor accepts the resignation tendered by Ray Bhagbut Mohanti Bahadur of his appointment as an Honorary Magistrate of the Bench at Khoorda, in the district of Pooree.

Baboo Kherod Chundra Roy is appointed to be an Honorary Magistrate of the Independent Bench at the head-quarters of the Madaripore sub-division of the district of Furreedpore, and is vested with the powers of a Magistrate of the third class.

The 31st January 1890.—Baboo Hemango Chandra Bose, Subordinate Judge, Hooghly, is allowed leave for six months, under article 369 of the Civil Service Regulations, with effect from the afternoon of the 14th December 1889.

Baboo Jodu Nath Das, Subordinate Judge of Patna, is allowed leave for one month and twelve days, under article 306(*b*) of the Civil Service Regulations, with effect from the date on which he availed himself of it.

The 1st February 1890.—Mr. Taheiruddin Ahmed, substantive *pro tempore* Munsif of Arrareah, in the district of Purneah, is appointed to be a substantive *pro tempore* Additional Munsif in the district of Dacca, to be ordinarily stationed at the Sudder station.

Baboo Nibarun Chandra Banerjee, Additional Munsif of Dacca, is appointed to be a Munsif in the district of Purneah, to be ordinarily stationed at Arrareah.

Baboo Sri Hari Lahiri, B.L., is appointed to act, until further orders, as a Munsif in the district of Purneah, to be ordinarily stationed at Arrareah, *vice* Baboo Nibarun Chandra Banerjee.

Baboo Ashutosh Chatterjee is appointed to be an Honorary Magistrate of the Kooshtea Bench, in the district of Nuddea, and is vested with the powers of a Magistrate of the third class.

The Lieutenant-Governor accepts the resignation tendered by Baboo Upendra Chundra Roy of his appointment as an Honorary Magistrate of the Narail Bench, in the district of Jessore.

Baboo Mohendro Nath Banerjee is appointed to be an Honorary Magistrate of the Municipal Bench at Kotrung, in the district of Hooghly, and is vested with the powers of a Magistrate of the third class.

Baboo Bungshidhur Sen is appointed to be an Honorary Magistrate of the Narail Bench, in the district of Jessore, and is vested with the powers of a Magistrate of the third class.

The 4th February 1890.—Baboo Rajendra Lal Ghosh, B.L., is appointed to act as a Munsif in the district of Gya, to be ordinarily stationed at the Sudder station of that district, during the absence, on leave, of Shah Latafut Hossein, or until further orders.

Baboo Bepin Behary Mookerjee, Deputy Magistrate and Deputy Collector, Bhagulpore, is vested with powers under sections 110, 133, 143, 144, 174, 186, 191 and 524 of the Code of Criminal Procedure.

Baboo Bepin Behary Bose is appointed to be an Honorary Magistrate of the Independent Bench at Jessore, and is vested with the powers of a Magistrate of the third class.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Moulvie Sarfraz Hossein Khan and Moulvie Mohamad Quaim, Honorary Magistrates of the Jhowgunge Bench, Patna, to take down evidence in criminal cases in the English language.

GRANT OF LEAVE TO MUNSIFS.—*The 31st January* 1890.—Shah Latafut Hossein, Munsif of Gya, is allowed leave for two months, under article 369 of the Civil Service Regulations, with effect from the date on which he may be relieved.

The 1st February 1890.—Baboo Gobind Deb Mukerjee, Munsif of Sudharam, in the district of Noakholly, is allowed leave for six months, under articles 266 and 369 of the Civil Service Regulations, with effect from the 25th January 1890.

Baboo Hari Narain Roy, Munsif of Sibgunge, in the district of Rajshahye, is allowed leave for one year, under article 371 of the Civil Service Regulations, with effect from the date on which he may be relieved.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 1st February 1890.—The following revised rule is substituted for Rule XV of the Rules made by the Lieutenant-Governor under the power vested in him by section 4 of Act III (B.C.) of 1879 (entitled "an Act to provide for the periodical inspection of Steam-boilers and Prime-movers attached thereto in the Town and Suburbs of Calcutta and in Howrah"), and since extended by notifications to places in the districts of Hooghly, Howrah, and the 24-Pergunnahs, within a radius of 30 miles from Calcutta, to the sub-divisions of Raneegunge, Giridhi, and Gobindpore, and the district of the Sonthal Pergunnahs :—

XV. The Inspector shall give one week's notice of every such intended thorough examination ; and if after that notice the boilers are not empty, cool, clean, and ready for inspection on the date named, the Inspector shall prohibit the boilers from working, and shall report the case to the Commissioners. Further, if any request be made to remove fittings or settings, and such be not complied with, the Inspector shall in like manner stop the working of the boilers.

Provided that the inspection of boilers in the Raneegunge, Giridhi, and Gobindpore sub-divisions, and in the district of the Sonthal Pergunnahs, shall be made during the months of November to May inclusive, and the Inspector shall give 14 days' notice of the day when he will make such inspection.

If any boiler needs inspection in the Raneegunge, Giridhi, and Gobindpore sub-divisions, and in the district of the Sonthal Pergunnahs, during the months of June to October inclusive, either as being a new boiler requiring a certificate, or as being a boiler which the owner for any other reason wishes to have inspected, it may, on the application of the owner, manager, or agent, be inspected during that period.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 21st January 1890.—Under section 2 of Act II (B.C) of 1867 (an Act to provide for the punishment of public gambling and the keeping of common gaming houses), the Lieutenant-Governor is pleased to authorize the extension, from the 1st February 1890, of the provisions of the said Act to the villages of Saidpore and Kuja Saidpore (commonly known as the town and bazar of Saidpore), within the jurisdiction of the police-station of Nilphamari and the district of Rungpore. The boundaries of the tract within which the said Act shall be in force are as follows:—

North—A straight line drawn from the Saidpore Rifle Range to Pénduram Bairagi's house.

South—A straight line drawn from the east of Baboopara to the village road east of Nanku Havildar's para.

East—A straight line drawn from Penduram Bairagi's house to the east of Baboopara.

West—A straight line drawn from the village road east of Nanku Havildar's para to the Saidpore Rifle Range.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 22nd January 1890.—It is hereby notified that the Lieutenant-Governor authorises the extension of the provisions of section 34 of Act V of 1861 to the town comprising the places known as Makundprosad, Jagarsing and Gurujang, in the district of Pooree, within the boundaries noted below, with effect from the 1st April 1890—

Bounded on the north by Tangiapara, Nuagan, Kumbharbast and Kunjiama; on the south by Sanpala, Khorda, and Jaganathpur; on the east by Bartola and Kholadwar; on the west by Sardhapur.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

[Third Publication.]

NOTIFICATION.

The 18th January 1890.—Under section 2 of Act II (B.C.) of 1867 (an Act to provide for the punishment of public gambling and the keeping of common gaming-houses), the Lieutenant-Governor authorizes the extension, from the 1st February 1890, of the provisions of sections 11 to 14 of the said Act to the town of Rampore Hât (including Brahamanigram, Kalisanra, and Khalasiparah), in the district of Beerbhoom.

2. For the purposes of the above Act, the boundaries of the place shall be as follows:—

North—East Indian Railway Rifle Butts.
South—Sanghatta khal.
East—Khair tank.
West—Village Suialla.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

DECLARATION.

The 4th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a police outpost in the village of Khaprail Bazar, pergunnah Midnapore, zillah Midnapore, it is hereby declared that for the above purpose a piece of land measuring, more or less, 7 cottahs and 8 chittaks of standard measurement, bounded on the east by the house of Issur Panday, on the north and west by public roads, and on the south by Ram Moyra and Baburam Garari's house, is required within the aforesaid village of Khaprail Bazar.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

IRRIGATION.

The 4th February 1890.

No. 31.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a chowkidar's shed on the Lathan Distributary at the 7th mile 30th chain, it is hereby declared that for the above purpose a piece of land measuring about 243 feet in length and 140 feet in width, and containing an area of 3 roods and 5 poles, more or less,

situate in mouzah Katarea, pergunnah Pero, bounded on the north by lands belonging to Ramdeyal Rai and Ramtahal Rai; on the east by lands belonging to Ramdeyal Rai; on the south by lands belonging to Loochal Churihor; and on the west by the Lathan Distributary, is required in the district of Shahabad.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Govt. of Bengal, P. W. Dept.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 5th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Mr. E. Stewart, Sub-divisional Officer, to be the Chairman of the Madhubani Municipality in the district of Durbungah, *vice* Mr. W. Maude, C.S., transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 6th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Mr. C. A. White, Executive Engineer, to be a Commissioner of the Sewan Municipality in the district of Sarun, *vice* Mr. A. G. Tytler, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—It is hereby notified that the members of the Rampore Hât Local Board, in the district of Beerbhoom, having at a meeting, under section 25 of Act III (B.C.) of 1885, requested the Lieutenant-Governor to appoint a Chairman, the Lieutenant-Governor is pleased, under the said section, to appoint Mr. C. J. Stevenson Moore, C.S., the Sub-divisional Officer of Rampore Hât, to be Chairman of that Local Board.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—Whereas a notification, dated the 28th September 1889, was published at page 217, Part IB of the *Calcutta Gazette* of the 2nd October 1889, declaring the Lieutenant-Governor's intention to sanction, under section 86 of the Bengal Municipal Act III (B.C) of 1884, the levy by the Commissioners of the Motihari Municipality, in the district of Chumparun, of a fee, under section 143, on the registration, under section 142, of all carts kept or habitually used within the Municipality, and whereas no good reasons have been shown to the contrary, it is notified for general information that the Lieutenant-Governor hereby sanctions the levy, by the Commissioners of the Motihari Municipality, of the fee on the registration of carts at the rates not exceeding those mentioned in section 143.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—Whereas a notification, dated the 17th November 1889, was published at page 248, Part IB of the *Calcutta Gazette* of the 20th idem, declaring the intention of the Lieutenant-Governor to extend the provisions of Part IX of Act III (B.C.) of 1884 to the Dinagepore Municipality, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Dinagepore Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of Part IX of the Municipal Act to the said Municipality.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—It is hereby notified that, under section 7, Act III (B.C.) of 1885, the following gentlemen have been elected to be members of the District Board of Beerbhoom :—

The Revd. A. McKenna.
Baboo Chandragati Mustafi.
„ Bunwari Lal Sen.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—It is hereby notified that the Lieutenant-Governor is pleased to approve the election by the members of the Soory Local Board, in the district of Beerbhoom, under section 25 of Act III (B.C.) of 1885, of Baboo Madan Gopal Singh to be their Chairman.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 7th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Kedar Krishna Banerjea to be the Chairman of the Jhaldah Municipality, in the district of Manbhoom, *vice* Baboo Kedarnath Mittra, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 8th February 1890.—It is hereby notified that, under section 24 of the Bengal Local Self-Government Act III (B. C.) of 1885, the Lieutenant-Governor is pleased to re-appoint the Magistrate of Midnapore to be the Chairman of the Midnapore District Board, with effect from the 27th January 1890.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 11th February 1890.—It is hereby notified for general information that, under section 138 of the Bengal Local Self-Government Act III (B.C.) of 1885, the Lieutenant-Governor is pleased to alter Rule 81, Part IV of the rules made under clauses (*b*), (*c*), (*d*), (*e*), (*f*), (*h*), (*j*), (*q*), (*s*) and (*t*) of the said section. The rule, as now amended, is as follows :—

"81. The latest day for the submission of the statement of the requirements and probable expenditure of the District Board for the ensuing financial year shall be the 15th of November."

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 6th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., widening the bye-lane from premises Nos. 98 to 104, Upper Chitpore Road, it is hereby declared that for the above purpose pieces of land, Nos. 99 and 104, Upper Chitpore Road in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 3 chittacks and 24 square feet only, are required.

The boundaries of the lands are as follow :—

Portion marked A on plan.—On the North and West a public bye-lane; on the South portion of premises No. 99, Upper Chitpore Road; and on the East premises No. 100, Upper Chitpore Road.

Portion marked B on plan.—On the North and East portion of premises No. 104, Upper Chitpore Road; on the South a public bye-lane; and on the West Upper Chitpore Road.

Plans and specifications of the land are filed in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 6th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz, for widening the filled up drain connecting Williams' Lane with Old Bytakhana Bazar Road, it is hereby declared that for the above purpose pieces of land, Nos. 19 and 20 Scott's Lane, and No. 1, Williams' Lane in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 2 cottahs 12 chittacks and 22 square feet only, are required.

The boundaries of the lands are as follow :—

Portion marked A on plan.—On the North portion of No. 20, Scott's Lane; on the South a public filled up drain; on the East Old Bytakhana Bazar Road; and on the West a passage.

Portion marked B on plan.—On the North portions of No. 1, Williams' Lane and No. 19, Scott's Lane; on the South a public filled up drain; on the East portion of No. 19, Scott's Lane; and on the West Williams' Lane.

A plan and specifications of the lands are filed in the office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 7th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Dacca Municipality for a public purpose, viz., for the improvement of the trench for the suction pipe for the use of the water works in the town of Dacca, station Lalbag, zillah Dacca, it is hereby declared that for the above purpose pieces of lands measuring, more or less, 12 cottahs and 8 dhoors of standard measurement, are required. The pieces of lands are bounded as follows :—

Plot No. I.—On the North by the main road; on the South by the foreshore of the river Boorigunga; on the East by the trench of the suction pipe; and on the West by the land of Baboo Manick Chand Saha and of Rahimuddi Meah.

Plot No. II.—On the North by the main road and the land of Basanta Lall and Hemanta Lall Dobe; on the South by the foreshore of the river; on the East by the land of Basanta Lall and Hemanta Lall Dobe; and on the West by the trench of the suction pipe.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 7th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a new road from Banerjee's Lane to Amherst Street, it is hereby declared that for the above purpose pieces of land Nos. 172, Bowbazar Street, 14-1, 5, 48-2, 53 and 54, Choonapooker Lane, 4, Nitaie Baboo's Lane, and 150, Amherst Street, in the town of Calcutta, district 24-Pergunnahs, measuring, more or less, 9 cottahs 1 chittack and 36 square feet only, are required.

The boundaries of the lands are as follows—

Portion marked A on plan.—On the North partly premises No. 53, Choonapooker Lane and partly Choonapooker Lane; on the South partly Choonapooker Lane and partly premises No. 55, Choonapooker Lane, portion of premises No. 54, Choonapooker Lane and portion of premises No. 172, Bowbazar Street; on the East Choonapooker Lane; and on the West partly portion of premises No. 54, Choonapooker Lane and partly Banerjee's Lane.

Portion marked B on plan.—On the North portion of premises No. 48-2, Choonapooker Lane; and on the South, East, and West Choonapooker Lane.

Portion marked C on plan.—On the North and East portion of premises No. 15, Choonapooker Lane; and on the South and West Choonapooker Lane.

Portion marked D on plan.—On the North and East public filled up drains; on the South No. 14-1, Choonapooker Lane; and on the West Choonapooker Lane.

Portion marked E on plan.—On the North portions of premises Nos. 5 and 4, Nitaie Baboo's Lane; on the East Nitaie Baboo's Lane; and on the West a public filled up drain.

Portion marked F on plan—On the North and South premises No. 150, Amherst Street; on the East Amherst Street; and on the West Nitaie Baboo's Lane.

A plan and estimates of the land to be required are in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 7th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for the construction of a dhobikhana, it is hereby declared that for the above purpose a piece of land No. 3, Woolfutbagan Road, Dihi Punchannogram, district 24-Pergunnahs, measuring, more or less, 5 bigahs and 14 cottahs only, are required.

The boundaries of the land are as follows :—

On the North a passage; on the South portion of No. 3, Woolfutbagan Road; on the East partly a public latrine and partly No. 283, Lower Circular Road; and on the West Woolfutbagan Road.

A plan and estimates of the land to be acquired are in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 8th February 1890.—Mr. L. P. Shirres, Joint-Magistrate, is appointed to be Vice-Chairman of the District Road Committee of Lohardugga, *vice* Mr. G. W. Place, transferred.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 12, 1890.

PART II.

Advertisements.

[N. B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Dacca Collectorate, the 8th February 1890.

L. HARE, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned estate, situate in the district of Maldah, will be put up to sale at the Maldah Collectorate on 26th March 1890, corresponding with 14th Chaitra 1296 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force ; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid at once.

4*th*—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

LETTERS of Administration (with copy Will annexed) of the property and credits of Edward James Jones, late of Calcutta, Deputy Superintendent of the Geological Survey of India, deceased, have been granted by the High Court, Calcutta, to G. W. F. Buckland, Esq., of No. 1, Esplanade, West, Calcutta, as the Attorney of the Executor named in the Will of the deceased. All persons having claims against the deceased are requested to submit same to the Administrator before the 31st day of March next, after which date no claims will be admitted.

J. A. APCAR, Attorney.

Calcutta, 17th January 1890. (3461-3)

NOTICE is hereby given that Mary Stephen, who obtained a decree *nisi* on the 23rd January 1890 in the High Court for dissolution of marriage against her husband S. S. Stephen, has revoked and cancelled the power-of-attorney which she executed in his favour, and that the said S. S. Stephen has no authority to act as her attorney in any matter whatsoever. Any payment of money therefore to the said S. S. Stephen on account of the said Mary Stephen will not be recognised.

GONESH CHUNDER CHUNDER, Attorney for Mary Stephen.

Calcutta, the 27th January 1890. (3494-3)

Notice.

IN continuation of notice, dated the 9th October 1889 published at page 1656, Part II of the *Calcutta Gazette* of 30th October 1889, regarding the Barque *Grosvener*, it is further notified that the said vessel, with all her masts, sails, gear, and appurtenances which may be on board her on the 19th day of April 1890, will be sold by auction to the highest bidder on Saturday, the 19th of April 1890.

The sale will be held at the Port Office, Chittagong, and will commence at 3 P.M.

Terms 25 per cent on fall of the hammer if desired by Receiver of Wrecks: the balance within a week of sale and before taking delivery. If the purchaser fails to pay the balance within seven days from date of sale, the vessel will be re-sold at his risk and expense. The vessel can be inspected at Chittagong by application to the Receiver of Wrecks.

E. GOOD, Receiver of Wrecks.

(3498—4)

In the Court of Baboo Ram Gopal Chaki, Roy Bahadur, Subordinate Judge of Backergunge.

EXECUTION CASE No. 14 OF 1890

Kashi Mani Chaudhurani, decree-holder, *versus* Mozaheruddin Mohammed Chaudhuri and others, judgment-debtors.

TO be sold the right, title, and interests of the undermentioned mortgaged property at 12 A. M. on the 19th day of February 1890 by the District Judge's Nazir, in the sale-house of the District Judge of Backergunge—

Schedule of Property.

7*a* 17½*g.* 1*kt.* and 12*bits* share of taluq Mohomed Shafi Chaudhuri, entered in the Backergunge Collectorate towji in No. 1628, pergunnah Bazoorgannadpur, and situated in Joár Ramna Bamna within station Mathá'iá and sub-registry Bhandúrá. The annual sudder jumma of the above share is Rs. 9·597 10*a.* 9*p.* 15*kt.* and 4 *dimish*, belonging to judgment-debtors Hurannessa Khatun and Manatajuddin Mohomed Chaudhuri by virtue of hebanamah and contract.

R. G. CHAKI, Sub-Judge.

(3518-1)

Stolen.

THE Government Promissory Note No. 220972 of the 4 per cent of 1865 for Rs. 500, originally standing in the name of Modhu Sudhir Kowar, and last endorsed to Kedar Nath Majumdar, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest and for issue of duplicates in favour of the proprietor after two years from date of last advertisement.

KEDAR NATH MAJUMDAR, Cooch Behar.

(3497-3)

Lost.

THE lower halves of the Government Promissory Notes Nos 236782 and 236783 of the 4 per cent. loan of 1865 for Rs. 500 each, originally standing in the name of the Bank of Bengal, and last endorsed to General Dumber Shum Shere Jung Bahadur Rana, the proprietor by whom it was never endorsed to any other person, having been lost, notice is hereby given that payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, Calcutta, and that application is about to be made for the issue of a duplicate in favour of the proprietor. The public are cautioned against purchasing or otherwise dealing with the abovementioned securities.

RAKHAL CHUNDRA CHATTERJEE, Secretary to the Representative of the Government of Nepal.

78, Dhurumtola Street, the 6th February 1890.

(3520-3)

Currency Notes.

THE following Currency Note of the Calcutta Circle is stated to have been destroyed, and payment of its value has been claimed by the person whose name is placed against the number; any other person claiming a right to it is warned to communicate at once with the undersigned:—

Note wholly lost or destroyed.

HS of 1890	U/56 9·840	100	Bhagwandas Khatri, Kooncha Sanjagi Ram, Lahore Gate, Delhi.

H. KEENE, Assistant Comptroller-General, in charge Paper Currency.

Paper Currency Department, 11th February 1890.

Notification.

TO be peremptorily sold pursuant to a decree and order of the Calcutta High Court, Original Civil Jurisdiction, made in suit No 285 of 1886 (wherein Nobokristo Seal is plaintiff and Rojooni Loll Bysack *alias* Rajendro Loll Bysack is defendant), and dated, respectively, the 5th of August 1886 and the 13th of July 1888, by the Registrar of the said Court in his sale-room in the Court-house, on Saturday, the 15th of March next, at the hour of 12 o'clock noon, the following properties.

Lot No. 1.—All that undivided half part or share of and in the upper-roomed brick-built messuage, tenement or dwelling-house, together with the piece or parcel of rent-free land or ground thereunto belonging, and on part whereof the same is erected and built, containing by estimation eight cottahs, be the same a little more or less, situate, lying, and being No. 29, Churruckdangah Street, Sootanooty, in the town of Calcutta, and bounded on the north by Churruckdangah Street, and on the east, west, and south by the garden belonging to the estate of the late Prosono Coomar Tagore.

Lot No. 2.—All that undivided half part or share of and in the garden and piece or parcel of land No 99, Manicktollah Road, in zillah 24-Pergunnahs, sub-district Sealdah, thana Manicktollah, being holding No 381 in Grand Division 2, Sub-division 11, Dehi Punchanmogram, containing by estimation thirteen bighas, more or less, and in respect of which the yearly rent of Rs. 27-4 is payable to the Collector of 24-Pergunnahs, and bounded on the north by the garden belonging to Benudbehary Shaw, on the south by the Manicktollah Street, on the east by the tenanted land belonging to the estate of the late Sreekristo Mullick, and on the west by the garden belonging to Gungapersaud Gangooly.

The abstract of title and the conditions of sale may be seen at the Office of the undersigned, or at the Office of Baboo Sitanauth Doss, Attorney for the plaintiff, on any day before the sale, and will be produced at the sale.

R. BELCHAMBERS, Registrar.

Calcutta, High Court, Original Side, the 24th day of January 1890. (3526-1)

Notification.

TO be peremptorily sold by the Registrar of the High Court of Judicature at Fort William in Bengal, in its Ordinary Original Civil Jurisdiction, on Saturday, the 15th day of February 1890, at the hour of 12 o'clock at noon, pursuant to a decree dated the 25th of March 1887, and the orders dated, respectively, the 18th February 1888 and the 14th of January 1889, of the said Court, made in suit No 417 of 1885 (wherein Kumar Nilkrishna Deb and another are the plaintiffs and Sreemutty Unnopoorna Dabee is the defendant), the following property belonging to the said defendant Sreemutty Unnopoorna Dabee:—

All that brick-built messuage, tenement or dwelling-house, together with the piece or parcel of land thereunto belonging, and on part of which the same is erected and built, containing by estimation 6 cottahs, be the same a little more or less, situate at and being No. 32, Nimtollah Ghat Street, formerly No. 46, Nimtollah Ghat Street, in the town of Calcutta, and bounded on the north partly by the land of Gudadhur Gangooly and partly by Nimtollah Ghat Street; on the south by the land of Kally Bysack; on the east by a narrow lane leading out to Nimtollah Street which separates these premises from the house of Nilmony Banerjee; and on the west by the Government drain.

The abstract of title and conditions of sale may be seen at the Office of the Registrar, High Court, Original Jurisdiction, and at the Office of Messrs. Swinhoe and Chunder, Attorneys for the plaintiffs, any day before the sale and will be produced at the sale.

R. BELCHAMBERS, Registrar.

Swinhoe and Chunder, plaintiffs' Attorneys.

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observation taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal, Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,
Offg. Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 17th March 1886.

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal.
The 24th November 1886.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage. Rs. A. P.	With postage. Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ...	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.

	For town. Rs. A. P.	For mufasil. Rs. A. P.
For the Calcutta Series per copy ...	0 8 9	0 10 3
„ each of the Madras, Bombay and Allahabad Series per copy	0 5 3	0 5 9
„ the Calcutta Series. For the year ...	7 2 6	8 6 3
„ each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Reports should apply to—

Superintendent, Government Press, Madras
The Government Central Book Depôt, Bombay.
„ Curator of Government Books, North-Western Provinces and Oudh.
„ Superintendent of Government Printing, Bengal.

Orders and subscriptions for* 1889 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

INDIAN LAW REPORTS.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance—

	One page.	Half page.	Quarter page.
For one issue ...	Rs. 20	Rs. 14	Rs. 9

Trial of Civil Suits. In Urdu. 4*a.* (1*a.*)

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

*** *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 6 (6*a*.) each. General Index to Volumes I to XXIII. Rs. 6 (6*a*.)

ANNUAL AWARD OF A MEDAL TO THE MOZUFFERPORE ZILLAH SCHOOL.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 5th February, 1890.

RESOLUTION.

READ—

A letter from the Commissioner of Patna, No. 180G, dated the 22nd March, 1889.

Read also—

A letter from the Director of Public Instruction, No. 2023, dated the 5th April, 1889.

IN commemoration of the visit of the Lieutenant-Governor to Sursund in the district of Mozufferpore, Mussamut Dulhin Golab Kuer and her son-in-law, Babu Damodar Deb Narain Singh, have paid into the Mozufferpore Treasury the sum of Rs. 900 for investment in Government securities as an endowment for the annual award of a medal, to be designated the "Bayley Medal," to the student of the Mozufferpore Zillah School obtaining the highest marks in Sanskrit at the University Entrance Examination of each year. The Lieutenant-Governor is pleased to accept the donation, and tenders his thanks to the donors for their liberality. The Magistrate of Mozufferpore will be the administrator of the fund.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Commissioner of Patna for information and for communication to the donors, and to the Director of Public Instruction for information.

Ordered also, that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

INCIDENCE OF TOLLS IN THE CIRCULAR AND EASTERN CANALS.

PUBLIC WORKS DEPARTMENT, BENGAL,--IRRIGATION.

RESOLUTION.

No. 238 *I.A.*

Dated Calcutta, the 11th February 1890.

READ—

(1) Memorial from the Bengal National Chamber of Commerce, dated 17th November 1887.
(2) Letter No. 2455T., from Agent, Bengal Central Railway, dated 24th November 1887.
(3) Bengal Government Notifications Nos. 349-350, dated 17th September 1889.
(4) Letter from Manager, Eastern Bengal Railway, No. 821, dated 19th October 1889.
(5) Bengal Government Notification No. 382, dated 21st October 1889.
(6) Letter from Secretary, Young Men's Association, Senhati, dated 6th November 1889.
(7) Letter from Messrs. Hoare, Miller and Company, No. 904, dated 10th December 1889.
(8) Bengal Government Notification No. 455, dated 17th December 1889.

In regard to the complaints which have been made against the tolls charged on boats using the channels included in the "Circular Canal Route," the Lieutenant-Governor has arrived at the conclusion that it is advisable to enquire into the system of measurements and incidence of tolls charged under the rules and notifications now in force.

2. *It is resolved* therefore to appoint, for the above purpose, a Commission consisting of—

Major McArthur, R.E. ... ... *President.*
Mr. W. C. Boyce, District Traffic Superintendent, Eastern Bengal Railway ... ... } *Members.*
Baboo Sitanath Roy, Honorary Secretary, Bengal National Chamber of Commerce ... ... } *Members.*

3. The enquiry will embrace the following points—

1. Present system of boat measurement, and whether it can be improved in the direction of (*a*) greater accuracy of gross tonnage or (*b*) ascertaining net tonnage.
2. The incidence of existing rates on the goods carried in the Canals; whether the rates should be revised; and whether differential rates should be introduced or not.
3. The boundaries within which the tolls are levied.
4. The practicability of levying tolls on the basis of "challans" of the merchants or others whose goods are carried.

ORDER.—Ordered that copies of this Resolution be sent to the President and members named to serve on the Commission for information and guidance, and to the Revenue, Appointment and Financial Departments of this Government, the Board of Revenue, the Commissioner of the Presidency Division, and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal,
P. W. Dept.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 163A.

GENERAL.—*The 4th February* 1890.—Mr. J. B. Worgan, District and Sessions Judge, Cuttack, is appointed to act as District and Sessions Judge of Dinagepore, during the absence, on deputation, of Mr. J. G. Charles, or until further orders.

Mr. F. J. G. Campbell is appointed to act as District and Sessions Judge of Cuttack, during the absence, on deputation, of Mr. J. B. Worgan, or until further orders, with effect from the date on which he joined the appointment.

Mr. A. H. Collins is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the Sudder station of the district of Dinagepore, on being relieved of his present appointment as Officiating District and Sessions Judge of that district.

The 5th February 1890.—The Lieutenant-Governor is pleased, under paragraph 16, Special India Army Circular, dated the 16th March 1889, to promote Captain Joseph Binning, Presidency Volunteer Reserve Battalion, to the rank of Major.

Baboo Komul Narain Chuckerbutty, Sub-Deputy Collector, Tipperah, is transferred to the Sudder station of the Chittagong Hill Tracts district.

Mr. H. Lee, Officiating Magistrate and Collector, Midnapore, is allowed leave for nine days, under article 291 of the Civil Service Regulations in extension of the leave granted to him under the order of the 7th January 1890.

The 6th February 1890.—Mr. W. F. Meres, C.S., has been granted by Her Majesty's Secretary of State for India an extension of furlough for twelve months.

The 7th February 1890.—The services of Captain C. J. Keene of the Eastern Bengal State Railway Volunteer Rifle Corps are placed at the disposal of the Government of the Punjab.

Mr. J. B. Worgan, District and Sessions Judge, is allowed leave for twelve days, under article 108 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 31st January 1890.

The 11th February 1890.—Baboo Okhoy Coomar Bose, Deputy Magistrate and Deputy Collector, on leave, is posted to the Sudder station of the district of Noakholly.

The Licutenant-Governor is pleased to accept the resignation tendered by Lieutenant H. Stuart of his appointment as Quartermaster, Behar Light Horse.

Lieutenant H. C. Spry is appointed to be Honorary Quartermaster of the Behar Light Horse, with effect from the 2nd January 1890, *vice* Lieutenant H. Stuart, resigned.

Commander E. W. Petley, Calcutta Naval Volunteers, is, with the sanction of His Excellency the Governor-General in Council, appointed Honorary Aide-de-Camp on the staff of His Honour the Lieutenant-Governor of Bengal.

Mr. C. P. Caspersz, Officiating Magistrate and Collector, Chittagong, is allowed furlough for ten months, under article 340 of the Civil Service Regulations, with effect from the 21st March 1890, or such date as he may be relieved.

POLICE.—*The 10th February* 1890.—Mr. R. F. G. Faussett, Officiating Assistant Superintendent of Police, is allowed leave for one year, under article 369 of the Civil Service Regulations, with effect from the 12th December 1889.

Mr. C. E. Briscoe, Officiating Assistant Superintendent of Police, Midnapore, is allowed leave for ten days, under article 273 (*a*) of the Civil Service Regulations, with effect from the date on which he availed himself of it.

ECCLESIASTICAL.—*The 10th February* 1890.—The Revd. W. S. Mitchell, Baptist Missionary, Gya, is hereby licensed, under section 6 of Act XV of 1872, to solemnize marriages between persons one or both of whom is a Christian or are Christians.

The Revd. W. S. Mitchell is also appointed to be a Registrar of Births and Deaths under Act VI of 1886.

The 11th February 1890.—The Revd. F. W. Brown, Minister of the American Baptist Mission, Balasore, is hereby licensed, under sections 6 and 9 of Act XV of 1872, to solemnize marriages between persons one or both of whom is a Christian or are Christians, and to grant certificates of marriages between persons who are Native Christians.

The Revd. F. W. Brown is also appointed to be a Registrar of Births and Deaths under Act VI of 1886.

EDUCATION.—*The 8th February* 1890.—Mr. E. F. Mondy, Officiating Principal, Dacca College, is appointed to act, until further orders, in class III of the Bengal Educational Service, with effect from the 29th December 1889, *vice* Mr. A. C. Edwards, on privilege leave.

The 11th February 1890.—Baboo Syama Churn Ganguli, Principal, Utterpara College, is appointed to act in class II of the Subordinate Educational Service, with effect from the 18th November 1889, *vice* Baboo Mathura Nath Chatterjee, on leave.

Mrs. Stansbury, Head Mistress, Eden Female School, Dacca, is appointed to act in class III of the Subordinate Educational Service, with effect from the 18th November 1889, *vice* Baboo Syama Churn Ganguli, on deputation.

Baboo Upendra Nath Maitra, Lecturer, Dacca College, is appointed to act in class IV of the Subordinate Educational Service, with effect from the 18th November 1889, *vice* Mrs. Stansbury, on deputation.

Dr. A. F. R. Hoernle, Principal, Madrassa College, Calcutta, is allowed furlough for eight months, under article 340 of the Civil Service Regulations, with effect from the 1st July 1890, or such subsequent date as he may avail himself of it.

MEDICAL.—*The 11th February* 1890.—Surgeon-Major A. Tomes, Officiating Civil Surgeon, Howrah, is allowed leave for two months, under article 291 of the Civil Service Regulations, with effect from the date on which he may be relieved.

The following notification is republished from the *Assam Gazette*:—

No. 652G.—The 31st January 1890.—Consequent on the recall to duty from privilege leave, for the period from the 1st to the 5th of September 1889, of Mr. J. Kennedy, C.S., the officiating promotions of Messrs. J. D. Anderson, C.S., A. Porteous, C.S., and H. Le Mesurier, C.S., announced in notification No. 351 of the 25th of October 1889, published in the *Assam Gazette* of the 2nd of November 1889, will have effect from the 20th, instead of the 15th of September 1889.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 165A.

GENERAL.—*The 13th February* 1890.—Baboo Soshi Sikar Dutt, Deputy Magistrate and Deputy Collector, Kandi, Moorshedabad, is allowed leave for two months, under section 370 of the Civil Service Regulations, with effect from the date on which he availed himself of it.

Mr. C. Johnston, Assistant Magistrate and Collector, Moorshedabad, is appointed temporarily to have charge of the Kandi sub-division of that district, during the absence, on leave, of Baboo Soshi Sikar Dutt, or until further orders.

The 15th February 1890.—Mr. C. A. Wilkins, District and Sessions Judge, Bhagulpore, on leave, is appointed to act, until further orders, in the first grade of District and Sessions Judges, with effect from the 18th instant, *vice* Mr. J. R. Hallett.

Mr. C. S. Bayley, Joint-Magistrate and Deputy Collector, is promoted substantively *pro tempore* to the first grade of Joint-Magistrates and Deputy Collectors, with effect from the 28th January 1890, *vice* Mr. F. A. Slack, on deputation, but will continue to be seconded.

Mr. E. B. Harris, Joint-Magistrate and Deputy Collector, Mozufferpore, is promoted substantively *pro tempore* to the first grade of Joint-Magistrates and Deputy Collectors, with effect from the 28th January 1890, *vice* Mr. C. S. Bayley, on deputation.

Mr. W. R. Bright, Assistant Magistrate and Collector, on furlough, is appointed substantively *pro tempore* to be a Joint-Magistrate and Deputy Collector of the second grade, with effect from the 28th January 1890, *vice* Mr. E. B. Harris.

The 18th February 1890.—Mr. T. D. Beighton, District and Sessions Judge, Dacca, is allowed furlough for seven months, under article 340 of the Civil Service Regulations, with effect from the 21st March 1890, or such subsequent date as he may avail himself of it.

Mr. A. E. Staley, Joint-Magistrate and Deputy Collector, is posted temporarily to the Sudder station of the district of the 24-Pergunnahs.

Mr. Staley is appointed to act as District and Sessions Judge of Dacca, during the absence, on furlough, of Mr. T. D. Beighton, or until further orders.

The following officers are appointed provisionally under Statute 33 Vic., Cap. 3, to be Assistant Magistrates and Collectors:—

Rai Nund Kissore Das, Bahadoor, Assistant Superintendent, Tributary Mehals, Cuttack.

Mr. Taheiruddin Ahmed, Barrister-at-Law, Officiating Additional Munsif of Dacca.

Rai Nund Kissore Das, Bahadoor, will continue to act in his present appointment of Assistant Superintendent of the Tributary Mehals, Cuttack, until further orders.

Mr. W. Maude, Officiating Joint-Magistrate and Deputy Collector, Tajpore, Durbhunga, is posted temporarily to the Chota Nagpore Division.

Mr. S. L. Maddox, Assistant Magistrate and Collector, Patna, is appointed temporarily to have charge of the Tajpore sub-division of the Durbhunga district, with effect from the forenoon of the 14th instant.

Mr. J. Windsor, Assistant Magistrate and Collector, Chumparun, is vested with the powers of a Collector under Act X of 1870 in the Bettiah sub-division of that district.

POLICE.—*The 13th February* 1890.—Mr. W. F. S. Allen, Officiating Assistant Superintendent of Police, Hazaribagh, is transferred to the district of Lohardugga, with effect from the date on which he joined his appointment.

The 14th February 1890.—Mr. R. L. Ward, Assistant Superintendent of Police, in charge of the district police of Bogra, is transferred to Pubna, and appointed to have charge of the district police of that district until further orders.

Baboo Jadub Chunder Deb, Assistant Superintendent of Police, 24-Pergunnahs, is transferred to Bogra, and appointed to have charge of the district police of that district until further orders.

Inspector Jiunat Hossein Khan is promoted from the third to the second grade of Inspectors, with effect from the 19th December 1889, *vice* Mr. R. H. Conran, retired.

The 18th February 1890.—In modification of the order dated the 21st January 1890, Mr. C. E. Gouldsbury, District Superintendent of Police, Purneah, is transferred to Julpigoree.

The following reversions of Police Officers are sanctioned:—

With effect from the 23rd January 1890, consequent on the return from leave of Colonel W. L. N. Knyvett, Deputy Inspector-General—

Mr A. H. Giles, Officiating Deputy Inspector-General, to the first grade of District Superintendents.

Mr. W. H. Cornish, Officiating first grade District Superintendent, to the second grade.

Mr. J. B. Goad, Officiating second grade District Superintendent, to the third grade.

Mr. H. Munro, Officiating third grade District Superintendent, to the fourth grade.

Mr. G. B. Havelock, Officiating fourth grade District Superintendent, to the fifth grade.

Mr. F. H. Tucker, Officiating fifth grade District Superintendent, to the first grade of Assistant Superintendents.

Mr. C. C. Plowden, Officiating first grade Assistant Superintendent, to the second grade.

With effect from the 25th January 1890, consequent on the return from leave of Mr. F. Wilcox, second grade District Superintendent—

Mr. A. E. C. Bolst, Officiating second grade District Superintendent, to the third grade.

Mr C. A. Fisher, Officiating third grade, to the fourth grade.

Mr. I. H. W. D. Clark, Officiating fourth grade District Superintendent, and with him Mr. R. F. Guise, Officiating fourth grade District Superintendent, to the fifth grade.

Mr. A. S. Judge, Officiating fifth grade District Superintendent, to the first grade of Assistant Superintendents.

Mr. A. Shuttleworth, Officiating first grade Assistant Superintendent, to the second grade.

JAILS.—*The 18th February* 1890.—Mr. H. M. Owen, Assistant Superintendent of the Bhagulpore Central Jail, is allowed leave for six months, under article 370 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

REGISTRATION.—*The 15th February* 1890.—Baboo Hari Prasanna Gupta, acting Rural Sub-Registrar of Bhatiyari, in the district of Chittagong, is confirmed in that appointment.

EDUCATION.—*The 18th February* 1890.—Mr. N. L. Hallward, M A., is appointed to be a member of the Bengal Educational Service and is posted as Professor in the Dacca College.

The 17th February 1890.—Assistant Surgeon Tamizuddin Ahmed, of the Bengal Provincial establishment, is transferred to the Imperial establishment.

The following notification is republished from the *Assam Gazette*:—

No. 293*R.*—*The 5th February* 1890.—Under the provisions of section 127 of the Assam Land and Revenue Regulation, 1886, the Chief Commissioner invests Mr. H. LeMesurier, Assistant Commissioner, Cachar, with the power to attach and sell moveable property under section 69 of the Regulation.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT.—(FORESTS.)

NOTIFICATION.

The 4th February, 1890.—Whereas by the notifications severally specified below, the undermentioned forests, situated in the Darjeeling district, were declared to be Reserved forests under the sections of the Indian Forest Act (VII of 1878) recorded against each of them, and whereas the Lieutenant-Governor is not satisfied as to the manner in which enquiries regarding rights in the said forests have been recorded, he is pleased to appoint the Deputy Commissioner of Darjeeling to be the Forest Settlement Officer, who will, under the provisions of Chapter II of that Act, determine the boundaries to be finally laid down, and enquire into and determine the existence, nature, and extent of any rights alleged to exist in favor of any person in, or over, any land comprised within the boundaries specified below, or in, or over, any forest produce to be found therein in cases where claims to such rights are preferred by any individual or community under section 6 of the said Act; and will also himself ascertain, as far as possible, and enquire into the existence of any rights mentioned in sections 4 or 5 of the said Act, within the said boundaries, which are not claimed under section 6, so far as the same may be ascertainable from the records of Government and the evidence of any persons likely to be acquainted with the same; and will otherwise perform the duties of a Forest Settlement Officer under that Chapter.

The Lieutenant-Governor is further pleased, under section 16 of the Indian Forest Act, to appoint the Commissioner of the Rajshahye Division to hear appeals from the decisions of the Forest Settlement Officer as above appointed.

(1) GOOMPAHAR FOREST.

(Includes lands described in notifications under the Indian Forest Act:—Section 34, dated the 23rd January, 1879, as Goompahar forest, exclusive of area mentioned in notification dated the 24th November, 1884 under section 26; section 19, dated the 19th July, 1880, as Pograinbong forest, and section 19, dated the 16th December, 1888 as Goom forest)

Description of boundaries.

North.—The source of the Little Rangit river, (Nepal frontier pillar No. 21 at Mani Bhanjan), down that river till it meets the boundary of the Permaigiri khas land; then a demarcated line eastwards along the southern boundaries of the following lands:—Permaigiri khas land, Mim Tea Estate, Tumsong khas land, Lingia Tea Estate, Khail Tea Estate, Christina Tea Estate, Rishihat khas land, Burbattia khas land to the Kuhil Jhora; then the Kuhil Jhora to the Hill Cart Road.

East.—The Hill Cart Road; then a demarcated line passing round Batasidhara village to the north-west boundary point of the Goom Tea Company's location; along the boundary of that location to the Goompahar ridge; across that ridge to the old (Upper) Goompahar Cart road; along that road to the head of a small jhora tributary to the Bing jhora; and down the small jhora to the south boundary.

South.—A demarcated line separating the forest from the following lands:—Tungsong and Pubong Tea Estates, Palongdong and Pagraingbong khas lands to the Nagri ridge at the head of the Kundongbong jhora; the Silimbong and Chamang Tea Estates, and the lands leased to Atchay Lall Moodi to the Nepal frontier.

West.—The Nepal frontier to the starting point.

(2) SENCHAL FOREST.

(Includes the Senchal, Rangirun, Pachim, Sonada and Rungbul blocks of the Rangnu Tukdah and Senchal forest, notified under section 34 in the notification of the 23rd January, 1879, and the Dooteria forest, notified under section 34 in the notification of same date.)

Description of boundaries.

North-West—From the boundary post on the Bing jhora, up that jhora to the saddle at Jor-bungalow, skirting and excluding the bazar and Raja of Burdwan's land; then down the Rangnu river to its junction with the Senchal jhora.

North-East—Up the Senchal jhora to the Pashok road; then along the Pashok road to the Sureil turning; then up the ridge to Tiger Hill and on to Senchal G. T. S.; then down the main Senchal ridge to the head of the Rishap (or Sureil) spur at the source of the Runum jhora; down that jhora to the old Military road.

South—The old Military road to the Pachim jhora; then a demarcated line to the old cart road trace; then along that trace to its junction with the Darjeeling-Himalayan Railway near the Rungmuk jhora; then the Darjeeling-Himalayan Railway (excluding road location) to the Dooteria spur at the top of Dooteria path; then the north boundary of the Dooteria Tea Estate to the starting point.

Note.—The Kinchintongdhara north and south blocks, which were declared to be Reserved forest in the notification, dated the 30th March, 1886, under section 19 of the Act, also form part of the Senchal forest.

(3) TUKDAH FOREST.

(Includes the Rangirun, Dawaipani, Tukdah, Hoom, Poomong, Runjo (part), Tiger hill, Rangbi and Rishap (part) blocks of the Rangirun, Tukdah and Senchal forest, notified under section 34 in the notification of the 23rd January, 1879, and parts of the additions made to that forest by the notifications under section 19, dated the 25th March, 1881 [parts of the Runjo and Rishap blocks.)]

Description of boundaries.

North—From the point on the Senchal jhora at the south of the land leased to Mr. Wilson, along the eastern boundary of the land so leased to the Rangnu river; the Rangnu river to its junction with the Kejok jhora; then along boundaries of the Charlesfield, mineral springs and Tukdah Tea Estates, and the Tukdah and Lopchu khas lands.

East—A demarcated line separating the forest from the Mangwa, Linding and Hoom khas lands; then from the Rangli Rangliot Tea Estate, and from the Poomong Government land to the Rangjo river; then a continuation of the line up to the Sureil road; then, along that road to a point about a mile from the Sureil bungalow; then a line due south to the top of the Rishap spur.

South—Along the crest of the Rishap spur to the head of the Runum jhora.

West—From the Runum jhora to the Senchal jhora, along the eastern boundary of the Senchal forest.

(4) MAHALDERAM FOREST.

(Includes the Sepoydhura and Chattakpur blocks of the Rangirun, Tukdah and Senchal forest as notified in the notification under section 34, dated the 23rd January, 1879, and part of the additions to the same made by the notifications under section 19, dated the 25th March, 1881, [now known as the Suriel and Mamrim blocks.)]

Description of boundaries.

North—Senchal and Tukdah forests.

East—A demarcated line running due south from a point on the Rishap ridge to the Sureil-Kurseong road; then that road to a point a short distance south of the Reaing river; then a straight demarcated line across the Mamrim valley to a survey point (stone post No. 66) on the Mahalderam-Sitong spur.

South—The Mahalderam-Sitong ridge to the old Military road; then southwards along that road to the north demarcated boundary of the Raja of Burdwan's land; then along that demarcated boundary to the Darjeeling-Himalayan Railway.

West—The Darjeeling-Himalayan Railway to the Runum jhora, excluding locations along the Hill Cart Road.

(5) RANGIT FOREST.

(Includes lands described in notification, dated the 23rd January, 1879, under section 34, as the Badamtam and Seem forests, and the Sumbong and Pashok blocks of the Sumbong, Pashok and Giljong forests.)

Description of boundaries—Badamtam block.

North—The Rangnit and Great Rangit rivers.

East—The Rangnu river.

South—The Rangnu river and the Badamtam Tea Estate.

West—The Badamtam Tea Estate.

Seem block.

North—A demarcated line from the Pusongpung spur to the Sumbong spur.

East and South-east—A demarcated line along the Sumbong spur meeting the boundary of the Sumbong block.

South-West and West—A demarcated line along the Pusongpung spur.

The Sumbong and Pashok blocks.

North—The Great Rangit river.

East—The Teesta river.

South—The Rangiak jhora; then a demarcated line along the boundary of the Pashok Tea Estate; then the Rungbong jhora; then a demarcated line along the boundary of the Lopchu Tea Estate to the Sumbong spur, on which it meets the boundary of the Seem block.

West—A demarcated line following the boundaries of the Glenburn and Sumbong Tea Estate to the Great Rangit river.

(6) MANGWA FOREST.

(Part of the land included in the notification, dated the 23rd January, 1879, under section 34, as the Sumbong, Pashok and Giljong forest.)

Description of boundaries.

North—The Rangiak jhora.

East—The Teesta river.

South—The Rangnu river.

West—A demarcated line along the boundary of the Linding and Mangwa Government waste lands.

(7) REAING FOREST.

(Part of the land included in the notification, dated the 23rd January, 1879, under section 34, as the Sumbong, Pashok and Giljong forest, known as the Rangnu and Reaing blocks, and the Berrik block, forming part of the land so notified as the Sukna-Teesta forest.)

Description of boundaries.

North—The Rangnu river.

East—The Teesta river.

South—The foot-path from the Teesta valley to Mongpu, from the Teesta river to the Reaing river.

West—The Reaing and Rangjo rivers; then a demarcated line forming also the boundary of the lands in the occupation of the Teesta Valley Tea Company.

(8) SITONG AND SIBHOK HILLS FOREST.

(Part of the land included in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, and known as the Kundong (part), Sitikhola, Numbong, Sitong, Andera, Ruyem, Chawa, Gola and Upper Ghoramara blocks, and an addition to the Kundong block of that forest, notified under section 19 in the notification dated 30th April 1881.)

Description of boundaries.

North—The foot-path from Mongpu to the Teesta Valley, from the Reaing river to the Teesta river.

East—The Teesta river.

South—The Sibhok or Chawa river; then the spur or ridge drained on the north by that river to the Latpunjor spur; then up that spur to Latpanchor, and along the ridge to Sitong.

West—A demarcated line forming the boundary of the land in occupation of the Government Cinchona Department; then the Reaing river.

(9) RILLI FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Nazzeokh and Tunang forests, and part of the Teesta-Cnel forest, notified under section 19 in notification, dated the 17th June, 1881, now known as the Gooling and Ponbu blocks.)

Description of boundaries.

North and West—The Rilli river and the Teesta river.

East—A demarcated line along the ridge from the junction of the Rere Oong with the Rilli river to Tunang; then along a ridge from Tunang to the junction of the Nuboong and Rey Oong rivers; then along the watershed between the Seth and Siok jhoras; then along the watershed between the Door and Siok jhoras to the trigonometrical station at Nazzeokh; then along the watershed between the Gooling and Runeyoth jhoras to the Runeyoth jhora, and southward across that jhora to the ridge forming the watershed between the Runeyoth and Peen jhoras, and along that watershed to Ramtik; then along a spur to the junction of the Ramtik and Pursum jhoras.

South—The Pursum jhora.

(10).—KALIMPONG FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Rinkinpung and Kalimpong forests.)

Description of boundaries.

North.—The Teesta river.

East.—The Tor Chu; then a demarcated line running nearly parallel to the Teesta river at a distance from about half to one mile to the head of the Seerjam Chu; then following a ridge to Rinkinpung trigonometrical station and another spur running in an easterly direction to the Rilli river; then the Rilli river to its junction with the Rere Oong.

South.—The Rilli river.

West.—The Teesta river.

(11).—DUMSONG FOREST.

(Includes the land described in the notification, dated the 23rd January, 1879, under section 34, as the Dumsong forest)

Description of boundaries.

North.—The Rungpo Chu.

East.—A demarcated line on a ridge from the Rungpo Chu passing by Kabu and Pedong hill to the road at Dochung; then along the road from Dochung towards Kalimpong.

South.—A demarcated line running from the Dochung-Kalimpong road to the watershed between the Teesta and Rilli rivers, meeting that watershed about three quarters of a mile south-west of Echa; then generally running first in a northerly and then in a westerly direction to the Tor Chu.

West.—The Tor Chu and the Teesta river.

(12).—RISSOOM FOREST.

(Includes the lands described in the notification dated the 23rd January, 1879, under section 34, notified as the Payong and Mayrong forests, and part [Rissoom and Khempung blocks] of the Khempung forest).

Description of boundaries.

North.—The Dumsong forest; then a demarcated line from the boundary of the Dumsong forest running from the old Pedong-Kalimpong road to the Pakathaw Monastery.

East and South.—A demarcated line along the watershed of the Mayrong Chu and Rushett Chu to a point near Ladam; then the same watershed for about one mile to the head of the Singkánim Chu; then the ridge at the head of the Rilli river to the Labah ridge

South.—The watershed between the Rilli river and the Jeet Chu and Chumung Chu to the head of the Hool Chu.

West.—Down the ridge east of the Hool Chu to the Rilli river; then the Rilli river to its junction with the Singkanim Chu; then a demarcated line to the starting point.

(13).—LOOLAGAON FOREST.

(Includes the lands described in the notification dated the 23rd January, 1879, under section 34, as the Loolagaon forest and part [the Siehoor block] of the Khempung forest, also part [the Pemling, Bokhim, and Chumung blocks] of the Jeet and Chee Chu forest, which was declared to be a Reserved forest under section 19 by the notification of the 28th August, 1882.)

Description of boundaries.

North.—The Rilli river; then the Khempung block of the Rissoom forest to Nunkfoo trigonometrical station.

East and South.—Down the ridge southwards from the Nunkfoo trigonometrical station to a demarcated line continuing westwards from the south-west point of the boundary of the Labah block, Pankasari Reserved forest round the heads of the valleys of the Chumung Chu, Mahaka Chu, Purmagree jhora, and other streams running into the Ghees Nadi, and of the Turoo Oopg, to a point on the watershed of the Rilli river on one side and the Jeet and Lessoo rivers on the other side.

West.—A demarcated line passing west of Rieun trigonometrical station to the Rere Oong, then to the Rungno Chu, and then northwards to the Rilli river, which forms part of the north boundary.

(14).—DHOBIJHORA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Dhobijhora forest, and the addition to the same gazetted under section 19 in the notification dated the 8th November, 1883)

Description of boundaries.

North.—The Old Kurseong-Darjeeling Military road.

East.—A demarcated line separating the forest from Juman Sing's lands.

South.—A demarcated line separating the forest from the land known as Giddapahar.

West.—A demarcated line to the Old Kurseong-Darjeeling Military road, separating the forest from land of the Castleton Tea Estate; then the Old Kurseong-Darjeeling Military road, excluding the land demarcated out as the Dow Hill Government school location.

(15).—SIBA KHOLA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sibakhola forest.)

Description of boundaries.

North-East.—The Sibakhola river.

South.—A demarcated line separating the forest from the lands of the Gayabari Tea Estate and of the Maharajah of Burdwan known as Kurjung.

West.—The Hill Cart Road.

(16).—MANJUA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Manjua forest [excluding the land described in the notification under section 26 by the notification dated the 18th February, 1882], and the addition to that forest which was declared under section 19 in the notification dated the 10th August, 1883.)

Description of boundaries.

North.—A demarcated line separating the forest from the remainder of the land known as Pinglu Tar.

East.—The Balasan river.

South.—A demarcated line from the junction of the Kalijhora and the Balasan river, separating the forest from the lands in the occupation of the new Fallodhi Tea Estate.

West.—A demarcated line separating the forest from the lands in the occupation of the Singbulli and Murmah Tea Estates.

(17).—KOOHEIN FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Koohein forest.)

Description of boundaries.

North.—A demarcated line from the Mechi river to the south-east corner of the Rangdo Estate, separating the forest from the lands of that estate.

East.—A demarcated line separating the forest from the lands of the Phugurhi Tea Estate.

South.—The Kuhein jhora.

West.—The Mechi river (Nepal frontier).

(18).—MANJHA FOREST.

(Includes the lands describedin the notification, dated the 23rd January, 1879, under section 34, as the Khyrbani and Lohaguree forests; also the lands described in that notification as the Manjha forest with the modifications in the Manjha forest made by the following notifications:—Additions under section 19, by notifications dated 10th August 1883 [9 acres] and dated 26th May, 1886, [1·75 acres]; exclusions under section 26, by notifications dated 18th February, 1882, [34 acres]; 6th June, 1885, [1·75, acres]; 29th December, 1885, [3 acres], and 12th March, 1887, [1·75 acres].

Description of boundaries.

North.—A demarcated line separating the forest from the lands in the occupation of the Tingling Tea Estate; then to a stream tributary to the Potong jhora; then that stream to its junction with the Potong jhora; then the Potong jhora to where the demarcated line separating the lands in the occupation of the new Fallodhi Tea Estate from the forest takes off from that jhora; then the said demarcated line to the Balasan river.

East.—A demarcated line on the Balasan river.

South.—A demarcated line separating the forest from the Balasan block of the Balasan forest, and from the lands in the occupation of the New Terai Tea Association, Indian Terai Tea Company, and Manjha Tea Estate.

West.—The boundary of the Central and Upper Mechi blocks of the Mechi forest; then demarcated lines separating the forest from the lands in the occupation of the Mechi and Lohagarhi Tea Estates to the Mechi river; then the Mechi river.

(19).—MECHI FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Mechi forests [two areas] and a detached area [the Surjbur forest]; also the additions to the Mechi forest made by the notifications under section 19, dated the 12th August, 1880, of the areas named Nipania and Gurabadi).

Description of boundaries.

North.—A demarcated line starting from the Mechi river forming part of the west boundary of the lands in the occupation of the Mechi Tea Estate.

East.—The Lohagurhi block of the Manjha forest; then a demarcated line separating the forest from the lands in the occupation of the Manjha, Morapur and Nipania Tea Estates.

South.—A demarcated line following the boundaries of adjoining jote lands to the Mechi river (Nepal frontier).

West.—The Mechi river (Nepal frontier).

Surjbur block.

North, East and South.—A demarcated line following the boundaries of adjoining jote lands.

West.—The Mechi river (Nepal frontier).

(20).—BALASAN FOREST.

(Includes part of the lands described in the notification dated the 23rd January, 1879, under section 34, as the Balasan and Dulkajhar forest, [the areas now known as the Balasan and Tarabari blocks].

Description of boundaries.

North.—A demarcated line across the Balasan river from Panighatta to the New Terai Tea Company's godown.

East.—A demarcated line separating the forest from lands leased for tea cultivation and from jote lands.

South.—A demarcated line across the New and Old Balasan rivers to the right bank of the latter.

West.—A demarcated line following approximately the right bank of the Balasan river, and forming also the boundary of the Tirihana block of the Pantapari forest; M and M Terai Tea Estate and New Terai Tea Association lands.

(21).—DALKAJHAR FOREST.

(Includes part of the lands described in the notification dated 23rd January 1879, under section 34, as the Balasan and Dalkajhar forest [viz., the areas now known as the Khadma, Taipu, Dalka (part), Central, Lalfa Bagdogra (part), Harlia, Dauhara (part), Bengdubi (part), and Rishabari (part) blocks]; also the additions to that forest made by the notifications under section 19, dated 12th August 1880, of the following lands:—Rishabari, Major Wardroper's and Kanoo Chowdry's jotes [forming parts of the areas now known as the Rishabari, Bagdogra and Bengdubi blocks]; Multa forest [forming the present Multa block and part of the Dalka block]; and the portions of the Bengdubi forest [forming parts of the present Dauhara and Bengdubi blocks].)

Description of boundaries.

North.—A demarcated line from the Rakti Nadi forming the boundaries of Jabra Khadma, Ord-Terai and Tirihana Tea Estates; then by the Tirihana block of the Pantapari forest.

East.—The Pantapari and Boiranti blocks of the Pantapari forest; then the Harlia Nadi.

South.—A demarcated line to the Taipu Nadi; then the Taipu Nadi to its junction with the Kaldor Nadi on the boundary between Sanesi Than and Kishtapur Tea Estates; then the Kaldor Nadi; then a demarcated line to the junction of the Lalfa with the Multa Nadi.

West.—The Multa Nadi; then a demarcated line excluding Jhakuadhura jote and across the Multa Nadi to the Rakti Nadi; then the Rakti Nadi.

Note.—From the area included in the above boundaries, the following jotes are excluded by demarcation:—

(1). Shamlal; (2). Tepua Chamaru; (3). Ragho.

(22).—PANTAPARI FOREST.

(Includes part of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Balasan and Dalkajhar forest [the portion now known as the Tirihana block]; also part of the lands described in the notification of 12th August 1880 under section 19, as the Bengdubi forest [the portions now known as the Pantapari, Latua Boiranti and Barobhita blocks].)

Description of boundaries.

North.—The Tarabari block of the Balasan forest.

East.—The left bank of the Old Balasan river.

South.—A demarcated line from the left bank of the Old Balasan river to the Harlia Nadi, separating the forest from jote lands.

West.—The Bengdubi and Dauhara blocks of the Dalkajhar forest; then a demarcated line separating the forest from the Tirihana and M and M Terai Tea Estates.

(23).—BAMONPOKRI FOREST.

(Includes the lands described in the notification dated the 23rd January, 1879, under section 34, as the Bamonpokri forest.)

Description of boundaries.

North.—A demarcated line separating the forest from lands known as Mount Pereira.

East.—The Rakti Nadi.

South.—A demarcated line from the Rakti Nadi to the Rangichung Nadi, separating the forest from lands in the occupation of the Marionbari Tea Estate.

West.—The Rangichung Nadi.

(24).—Rakti FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Rakti Forest.)

Description of boundaries.

North.—The Silligori-Pankabari road.

East and South-East.—The eastern branch of the Rakti river.

West.—The Rangichung and Bissurbatti jhoras; then a demarcated line east to the Rangichung jhora; then that jhora; then another demarcated line east to the junction of the two branches of the Rakti river; then the Rakti river.

(25).—LAMAGUMBA FOREST.

(Includes the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Lamagumba Forest.)

Description of boundaries.

North and East.—A demarcated line from the junction of the Chochi jhora with the Rohoni river separating the forest from the lands in the occupation of the Selim Hill Tea Estate.

South.—A demarcated line separating the forest from the lands in the occupation of the Lamagumba Tea Estate.

West.—The Rohoni river.

Note.—From the area described within the boundaries above given is excluded the location of 6 acres, 2 roods, 3 poles, held by the Selim Tea Company.

(26).—SUKNA FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1897, under section 34, notified as the Sukna-Teesta forest, now known as the Kuklong, Sukna, Rungdung, Kynanuka, Adulpur and Chamta blocks.)

Description of boundaries.

North.—A demarcated line starting from the point of the Gumti on the Hill Cart Road at the head of the Kuklong Nadi along the Hill Cart Road for a short distance, and then across the Rungdung valley to the junction of the Chibla Khola with the Punchanai river, the whole forming the boundary between the forest and the lands in the occupation of the Sepoydhura Tea Estate.

East.—The Panchanai river to the north-east point of the Kynanuka jote boundary; then a demarcated line along the boundaries of that jote round to the Sukna trigonmetrical station on the Hill Cart Road; then the Hill Cart Road to a point near Methibari.

South.—A demarcated line separating the forest from Methibari and Chamta Tea Estates to the Chamta Nadi.

West.—The Chamta Nadi to the Sukna-Adulpur road; then a demarcated line to the Kuklong Nadi skirting the village lands of Kynanuka; then the Kuklong Nadi, which separates the forest from the lands in the occupation of the Terai Tea Company, Terai Tea Association, and Selim Hill Tea Estate.

(27) —MAHANADI FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, now known as the Pundig, Mahanadi, Mohurgong, Hatisurra and Panchanai blocks.)

Description of boundaries.

North.—A demarcated line from the Panchanai river to the Mahanadi river, separating the forest from the lands in the occupation of the Narbong Tea Estate.

East.—The Mahanadi river to the Sukna-Teesta road crossing.

South.—A demarcated line along that road to the Panchanai river.

West.—The Panchanai river.

(28).—CHAMPASARI FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, now known as the Gulma, Singimari, Upper Champasari and Lower Champasari blocks.)

Description of boundaries.

North.—The Sukna-Sibhok forest road from the Mahanadi river to the Gulma river.

East.—The Gulma river to the Sukna-Teesta road crossing at Champasari.

South.—A demarcated line along the Sukna-Teesta road to the Mahanadi river.

West.—The Mahanadi river.

(29).—CHOKLONG AND LATPANCHOR FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest now known as the Lower Ghoramara, Gulma valley, Choklong, Jogijhora, Kuhi, Bandarjhola, Mana (part) and Latpanchor blocks; also the lands gazetted under section 19, in the notification, dated the 12th August, 1880, as the Manering forest, now forming part of the Mana block.)

Description of boundaries.

North.—A demarcated line along the Mamrim ridge from the north-east point on the boundary of the Mahalderam Tea Estate to Sitong Hill.

East.—The Mimbong and Sitong blocks of the Sitong forest, and the Upper Ghoramara and Chawa blocks of the Sibhok Hill forest; then the boundary between Darjeeling Hills and Terai pergunnahs to the Sukna-Sibhok forest road.

South.—The Sukna-Sibhok forest road, from the Ghoramara Nadi to the Mahanadi river.

West.—The Mahanadi river and Manajhora; then a demarcated line forming part of the east boundary of Mahalderam Tea Estate.

(30).—SIBHOK FOREST.

(Includes a portion of the lands described in the notification, dated the 23rd January, 1879, under section 34, as the Sukna-Teesta forest, now known as the Janaikuri, Somardanga, Sibhok North, Sibhok East, Sibhok West, and part of the Shilibhita blocks; also the lands gazetted under section 19, in the notification, dated the 12th August, 1880, as the Shilibhita forest, now forming part of the Shilibhita block.)

Description of boundaries.

North.—The Sibhok or Chawa river.

East.—The Teesta river along the boundary between the Darjeeling and Julpigori districts.

South.—The Janaikuri Nadi; then a demarcated line to the junction of the Jial jhora with the Ghoramara Nadi; then the Ghoramara Nadi to its junction with the Gulma river.

West.—The Gulma river to the Sukna-Sibhok forest road; then the boundary between Darjeeling Hills and Terai pergunnahs to the Sibhok river.

P. NOLAN,
Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT—(OPIUM).

NOTIFICATION.

The 17th February, 1890.—It is hereby notified that at the examination for admission into the Opium Department held simultaneously at Calcutta and Allahabad in January, 1890, in pursuance of the notification dated the 5th October, 1889, the following candidates passed and obtained the highest aggregate of marks :—

(1) Mr. Albert Datta.
(2) „ Alfred Burt.
(3) „ A. H. Biss.
(4) „ J. E. Powell.

These gentlemen will be appointed to fill vacancies in the Opium Department as they occur, according to the order in which their names appear. The last named will, however, be appointed after the native gentleman to be selected by the Lieutenant-Governor has been appointed, as stated in paragraph 7 of the above-quoted notification.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 17th February 1890.—The Lieutenant-Governor directs, under section 101 of the Bengal Tenancy Act VIII of 1885, that a survey shall be made and a record of rights prepared in respect of all lands included in the boundaries of the following estate in the district of Nuddea :—

Name of estate.	Situation in pergunnah.
841, Chur Goalgram.	Shahanjial.

The particulars to be recorded in the survey and record of rights shall be the following :—

1. The name of each tenant.
2. The class to which he belongs : that is to say, whether he is a tenure-holder, ryot holding at fixed rates, occupancy ryot, non-occupancy ryot or under-ryot; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
3. The situation, quantity and boundaries of the land held by him.
4. The name of his landlord.
5. The rent payable.
6. The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.
7. If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.
8. The special conditions and incidents, if any, of the tenancy.

P. NOLAN,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 17th February 1890.—With reference to the Government notification dated the 17th February 1890, published in the *Calcutta Gazette* of the 19th February 1890, the Sub-divisional Officer of Kushtea is hereby appointed under rule 1, Chapter VI of the rules made by Government under the Bengal Tenancy Act, to be the Settlement Officer of Estate Goalgram, No. 841, in the district of Nuddea.

P. NOLAN,
Secretary to the Govt. of Bengal.

DECLARATION.

The 17th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the Sherpur Town Post Office in the village of Sherpur, pergunnah Sherpur, zillah Mymensingh, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigah 13 cottahs and 4 chittacks of standard measurement, bounded on the north by a ditch and unoccupied homestead land of Har Kumar Chaudhri; on the south by a drain and a road belonging to Krisna Chandra Patranavis; on the west by a Municipal tank and the school compound; and on the east by a drain and a road belonging to Krisna Chandra Patranavis, is required within the aforesaid village of Sherpur.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

P. NOLAN,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 166A.

The 12th February 1890.—Baboo Satkari Haldar, B.L., is appointed to act as a Munsif in the district of the 24-Pergunnahs, to be ordinarily stationed at the Sudder station of that district, during the absence, on leave, of Baboo Revati Churn Banerjee, or until further orders.

The 15th February 1890.—Baboo Amar Chunder Mukerjee, Munsif of Palamow, in the district of Lohardugga, is vested with the powers of a Magistrate of the second class.

The orders of the 22nd and the 25th January 1890, published in the *Calcutta Gazette* of the 29th idem, granting Baboo Gopi Krishna Banerjee, Munsif of Bagirhat, in the district of Jessore, leave on medical certificate for two months, and appointing Baboo Satkari Haldar, B.L., to act as Munsif of Bagirhat, are cancelled.

Baboo Ananta Ram Ghose, Munsif of Gya, is appointed to act as Subordinate Judge of Dinagepore, during the absence, on leave, of Baboo Hara Gobind Mukerjee, or until further orders.

Baboo Ananta Ram Ghose is vested with the powers of a Munsif, and with those of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 100 within the local limits of the Sudder Munsifi of Dinagepore.

Baboo Gopal Chunder Mukerjee, B.L., is appointed to act as a Munsif in the district of Gya, to be ordinarily stationed at the Sudder station, during the absence, on deputation, of Baboo Ananta Ram Ghose, or until further orders.

Baboo Shanta Nath Bhattacharjea is appointed to be an Honorary Magistrate of the Independent Bench at Nattore, in the district of Rajshahye, and is vested with the powers of a Magistrate of the third class.

Moulvie Obedullah is appointed to be an Honorary Magistrate of the Perozepore Bench, in the district of Backergunge, and is vested with the powers of a Magistrate of the third class.

The Lieutenant-Governor accepts the resignation tendered by Sayed Habibar Rahman of his appointment as an Honorary Magistrate of the Perozepore Bench, in the district of Backergunge.

Baboo Prosonno Chundra Chackravarti is appointed to be an Honorary Magistrate of the Gaibanda Bench, in the district of Rungpore, and is vested with the powers of a Magistrate of the third class.

Baboo Tulsi Dass Mukerjee, Sub-divisional Magistrate, Nilphamari, in the district of Rungpore, is vested, under section 407 of the Code of Criminal Procedure, with powers to hear appeals from convictions by Subordinate Magistrates of the second and third classes.

The 17th February 1890.—Baboo Monmohun Chakravarti, Temporary Deputy Magistrate and Deputy Collector, Pooree, is vested with the powers of a Magistrate of the first class.

The 18th February 1890.—Baboo Tara Prosonno Das, B.L., is appointed to act as a Munsif in the district of Midnapore, to be ordinarily stationed at the Sudder station, during the absence, on leave, of Baboo Kanti Chandra Bhaduri, or until further orders.

Baboo Jogesh Chunder Mookerjee, Officiating Sub-Deputy Collector, Madhubani, Durbhunga, is vested with the powers of a Magistrate of the third class.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Moulvie Karam Hossein, Officiating Deputy Magistrate, Durbhunga, to take down evidence in criminal cases in the English language.

Baboo Amrita Lal Pal, Subordinate Judge of Gya, is allowed leave for two days under article 306(*b*) of the Civil Service Regulations, in extension of the leave granted to him under the order of the 4th April 1889.

GRANT OF LEAVE TO MUNSIFS.—*The 14th February* 1890.—Baboo Kanti Chandra Bhaduri, Munsif of Midnapore, is allowed leave for two months, under article 306 (*b*) of the Civil Service Regulations, with effect from the 1st February 1890.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION

The 18th February 1890.—It is hereby notified that under the provisions of section 641 of the Code of Civil Procedure (Act XIV of 1882), the Lieutenant-Governor exempts Maharajah Girija Nath Roy of Dinagepore from personal attendance in Civil Courts.

JOHN EDGAR,
Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT, BENGAL.

IRRIGATION.

The 17th February 1890.

No 43.—*Notification.*—With reference to Bengal Government Resolution, No. 238*I.A.*, dated the 11th February 1890, appointing a Commission to enquire into certain matters relating to the "Circular and Eastern Canals," and to notification No. 350, dated the 17th September 1889, imposing certain tolls at Khoolna on boats using that route, *it is hereby notified* that the last quoted notification above is cancelled. Final orders on the points under enquiry, which include "the boundaries within which tolls are levied," will be issued subsequently.

No 44.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for constructing a retired line of embankment in the village of Sreenagore, taruf Bansra, pergunnah Medunmull, zillah 24-Pergunnahs, it is hereby declared that for the above purpose a piece of land 2,140 feet long, 132 feet broad, measuring, more or less, 19 bighas 12 cottahs and 5 chittacks of standard measurement, bounded on the north and south by the Government embankment, and east and west by the paddy lands of Baboos Radha Mohun Banerjee and Tarruck Nath Banerjee, is required within the aforesaid village of Sreenagore.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

No. 45.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for constructing a retired embankment in the village of Jehanabad, taraf Bonomallypore, pergunnah Medunmull, zillah 24-Pergunnahs, it is hereby declared that for the above purpose a piece of land 820 feet long, 135 feet broad, measuring, more or less, 7 bighas 13 cottahs and 12 chittacks of standard measurement, bounded on the north and south by the lands of Baboos Bussonto Kumar Roy Choudry and others of Baripore, and east and west by the Government embankment, is required within the aforesaid village of Jehanabad.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

A. CROFT, *Director of Public Instruction.*

NOTIFICATION.

IN accordance with the Government of Bengal Notification of the 23rd July 1887, notice is hereby given that the next half-yearly examination of compounders will be held at 11 A.M. on Wednesday, the 2nd April 1890, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce one of the following certificates—

(*a*). From the Superintendent of a Vernacular Medical School that he has attended regularly for one year the compounder class of the school.

(*b*). From the legally qualified Medical Manager of a Chemists' and Druggists' establishment, recognised by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment.

(*c*). From a Civil Surgeon, that he has assisted in the dispensing of drugs at the Sudder dispensary of a Civil station for a period of five years.

3. Applicants must register their names and submit their certificates, together with a fee of Rs 3, at least one week before the 2nd April 1890, at the office of the undersigned

NOTE.—The students belonging to the compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the school entrance fee.

4. Should any candidate fail to pass the required examination he will forfeit his fee.

N. B—The attention of candidates is drawn to Rules in section (*b*) of the Government notification of the 23rd July 1887, or paragraph 2 (*b*) of this notification, from which they will observe that the Chemists' and Druggists' establishments, from the legally qualified Medical Managers of which they obtain their certificates, will have to be recognised by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

S. COULL MACKENZIE, M.D.,
Supdt., Campbell Medical School.

CAMPBELL MEDICAL SCHOOL, CALCUTTA, *the 12th February* 1890.

NOTIFICATION.

The 18th February 1890.—It is hereby notified for general information that, in t exercise of the power vested in the Local Government by section 4 of Act XX of 1887, t Lieutenant-Governor has been pleased to declare that the provisions of section 3 of the A with respect to wild birds shall apply, so far as regards the rules framed for the cantonme of Dum-Dum, to deer and hares.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Benga

NOTIFICATION.

The 18th February 1890.—The following rules framed by the Military authorities of the Dum-Dum Cantonment under section 3 of Act XX of 1887, for the protection of wild birds and game within the limits of the Cantonment, are hereby confirmed by the Lieutenant-Governor under clause (4) of the said section of the Act, and are published for general information under clause (5) of section 6 of the General Clauses Act I of 1887 :—

Rules.

1. "Wild bird," for the purpose of these rules, shall include jungle fowl, peafowl, pheasants, partridges, quail, snipe, plover, wild duck, teal and ortolans.

2. The Local Government having, by notification of this date, declared that the provisions of section 3, Act XX of 1887, shall apply to hares and deer, the following rules will apply to those animals also as well as to wild birds.

3. The "breeding season" for the purposes of these rules shall extend from the 15th March to the 15th August.

4. Whoever, during the breeding season, has in his possession in the Cantonment of Dum-Dum any wild bird, deer or hare recently killed, or exposes for sale any such bird or animal living or dead, shall be liable to a fine not exceeding Rs. 5 for each bird or animal.

5. Whoever, during the breeding season, imports into the Cantonment the plumage of any kind of wild bird recently killed or taken, or the fur or skin of any hare or deer recently killed or taken, shall be liable to a fine not exceeding Rs. 5 for each bird or animal.

6. In the case of a second conviction, the fine may extend to Rs. 10 for each bird or animal.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 18th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Ghatal Municipality for a public purpose, viz., for erecting houses for the municipal mehters as well as for the construction of a road to those houses, in the village of Konenagore, pergunnah Barda, district Midnapur, it is hereby declared that for the above purpose 3 plots of land, measuring 5 cottahs and 13 chattacks of standard measurement, are required. The lands are bounded as follows :—

1st Plot.—Measuring 4 cottahs and 13 chattacks, is bounded on the North and East by the lakheraj land of Rama Nath Roy; on the South by the embankment of Choudhury's tank ; and on the West by the Choudhury's tank.

2nd Plot.—Measuring 10 chattacks, is bounded on the North by the lakheraj land of Rama Nath Roy ; on the South by paddy land; East by a public drain ; and the West by the lakheraj land of Rama Nath Roy.

3rd Plot.—Measuring 6 chattacks, is bounded on the North and East by the public drain ; on the West by lakheraj land of Rama Nath Roy ; and on the South by the paddy land.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 17th February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., widening Beny Madhub Nandan Brothers' 1st Lane, it is hereby declared that for the above purpose pieces of land Nos. 52, 51, 50, 49, 40, 39 and 4, Beny Madhub Nandan Brothers' 1st Lane, and No. 7, Russa Road North, in Bhowanipore, Dihi Punchannogram, district 24-Pergunnahs, measuring, more or less, 4 cottahs 13 chittacks and 8 square feet only, are required. The boundaries of the lands are as follows :—

Portion marked A on plan.—On the North, portion of No. 7, Russa Road North; on the South, Beny Madhub Nandan Brothers' 1st Lane ; on the East, partly Russa Road North, and partly portion of No. 7, Russa Road North ; and on the West, partly Beny Madhub Nandan Brothers' 1st Lane, and partly portion of No. 7, Russa Road North.

Portion marked B on plan.—On the North and East, Beny Madhub Nandan Brothers' 1st Lane; on the South, portion of No. 52, Beny Madhub Nandan Brothers' 1st Lane ; and on the West, partly portion of No. 52, Beny Madhub Nandan Brothers' 1st Lane, and partly a public drain.

Portion marked C on plan.—On the North and West, Beny Madhub Nandan Brothers' 1st Lane ; on the South, portions of Nos. 50 and 51, Beny Madhub Nandan Brothers' 1st Lane ; and on the East, a public drain.

Portion marked D on plan.—On the North and West, Beny Madhub Nandan Brothers' 1st Lane; and on the South and East, portion of No. 49, Beny Madhub Nandan Brothers' 1st Lane.

Portion marked E on plan.—On the North and East, portion of No. 4, Beny Madhub Nandan Brothers' 1st Lane; and on the South and West, Beny Madhub Nandan Brothers' 1st Lane

Portion marked F on plan.—On the North and East, Beny Madhub Nandan Brothers' 1st Lane ; and on the South and West, partly portion of No. 39, Beny Madhub Nandan Brothers' 1st Lane, and partly portion of No. 40, Beny Madhub Nandan Brothers' 1st Lane.

Plan and specifications of the land are filed in the Office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 15th February 1890.—The following gentlemen are appointed, under section 112 of Act IX (B.C.) of 1880, to be members of the Lohardugga District Road Committee :—

Mr. T. F. Peppe. | Kumar Jogat Mohun Nath Sahi Deo.

Offg. Secy. to the Govt. of Bengal.

The Calcutta Gazette.

WEDNESDAY, FEBRUARY 19, 1890.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Dacca Collectorate, the 8th February 1890.

L. HABB, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned estate, situate in the district of Maldah, will be put up to sale at the Maldah Collectorate on 26th March 1890, corresponding with 14th Chaitra 1296 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid at once.

4*th*—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Government revenue assessed.

In addition to the above, there are 1,464 estates with balances under Rs. 500 each, aggregating Rs. 1,70,199-13-3, the particulars of which may be learnt at this Office. The Official Assignee has received for remuneration for the quarter ending 30th September 1889 Rs. 4,798-3-6.

Notification.

TO be peremptorily sold pursuant to a decree and order of the Calcutta High Court, Original Jurisdiction, made in suit No. 257 of 1888 (wherein Punno Bibee is plaintiff and Denonauth Ghose is defendant), and dated, respectively, the 23rd of August 1888 and the 12th of September 1889, by the Registrar of the said Court, in his sale-room in the Court-house on Saturday, the 29th of March next, at the hour of 12 o'clock at noon, an undivided one equal third part or share of the defendant in the following properties, viz.—

Lot. No. 1.—Nos. 32 and 33, formerly Nos. 74 and 75, College Street in Calcutta, being an upper-roomed brick-built house and the land appertaining thereto, the area of which is about two cottahs, and which property is bounded on the north by Arpooly Lane; on the south by the dwelling-house of Kanoy Loll Seal and brothers; on the east by the tenanted house of Kally Churn Ghose; and on the west by College Street.

Lot. No. 2.—No. 17-1, Jhamapooker in Calcutta, being an upper-roomed brick-built dwelling-house, and the land appertaining thereunto, on part whereof the same is erected, the area of which is about 9½ cottahs, and which property is bounded on the north by the dwelling-house of Madhub Chunder Ghose and his brothers; on the south by a Government drain; on the east partly by the dwelling-house of Khetter Mohun Bose and partly by a Government drain; and on the west partly by a Government drain and partly by the dwelling-house of late Issur Chunder Bonnerjee and partly by the house of Madhub Chunder Ghose and his brothers.

The abstract of title and conditions of sale may be seen at the Registrar's Office in the Court-house, or at the office of Baboo Gonesh Chunder Chunder, the plaintiff's Attorney, at No. 5, Hastings Street in Calcutta, and will be produced at the sale.

R. BELCHAMBERS, Registrar.

Gonesh Chunder Chunder, Plaintiff's Attorney.

High Court, Calcutta, Original Side, the 11th February 1890.

(3513—1)

Notification.

TO be peremptorily sold by the Registrar of the Calcutta High Court, Original Civil Jurisdiction, in his sale-room on the middle floor of the Court-house on Saturday, the 22nd of February next, at the hour of 12 o'clock at noon, pursuant to a decree and orders of the said Court, made in suit No. 113 of 1885 (wherein Maltee Bibee, widow and administratrix of the late Bhogoban Dass, Augurwallah, is the plaintiff, and Russick Laul Chunder and others are the defendants), and dated, respectively, the 10th January 1887 and the 27th of July 1889, the undivided three annas and four gundas share of the defendants in the following property:—

Lot No. 1.—No. 50, Moirahatta Street, in Calcutta, being a brick-built house and premise in block No. 18, holding No. 187, North Division, and a piece of land thereunto belonging, and on part whereof the same is built, the area of which is by estimation 11 chittacks and 1 square foot, be the same, a little more or less, paying the annual jumma of 13 annas eight gundas and three cowries, and butted and bounded as follows:—On the north by the tenanted house of Aukhoy Churn Mullick; on the south by the tenanted house of the late Rajkristo Khan and others; on the east by the public road called Moirahatta Street; and on the west by the tenanted house of Sreemutty Rani Dassee.

The conditions of sale and abstract of title may be seen at the Office of Messrs. Sowton and Sen, Attorneys for the plaintiff, at No. 2, Church Lane, in Calcutta, on any day before the sale, and will be produced at the sale.

R. BELCHAMBERS, Registrar.

Sowton and Sen, Plaintiff's Attorneys.

Calcutta, High Court, Original Jurisdiction, the 12th February 1890.

(3547—1)

In the Court of the Second Sub-Judge, 24-Pergunnahs.

EXECUTION CASE No. 190 OF 1889.

Jagat Chander Roy Chaudhury and others, decree-holders, *versus* Nilratan Mukerjee of Ula, debtor.

TO be peremptorily sold by the Nazir of the District Judge, 24-Pergunnahs, at 12 o'clock, on Monday, the 10th March 1890, the following mortgaged properties of the debtor above named for the realization of Rs. 6,562-9 due to the decree-holders:—

Lot No. 1.—The one-fourth undivided share of the debtor Nilratan Mukerjee, in taraf Birnagur *alias* Ula taluq Rupmanjari Dasy, forming towji No. 379 in the Collectorate of Nuddea, comprised in pergunnah Mamjoany, thana and sub-registration Ranaghat.

Lot No. 2.—In the said district and the said registration, and within the said pergunnah Mamjoany, the sixteen annas share in taluq Tripura Sundary Dasy, taraf Ula *alias* Birnagar, forming taluq No. 3087 in the Collectorate of Nuddea.

Lot No. 3.—The sixteen annas share of the debtor in 9 bighas of land, and the buildings, walls, gardens, &c., on it, in Ula *alias* Birnagar, in pergunnah Mamjoany, thana and sub-registration Ranaghat, district Nuddea, boundaries west and north of road, east of lakhiraj land belonging to Dasarathi Rudra and others, south of the land purchased by debtors in taluq No. 3063

N.B.—These three lots form the property No. 2 of the decree.

Lot No. 4.—(The property No. 3 of the decree.)

The 17 gundas 3 kans 1 kag undivided share of the debtor in 27 mouzahs, taraf Bhabanipur, Siddhi and others, formerly comprising taluq No. 49 in the Collectorate of Nuddea, at present No. 5073 in the Collectorate of Jessore, thana and sub-registration being Bongong.

RADHA KRISHNA SEN, Sub-Judge.

(3556—1)

In the Court of the Subordinate Judge of Beerbhoom.

EXECUTION CASE No. 1 OF 1890.

Gopal Chandra Chakrabarti and another, decree-holders *versus* Sheikh Iashin, minor, represented by his next friend, maternal uncle Sheikh Abdool Goffar, and another, judgment-debtors.

THE undermentioned property of the above judgment-debtors will be sold by public auction on the 1st day of April 1890 at 12 o'clock noon by the Nazir of the District Judge's Court, Beerbhoom, in the sale-room of the Court-house:—

Schedule of property to be sold.

1. The right, title, and interest of the judgment-debtors in nine gundas three cowris share of lot Baotara within the police-station and sub-registry of Doobrajpur, pergunnah Haripur, bearing towji No. 229 of the Beerbhoom Collectorate; the Government revenue payable is Rs. 1,056-12 in the sixteen annas share.

2. One anna one gunda three cowris share of the above mehal, including the khas khamar lands, tanks, and jungle.

3. Eight gundas three cowris share of the above mehal, including khas khamar lands, tanks, and jungle.

(3552—1) KEDAR NATH CHATTERJI, Sub-Judge.

High Court Notice.

ESTATE RAJAH RAJ KISSEN.

Maharajah Sibkristo Bahadoor, *vs.* Kristo Chunder Ghose.

NOTICE is hereby given that on Wednesday, the 12th March next, at the hour of 1 o'clock in the afternoon, the Receiver of the High Court will put up for auction, at his office on the third floor of the Court-house, a lease for six years from the 1st Bysack 1297, corresponding with the 13th April 1890, of the undermentioned property, on the terms and conditions of a draft lease which may be inspected at the said office.

In Zillah Tipperah, Pergunnah Gungamundle, recorded in the Register of the Collector as Towji No. 545, including the Churs appertaining thereto, viz., Nobbo Chur No. 1290, Chur Bahur *alias* Teotoor Chur No. 1508, Chur Surjo and Chur Sunjoora No. 1964, Chur Assad and Doobur Chur No. 21.

In Zillah Dacca, Chur Gongachia No. 10503, Chur Jamalpur No. 10505.

For conditions of auction and further particulars apply to the Receiver of the High Court.

J. C. MACGREGOR, Receiver High Court.

High Court Receiver's office, the 18th February 1890.

(3502—4)

Lost.

THE Government Promissory Note No. 238858 of 4 per cent. of 1865, for Rs. 500, originally standing in the name of Debnath Sreemany and last endorsed to Russick Lall Dutt the proprietor, by whom it was never endorsed to any other person; and also the Government Promissory Note No. 188252 of 4 per cent. of 1865, for Rs. 500, originally standing in the name of Khcoromoney Dassee, the proprietress, by whom it was never endorsed to any other person. Payment of the above notes and the interests thereupon have been stopped at the Public Debt Office, Bank of Bengal, and applications are about to be made for the issue of duplicates in favour of the proprietor and the proprietress.

RUSSICK LAUL DUTT, Bally, District Howrah.
(3550—3)

Stolen.

THE Government Promissory Note No. 220972 of the 4 per cent of 1865 for Rs. 500, originally standing in the name of Modhu Sudhir Kowar, and last endorsed to Kedar Nath Majumdar, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is to be made for accrued interest and for issue of duplicates in favour of the proprietor after two years from date of last advertisement.

KEDAR NATH MAJUMDAR, Cooch Behar.
(3497—3)

Wanted

A CASHIER for the Patna Municipality on salary of Rs. 50 per month. Applicants must possess a good knowledge of English and Hindee, and should be well versed in municipal rules and forms. A security of Rs. 3,000 in cash, or landed property, is also required. Applications with testimonials will be received by the undersigned up to 28th February 1890.

SYUD FUZL IMAM, Vice-Chairman.
Patna Municipality, the 14th February 1890.
(3557—2)

Notice.

IN continuation of notice, dated the 9th October 1889 published at page 1656, Part II of the *Calcutta Gazette* of 30th October 1889, regarding the Barque *Grosvenor*, it is further notified that the said vessel, with all her masts, sails, gear, and appurtenances which may be on board her on the 19th day of April 1890, will be sold by auction to the highest bidder on Saturday, the 19th of April 1890.

The sale will be held at the Port Office, Chittagong, and will commence at 3 P.M.

Terms—25 per cent. on fall of the hammer if desired by Receiver of Wrecks: the balance within a week of sale and before taking delivery. If the purchaser fails to pay the balance within seven days from date of sale, the vessel will be re-sold at his risk and expense. The vessel can be inspected at Chittagong by applictaion to the Receiver of Wrecks.

E. GOOD, Receiver of Wrecks.
(3498—4)

In the Court of Baboo Shamboo Chandra Nag, Subordinate Judge of Hooghly, Third Court.

DWARKANATH BHUTTACHARJEA, Subordinate Judge,
(3548—1) First Court

Excise.

NOTIFICATION.

1. The right of retail sale of the Liquors and Drugs specified below will be put up to auction at the Opium Sale-room, Board of Revenue, 2, Bankshall Street, on Tuesday, the 4th March 1890, and subsequent days, in the following order :—

Name of article.	Date of sale.
Ganja, Siddhi, Charas, Majum ...	Tuesday, the 4th March 1890.
Opium, Madak, Chandu	Wednesday, the 5th ditto.
Tari	Saturday, the 8th ditto.
Country Spirit, Rum and Imported Liquor by glass.	Monday, Tuesday, and Wednesday, the 10th, 11th and 12th March 1890.

2. A complete list of all the shops for which licenses will be offered and a copy of each form of license are open to general inspection at the Office of the Superintendent of Excise Revenue, 4, Bankshall Street, and the number of these shops is not under any circumstances to be increased during the term of three years ending the 31st March 1893, except under the Board's sanction in each case. The Superintendent of Excise Revenue, however, reserves to himself the right, in case of combination, or for other cause, to transfer (subject to there being no objection on police grounds), either before or after its settlement, any shop from the site specified in the list to some other site, provided that the new site, if it is more than 100 yards from the advertised one, does not bring the shop within a quarter of a mile of any other similar shop whose term of license is unexpired.

3 It is not at present intended to open any other shop during the term of the license; but the Superintendent of Excise Revenue does not absolutely bind himself in this respect. On special cause shown, and with the sanction of the Board of Revenue in each case, the number of shops may be increased: provided, however, that, whenever a new shop is opened, it will be optional to the holder of a similar license for the sale of Liquor or Drugs, if his shop is within a quarter of a mile of the new shop, to surrender his license without forfeiting his advance, when the Superintendent of Excise Revenue is to re-settle the shop by auction or otherwise.

4. The right of retail sale of the Liquors and Drugs is to be put up to auction at the sanctioned upset prices.

5. The right of retail sale of the Liquors and Drugs is to be put up to auction in separate lots of one or more shops, either in the order specified in the list, or in such other order as the officer conducting the sale may deem fit. When one lot has been sold, the next lot is not to be put up until the sum payable in advance on account of the lot already sold has been actually paid: provided, however, that, where the sum payable exceeds Rs. 25, a promissory note may be taken from any respectable and well-known purchaser in lieu of cash payment.

6. The purchasers of the right of retail sale of Country Spirit, Rum, and Imported Liquors are entitled to sell Imported Liquors by the glass only, the liquor to be drunk *on* the premises.

7. The auction is to be held subject to the following conditions :—

(*a*)—That the Superintendent of Excise Revenue does not bind himself to accept the highest or any bid.

(*b*)—That the settlement with each accepted purchaser will, in Calcutta and the Suburbs, be contingent on the production by him of the usual Police certificate or license, as the case may be, viz.—

For Excise licenses for— Doasta ... Rum ... Imported Liquors by glass Tari ... Ganja ... Siddhi ... Charas Majum	If to be held in Calcutta, a Police certificate in the form prescribed by section 36, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police certificate in the form prescribed by section 19, Act II (B.C.) of 1866, must be produced.
For Excise licenses for— Opium ... ... Madak ... ... Chandu	If to be held in Calcutta, a Police license in the from prescribed by section 39, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police license in the form prescribed by section 22 of Act II (B.C.) of 1866, must be produced.

(*c*)—That the person accepted as the purchaser is to state in writing, within seven days from the date of settlement, in what building he purposes to open his shop, and is at the same time to submit a plan showing clearly and distinctly what building or portion thereof he desires to be covered by the license, it being understood that the removal of shops to other premises than those named in the list attached to this notification will be contingent on the approval of both the Excise and Police authorities, and that any sum which has been paid as an advance of the license fee under the provisions of clause (*d*) of these conditions will be returned to any person to whom a license may be subsequently refused for Police reasons.

(*d*)—That the term of the license is to be for three years ending the 31st March 1893, and that, except in the case of Tari, the license fee for that period is to be paid in advance in the following instalments :—namely, the sum equivalent to the fee for two months, at the time of sale, and one month's fee on the date on which the currency of the license commences, and one month's fee on the 1st day of every succeeding month, until the whole of the fee due on the license shall have been paid. In the case of Tari only one month's fee

is to be paid in advance at the time of sale, and fifteen days' fee on the date on which the currency of the license commences, and the rest of the fee in half-monthly instalments, viz., on the 1st and 16th day of every month, until the whole of the fee due on the license shall have been paid. This condition is to be strictly enforced in future, and failure to comply with it is to be met by immediate cancelment of the license.

(*e*)—That the purchaser is not to be entitled to receive back any portion of his advance in the event of his shop being closed before the expiration of the term of the license on violation of any of the conditions of the license, or his being convicted of a non-bailable criminal offence, or of any offence against the Excise laws or rules; and in the case of the surrender of a license under Act VII (B.C.) of 1878, the licensee is to give fifteen days' previous notice in writing to the Superintendent of Excise Revenue, and pay a sum equal to the license fee for fifteen days, over and above the amounts already paid in advance; and in the case of the surrender of a license under Act I of 1878, the licensee is to give one month's previous notice in writing to the Superintendent of Excise Revenue, and pay such fine not exceeding six months' license fees as the Superintendent of Excise Revenue may adjudge, over and above the amounts already paid in advance.

(*f*)—That the currency of the license is to commence on the 1st April 1890, on which date the purchaser is to open his shop, in all respects prepared for the accommodation of customers, to be certified by an Excise Officer—failure to comply with this condition is to be met by the immediate cancelment of the license, the forfeiture of the deposit, and the levy of the fees for the month except in the case of delay caused by the non-issue of the Police certificate or Police license, for which a reasonable extension of time may be allowed upon application and cause shown to the Superintendent of Excise Revenue.

(*g*)—That where the amount of the sum payable in advance is required to be paid at once in cash, and the bidder fails to make such payment, the officer conducting the sale is either immediately to put up the lot again for sale, or after the other lots in the list have been disposed of, or he may postpone the sale to such future date as he shall then and there notify; and the defaulting purchaser is to be debarred from bidding for such lot, or for any other lot, and he is not to be allowed to remain in the auction-room; and that the defaulting purchaser will be liable for any loss that may accrue to Government in case it becomes necessary to re-sell a lot at a lower rate, either in consequence of his failure to deposit the sum payable at the time of sale, or to redeem his promissory note on or before 4 P.M. on the day following that on which the note was signed.

(*h*)—That the purchasers are to adhere to all the provisions of the Opium, Excise and Police laws, and of the rules which have been or may from time to time be prescribed by the Board of Revenue.

8. All sales subsequent to the date of the triennial sale in March are to be held subject to the conditions contained in this notification, so far as they may be applicable.

9. Any further information regarding the auction may be had on application at the Office of the Superintendent of Excise Revenue.

D. G. BONNERJEE,

Superintendent of Excise Revenue,
Calcutta, the Suburbs, Howrah, and Bally.

OFFICE OF THE SUPDT. OF EXCISE REVENUE; 4, BANKSHALL STREET, CALCUTTA, *the 14th February* 1890.

INSOLVENT NOTICES.

In the Court for the Relief of Insolvent Debtors at Calcutta.

In the matter of BUNSIDHUR SINGHANIA, lately carrying on business as piece-goods dealer and commission agent at No. 68, Cotton Street, in the town of Calcutta, under the name, style and firm of KRIPARAM SOOKDYAL, an insolvent.

On Wednesday, the 15th day of January last, it was, on the petition of Jumna Dhur, Joogulkissore, creditors of the said insolvent, adjudged that the said Bunsidhur Singhania hath committed an act of insolvency, under the provisions of the Act XI Vic., Chapter XXI, and by another order of the same date the estate and effects of the said insolvent were vested in the Official Assignee.

E. J. Fink, Attorney. (3538—2)

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observation taken at 20 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 37 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e*, from May 15th to November 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 44 observing stations, and of rainfall recorded at 245 sub-divisional stations together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal, Daily Report, and to the Accountant and Treasurer Bengal Secretariat, for the other reports.

ALEX. PEDLER,

Offg. Meteorological Reporter to the Govt. of Bengal.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

NOTICE.

IT is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal.
The 24th November 1886.

Trial of Civil Suits. In Urdu. 4*a.* (1*a.*)

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 689 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set. An extra charge for packing and postage will be made for the set in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

*** *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 6 (6*a*.) each. General Index to Volumes I to XXIII. Rs. 6 (6*a*.)

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 14th February, 1890, and is hereby promulgated for general information:—

ACT NO. I OF 1890.

An Act to make better provision for recovering certain public demands.

WHEREAS it is expedient to make better provision for recovering certain public demands; It is hereby enacted as follows:—

Title, extent and commencement.

1. (*1*) This Act may be called the Revenue Recovery Act, 1890.

(*2*) It extends to the whole of British India, inclusive of Upper Burma and British Baluchistan; and

(*3*) It shall come into force at once.

Definitions.

2. In this Act, unless there is something repugnant in the subject or context,—

(*1*) "district" includes a presidency-town:

(*2*) "Collector" means the chief officer in charge of the land-revenue administration of a district: and

(*3*) "defaulter" means a person from whom an arrear of land-revenue, or a sum recoverable as an arrear of land-revenue, is due, and includes a person who is responsible as surety for the payment of any such arrear or sum.

Recovery of public demands by enforcement of process in other districts than those in which they become payable.

3. (*1*) Where an arrear of land-revenue, or a sum recoverable as an arrear of land-revenue, is payable to a Collector by a defaulter being or having property in a district other than that in which the arrear accrued or the sum is payable, the Collector may send to the Collector of that other district a certificate in the form as nearly as may be of the schedule, stating—

(*a*) the name of the defaulter and such other particulars as may be necessary for his identification, and

(*b*) the amount payable by him and the account on which it is due.

(*2*) The certificate shall be signed by the Collector making it, and, save as otherwise provided by this Act, shall be conclusive proof of the matters therein stated.

(*3*) The Collector of the other district shall, on receiving the certificate, proceed to recover the amount stated therein as if it were an arrear of land-revenue which had accrued in his own district.

Remedy available to person denying liability to pay amount recovered under last foregoing section.

4. (*1*) When proceedings are taken against a person under the last foregoing section for the recovery of an amount stated in a certificate, that person may, if he denies his liability to pay the amount or any part thereof and pays the same under protest made in writing at the time of payment and signed by him or his agent, institute a suit for the re-payment of the amount or the part thereof so paid.

(*2*) A suit under sub-section (*1*) must be instituted in a Civil Court having jurisdicti in the local area in which the office of the Collector who made the certificate is situate, and the suit shall be determined in accordance with the law in force at the place where the arrear accrued or the liability for the payment of the sum arose.

(*3*) In the suit the plaintiff may, notwithstanding anything in the last foregoing section, but subject to the law in force at the place aforesaid, give evidence with respect to any matter stated in the certificate.

Recovery by Collectors of sums recoverable as arrears of revenue by other public officers or by local authorities.

5. Where any sum is recoverable as an arrear of land-revenue by any public officer other than a Collector or by any local authority, the Collector of the district in which the office of that officer or authority is situate shall, on the request of the officer or authority, proceed to recover the sum as if it were an arrear of land-revenue which had accrued in his own district, and may send a certificate of the amount to be recovered to the Collector of another district under the foregoing provisions of this Act as if the sum were payable to himself.

Property liable to sale under this Act.

6. (*1*) When the Collector of a district receives a certificate under this Act, he may issue a proclamation prohibiting the transfer or charging of any immoveable property belonging to the defaulter in the district.

(*2*) The Collector may at any time, by order in writing, withdraw the proclamation, and it shall be deemed to be withdrawn when either the amount stated in the certificate has been recovered or the property has been sold for the recovery of that amount.

(*3*) Any private alienation of the property or of any interest of the defaulter therein, whether by sale, gift, mortgage or otherwise, made after the issue of the proclamation and before the withdrawal thereof shall be void as against the Government and any person who may purchase the property at a sale held for the recovery of the amount stated in the certificate.

(*4*) Subject to the foregoing provisions of this section, when proceedings are taken against any immoveable property under this Act for the recovery of an amount stated in a certificate, the interests of the defaulter alone therein shall be so proceeded against, and no incumbrances created, grants made or contracts entered into by him in good faith shall be rendered invalid by reason only of proceedings being taken against those interests.

(*5*) A proclamation under this section shall be made by beat of drum or other customary method and by the posting of a copy thereof on a conspicuous place in or near the property to which it relates.

Saving of local laws relating to revenue.

7. Nothing in the foregoing sections shall be construed—

(*a*) to impair any security provided by, or affect the provisions of, any other enactment for the time being in force for the recovery of land-revenue or of sums recoverable as arrears of land-revenue, or

(*b*) to authorise the arrest of any person for the recovery of any tax payable to the corporation, commissioner, committee, board, council or person having authority over a municipality under any enactment for the time being in force.

Recovery in British India of certain public demands arising beyond British India.

8. When this Act has been applied to any local area which is under the administration of the Governor General in Council but which is not part of British India, an arrear of land-revenue accruing in that local area, or a sum recoverable as an arrear of land-revenue and payable to a Collector or other public officer or to a local authority in that local area, may be recovered under this Act in British India.

THE SCHEDULE.

CERTIFICATE.

(*See section 3, sub-section (1).*)

From

The Collector of

To

The Collector of .

Dated the of 18 .

The sum of Rs. is payable on account of by , son of , resident of , who is believed (to be at) (to have property consisting of at) in your district.

Subject to the provisions of the Revenue Recovery Act, 1890, the said sum is recoverable by you as if it were an arrear of land-revenue which had accrued in your own district, and you are hereby desired so to recover it and to remit it to my office at .

A. B.,
Collector of .

S. HARVEY JAMES,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 14th February, 1890, and is hereby promulgated for general information :—

ACT NO. II OF 1890.

An Act to amend Acts XVII of 1864, X of 1865, II of 1874 and V of 1881.

WHEREAS it is expedient to amend Act XVII of 1864 (*an Act to constitute an Office of Official Trustee*), the Indian Succession Act, 1865, the Administrator General's Act, 1874, and the Probate and Administration Act, 1881; It is hereby enacted as follows :—

Act XVII of 1864.

Addition to section 1, Act XVII, 1864.

1. In section 1 of Act XVII of 1864, before the definition of the expression "High Court", the following shall be inserted, namely :—

"Government."

"The word 'Government' shall mean, in relation to the Presidency of Fort William in Bengal, the Governor General in Council; in relation to the Presidency of Fort St. George, the Governor of Fort St. George in Council; and, in relation to the Presidency of Bombay, the Governor of Bombay in Council:".

Insertion of new section after section 1, Act XVII, 1864.

2. After section 1 of the said Act the following shall be inserted, namely :—

Construction of references to Presidencies.

"2. In this Act references to the Presidency of Fort William in Bengal, the Presidency of Fort St. George and the Presidency of Bombay shall, as regards all persons for whom the Governor General in Council has for the time being power to make laws and regulations, be read as references to the Presidency of Bengal, the Presidency of Madras and the Presidency of Bombay, respectively, as those expressions are severally defined in the law for the time being in force relating to the office and duties of Administrator General."

Substitution of new section for section 5.

3. For section 5 of the said Act the following shall be substituted, namely :—

Appointment, suspension and removal of Official Trustees.

"5. Every Official Trustee appointed under this Act shall be appointed and may be suspended or removed from his office by the Government."

Amendment of section 6, Act XVII, 1864.

4. In section 6 of the said Act, for the words "Chief Justice by whom he is appointed" the word "Government" shall be substituted.

Amendment of section 7, Act XVII, 1864.

5. For the portion of section 7 of the said Act beginning with the words "It shall be lawful for the Chief Justice of the High Court" and ending with the words "it shall be lawful for the Chief Justice to appoint some person to officiate as Official Trustee" the following shall be substituted, namely :—

"It shall be lawful for the Government from time to time to grant leave of absence to the Official Trustee, but subject always to such and the like rules as may be for the time being in force as to leave of absence of officers attached to the High Court. Whenever any Official Trustee shall obtain leave of absence, it shall be lawful for the Government to appoint some person to officiate as Official Trustee,".

Addition to section 11, Act XVII, 1864.

6. To section 11 of the said Act the following shall be added, namely :—

"Provided that the High Court, by its order appointing the Official Trustee to be trustee of such property, may, for special reasons to be recorded by the Court, direct that the Official Trustee shall be entitled by way of remuneration, in respect of the capital moneys, sums and rents aforesaid, or any of them, to a commission at rates or a rate to be specified in the order and exceeding the rates or rate hereinbefore in this section prescribed."

Addition of sections to Act XVII, 1864.

7. To the said Act, after section 32, the following shall be added, namely :—

Compliance with requisitions for returns.

"33. The Official Trustee shall comply with such requisitions as may be made by the Government for returns and statements, in such form and manner as the Government may deem proper.

Division of the Presidency of Fort William in Bengal into Provinces.

"34. (1) Notwithstanding anything in the foregoing provisions of this Act, the Governor General in Council, upon the occurrence of any vacancy in the

office of the Official Trustee of Bengal, may, by notification in the Gazette of India,—

(*a*) divide the Presidency of Fort William in Bengal into so many Provinces as he thinks fit,

(*b*) define the limits of each of those Provinces, and

(*c*) appoint an Official Trustee for each Province,

and, subject to the provisions of this section, the following consequences shall thereupon ensue, namely:—

(*i*) the office of Official Trustee of Bengal shall cease to exist:

(ii) the Official Trustee of a Province shall have the like rights and privileges, and perform the like duties, in the territories and dominions included in the Province as the Official Trustee of Bengal had and performed as Official Trustee therein:

(iii) the functions of the Government under this Act shall, as regards the territories and dominions included in the Province, be discharged by the Governor General in Council:

(iv) the functions of whatsoever kind assigned by the foregoing provisions of this Act to the High Court of Judicature at Fort William in Bengal in respect of the territories and dominions included in a Province shall be discharged by such High Court as the Governor General in Council may, by notification in the Gazette of India, appoint in this behalf:

(v) in the foregoing provisions of this Act, the word 'Presidency' shall be deemed to include a Province, the expression 'Chief Justice' the Chief Justice, senior Judge or sole Judge, as the case may be, of a High Court appointed by the Governor General in Council under clause (iv) of this sub-section, and the expression 'Advocate General' a Government Advocate or other officer appointed by the Governor General in Council to discharge for a Province the functions under this Act of an Advocate General for a Presidency: and,

(vi) generally, the provisions of the foregoing sections and of any other enactment for the time being in force with respect to the Official Trustee of Bengal shall, in relation to a Province, be construed, so far as may be, to apply to the Official Trustee appointed for the Province under this section.

(*2*) Any proceeding which was commenced before the publication of the notification dividing the Presidency of Fort William in Bengal into Provinces, and to or in which the Official Trustee of Bengal in his representative character was a party or was otherwise concerned, shall be continued as if the notification had not been published, and the Official Trustee of the Province in which the Town of Calcutta is comprised shall for the purposes of the proceeding be deemed to be the successor in office of the Official Trustee of Bengal, and shall hold and execute the trusts of which immediately before the publication of the notification the Official Trustee of Bengal was trustee in all respects as if he were such successor.

(*3*) The Court of the Recorder of Rangoon shall be deemed to be a High Court for the purposes of clause (iv) of sub-section (*1*)."

Official Trustees holding office at commencement of this Act.

8. Every person holding the office of Official Trustee at the commencement of this Act shall be deemed to have been appointed under Act XVII of 1864 as amended by this Act.

The Indian Succession Act, 1865.

Addition of new section after section 326, Act X, 1865.

9. After section 326 of the Indian Succession Act, 1865, the following shall be inserted, namely:— X of

"326A. Where a person not having his domicile in British India has died leaving assets both in British India and in the country in which he had his domicile at the time of his death, and there have been a grant of probate or letters of administration in British India with respect to the assets there and a grant of administration in the country of domicile with respect to the assets in that country, the executor or administrator, as the case may be, in British India, after having given such notices as are mentioned in section 320 and after having discharged, at the expiration of the time therein named, such lawful claims as he knows of, may, instead of himself distributing any surplus or residue of the deceased's property to persons residing out of British India who are entitled thereto, transfer, with the consent of the executor or administrator, as the case may be, in the country of domicile, the surplus or residue to him for distribution to those persons."

Transfer of assets from British India to executor or administrator in country of domicile for distribution.

The Administrator General's Act, 1874.

Amendment of definitions of "Presidency of Bengal" and "Presidency of Bombay" in section 3, Act II, 1874.

10. In clause (*b*) of the definition of the expression "Presidency of Bengal" in section 3 of the Administrator General's Act, 1874, the word "Burma" shall be substituted for the words "British Burma", and to clause (*a*) of the definition of the expression "Presidency of Bombay" in the same section of that Act the words "and under the administration of the Chief Commissioner of British Baluchistan" shall be added. II of

Substitution of new paragraph for first paragraph of section 37, Act II, 1874

11. (*1*) For the first paragraph of section 37 of the said Act, as amended by section 5 of the Administrator General's Act, 1881, beginning with the words "If in cases falling within section 36" and ending with the words "as if such letters had been granted to him", the following shall be substituted, namely:— IX

"If, in cases falling within section 36, no person claiming otherwise than as a creditor to be entitled to a share of the effects of the deceased obtains, within three months, a

certificate from the Administrator General under the same section, or letters of administration to the estate and effects of the deceased, and such deceased was not a Hindu, Muhammadan, Parsi or Buddhist, or exempted under the Indian Succession Act, 1865, section 332, from the operation of that Act, the Administrator General may administer the estate and effects without letters of administration, in the same manner as if such letters had been granted to him;".

(2) The portion of section 5 of the Administrator General's Act, 1881, beginning with the words "and in section 37 of the same Act" and ending with the words "from the operation of that Act" is hereby repealed.

Addition of new section after section 41, Act II, 1874.

12. After section 41 of the said Act the following shall be inserted, namely:—

Transfer of certain assets from British India to executor or administrator in country of domicile for distribution.

"41A. Where a person not having his domicile in British India has died leaving assets both in British India and in the country in which he had his domicile at the time of his death, and proceedings for the administration of his estate with respect to assets in British India have been taken under section 36 or section 37, and there has been a grant of administration in the country of domicile with respect to the assets in that country, the holder of the certificate granted under section 36 or section 37, or the Administrator General, as the case may be, after having given such notices as the High Court may by any general rule to be made from time to time prescribe, for creditors and others to send in to him their claims against the estate of the deceased, and after having discharged, at the expiration of the time therein named, such lawful claims as he knows of, may, instead of himself distributing any surplus or residue of the deceased's property to persons residing out of British India who are entitled thereto, transfer, with the consent of the executor or administrator, as the case may be, in the country of domicile, the surplus or residue to him for distribution to those persons."

Addition to section 64, Act II, 1874.

13. To section 64 of the said Act the following shall be added, namely:—

"The District Judge may cause to be paid out of any property of which he or such officer has charge, or out of the proceeds of such property or of any part thereof, such sums as may appear to him to be necessary for all or any of the following purposes, namely:—

(a) the payment of the expenses of the funeral of the deceased and of obtaining probate of his will or letters of administration to his estate and effects,

(b) the payment of wages due for services rendered to the deceased within three months next preceding his death by any labourer, artizan or domestic servant, and

(c) the relief of the immediate necessities of the family of the deceased,

and nothing in section 279, section 280 or section 281 of the Indian Succession Act, 1865, or in any other law for the time being in force with respect to rights of priority of creditors of deceased persons, shall be held to affect the validity of any payment so caused to be made."

Addition to Part VI, Act II, 1874.

14. To Part VI, and after section 66, of the said Act the following shall be added, namely:—

Compliance with requisitions for returns.

"67. The Administrator General shall comply with such requisitions as may be made by the Government for returns and statements, in such form and manner as the Government may deem proper."

Addition to Act II, 1874, of a Part respecting the division of the Presidency of Bengal into Provinces.

15. To the said Act, after Part VI and section 67 thereof, the following shall be added, namely:—

"PART VII.

DIVISION OF THE PRESIDENCY OF BENGAL INTO PROVINCES.

Division of the Presidency of Bengal into Provinces.

68. (1) Notwithstanding anything in the foregoing provisions of this Act, the Governor General in Council, upon the occurrence of any vacancy in the office of the Administrator General of Bengal, may, by notification in the Gazette of India,—

(a) divide the Presidency of Bengal, as defined in this Act, into so many Provinces as he thinks fit,

(b) define the limits of each of those Provinces, and

(c) appoint an Administrator General for each Province,

and, subject to the provisions of this section, the following consequences shall thereupon ensue, namely:—

(i) the office of Administrator General of Bengal shall cease to exist:

(ii) the Administrator General of a Province shall have the like rights and privileges, and perform the like duties, in the territories and dominions included in the Province as the Administrator General of Bengal had and performed as Administrator General therein:

(iii) the functions of the Government under this Act shall, as regards the territories and dominions included in a Province, be discharged by the Governor General in Council:

(iv) the functions of whatsoever kind assigned by the foregoing provisions of this Act to the High Court at Calcutta in respect of the territories and dominions included in a Province shall be discharged by such High Court as the Governor General in Council may, by notification in the Gazette of India, appoint in this behalf, and probate or letters of administration granted to the Administrator General of the Province by the High Court so appointed shall have the same effect throughout the Presidency of Bengal, as defined

in this Act, or, if the Court so directs, throughout British India, as, but for the abolition of the office of Administrator General of Bengal, probate or letters of administration granted to the holder of that office by the High Court at Calcutta would have had :

(v) in the foregoing provisions of this Act the word 'Presidency' shall be deemed to include a Province, the expression 'Presidency-town' the place of sitting of a High Court appointed by the Governor General in Council under clause (iv) of this sub-section, and the expression 'Advocate General' a Government Advocate or other officer appointed by the Governor General in Council to discharge for a Province the functions under this Act of an Advocate General for a Presidency :

(vi) the provisions of this Act with respect to the commission of the Administrator General of Bengal shall regulate the commission payable to the Administrator General of a Province : and,

(vii) generally, the provisions of the foregoing sections of this Act with respect to the High Court at Calcutta, and the provisions of those sections or of any other enactment with respect to the Administrator General of Bengal, shall, in relation to a Province, be construed, so far as may be, to apply to the High Court and Administrator General, respectively, appointed for the Province under this section.

(*2*) Any proceeding which was commenced before the publication of the notification dividing the Presidency of Bengal into Provinces and to or in which the Administrator General of Bengal in his representative character was a party or was otherwise concerned shall be continued as if the notification had not been published, and the Administrator General of the Province in which the town of Calcutta is comprised shall for the purposes of the proceeding be deemed to be the successor in office of the Administrator General of Bengal.

(*3*) The Court of the Recorder of Rangoon shall be deemed to be a High Court for the purposes of clause (iv) of sub-section (*1*).

(*4*) Notwithstanding any division of the Presidency of Bengal, as defined in this Act, into Provinces under this section, the Administrator General of the Province in which the town of Calcutta is comprised shall be deemed to be the Administrator General for the whole of the said Presidency for the purposes of the Regimental Debts Act, 1863." 26 & 27 c. 57.

The Probate and Administration Act, 1881.

16. After section 145 of the Probate and Administration Act, 1881, the following shall be inserted, namely :— V of

Addition of new section after section 145, Act V, 1881.

"145A. Where a person not having his domicile in British India has died leaving assets both in British India and in the country in which he had his domicile at the time of his death, and there have been a grant of probate or letters of administration in British India with respect to the assets there and a grant of administration in the country of domicile with respect to the assets in that country, the executor or administrator, as the case may be, in British India, after having given such notices as are mentioned in section 139 and after having discharged, at the expiration of the time therein named, such lawful claims as he knows of, may, instead of himself distributing any surplus or residue of the deceased's property to persons residing out of British India who are entitled thereto, transfer, with the consent of the executor or administrator, as the case may be, in the country of domicile, the surplus or residue to him for distribution to those persons."

Transfer of assets from British India to executor or administrator in country of domicile for distribution.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 14th February, 1890:—

NO. 4 OF 1890.

A Bill to amend Acts I of 1859, VII of 1880 and V of 1883.

WHEREAS it is expedient to amend Act I of 1859 (*for the amendment of the law relating to Merchant Seamen*), the Indian Merchant Shipping Act, 1880, and the Indian Merchant Shipping Act, 1883, in manner hereinafter appearing; It is hereby enacted as follows:—

Act I of 1859.

Addition of section after section 24, Act I, 1859.

1. After section 24 of Act I of 1859 the following shall be inserted, namely:—

"24A. (*1*) When a running agreement with the crew of a foreign-going ship has been made under section 23 and the ship arrives after the next following thirtieth day of June or thirty-first day of December at a port of destination in India which is not the port therein at which the crew have agreed to be discharged, the master may, with the previous sanction of the shipping-master, renew the agreement with the crew, or may be required by the shipping-master so to renew the agreement, for the voyage from such port of destination to the port in India at which the crew have agreed to be discharged.

Renewal of running agreements in certain cases.

"(*2*) If the master of the ship is required by the shipping-master to renew the agreement as aforesaid and refuses so to renew it, any expenses which may be incurred by the Government for the subsistence of the crew and their conveyance to the port at which they have agreed to be discharged shall be a charge upon the ship, and shall be recoverable as if they were expenses incurred in respect of distressed seamen under the provisions of Chapter III of the Indian Merchant Shipping Act, 1880." VII of

2. To section 115 of the same Act the following shall be added, namely:—

Amendment of section 115, Act I, 1859.

"and for the repayment to the Secretary of State for India in Council of all expenses which may be incurred by the Government in respect of any such lascar or other native seaman who may be discharged or left behind at any port out of India and becomes distressed and is relieved under the provisions of the Merchant Shipping Act, 1854, section 211, and the enactments amending the same." 17 & 1 c. 104.

The Indian Merchant Shipping Act, 1880.

3. In section 74 of the Indian Merchant Shipping Act, 1880, after the words "so appointed" the words "or bringing within such limits any wreck which has been found and taken possession of elsewhere" shall be inserted.

Amendment of section 74, Act VII, 1880. VII of

The Indian Merchant Shipping Act, 1883.

4. To section 6 of the Indian Merchant Shipping Act, 1883, the following shall be added, namely:—

Amendment of section 6, Act V, 1883. V of 1

"(*4*) The word "coasts" in this section includes the coasts of creeks and tidal rivers."

5. For sub-section (*1*) of section 7 of the same Act the following shall be substituted, namely:—

New sub-section substituted for sub-section (*1*) of section 7, Act V, 1883.

"If the Local Government to which the report or notice prescribed by the last foregoing section has been made or given, or within whose territories any competent witnesses of any such loss, abandonment, stranding, damage or casualty as is described in clause (*a*), (*b*), (*c*) or (*d*) of sub-section (*1*) of the same section have arrived or are to be found or any evidence of

Power for Local Government to appoint Special Court of Investigation.

such supposed loss as is described in clause (*e*) of the same sub-section can be obtained, is of opinion that a formal investigation into the facts mentioned in any of the said clauses is requisite or expedient, such Local Government may appoint a special Court, consisting of not less than two nor more than four persons, and direct that Court to make the investigation, and may fix the place for making the same."

Amendment of section 8, Act V, 1883.

6. In section 8 of the same Act, after the words "Local Government" the words "or by such officer as the Local Government has empowered in this behalf" shall be inserted.

Amendment of section 20, Act V, 1883.

7. In section 20 of the same Act, clause (*a*) and the proviso shall be repealed.

Addition of section after section 24, Act V, 1883.

8. After section 24 of the same Act the following shall be added, namely:—

Power to Court to suspend or cancel certificates granted by Local Government.

"24A. (*1*) Notwithstanding anything in the foregoing provisions of this Act, a certificate (whether of competency or service) which has been granted by any Local Government to a master, mate or engineer, but has not been granted under the provisions of the Merchant Shipping (Colonial) Act, 1869, or of any Order in Council under the said Act, may, if a Court conducting an investigation under this Act finds that the loss, stranding or abandonment of or damage to any ship, or loss of life, has been caused by the wrongful act or default of the master, mate or engineer, or that he is incompetent or has been guilty of any gross act of drunkenness, tyranny or other misconduct, be suspended or cancelled by the Court:

"Provided that the Court shall not suspend or cancel a certificate unless the holder of the certificate was furnished before the commencement of the investigation with the copy of the report or statement required by section 9 or section 10, as the case may be.

"(*2*) At the conclusion of the investigation, or as soon afterwards as possible, the Court shall state in open sitting the decision to which it may have come with respect to the cancelment or suspension of any certificate.

"(*3*) A master, mate or engineer whose certificate has been cancelled or suspended by the Court shall, on demand by the Court, deliver the certificate to the Court, and the Court shall forward it to the Local Government together with the report which it is required by section 17, sub-section (*1*), to transmit to that Government.

"(*4*) A master, mate or engineer failing to deliver a certificate as required by sub-section (*3*) shall be punished with fine which may extend to five hundred rupees.

"(*5*) The duties imposed and powers conferred by sections 22, 23 and 24 on the Local Government which cancels or suspends a certificate shall, when a Court has under this section cancelled or suspended a certificate, be performed and exercised by the Local Government to which the Court has forwarded the certificate under sub-section (*3*), as if such Local Government had itself cancelled or suspended the certificate under section 20."

STATEMENT OF OBJECTS AND REASONS.

THE objects of this Bill are the following:—

(*a*) to amend Act I of 1859 (*for the amendment of the law relating to Merchant Seamen*) so as to make it lawful for the master of a foreign-going ship, when the term of a running agreement has expired at a port in India which is not also the port at which the crew have agreed to be discharged, to renew the agreement, with the sanction of the shipping-master at the port at which the agreement has expired, for the voyage from that port to the port in India which is the port of discharge agreed to by the crew (section 1);

(*b*) to provide in section 115 of the same Act for the indemnification of the State against expenses incurred in the relief of lascars left abroad by masters of foreign vessels (section 2);

(*c*) to provide, in amendment of section 74 of the Indian Merchant Shipping Act, 1880, that all wreck found outside, but brought within, the local limits for which a Receiver of Wreck has been appointed, as well as wreck found within those limits, shall be delivered to the Receiver (section 3);

(*d*) to explain that the word "coasts" in section 6 of the Indian Merchant Shipping Act, 1883, includes the coasts of creeks and tidal rivers (section 4);

(*e*) to provide in Chapter II of the same Act for giving power to a Local Government to convene a Court of Investigation into a casualty which has occurred in the jurisdiction of, or been reported to, another Local Government, when it may be advisable to hold such a Court by reason of the witnesses being within the jurisdiction of the Local Government or for other sufficient cause (section 5);

(*f*) to provide in section 8 of the same Act that the Governor of Bombay in Council may delegate to the Political Resident at Adén his powers under that section in respect of investigations at Aden into shipping casualties (section 6); and

(*g*) to provide, in amendment of Chapter III of the same Act, that Courts of Investigation may cancel or suspend local certificates of competency or service as they may now cancel or suspend Board of Trade and Colonial certificates.

2. These amendments of Act I of 1859 and the Indian Merchant Shipping Acts of 1880 and 1883 have been shown by experience to be either necessary or desirable.

The 7th February, 1890.

OBSERVATIONS.—In April 1885 sanction was given to the formation of volunteer reserves in the North-Western Provinces and Local Governments were asked to submit proposals for the organization of similar forces in their respective provinces. In May 1887 the proposals of the Bengal Government for raising volunteer reserves in Bengal, and those of the Bombay Government for the formation of volunteer reserves in Bombay and in connection with the Bombay, Baroda, and Central India Railway Volunteer Corps, were approved. In the beginning of 1888 sanction was also given to the organization of volunteer reserves in Burma, and in September 1888 to the formation of volunteer reserves in the Madras Presidency In September 1888 the Punjab Government reported that steps were being taken to ascertain the number of persons in the province who were fit to be volunteers and the proportion of these already enlisted in the volunteer or reserve forces. Subsequently Local Governments were requested to furnish, for the information of the Government of India, reports showing the progress made. The reports which have been received show that reservists in the following numbers have been enrolled in the various provinces:—

Bengal	Calcutta	462	
	Bhagalpur	20	(a)
	Muzaffarpur	30	(a)
N.-W. Provinces	Allahabad	180	
	Cawnpore	80	(a)
	Benares	26	
	Oudh Volunteer Reserve Corps	98	
	Mussoorie ditto	150	
	Rohilkhand ditto	38	
	Dehra Dun Mounted Volunteer Reserve Corps	40	
Punjab	...	500	(a)
Madras	Madras City	248	
	Kistna District	81	
	Bellary do	54	
	Coorg and Mysore	5	
Burma	Upper Burma	103	
	Arracan Division	36	
	Tennasserim Division	38	
	Irrawaddy Division	69	
	Total	2,258	

(a) These are said to be expected to join.

RESOLUTION.—The Governor-General in Council observes with satisfaction the progress made in this important matter and desires to record the acknowledgments of the Government of India to the Local Governments and Administrations and to the volunteer corps concerned for their efforts in furthering the volunteer reserve movement. From a comparison, however, of the number of available men in the various towns and districts of India with the numbers already enrolled as volunteers or reservists, it is evident that the volunteer reserve force might be considerably augmented, and His Excellency in Council trusts that Local Governments and Administrations will give their earnest attention to this matter and endeavour to increase existing volunteer reserve corps and companies and to raise new corps and companies where none at present exist. His Excellency in Council also desires that local Governments and Administrations will impress on the civil officers under their orders and on officers commanding volunteer corps the necessity for taking a personal interest in the movement, as it is one to which the Government of India attach great importance.

ORDER.—Ordered that a copy of this Resolution be communicated to the Secretary to the Government of $\frac{\text{Madras}}{\text{Bombay}}$, Military Department; the Secretary to the Government of Bengal, General Department; the Secretary to the Government of the North-Western Provinces and Oudh, General Department; the Secretary to the Government of the Punjab, Civil Department; the Chief Commissioners of Burma, Assam, and the Central Provinces, and the Adjutant-General in India.

DECLARATION.

The 21st February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the construction of the proposed central distillery at Jessore, in the village of Bijpara, pergunnah Emadpore, zillah Jessore, it is hereby declared that for the above purpose a piece of land in five plots, measuring, more or less, 6 bighas 14 cottahs and 10 chittacks of standard measurement, within the boundaries given below, is required within the aforesaid village of Bijpara—

Plot No. 1 —Bounded on the North by Binode Bihari Shaha's land; East by the old tank; South by Binode Bihari Shaha's land; and West by the old distillery land.

Plot No. 2.—Bounded on the North by the old distillery land and Binode Bihari Shaha's land; East by an old tank; South by Binode Bihari Shaha's land; and West by Mathura Nath Basu's land.

Plot No. 3 —Bounded on the North by Mathura Nath Basu's land; East by the old distillery land and Binode Bihari Shaha's land; South by Mathura Nath Basu's land; and West by Mathura Nath Basu's land.

Plot No 4.—*Old tank.*—Bounded on the North by Baboo Umes Chandra Ghosh's land; East by Mathura Nath Basu's land; South by Binode Bihari Shaha's land; and West by Binode Bihari Shaha's land.

Plot No. 5.—*Old distillery land.*—Bounded on the North by Baboo Umes Chandra Ghosh's land; East by Binode Bihari Shaha's land; South by Binode Bihari Shaha's land; and West by Mathura Nath Basu's land.

A plan of the required land may be inspected at the Collector's office.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

DECLARATION.

The 22nd February 1890.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for construction of a building for Sudder distillery at Beerbhoom, in the village of Hatzanbazar, pergunnah Khatanga, zillah Beerbhoom, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bighas of standard measurement, bounded on the North by Poorana Sonatoree; and on the South, East, and West by the lands belonging to Baboo Jagendra Chandra Bose, is required within the aforesaid village of Hatzanbazar.

A plan of the land required to be taken up may be inspected by the parties interested in the office of the Collector of Beerbhoom.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 168A.

The 20th February 1890.—Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Baboo Abhilash Chandra Mukerjee, Officiating Deputy Magistrate and Deputy Collector, Rajshahye, to take down evidence in criminal cases in the English language.

The 25th February 1890.—The following Notice to Mariners is published for general information.

J. M. MCNEILE, *Col.*, R.E.,
Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, PUBLIC WORKS DEPARTMENT—(MARINE.)

NOTICE TO MARINERS—(No. 23).

AUSTRALIA—EAST COAST.

INNER ROUTE.

Sunken rock and bank eastward of Claremont No. X (Chapman) island; and non-existence of rock awash south-eastward of Young island.

THE British Admiralty has given notice (No. 31 of 1890) that the following information has been received, relating to dangers found in the Inner Route, east coast of Australia, the result of recent examinations by Lieutenant and Commander G. C. Frederick, H.M.'s Surveying Vessel *Dart*:—

(1) A sunken rock, composed of coral, with a depth of 5 feet on it at low water, is situated with Claremont No. X (Chapman) island, bearing W.S.W., distant $1\frac{9}{10}$ miles.
Position: lat. 12° 53′ S., long. 143° 39′ 15″ E.

(2) A bank, with several patches of $2\frac{1}{2}$ fathoms near its western edge, extending thence more than a mile to the eastward, with patches of 4 and 5 fathoms on it, lies between the above rock and Claremont No. X island.
From the shoalest part of this bank Claremont No. X island bears W. by S., distant 8 cables.

(3) A careful search was made for the rock awash at low water, marked on the charts in a position bearing S.E., distant $1\frac{5}{10}$ miles from Young island. Depths of 12 to 14 fathoms, and a level bottom, were found all round and upon the assigned position of this rock; and at low water, and under favourable circumstances, no indications of shoal water were observed in the locality.

This rock has consequently been expunged from the Admiralty charts.
Position: lat. 12° 8′ 30″ S, long 143° 14′ E.

NOTICE TO MARINERS—(No. 24).

AFRICA—EAST COAST.

GULF OF ADEN.

Permanent light vessel, Aden harbour, replaced in position.

IN continuation of Notice to Mariners, No. 109, dated the 12th November 1889, issued by this office, the British Admiralty has given notice (No. 35 of 1890) that on 15th February 1890 the provisional light-vessel will be replaced by the permanent light-vessel.

The light will be (as previously) a *flashing* white light, showing a flash *every minute*, and elevated 39 feet above the sea.

The light-vessel, moored in 18 feet at low water, is painted red, but will not carry a red ball at the masthead, nor hoist a red flag during the day.

By direction of the Government of Bengal,

EATON W. PETLEY,
Port Officer of Calcutta.

PORT OFFICE, CALCUTTA, *the 24th February* 1890.

NOTICE TO MARINERS (No. 19).

CHINA SEA.

SINGAPORE, WESTERN APPROACH—SALAT SINKI.

Bell buoy withdrawn; and a light-vessel moored on Ajax shoal.

THE British Admiralty has given notice (No. 23 of 1890) that on 1st February 1890 a light-vessel will be moored on Ajax shoal, west side of Salat Sinki, western approach to New harbour, Singapore:—

The light will be a *flashing* white light, showing a *flash every thirty seconds*; it will be elevated 38 feet above the sea, and should be visible in clear weather from a distance of 10 miles.

The light-vessel will be painted yellow, with the word *Ajax* in white letters on a black ground on her sides. She will carry a caged ball, painted red, at the masthead, as a day mark.

Position, lat. 1° 13′ 55″ N., long 103° 40′ 20″ E.

Also, that on the same date, the Bell buoy now marking Ajax shoal will be withdrawn.

By direction of the Government of Bengal,

OLIVER LASH,
for Port Officer of Calcutta.

A. HILSON, M.D.,
Inspector-General of Civil Hospitals, Bengal.

HIGH COURT NOTICE.

CIRCULAR ORDER ISSUED BY AUTHORITY OF THE HIGH COURT OF JUDICATURE AT FORT WILLIAM IN BENGAL.

CRIMINAL.

No. 1, *dated the* 24*th January* 1890.

For Rule 39, Clauses (*a*), (*b*), (*c*), (*cc*), (*ccc*), (*d*), (*e*), (*f*), (*g*), (*h*), (*hh*) (*i*), (*j*), and foot-notes, Chapter VI, pages 135 to 139, Criminal Rules and Orders, substitute the following:—

39.[1] [*Charges for Copies—C. O. No.* 1 *of* 24*th January* 1890]—(*a*) In all Criminal Courts a uniform charge shall be made for the preparation of copies, whether certified or uncertified, at the rate of 3 annas per folio. This term, it is to be carefully explained to all subordinate officers, merely denominates a certain quantity of manuscript; the folio to consist of 150 words English or of 300 words Vernacular, 4 figures counting as one word.

(*b*) This charge shall be levied by means of an impressed stamp of 3 annas[2] on each sheet of paper corresponding with the folio to be provided by the applicant for a copy. Each of these sheets shall contain a folio, that is, 150 words English or 300 words Vernacular. As there are 25 lines in each sheet, no line shall contain more than 6 words English or 12 words Vernacular.

(*c*) All copies, whether certified or uncertified, must, before issue, be examined by a salaried officer.[3] The copies themselves will, in all cases, be made by Section-writers, who will be remunerated at the rate of 2 annas per folio.

(*d*) Uncertified copies may be converted into certified copies upon the application of the person to whom they have been granted, and upon his filing with such application the necessary 8-anna Court-fee stamps required by law.

(*e*) Certified copy must be "certified to be a true copy," must bear the seal of the Court, and must be signed in full, if not by the Presiding Officer, then by the officer hereinafter named, viz.:—

At the head-quarters of a district—

All certified copies by the Head Clerk of the Court of the District Magistrate;

In Courts at Sub-divisions—

All certified copies by the Head Clerk of the Court of the Sub-divisional Magistrate.

In every case the certifying officer will append to his signature the words "authorised under Section 76, Act I of 1872."

[1] This rule takes effect from the 1st of April 1890.

[2] Till such stamps are available, the sheets now in use for copies, each bearing an impressed (non-judicial) stamp of 4 annas, will, after they have been overprinted with the words "3 annas" in English and in the Vernacular, be sold for 3 annas per sheet.

[3] The duty of examining copies should, as a rule, be entrusted to the Comparing or Examining Clerks, or if there none in the office, to the Head Clerk or Sheristadar. The copyists must not be allowed to examine for each other. Uncertified copies should only be marked as "examined" and initialled by the Examiner.

The words

Certified to be a true copy

authorised under Section 76, Act I of 1872.

may be impressed by means of a stamp.

(*f*) One-third of the charge of 3 annas per folio, levied by means of the impressed stamp, represents the payment to Government on account of the salary of Examiners, cost of paper, &c., the remaining two-thirds will represent the earnings of the Section-writers, whose accounts will be made up monthly, and the amount due to each paid out of contingencies.[1] These payments must be checked at the time with the upper part of each stamp, which, when the copy is ready, must be torn off each sheet, along the perforated line, and then endorsed with the copyist's name, and kept till the end of the month. Care must be taken to see that nothing in excess of two-thirds of the amount realized in stamps is paid away.

(*g*) To prevent the risk of stamped slips being used more than once, the Officer passing the copyist's account will, after checking it as directed, tear the slips to pieces and cause them to be burnt in his presence. A certificate that this has been done must be attached to the contingent bill on which the copyists' fees are drawn.

(*h*) To protect the interests of the Government, care must be taken to see that all copies issued from the Courts are prepared on the prescribed stamp paper; they must be written on one side of the sheet only, and must not contain more than the authorised number of words. On the other hand, care must be taken to see that applicants are not imposed upon by the copyists spreading their writing over a larger number of sheets than is necessary. By insisting on the number of lines in each sheet being uniform, control may easily be exercised in this matter, the number of words in a few of the lines in each folio being checked. The business of a copyist is (like most other occupations) one calling for skill and greatly dependent for its successful practice on experience; copyists, therefore, must possess or acquire skill in their business, or they ought not to be retained. Copyists who fail to do their work satisfactorily must be removed.

(*i*) When an applicant requires his copies to be furnished on the day of application, an extra fee of one rupee (or, if the copies exceed four folios, of 4 annas for each folio)[2] shall be charged on all copies so furnished, to be levied from him by a Court-fee stamp, which should be affixed to the application for the copy and be entered in the Register for Court-fee stamps. Care, however, is to be taken that other applicants for copies do not materially suffer by the arrangement. If the granting of other copies be much delayed by this rule, an extra hand ought to be told off to furnish their copies.

(*j*) Under ordinary circumstances, the time for furnishing the copies required shall not be later than 1 P.M. of the fifth open day after the presentation of the application.

(*k*) When a copy of a judgment, sentence or order is granted, the following particulars must invariably be recorded on the back of the copy itself, and in the form[3] given below for the information of the Appellate Court (Section 12, Act XV of 1877).

Date of application for the copy.....

Date of delivery of the requisite stamped sheets .....

Date on which the copy was ready for delivery[4].....

Date of making over the copy to the applicant .....

(*l*) In the case of certified copies, the Court-fee chargeable under the Court-fees Act should be levied by affixing the necessary stamp to the first folio of the copy.

(*m*) In the case of maps and plans, no general rule can be laid down. In each case a charge will have to be fixed with reference to the difficulty or intricacy of the work to be done. Half will be paid to the copyist, and half credited to Government on account of examination fees and cost of materials.[5]

List of Orders cancelled.

Circular Order (Civil) No. 8, dated 29th June 1875.

Circular Order (Civil) No 30, dated 23rd August 1879, paragraph 4.

Circular Order No. 35, dated the 1st October 1880.

General Letter No. 4, dated the 4th March 1881.

---

[1] The copyist is paid by the folio; he would get his pay according to the number of folios copied, whether the copies are subsequently taken out or not.—(H. C. No. 2168, 1881.)

[2] This is a fee for credit to Government, and no part of it is payable to the copyists. Expedition fees should be shown in column 5 of Annual Statement I, Part IV.

[3] This form is printed on the reverse of the stamped sheets now in use for copies.

[4] Compare IX, C. L. R. 293, which is to be strictly followed—(H. C. 1757, 1883.)

[5] In Criminal cases parties are entitled to obtain copies, certified or uncertified, of any portion of the record of trial, this ruling covers such Police-papers as may be made use of as evidence at the trial. As regards other Police-papers, the High Court can pass no orders—(H. C. 1972, 1880, and 1652, 1882.)

Complainants must pay copying fees whenever they want copies. But an accused is, under Section 371 of Act X of 1882, entitled, in cases other than summons cases, to a copy of the judgment absolutely free of charge and on plain paper—(H. C. Proceedings, May 1881.)

As a general rule, copies of exhibits in a Criminal case should certainly not be granted to persons who are strangers to the case. A Magistrate should use his discretion in each case, acting on the general principle that no copies should be given to a stranger without very good cause being shown—(H. C. 82, 1882.)

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

The 12th February 1890.—It is hereby notified for general information that, in exercise of the power vested in the Local Government by section 351 of Act III (B.C.) of 1884, and on the recommendation of the Commissioners of the Lohardugga Municipality, made at a meeting, the Lieutenant-Governor confirms the bye-laws set forth below, which have been framed by the Commissioners of the said Municipality, under section 350 of the said Act.

I.—For regulating business at meetings.

1. Meetings shall be either ordinary or special.

2. An ordinary general meeting of the Commissioners shall be held on the last Saturday of every month, unless the Chairman for any special reasons shall fix any other day

3. A special meeting may be called at any time by the Chairman or the Vice-Chairman.

4. All such meetings shall be convened by the Chairman, or in his absence by the Vice-Chairman, by notice to be served on each Commissioner not later than three days preceding the date of the meeting.

5. Notices of motions must be sent to the Chairman or Vice-Chairman at least two days before the meeting convened by the Chairman or Vice-Chairman. Notices received too late will be inserted in the list of business of the next succeeding meeting.

6. Meetings shall be held at the office of the Commissioners or at such place as the Commissioners in a general meeting may from time to time determine.

7. A notice-book shall be kept by the Chairman, in which all notices shall be entered. All such notices shall be dated and numbered as received.

8. Every notice convening a meeting shall be accompanied by a list of the business to be brought forward at such meeting, signed by the Chairman or Vice-Chairman.

9. At ordinary meetings the business shall be transacted in the following order, unless the President, with the consent of the majority of Commissioners present, determine otherwise:—

(*a*) The minutes of last ordinary meeting and of any special meeting held since shall be read, and if approved of as correctly entered, shall be confirmed and signed by the Chairman of the meeting.

(*b*) All correspondence of importance from higher authorities.

(*c*) Any business postponed from the last ordinary meeting shall be considered.

(*d*) The business contained in the notice of the meeting prescribed by rule 4 above shall be considered in the order in which it appears in the notice paper, unless the President, with the consent of the majority of the members present, determine otherwise.

10. No business shall be considered or proposition received at any meeting if it does not appear in the list of business, except with the consent of the majority of the Commissioners present.

11. Every motion or amendment duly made must be seconded, and until seconded no discussion on it shall take place.

12. After a motion has been moved and seconded, an amendment may be moved at any stage of the debate thereon.

13. When a motion or an amendment has been declared by the Chairman to be duly carried, no further proposal for amending the motion or amendment can be entertained.

14. Unless not less than two-thirds of the Commissioners consent by signing a requisition, no subject once finally disposed of can be reconsidered within six months.

II.—For regulating the conduct of persons employed by the Commissioners.

15. The Commissioners may fine, suspend or degrade any officer or servant engaged by them for neglect of duty or misconduct. The fine not to exceed one month's pay.

16. The Municipal officers or servants shall be liable to a fine, in addition to a forfeiture of their pay, for absence without leave; the fine not to exceed the amount of their pay for the day or days they are so absent.

17. The Commissioners may grant leave of absence to the officers or servants engaged by them either with or without pay.

18. As to the leave granted to Municipal officers, the Government rules shall apply as far as practicable.

III.—For regulating traffic in the streets.

19. No owner of any cart, carriage, or other vehicle shall allow it to be driven by a driver under 16 years of age.

20. No long bamboos shall be carried through the streets after sunset and before sunrise either by men or carts.

21. No person shall leave or keep any truck, cart or carriage or other vehicle standing on any public road except only when engaged in taking up and setting down passengers or in loading or unloading goods.

22. No person shall make a shop over any public road or drain, or in any way occupy any culvert, bridge or platform which may have been placed over any public drain, except with the permission of the Commissioners.

23. No person shall slaughter animals on or by the side of a public road.

24. No procession accompanied by beat of drum or by a band of music shall be allowed on a public road without the written permission of the Commissioners previously obtained.

25. All owners and drivers of carts laden with bricks or other materials shall be responsible for their being so secured that the contents may not fall on the road.

26. No person shall, without the permission of the Commissioners, take more than ten head of cattle at one time along any of the public roads within the limits of the Municipality, except by such routes as shall be fixed for the purpose from time to time by the Municipal Commissioners.

27. No person shall let loose or allow to be let loose or allow to get loose any diseased or worn-out animals, or use or cause to be used any such animal for the purpose of drawing any cart or other conveyance within municipal limits.

28. No person shall allow any pig to be at large or keep them otherwise than in closed styes.

29. No person shall let off any fire-balloon, firework or firearms in or near the public roads or lanes within the Municipality without the permission of the Commissioners, nor otherwise than as the Commissioners shall direct.

30. No person shall accumulate straw, jute, timber, bricks or any other materials on any public road without the permission of the Commissioners.

31. Any person required by the Act or by any bye-law under it to take out a license shall produce and show his license when required to do so by any person empowered by the Commissioners to make such requisition.

The penalty for the infringement of any one of the bye-laws from Nos. 19 to 31 shall be a fine not exceeding Rs. 20, and for continued infringement after sentence a daily fine not exceeding Rs. 5.

IV.—General bye-laws.

32. No person shall put or cause to be put on any house or other building any spout or other thing intended for the conveyance or discharge of water in such a manner that the water discharged therefrom shall be thrown into or fall upon any public road or thoroughfare.

33. No person shall keep filth, dirt, dung, ashes, bones, dead bodies, rubbish or other matter of a noxious kind on any public road, street or lane, or within close proximity to such public roads or lanes, except for the purpose of immediate removal.

34. No person shall, without the written permission of the Commissioners, set up any obstruction in any drain or water-course, and the Commissioners may order the removal of any such obstruction. (Spreading fishing nets and placing fishing traps in a drain or water-course come under the definition of obstruction.)

35. No person shall deposit or cause to be deposited any carcass of any animal in any place other than those appointed by the Commissioners.

36 No refuse resulting from any business, trade or profession shall be removed by the Municipal Commissioners except on payment for removal at the rate to be fixed by the Commissioners from time to time, and any expense incurred on this account shall be recoverable as a debt due to the Commissioners.

37. The Commissioners may require the owner or occupier of any pit, cesspool or other excavation to fill it up within a fixed time, if it appears to them to be injurious to public health. If such owners or occupiers do not comply with the order or requisition as mentioned above, the Commissioners may, instead of imposing any penalty, fill up the pit, cesspool or excavation at their own cost, to be realized from the owner or occupier under section 360 as a debt due to the Commissioners.

38. When the owners or occupiers of any land have been ordered, under section 200 of the Act, to cleanse any water-course, private tank or pool therein, they may, in addition, be ordered to remove the weeds instead of accumulating them on the slopes or banks of the tank, water-course or pool.

39. The owner or occupier of any part of the bank of any water-course or tank which is used by the public or any section of the community, or of the bank of a public drain or a private drain leading to a public drain, shall keep it free from filth, jungle and weeds; and the Commissioners may give notice, in writing, to the owner of any trees or shrubs overhanging such water-course or tank, and likely to foul the water thereof, to cut or trim the same in such a manner as the Commissioners shall direct. The Commissioners may also give a like notice to the owner of trees or shrubs overhanging any public drain or private drain leading to a public drain, and likely in any way to injure such drains and obstruct the clearing of them, to cut or trim them in such a manner as the Commissioners may think proper.

40. No person suffering from a contagious skin disease shall bathe in any tank used as a public bathing-place

41. No washerman or other person shall wash clothes in any tank or water-course except those which the Commissioners shall set apart for the purpose.

42. No person shall erect or place over a public road any kind of structure or obstruction without the written permission of the Commissioners previously obtained.

43. No person shall, without the permission of the Commissioners, cut sods or grass or remove any earth or grass from any public road or from the margin or slopes of any road or drain.

44. No person shall dig or remove from or deposit earth or any other substance in or make any alterations whatever in any public drain, or throw or place any offensive matter or rubbish on such drains without the permission of the Commissioners.

45. No person shall enlarge or deepen any existing tank or other excavation or dig a new one without the permission of the Commissioners.

46 No person shall quarry kunker, cut timber or grass or damage trees, or remove or damage any property, or deface the blocks on which the names of any road or street are engraved, or remove any boundary marks or pillars being the property of the Commissioners and within municipal limits.

47. No person shall break or cause to be broken any wall, fence, rail or post constructed for the protection of any public well, tank, drain or other excavation.

48. When any person erects any hut or building in contravention of the provision of section 236 and the bye-laws framed under it, the Commissioners shall have power to issue notice on such person to remove the external covering of his hut or building made of inflammable materials within one month, and on his failure to execute the work, the Commissioners shall have power to execute it by their own men or otherwise at their own cost, and recover the same from the owner or occupier of such house or hut as a debt due to the Commissioners.

49. No person desiring to construct a pucca privy shall do so, except with the permission of the Municipal Commissioners and according to the plan approved of by them.

50: No person shall build or cause to be built or keep after prohibition by the Commissioners any tatteo, privy or urinal within 10 feet of any public road or street. In case there is no wall at least 5 feet high between a privy and a public road, the distance from the former to the latter is to be at least 30 feet.

51. No person shall burn or cause to be burnt a corpse, or build or dig or cause to be built or dug a grave in any other place than those set apart or recognized by the Commissioners.

52. No grave once used shall be opened for the burial of another, and no grave shall be dug or built having less than 5 feet depth.

53. No person when burning or causing to be burnt any corpse in any burning ground shall permit the same to remain without being completely reduced to ashes, or shall permit the clothes or other articles connected with the burning of such corpse to remain at or near such burning-ground unless the same be completely reduced to ashes.

The penalty for infringement of any one of the bye-laws from numbers 32 to 53, both inclusive, shall be a fine not exceeding Rs. 20, and for continued infringement a daily fine not exceeding Rs. 5.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th February 1890.—Whereas a notification, dated the 24th November 1889, announcing the intention of the Lieutenant-Governor to extend the provisions of the Bengal Vaccination Act V (B.C.) of 1880 to the Tangail Municipality, in the district of Mymensingh, was published at page 261, Part IB of the *Calcutta Gazette* of the 27th idem, and whereas no objection has been raised to the proposal within six weeks from the date of the publication of the notification within the Municipality, it is hereby notified for general information that, in exercise of the power conferred on him by section 1 of the said Act, the Lieutenant-Governor extends the provisions of the Act to the said Municipality.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th February 1890.—It is hereby notified that, under section 27, Act III (B.C.) of 1884, the Lieutenant-Governor is pleased to appoint Baboo Puna Lal to be a Commissioner of the Daudnagar Municipality, in the district of Gya, *vice* Baboo Lalji Pershad, resigned.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 19th February 1890.—It is notified for general information that the declaration, dated the 21st November 1887, published at page 282, Part IB of the *Calcutta Gazette* of the 23rd idem, for the acquisition of a plot of land required by the Dacca Municipality for the excavation of new tanks for the water-works of the town, is hereby cancelled.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 22nd February 1890.—It is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 4 of Act XX of 1887, the Lieutenant-Governor has been pleased to declare that the provisions of section 3 of the said Act with respect to wild birds shall apply, so far as regards the rules that may be framed by the Commissioners of the Cuttack Municipality with the approval of Government, to deer, hares and antilope.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

The 24th February 1890. It is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 221, Act III (B.C.) of 1884, and in accordance with the recommendation of the Commissioners of the Naihati Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the provisions of sections 220 to 225, 229, 231, 234, 235, 245 to 251, 254 to 262, 265, 266, 268, 269, 270 with the exception of clause 4, 271, 272, 273 with the exception of clause 4, 274 and 277 of Part VI of the said Act, to the whole of the said municipality except the villages of Bhatpara, Kantalpara, Naihati, and Gorifa, to which the above provisions have already been extended by notification dated 3rd December 1889, published at page 269 of Part IB of the *Calcutta Gazette* of the 4th idem. The Lieutenant-Governor further sanctions the extension of the provisions of sections 237, 238 and 241 clauses 1 and 2, to the whole municipality, except the villages of Bhatpara, Kantalpara, Naihati, and Gorifa, to which the above provisions have already been extended by the aforesaid notification and excepting also the premises occupied by the Eastern Bengal Railway Company for the purposes of the Kanchrapara and Shamnagar railway stations.

PART II.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the undermentioned plots of the Nizamut lakhiraj State lands situated in the district of Nuddea will be put up to sale at the Collectorate of Nuddea on the 13th March 1890, corresponding with 1st Chyte 1296 B.S.

The purchasers of the plots will be subject to the following conditions :—

I.—The plots will be sold revenue free to the highest bidders above the upset price.

II.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

III.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount will be paid down at once.

IV.—If the amount of the purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up for sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale.

V.—The purchasers shall be put in possession on receipt of the orders of the Collector approving of the sales, but such possession shall be liable to be disturbed in case the final confirmation of the Board of Revenue should not be accorded to the proceedings.

Dacca Collectorate, the 8th February 1890.

L. HABB, Offg. Collector.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned estate, situate in the district of Maldah, will be put up to sale at the Maldah Collectorate on 26th March 1890, corresponding with 14th Chaitra 1296 B.S.

The purchasers will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.

3*rd*—If the amount of purchase money do not exceed Rs. 100, the whole amount to be paid at once.

4*th*—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Number on the district roll.	Name of estate and pergunnah.	Approximate area in acres.	Government revenue assessed.

Port Commissioners' Office, Calcutta, the 11th February 1890. E. J. BEAUMONT, Asst. Conservator.

Excise.

NOTIFICATION.

1. The right of retail sale of the Liquors and Drugs specified below will be put up to auction at the Opium Sale-room, Board of Revenue, 2, Bankshall Street, on Tuesday, the 4th March 1890, and subsequent days, in the following order :—

Name of article.	Date of sale.
Ganja, Siddhi, Charas, Majum ...	Tuesday, the 4th March 1890.
Opium, Madak, Chandu	Wednesday, the 5th ditto.
Tari	Saturday, the 8th ditto.
Country Spirit, Rum and Imported Liquor by glass.	Monday, Tuesday, and Wednesday, the 10th, 11th and 12th March 1890.

2. A complete list of all the shops for which licenses will be offered and a copy of each form of license are open to general inspection at the Office of the Superintendent of Excise Revenue, 4, Bankshall Street, and the number of these shops is not under any circumstances to be increased during the term of three years ending the 31st March 1893, except under the Board's sanction in each case. The Superintendent of Excise Revenue, however, reserves to himself the right, in case of combination, or for other cause, to transfer (subject to there being no objection on police grounds), either before or after its settlement, any shop from the site specified in the list to some other site, provided that the new site, if it is more than 100 yards from the advertised one, does not bring the shop within a quarter of a mile of any other similar shop whose term of license is unexpired.

3. It is not at present intended to open any other shop during the term of the license; but the Superintendent of Excise Revenue does not absolutely bind himself in this respect. On special cause shown, and with the sanction of the Board of Revenue in each case, the number of shops may be increased: provided, however, that, whenever a new shop is opened, it will be optional to the holder of a similar license for the sale of Liquor or Drugs, if his shop is within a quarter of a mile of the new shop, to surrender his license without forfeiting his advance, when the Superintendent of Excise Revenue is to re-settle the shop by auction or otherwise.

4. The right of retail sale of the Liquors and Drugs is to be put up to auction at the sanctioned upset prices.

5. The right of retail sale of the Liquors and Drugs is to be put up to auction in separate lots of one or more shops, either in the order specified in the list, or in such other order as the officer conducting the sale may deem fit. When one lot has been sold, the next lot is not to be put up until the sum payable in advance on account of the lot already sold has been actually paid: provided, however, that, where the sum payable exceeds Rs. 25, a promissory note may be taken from any respectable and well-known purchaser in lieu of cash payment.

6. The purchasers of the right of retail sale of Country Spirit, Rum, and Imported Liquors are entitled to sell Imported Liquors by the glass only, the liquor to be drunk on the premises.

7. The auction is to be held subject to the following conditions :—

(*a*)—That the Superintendent of Excise Revenue does not bind himself to accept the highest or any bid.

(*b*)—That the settlement with each accepted purchaser will, in Calcutta and the Suburbs, be contingent on the production by him of the usual Police certificate or license, as the case may be, viz.—

For Excise licenses for— Doasta ... ... Rum ... Imported Liquors by glass Tari ... Ganja ... Siddhi ... Charas ... Majum	If to be held in Calcutta, a Police certificate in the form prescribed by section 36, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police certificate in the form prescribed by section 19, Act II (B.C.) of 1866, must be produced.
For Excise licenses for— Opium ... ... Madak ... ... Chandu	If to be held in Calcutta, a Police license in the from prescribed by section 39, Act IV (B.C.) of 1866, must be produced; and if to be held in the Suburbs, a Police license in the form prescribed by section 23 of Act II (B.C.) of 1866, must be produced.

(*c*)—That the person accepted as the purchaser is to state in writing, within seven days from the date of settlement, in what building he purposes to open his shop, and is at the same time to submit a plan showing clearly and distinctly what building or portion thereof he desires to be covered by the license, it being understood that the removal of shops to other premises than those named in the list attached to this notification will be contingent on the approval of both the Excise and Police authorities, and that any sum which has been paid as an advance of the license fee under the provisions of clause (*d*) of these conditions will be returned to any person to whom a license may be subsequently refused for Police reasons.

(*d*)—That the term of the license is to be for three years ending the 31st March 1893, and that, except in the case of Tari, the license fee for that period is to be paid in advance in the following instalments:—namely, the sum equivalent to the fee for two months, at the time of sale, and one month's fee on the date on which the currency of the license commences, and one month's fee on the 1st day of every succeeding month, until the whole of the fee due on the license shall have been paid. In the case of Tari only one month's fee

is to be paid in advance at the time of sale, and fifteen days' fee on the date on which the currency of the license commences, and the rest of the fee in half-monthly instalments, viz., on the 1st and 16th day of every month, until the whole of the fee due on the license shall have been paid. This condition is to be strictly enforced in future, and failure to comply with it is to be met by immediate cancelment of the license.

(*e*)—That the purchaser is not to be entitled to receive back any portion of his advance in the event of his shop being closed before the expiration of the term of the license on violation of any of the conditions of the license, or his being convicted of a non-bailable criminal offence, or of any offence against the Excise laws or rules; and in the case of the surrender of a license under Act VII (B.C.) of 1878, the licensee is to give fifteen days' previous notice in writing to the Superintendent of Excise Revenue, and pay a sum equal to the license fee for fifteen days, over and above the amounts already paid in advance; and in the case of the surrender of a license under Act I of 1878, the licensee is to give one month's previous notice in writing to the Superintendent of Excise Revenue, and pay such fine not exceeding six months' license fees as the Superintendent of Excise Revenue may adjudge, over and above the amounts already paid in advance.

(*f*)—That the currency of the license is to commence on the 1st April 1890, on which date the purchaser is to open his shop, in all respects prepared for the accommodation of customers, to be certified by an Excise Officer—failure to comply with this condition is to be met by the immediate cancelment of the license, the forfeiture of the deposit, and the levy of the fees for the month except in the case of delay caused by the non-issue of the Police certificate or Police license, for which a reasonable extension of time may be allowed upon application and cause shown to the Superintendent of Excise Revenue.

(*g*)—That where the amount of the sum payable in advance is required to be paid at once in cash, and the bidder fails to make such payment, the officer conducting the sale is either immediately to put up the lot again for sale, or after the other lots in the list have been disposed of, or he may postpone the sale to such future date as he shall then and there notify; and the defaulting purchaser is to be debarred from bidding for such lot, or for any other lot, and he is not to be allowed to remain in the auction-room; and that the defaulting purchaser will be liable for any loss that may accrue to Government in case it becomes necessary to re-sell a lot at a lower rate, either in consequence of his failure to deposit the sum payable at the time of sale, or to redeem his promissory note on or before 4 P.M. on the day following that on which the note was signed.

(*h*)—That the purchasers are to adhere to all the provisions of the Opium, Excise and Police laws, and of the rules which have been or may from time to time be prescribed by the Board of Revenue.

8. All sales subsequent to the date of the triennial sale in March are to be held subject to the conditions contained in this notification, so far as they may be applicable.

9. Any further information regarding the auction may be had on application at the Office of the Superintendent of Excise Revenue.

D. G. BONNERJEE,
Superintendent of Excise Revenue,
Calcutta, the Suburbs, Howrah, and Bally.

The Indian Law Reports,

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, *including postage*, Rs. 22-8.

	Without postage. Rs. A. P.	With postage. Rs. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
,, each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
,, a part of the Calcutta Series purchased separately (*inclusive of postage in India*)	.....	2 0 0
,, a part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ...	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit.

	For town. Rs. A. P.	For mufasil. Rs. A. P.
For the Calcutta Series per copy ...	0 8 9	0 10 3
,, each of the Madras, Bombay and Allahabad Series per copy	0 5 3	0 5 9
,, the Calcutta Series. For the year ...	7 2 6	8 6 3
,, each of the Madras, Bombay and Allahabad Series. For the year ...	4 4	4 11 3

Persons desiring to subscribe for or purchase the Reports should apply to—

Superintendent, Government Press, Madras.
The Government Central Book Depôt, Bombay.
,, Curator of Government Books, North-Western Provinces and Oudh.
,, Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1889 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions for the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

H. A. D. PHILLIPS,
Under-Secy. to the Govt. of Bengal
The 24th November 1886.

BOOKS AND PUBLICATIONS

Trial of Civil Suits. In Urdu. 4*a* (1*a.*)

REVENUE DEPARTMENT.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first two volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses, both chemical and industrial; trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributions have, however, furnished the results of new discoveries, and confirmed the vernacular names; so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal pages; Volume II embraces the letter C in 682 pages; Volume III is in course of preparation, and will contain the letters D, E, F, and G. The whole work will, it is expected, be completed in six volumes by 1891; but a seventh volume may also be issued consisting of an index to all the vernacular and other names contained in the Dictionary; and this as a work of reference, it is hoped, may prove of considerable value.

The price to subscribers will be in India Rs. 30 and in England 2 guineas, *payable in advance*, for the complete set. An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

*** *No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately. The price to non-subscribers will be Rs. 45 in India, and 3 guineas in England, exclusive of packing and postage.*

Archæological Survey of India. Reports on the. By GENL. A. CUNNINGHAM, C.S.I. Super royal 8vo, full cloth. Vols. VI and XIX to XXIII only available. Rs. 8 (6*s.*) each. General Index to Volumes I to XXIII. Rs. 8 (6*s.*)

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 21st February, 1890, and, is hereby promulgated for general information :—

ACT No. III OF 1890.

An Act to amend Acts VI and VII of 1884.

WHEREAS it is expedient to amend the Inland Steam-vessels Act, 1884, and the Indian Steamships Act, 1884, in manner hereinafter appearing; It is hereby enacted as follows :— 1884. 1884.

Inland Steam-vessels Act, 1884.

1. For the definition of "inland water" in section 5, clause (*3*), of the Inland Steam-vessels Act, 1884, the following shall be substituted, namely :— Amendment of section 5 (3), Act VI, 1884. 1884.

"(*3*) "inland water" means any canal, river, lake or navigable water in British India :"

2. After section 8 of the said Act the following shall be inserted, namely :— Insertion of new section after section 8.

"8A. Before a survey under this Act is commenced, the owner or master of the steam-vessel to be surveyed shall pay to such officer as the Local Government, from time to time, appoints in this behalf— Fees in respect of surveys.

(*a*) a fee calculated on the tonnage of the steam-vessel according to the rates in the second schedule hereto annexed, or according to any other prescribed rates; and,

(*b*) when the survey is to be made in any place of survey other than Calcutta, Madras, Bombay or Rangoon, such additional fee in respect of the expense (if any) of the journey of the surveyor to the place as the Local Government, from time to time, by notification in the official Gazette, directs."

3. In section 10, sub-section (*3*), of the said Act the words "in addition to the fee payable for the certificate" are hereby repealed. Repeal of part of section 10 (3), Act VI, 1884.

4. (*1*) In section 11, sub-section (*1*), of the said Act the words "fees and other" are hereby repealed. Amendment of, and addition to, section 11, Act VI, 1884.

(*2*) To the same section the following sub-section shall be added, namely :—

"(*4*) The Local Government may, from time to time, delegate,—

(*a*) with the previous sanction of the Governor General in Council, to any person, by name or as holding an office, the function, assigned to the Local Government by sub-section (*1*), of granting a certificate of survey under that sub-section ;

(*b*) of its own authority, to any person, by name or as holding an office, the function, assigned to the Local Government by sub-section (*3*), of causing notice to be given of a certificate of survey being ready for delivery :

Provided, with respect to clause (*a*) of this sub-section, that no delegation of the function mentioned in that clause shall be construed to authorise the grant of a certificate of survey by the surveyor who gave the declaration of survey under section 9."

5. Section 12 of the said Act is hereby repealed. Repeal of section 12, Act VI, 1884.

6. In section 17 of the said Act, between the word "which" and the word "granted", in both places where the expression Amendment of section 17, Act VI, 1884.

"which granted" occurs, the words "or whose delegate" shall be inserted.

Amendment of section 19, Act VI, 1884.

7. In section 19, sub-section (*1*), of the said Act, after the words "on the application of the owner or master," the words "and the payment by him of such fee, not exceeding twice the amount of the fee for the previous survey, as the Local Government may require," shall be inserted.

Amendment of section 21, Act VI, 1884.

8. In section 21, sub-section (*2*), clause (*d*), of the said Act, for the words "for certificates of survey" the words in respect of surveys" shall be substituted.

Insertion of new section after section 25, Act VI, 1884.

9. After section 25 of the said Act the following shall be inserted, namely:—

Grant of certificates of service.

"25A. (*1*) The Local Government may in its discretion grant without examination to any person who has served as a master, or as an engineer, or as an engine-driver, of an inland steam-vessel before the first day of April, 1890, a certificate of service to the effect that he may act as a first-class or second-class master, or as an engineer, or as an engine-driver, as the case may be, of an inland steam-vessel.

(*2*) A certificate of service so granted shall have the same effect as a certificate of competency granted under this Act after examination."

Amendment of section 26, Act VI, 1884.

10. In section 26 of the said Act the words "or service" shall be inserted after the word "competency".

Addition to section 29, Act VI, 1884.

11. To section 29 of the said Act the following shall be added, namely:—

"The Local Government may also make rules with respect to the grant of certificates of service under this Act, and may by such rules—

(*a*) fix the fees to be paid for such certificates, and

(*b*) prescribe the form in which such certificates are to be framed and the manner in which the copy of the certificate which is kept by the Local Government is to be recorded."

Addition to Chapter VII, Act VI, 1884.

12. To Chapter VII of the said Act the following shall be added, namely:—

Power for Local Government to make rules for protection of passengers.

"51A. (*1*) The Local Government may also make rules for the protection of passengers in inland steam-vessels, and may by such rules require, among other matters, a sufficient quantity of fresh water to be provided free of charge in such vessels for the use of passengers, and the prices of passenger-tickets to be printed or otherwise denoted on such tickets.

(*2*) Any rule under this section may contain a provision that any owner, master or passenger committing a breach of it shall be punished with fine which may extend to fifty rupees."

Insertion of new section after section 54, Act VI, 1884.

13. After section 54 of the said Act the following shall be inserted, namely:—

Penalty for having excessive number of passengers on board.

"54A. If an inland steam-vessel has on board thereof or on or in any part thereof a number of passengers which is greater than the number of passengers set forth in the certificate of survey as the number which the vessel or the part thereof is, in the judgment of the surveyor, fit to carry, the owner and master shall, for every passenger over and above that number, be each liable to a fine which may extend to ten rupees."

Amendment of heading to second schedule, Act VI, 1884.

14. In the second schedule to the said Act, for the words and figures "*See section 12*" the words, figure and letter "*See section 8A*" shall be substituted.

Indian Steamships Act, 1884.

Insertion of new section after section 10, Act VII, 1884.

15. After section 10 of the said Act the following shall be inserted, namely:—

Fees in respect of surveys.

"10A. Before a survey under this Act is commenced, the owner or master of the steamship to be surveyed shall pay to such officer as the Local Government, from time to time, appoints in this behalf—

(*a*) a fee calculated on the tonnage of the steamship according to the rates in the schedule hereto annexed or according to any other prescribed rates and

(*b*) when the survey is to be made in any port of survey other than Calcutta, Madras, Bombay or Rangoon, such additional fee, in respect of the expense (if any) of the journey of the surveyor to the port, as the Local Government, from time to time, by notification in the official Gazette, directs."

Repeal of part of section 12 (3), Act VII, 1884.

16. In section 12, sub-section (*3*), of the said Act, the words "in addition to the fee payable for the certificate" are hereby repealed.

Amendment of, and addition to, section 13, Act VII, 1884.

17. (*1*) In section 13, sub-section (*1*), of the said Act the words "fees and other" are hereby repealed.

(*2*) To the same section the following sub-section shall be added, namely:—

"(*4*) The Local Government may, from time to time, delegate,—

(*a*) with the previous sanction of the Governor General in Council, to any person, by name or as holding an office, the function, assigned to the Local Government by sub-section (*1*), of granting a certificate of survey under that sub-section;

(*b*) of its own authority, to any person, by name or as holding an office, the function, assigned to the Local Government by sub-section (*3*), of causing notice to be given of a certificate of survey being ready for delivery;

Provided, with respect to clause (*a*) of this sub-section, that no delegation of the function mentioned in that clause shall be construed to authorise the grant of a certificate of survey by the surveyor who gave the declaration of survey under section 11."

Repeal of section 14, Act VII, 1884.

18. Section 14 of the said Act is hereby repealed.

Amendment of section 19, Act VII, 1884.

19. In section 19 of the said Act, between the word "which" and the word "granted", in both the places where the expression "which granted" occurs, the words "or whose delegate" shall be inserted.

Amendment of section 21, Act VII, 1884.

20. In section 21, sub-section (*f*), of the said Act, after the words "on the application of the owner or master," the words "and the payment by him of such fee, not exceeding twice the amount of the fee for the previous survey, as the Local Government may require," shall be inserted.

Amendment of section 24, Act VII, 1884.

21. In section 24, sub-section (*2*), clause (*d*), for the words "for certificates of survey" the words "in respect of surveys" shall be substituted.

Amendment of heading to second schedule, Act VII, 1884.

22. In the schedule to the said Act, for the words and figures "*See section 14*" the words, figures and letter "*See section 10A*" shall be substituted.

S. HARVEY JAMES,
Secretary to the Government of India.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 1st February, 1890.

Present:

The HON'BLE SIR STEUART COLVIN BAYLEY, K.C.S.I., C.I.E., Lieutenant-Governor of Bengal, *presiding.*

The HON'BLE SIR CHARLES PAUL, K.C.I.E., *Advocate-General.*

The HON'BLE F. B. PEACOCK.

The HON'BLE P. NOLAN.

The HON'BLE T. T. ALLEN.

The HON'BLE SIR HENRY HARRISON, KT.

The HON'BLE SIR ALFRED CROFT, K.C.I.E.

The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.

The HON'BLE C. H. MOORE.

The HON'BLE H. PRATT.

The HON'BLE SHAHZADA MAHOMMED FURROKH SHAH.

The HON'BLE DR. RASH BEHARY GHOSE.

The HON'BLE RAJA RAMESHWAR SING BAHADUR.

BENGAL VACCINATION BILL.

THE Hon'ble SIR HENRY HARRISON moved that the Report of the Select Committee on the Bill to amend the Bengal Vaccination Act, 1880, and Act II, 1887, be taken into consideration in order to the settlement of the clauses of the Bill.

The Motion was put and agreed to.

The Hon'ble SIR HENRY HARRISON also moved that the clauses of the Bill be considered for settlement in the form recommended by the Select Committee.

He said:—"I have explained the object of the Bill at a previous meeting, and it is therefore not necessary for me to say anything further on this occasion."

The Motion was put and agreed to.

The Hon'ble SIR HENRY HARRISON also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

CALCUTTA PORT BILL.

His Honour the PRESIDENT said:—"Before adjourning the Council, I think I owe a few words to it in explanation of the omission from the list of business of the Ports Bill which had been originally entered in the list of business for discussion to-day.

"You will recollect that a fortnight ago we adjourned without considering it, in order that the Chamber of Commerce might have an opportunity of submitting a memorial, which we understood was in the course of preparation for our consideration.

"On Wednesday last, my friend, the Hon'ble Mr. Moore, told me he was afraid he would have to ask for another postponement in consequence of the absence of the Chamber's legal adviser. I asked him to see if the postponement could not be avoided, but I heard from him yesterday that he had been unable to get the memorial considered in time for us to take it up to-day, and he again asked for an adjournment. Upon that I took it on myself to exclude the motion from the list of business for to-day.

"Since then (yesterday) I received an application, which I think is in your hands, from the Secretary of the British Indian Association, which requests us that we will postpone for a fortnight the consideration of the Select Committee's report in view of the Committee laying before the Council some further representation regarding section 85.

"I may add that the Secretary says 'that the question of title in riverbanks having been treated by the Select Committee as one of general application, my Committee venture to hope that His Honour the Lieutenant-Governor will be pleased to recognize its importance by granting their prayer.'

"On this occasion I am very glad that we are able to meet their wishes without adding to the inconvenience of the Council, but I think I must protest against a body of the importance of the British Indian Association addressing us two days before the Bill is down for final consideration, asking us to postpone that consideration with reference to a point which has been discussed in all the newspapers since the issue of the report of the Select Committee which has been before them for five whole weeks, and regarding a section which has been the law of the land, with a slight alteration, for the last twenty years. I think it would be more respectful to the Council, and more conducive to public business, if they would take matters of that kind into their consideration a little earlier before the date of actual discussion in Council.

"On this occasion, as I said, I am very glad to be able to meet their wishes, but I do hope that, on Saturday fortnight, to which I propose to adjourn the Council, this Port Bill may be brought up for discussion and settlement."

The Council adjourned to Saturday, the 15th February, 1890.

CALCUTTA;
The 3rd February, 1890.

C. H. REILY,
Assistant Secretary to the Govt. of Bengal, Legislative Department.

EXTENSION OF THE BENGAL TENANCY ACT TO ORISSA.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 24th January, 1890.

RESOLUTION.

READ—

A letter from the Commissioner of Orissa, No. 1850, dated 4th November, 1886, on the subject of the extension of the Bengal Tenancy Act to that Division.

A letter from the Board of Revenue, No. 975A, dated 17th December, 1889, with enclosures, regarding the arrangements to be made for the survey and settlement of Orissa.

THE Collector of Balasore recommended in 1885 that the Lieutenant-Governor should, in the exercise of the power vested in him by section 1, immediately extend the Bengal Tenancy Act of that year to Orissa. The proposal received no local support at the time, and was considered premature by this Government; but it has since been renewed in connexion with the survey and settlement of the Division which is now being taken in hand. The Director of the Department of Agriculture and Land Records has represented that the settlement laws now in force in Orissa, that is to say, Regulation VII of 1822 and Bengal Act VIII of 1879, read with Act X of 1859, do not supply an adequate machinery for adjusting rents, inasmuch as they do not require the ryots to question the Settlement Officer's proceedings till the record is completed, and that the procedure which they established has proved practically unworkable where it has been contested. He observes—

"In proceedings under Chapter X of the Tenancy Act, the case is otherwise. The Settlement Officer's decision has the force of a decree; it must be appealed against within 30 days of the date of the order, and the appeal lies to the superior court of a Special Judge. Settlement proceedings under Chapter X of the Tenancy Act have therefore a sanction and finality which do not attach to proceedings under Act VIII of 1879. Moreover, experience has shown that proceedings under Chapter X of the Tenancy Act, besides being final, can be worked harmoniously and satisfactorily. It appears to me, therefore, that Chapter X of the Tenancy Act should be extended to those portions of Orissa which are from time to time brought under survey.

"The extension of Chapter X to any particular area involves also the extension of the sections of the Act relating to the determination of the status of tenants and to the enhancement and reduction of rent, *i.e.* sections 19 to 38. As a record of rights will have to be made and fair rents settled under Chapter X, it is evident that the rules for determination of the status of tenants and determination of fair rents prescribed in the Act must also be followed."

There is also some reason to believe that if the most important portion of the Act is extended to Orissa, it will be convenient to introduce the law in its entirety. It is a question, however, whether the provisions as to preparing price-lists (section 39) and as to the payment of landlords' fees on transfers of tenures (sections 12 and 13) should not be excluded. The provisions as to judicial procedure and sales on decree (Chapters XIII and XIV) may, moreover, be found unsuitable to a province in which rent suits are still tried by Revenue officers.

2. The opinion of the Board and of the Revenue officers employed in Orissa is awaited on the subject; and, as the matter is of considerable public importance, the Lieutenant-Governor will be glad to receive any expression of opinion which may be offered by those interested. Such opinions should be transmitted to this Government before the 15th of April next.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* for the information of the public.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Govt. of Bengal.

THE CANAL REVENUE REPORTS FOR 1888-89.

No. 198 *I.A.*

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Calcutta, the 3rd February 1890.

RESOLUTION.

READ—

The Canal Revenue Reports for 1888-89, and Chief Engineer's Note on same.

The outlay, direct and indirect, on canals in Bengal, for which capital accounts are kept, amounted at the close of the year 1888-89 to Rs. 7,15,56,843. Of this sum Rs. 6,05,42,061 is the amount spent on Major Irrigation Works and charged to Loan Funds; while the expenditure on Minor Works was Rs. 1,10,14,782, of which Rs. 93,75,327 was provided from Provincial revenues, Rs. 8,66,000 was the grant contributed by the Imperial Government from Famine Relief and Insurance Funds in aid of the construction of the Orissa Coast Canal, and Rs. 7,73,455, representing expenditure on surveys and investigations for irrigation works which have not been carried out, was provided from Imperial revenues, but is not now chargeable with interest.

On Major Works the capital outlay during the year was Rs. 7,92,776, of which Rs. 6,38,718 represents the progress made with the revised project for the Orissa Canals, and Rs. 1,51,340, the expenditure on the Sone system; that on Minor Works was Rs. 1,49,475, of which Rs. 1,01,306 was spent on the Orissa Coast Canal, now nearly completed and open to traffic throughout its length, and Rs. 47,862 on the Circular and Eastern Canals.

2. The length of the canals in Bengal now in operation is altogether 864 miles, of which 621 miles are navigable. The area which, in their present state of completion, they are capable of irrigating is 1,422,319 acres, and the area actually irrigated in 1888-89 was 574,216 acres, the crops raised on which are valued at Rs. 1,81,10,045.

The traffic is represented by 195,140 boats which plied on the canals with passengers or cargo, and measured 3,747,300 tons. These figures do not include the traffic on the Nuddea rivers, which were brought under the management of the Public Works Department at the commencement of the year. On these rivers the boats which paid toll were 48,224 in number, and were measured at 839,502 tons.

3. Receipts and expenditure are shown in the following statement, where the results of three years can be compared :-

	1888-89.		1887-88.		1886-87.	
	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.
Major Irrigation Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals	2,43,294	4,05,019	2,22,679	5,02,450	1,79,519	5,20,548
Midnapore Canal	2,51,510	2,09,804	2,33,925	2,50,396	2,33,974	2,35,038
Hidgellee Tidal Canal	55,097	78,040	41,858	66,976	53,494	22,735
Sone Canals	8,31,278	7,94,432	5,88,618	7,52,348	9,02,692	5,97,821
Total ...	13,81,179	14,87,295	10,87,080	15,72,170	13,69,679	13,76,137
MINOR WORKS AND NAVIGATION.						
Irrigation and Navigation Works.						
Sarun Canals	20,814	36,332	20,665	29,307	12,427	28,659
Calcutta and Eastern Canals ...	5,75,125	2,93,801	5,79,934	2,24,656	4,83,654	1,92,264
Orissa Coast Canal	66,174	77,018	53,837	83,507	29,488	61,426
Total ...	6,62,113	4,07,151	6,54,436	3,37,560	5,25,569	2,82,349
GRAND TOTAL ...	20,43,292	18,94,446	17,41,516	19,09,730	18,95,248	16,58,486

The net deficit on Major Works is Rs. 1,06,116 contrasting with deficits in 1887-88 of Rs. 4,85,090 and in 1886-87 of Rs. 6,458, while Minor Works shew incomes in 1888-89 of Rs. 2,54,962, in 1887-88 of Rs. 3,16,876, and in 1886-67 of Rs. 2,43,220. All irrigation works taken together shew a net income in 1888-89 of Rs. 1,48,846; but as interest charges payable to the Imperial Government on the capital spent on Major Works amounted to Rs. 23,39,849, the actual deficit to be met from Provincial revenues was Rs. 21,91,003.

4. The better results of 1888-89 as compared with 1887-88 have been mainly due to increased receipts, but the statement shews that considerable reductions of expenditure were also effected. In Orissa one great outlet of expenditure, the reconstruction of the two weirs which were partially overthrown by the floods of 1886, a work which for two years has been a heavy charge on the revenues of the Orissa Canals, is now happily closed. On the other hand, the ordinary maintenance charges of these canals are found to be higher than usual, a point to which the attention of the Superintending Engineer has been drawn in the Chief Engineer's Note. It seems probable, however, that, so long as the reconstruction of the weirs was in progress, expenditure on ordinary repairs was restricted to the more imperative requirements of the works, and more therefore had to be spent in 1888-89 in carrying out repairs which could be and had been postponed for a while. The cost of establishment chargeable against Revenue, which in 1886-87 was Rs. 5,16,714 for the works given in the table above, rose in 1887-88 to Rs. 7,21,376, an increase due not to greater extravagance in the establishment employed, but to the introduction of a new and fairer method of distributing establishment charges between Irrigation and Roads and Buildings. For 1888-89 the corresponding figure is Rs. 7,01,050, and the saving would have been greater but for an increase of Rs. 27,996 in the cost of establishments employed under Civil officers for the collection of revenue on the Orissa, Midnapore and Sone Canals, an increase which was due chiefly to the greater amount of work involved in realising the heavier collections. On the whole, therefore, there has been a substantial saving in the charges incurred for establishment on the maintenance and management of the canals. The occurrence of this saving can be traced chiefly to the increased amount of work carried out by the Irrigation staff on Roads and Buildings, and the consequent transfer of a larger share of establishment charges from the Irrigation to the Roads and Buildings Branch. Similarly the larger Capital expenditure in 1888-89, on works not chargeable to Revenue, has tended to relieve the canal Revenue account of a portion of its establishment charges.

5. The revenue collected in the last three years on the works mentioned in the above statement is shown below:—

Head.	Revenue		
	1888-89.	1887-88.	1886-87.
	Rs.	Rs.	Rs.
Water-rates	10,22,352	7,69,362	10,43,342
Navigation	9,74,105	9,21,482	7,88,685
Miscellaneous	60,298	66,838	80,171
Total ...	20,56,755	17,57,682	19,12,198
Less refunds of revenue	13,463	16,166	16,950
Net total receipts ...	20,43,292	17,41,516	18,95,248

6. The recovery of the revenue derived from water-rates from the depression of 1887-88 was assisted by the character of the irrigation season of 1888-89, which was such as to lead to a full appreciation of the value of canal water. On the Sone Canals, where collections had been to some extent suspended in consequence of the agitation of the previous year, the receipts rose from Rs. 5,19,586 to Rs. 7,59,556, and it is clear that the efforts of the managing staff to restore public confidence in the canals have been attended with success. Irrigation in Orissa also has received a fresh impetus, and the collections of 1888-89 are higher than those of any year since 1882-83, while on the Midnapore Canal, where no great development of irrigation can be expected owing to the limited and fluctuating character of the source of supply, there is a slight improvement on the results of 1887-88.

7. The activity of irrigation in 1888-89 is evident from the figures in the following table, where actual areas irrigated during the last three years are shown :—

		1888-89.	1887-88.	1886-87.
		Acres.	Acres.	Acres.
Orissa ...	Kharif	156,319	108,867	75,115
	Rabi	2,779	502	2,440
	Perennial	194	137	154
	Total ...	159,292	109,506	77,709
Midnapore ...	Kharif, including boro rice crop	69,777	65,864	69,762
Sone ...	Kharif	69,628	57,595	30,082
	Rabi	69,817	27,501	16,662
	Perennial	4,600	6,265	11,626
	Hot-weather	11,762	13,855	15,278
	Five-year lease ...	200,102	210,164	194,556
	Total ...	355,909	315,380	268,204
	Total Major Works ...	584,978	490,750	415,675
Sarun ...	Kharif	3,897	1,699	566
	Rabi, including hot-weather...	3,316	2,519	1,580
	Total Minor Works ...	7,213	4,218	2,146
GRAND TOTAL, MAJOR AND MINOR WORKS ...		592,191	494,968	417,821

8. The "earnings" of the year's work, of which the above table shows the extent, are as follows :—

	Water rates earned. 1888-89.
	Rs.
Orissa Canals	2,42,808
Midnapore Canal	1,31,433
Sone Canals	8,05,790
Sarun Canals	21,850
Total ...	12,01,881

These sums represent the whole of the liabilities incurred by cultivators on crops raised by canal water during the year. In previous years the definition of the word "earnings" has been restricted to the assessments, which were not only fully completed, but also legally recoverable within the year. Exact returns of "earnings" (in the wider sense of the word now adopted) are not available for previous years ; but owing to the extended use of canal water already noticed, the earnings of 1888-89 considerably exceed those of 1887-88 and 1886-87. This is in favour of good collections in 1889-90.

9. The arrears of water-rates outstanding at the close of each of the last three years are shown in the following statement :—

NAME OF CANAL.	ARREARS.		
	1st April 1889.	1st April 1888.	1st April 1887.
	Rs.	Rs.	Rs.
Orissa Canals	1,14,597	92,109	87,458
Midnapore Canal	84,773	56,493	50,749
Sone Canals	3,80,613	4,11,281	2,31,582
Sarun Canals	34,927	33,492	32,712
Total ...	6,14,910	5,93,375	4,02,501

NOTE.—The figures are those of the Examiner, Public Works Accounts ; but it is believed that they will require correction, since they do not agree with those given by the Superintending Engineer, which again differ from those of the Collector.

The reduction effected in the outstanding balances of the Sone Canals is less than the increments in the balances of the Orissa and Midnapore Canals taken together. The progress made with collections on each system can be compared as follows :—

	Percentage of current demand adjusted.	Percentage of arrear demand adjusted.
Sone Canals	60	80
Midnapore Canal	34	89
Orissa Canals	46	72

These results (except in the case of the Sone Canals) cannot be considered good, and it is again necessary to call the attention of district officers in Orissa and Midnapore to the steady growth of the arrear balances as a subject which demands early and energetic treatment.

10. In Navigation Receipts improved results are shown on all the lines except the Calcutta and Eastern Canals. There is reason to suppose that the income from this route, on which the traffic receipts are greater than on all the other canals of the province combined, is being unfavourably effected by the competition of the Central Bengal Railway. Under arrangements which existed before the construction of the railway, when the canals had a monopoly of the traffic, and which have not yet been altered, tolls are only collected at the Calcutta terminus of the boat-route; and the railway is thus enabled to tap the canal traffic before the latter has paid toll, and therefore at present competes with the canal at an advantage. The actual tollage collections for each system are given below for three years—

Year.	Orissa Canals.	Midnapore Canal.	Hidgellee Tidal Canal.	Orissa Coast Canal.	Sone Canals.	Calcutta and Eastern Canals.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1886-87	58,604	1,09,693	51,994	28,587	49,685	4,73,193	7,71,706
1887-88	66,628	1,20,574	40,406	52,828	50,084	5,71,872	9,09,292
1888-89	69,850	1,46,760	53,910	65,010	52,162	5,65,491	9,53,183

On the Nuddea rivers the collections fell from Rs. 1,98,318 to Rs. 1,91,749.

11. The number of complaints which came up for disposal during the year was altogether 14,710, of which 12,506 were complaints made during the year and 2,204 were old complaints left over for disposal from the files of the previous year—

	Orissa.		Midnapore.		Sone.		Total.	
	Number.	Percentage on cases disposed of.	Number.	Percentage on cases disposed of.	Number.	Percentage on cases disposed of.	Number.	Percentage on cases disposed of.
Pending from last year	1,503	.....	84	.....	615	.....	2,212	.....
Filed during the year	3,789	.....	1,647	.....	7,062	.....	12,498	.....
Total ...	5,292	.....	1,731	.....	7,687	.....	14,710	.....
Disposed of { Admitted	.....	.....	216	11·5	2,253	39·0	.....	.....
Disposed of { Dismissed	.....	.....	1,276	85·5	3,519	61·0	.....	.....
Total ...	4,110	100·0	1,492	100·0	5,772	100·0	11,374	100·0
Pending on 31st March 1889 ...	1,182	.....	239	.....	1,915	.....	3,336	.....
Area irrigated in 1888-89 ... Acres	169,292		59,777		335,909		564,978	
Proportion of acres irrigated to one complaint (current year only).	43·04		42·3		50·4		46·7	
Ditto for 1887-88 (including cases pending from previous years).	37·9		78·3		46·7		47·5	

The above table, which is an abstract of the information given in the various Revenue reports on the filing and disposal of complaints, is defective in the case of the Orissa Canals, where the Deputy Revenue Superintendent has failed to distinguish the claims admitted and those rejected. Also, since in the reports of 1887-88 current and pending complaints were taken together, it is impossible to exactly compare the work done in each year. As, however, the number of complaints, current and pending, in 1887-88 was 10,332, being in the ratio of 1 : 47·5 to the number of acres irrigated, while in 1888-89 the number of current complaints is 12,498 and the ratio 1 : 46·8, it is clear that not only was the number of complaints greater in the latter year, but the proportion of complaints with regard to the area irrigated has also risen. In the case of the Midnapore Canal that proportion has almost doubled—an unsatisfactory state of affairs which should have received attention in the reports of the officers responsible.

12. The number of certificates issued for the recovery of arrears has fallen from 28,805 to 19,536, and the number pending at the close of the year from 19,536 to 15,880—

	Pending at close of 1887-88.	Instituted during 1888-89.	Total.	Disposed of.	Pending at close of 1888-89.
Midnapore	5,310	11,201	16,511	9,326	7,185
Orissa	9,047	5,259	14,306	8,553	5,753
Sone	5,179	4,216	9,395	6,453	2,942
Total ...	19,536	20,676	40,212	24,332	15,880

The reduction in the cases pending has been effected entirely on the Sone and Orissa Canals, as in Midnapore there is a considerable and highly unsatisfactory increase, notwithstanding that the number of cases disposed of is actually higher than in either of the other systems. The percentage, however, of cases disposed of, as compared with the number pending and instituted, is not so good, the respective percentages being for Midnapore 56·5, Orissa 59·8, and Sone 68·7. Judging by the very large proportion of cases struck off compared with the total number disposed of in Midnapore, namely, 5,478, or nearly 59 per cent, it appears probable that sufficient care is not exercised in issuing these certificates, and that much unnecessary work is in consequence thrown on the officer who is trusted with their disposal.

13. The Lieutenant-Governor notes with satisfaction the names of the various officers to whom Colonel Harrison awards special praise, and he takes this opportunity, on Colonel Harrison's connection with the province being severed, of recording his acknowledgment of the excellent service rendered by him during his tenure of the office of Chief Engineer and Joint-Secretary, and of the admirable tact and judgment which Colonel Harrison has always displayed in administering the department confided to him.

ORDER.—Ordered that a copy of this Resolution, and of the Note and its accompaniments, be submitted to the Government of India, in the Public Works Department, for information; also that copies be forwarded to the Appointment, Revenue, and Financial Departments of this Government; the Board of Revenue, Lower Provinces; the Commissioners of the Presidency, Burdwan, Patna, and Orissa Divisions; the Collectors of the 24-Pergunnahs, Nuddea, Hooghly, Midnapore, Burdwan, Patna, Shahabad, Gya, Sarun, Cuttack, and Balasore; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and Examiner, Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON, *Lieut.-Col.*, R.E.,
Offg. Joint-Secy. to the Govt. of Bengal,
P. W. Dept.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

IRRIGATION BRANCH.

REVENUE REPORT.

Note by LIEUTENANT-COLONEL C. W. I. HARRISON, R.E., *Chief Engineer, on the Canal Revenue Reports for the year* 1888-89.

THE Capital expenditure on Irrigation Works, for which Capital accounts are kept, amounted during the year 1888-89 to Rs. 9,19,020 for direct and Rs. 23,231 for indirect charges—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	7,74,547	18,229	7,92,776
Minor Works and Navigation, Provincial	1,44,473	5,002	1,49,475
Total ...	9,19,020	23,231	9,42,251

2. The total Capital outlay at the end of the year 1888-89, including indirect charges, was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works.			
Productive Public Works. ...	5,88,83,503	16,58,558	6,05,42,061
Minor Works and Navigation.			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial } ...	98,67,297	2,81,485	1,01,48,782
Total ...	6,96,16,800	19,40,043	7,15,56,843

3. The above outlay is divided under the different projects in the following statement:-

Works.	During 1888-89.			To end of 1888-89.		
	Direct charges.	Indirect charges.	Total.	Direct charges.	Indirect charges.	Total.
Major Irrigation Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	6,23,439	15,279	6,38,718	2,35,37,322	5,31,481	2,40,68,803

INTEREST.

5. The total amount of interest payable to the Imperial Treasury on account of Major Irrigation Works for the year 1888-89 is Rs. 23,39,849.

FINANCIAL RESULTS.

6. The following statement shows the financial results of both Major Irrigation Works and Minor Works and Navigation, of which Capital and Revenue Accounts are kept, to the close of the year 1888-89:—

	Major Irrigation Works.	Minor Works and Navigation.
	Rs.	Rs.
Direct revenue	1,51,85,443	2,05,73,482
Working expenses (direct charges)	1,58,26,535	79,97,925
Results on direct charges only ... Loss ...	6,41,092	Profit ... 1,25,75,557
Indirect charges debitable to revenue ...	8,27,907	... 2,05,967
Results on both direct and indirect charges ... ... Loss ...	14,68,999	Profit ... 1,23,69,590
Charges for interest on Capital	3,40,63,927	Not calculated.
Net results, including interest to end of 1888-89 ... ... Loss ...	3,55,32,926	

Thus on Major Irrigation Works the net loss including interest is Rs. 3,55,32,926, or 58·69 per cent., of the gross Capital outlay, including all charges.

7. The financial results of Minor Works and Navigation, of which only revenue accounts are kept, are shown below:—

	Rs.
Direct revenue	78,22,208
Working expenses (direct charges)	42,44,206
Results on direct charges only ... ... Profit ...	35,78,002
Indirect charges debitable to revenue	2,21,813
Results on both direct and indirect charges ... Profit ...	33,56,189

EXPENDITURE.

8. The expenditure on, and receipts from, Irrigation, Navigation, and Agricultural Works during the year 1888-89, as compared with those of the year 1887-88, are shown below:—

EXPENDITURE.	1888-89. Rs.	1887-88. Rs.
42—Major Irrigation Works, Working Expenses—		
Provincial	14,87,295	15,72,170

Receipts.

Note.—Commencing with the year 1888-89, "Refunds of revenue" are treated as reduction of receipts and not as charge against Working Expenses, and "Indirect charges" are shown in addition to direct charges under Working Expenses, in accordance with the suggestion contained in Government of India's letter No. 154*I*, dated 15th August 1889.

9. The areas irrigated during the year 1888-89 and the four preceding years, by the Major Irrigation Works, are shown in the following statement:— Area irrigated.

The year's working and its financial results will now be dealt with separately for each of the canal systems of the province.

ORISSA CANALS.

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT. Capital account.

Heads of account.	Outlay during 1888-89.	Outlay to end of 1888-89.
Direct charges.	Rs.	Rs.
I.—Works	4,88,452	1,69,03,279
II.—Establishment	1,06,375	43,03,670
III.—Tools and plant	15,043	20,01,555
IV.—Suspense accounts	21,307	1,46,525
Loss by exchange	...	2,68,070
Total ...	6,31,177	2,36,23,099
V.—*Less*—Receipts on Capital account ...	7,738	85,777
Net total direct charges ...	6,23,439	2,35,37,322
Indirect charges.		
Capitalization of abatement of land revenue ...	386	32,842
Leave and pension allowances	14,893	4,98,639
Total indirect charges ...	15,279	5,31,481

The capital outlay of 1888-89 shown in this statement represents the progress made with the works provided in the revised estimates of the Orissa Project. Owing to a slight scarcity of food-supply in the district, a more plentiful supply of labour was available than has been the case for some years, and the amount of earthwork carried out on canal and distributary banks, drainage works and protective embankments was more satisfactory. The additional lengths completed and the fresh areas brought under command, or provided with distributaries, will be shown in a later paragraph. The list of masonry works and buildings either put in hand or brought to completion also indicates a fair rate of progress during the year.

Indirect charges	18,073	Deficit	70,282
Total working expenses ...	4,05,019	Total ...	4,05,019

By the orders of the Government of India, a change is now introduced in the method of calculating the amount of water-rates shown as "earned" in the above statement. Under the rules in force on the Orissa canals, a portion of the water-rates assessed in any year do not become legally due until the 1st May, and a further portion till the 1st June, of the following year. Hitherto, therefore, as explained in previous Revenue Reports, the earnings of each year have been calculated by excluding those instalments of the assessments which would not become due till the year following; but, on the other hand, including those instalments of the assessments of the previous year, which, though undoubtedly earned in that year, have only become due in the year under report. The amount thus arrived at has hitherto been shown in the statistical table IVC attached to each report as the amount of revenue assessed. In this and future reports, however, the 'earnings' of a year will be taken to mean the amount of the liabilities incurred by cultivators for water supplied during that year, without regard to the date on which those liabilities may become legally recoverable. The statement also now for the first time includes, on the expenditure side, indirect as well as direct charges. EARNINGS.

12. The lengths of the canals and distributaries in operation at the close of the year 1888-89, compared with 1887-88, are given in the statement following:— LENGTH OF CANALS

Name of Canal.	1888-89.								1887-88.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated. There has been an increase of 6½ miles in the length of canals intended for the purposes both of irrigation and navigation, and of 13 miles in the length of those to be used for irrigation only. The former increase is due to the completion of the Jajepore Canal in the Brahmini-Byturni Series, which was opened for traffic in the month of August 1888, and the latter to the completion of the Machgong Extension Canal in the Mahanuddee Series, as far as the 32nd mile, up to which point it has been filled with water.

There has been no increase in the length of village channels, and none are in progress upon any of the canals, but the length of distributaries has increased during the year to the extent of 42½ miles, of which 6¾ miles are on the Kendrapara and Pattamoondi Canals, and 35¾ miles on the High Level Canal, Range III, where the whole length of distributaries proposed to be constructed has been completed with the exception of about two miles of main distributary, and a few minor branches required for affording irrigation to the high ground near the Main Canal and the Orissa Trunk Road. The area protected from flood remains the same as it was in the previous year, as the Daib embankment has not yet been fully completed, but there is an increase of 98,851 acres in the area under command in consequence of the completion of that portion of the Machgong Extension Canal which lies above the 32nd mile, and of the Jajepore Canal, the former of which has added 28,851 acres, and the latter 70,000 acres to the area commanded. The area provided with distributaries has also increased to the extent of 24,132 acres, of which 3,402 acres, are on the Kendrapara, Pattamoondi and High Level, Range I, canals of the Mahanadi Series, and 20,730 acres, on the High Level Canal, Range III, of the Brahmini-Byturni Series.

RAINFALL.

13. The rainfall of the year 1888-89 and of the previous year in the Cuttack and Balasore districts is given in the Statistical Table No. IVE. In both districts the total fall registered is very nearly the same as that registered in 1887-88.

The average rainfall at the thirteen stations situated within the area commanded by the Orissa canals for nineteen years is 55·18 inches, whilst the fall of the year at the same stations was 47·94, or 7·24 inches below the average.

From the statement of rainfall at the eleven stations in the upper districts drained by the Mahanadi, which has been supplied by the Superintending Engineer, it appears that the average fall during the year under review was 43·08 inches against 52·18 inches of the year 1887-88, showing a decrease of 9·10 inches. The average for the last seven years up to and including 1887-88 was 46·22 inches, so that the fall of the year under review is somewhat below the average.

From the table below, which gives the average rainfall observed during the kharif and rabi months during the last seven years at thirteen stations within the tract irrigated by the Orissa canals, it is evident that the kharif rains, though on the whole more plentiful than usual, were unequally distributed, a very short fall being registered in July and October, while that of August was unusually large. The deficiency in October was, however, partly made up by an increase in November, when the quantity registered was 2·01 inches in excess of the fall of the previous year :—

		AVERAGE OF THIRTEEN STATIONS.

IRRIGATION.

14. The following statement shows the areas irrigated and yearly rainfall since the year 1879-80:—

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
	Acres.	Acres.	Acres.	Acres.	Inches.
1879-80	105,186	3,616	236	109,038	60 85*
1880-81	112,171	4,877	173	117,221	85·10*
1881-82	126,611	5,403	264	132,278	56·92†
1882-83	128,530	4,100	398	133,028	59·03†
1883-84	47,035	1,381	344	48,760	57·21†
1884-85	54,181	2,994	197	57,372	50·40†
1885-86	70,563	1,605	171	72,339	52·59†
1886-87	75,115	2,440	154	77,709	60·07†
1887-88	108,867	502	137	109,506	47·84†
1888-89	156,319	2,779	194	159,292	47·94†

* Mean of observations in Cuttack and Marsaghai.

† Ditto ditto at 13 stations throughout canal-irrigated area.

The spread of kharif irrigation has again been very marked, as the area which has taken water during 1888-89 is greater by 47,452 acres than the irrigated area of 1887-88, and greater by 27,789 acres than the irrigated area of any year since the construction of the canals. The partial failure of the July rains and the drought in October were the main causes which brought about this result.

To compare with 1887-88, of the increase of 47,452 acres in kharif irrigation, 18,019 acres are contributed by the High Level Canal, Range III, where the rate of increase is as much as 241 per cent., and 16,257 acres by the Kendraparah Canal. All the canals, however, show improved results, the lowest rate of increase being on the High Level Canal, Range II, where it was 18 per cent. Of the 2,227 more acres of rabi irrigated, 2,114 acres represent the increase on the Kendraparah Canal.

The whole area of all crops irrigated, being 159,292 acres, bears a ratio of 63 per cent. to the area under command of distributaries, already given as 250,919 acres. The ratio by canals is as follows:—

	1887-88.	1888-89.	Increase.
Kendraparah system	54·2	70·8	16·6
Taldundah ditto	54·9	71·0	16·1
High Level, Range I	32·0	37·0	5·0
High Level, „ II	No distributaries.		
High Level, „ III	35·0	60·3	25·3

15. The whole of the irrigated area was assessed. The figures below show the method of assessment alongside of the figures of the two preceding years for purposes of comparison:—

		1888-89.	1887-88.	1886-87.
		Acres.	Acres.	Acres.
Kharif	Five-year leases ...	152,282	102,868	75,606
	Annual leases ...	57	37	68
	Unauthorized irrigation ...	3,981	5,975	1,354
Rabi	... ...	2,779	501	2,430
Perennial	... Sugarcane	193	130	149
Total, including unauthorized irrigation	...	159,292	109,506	77,709
Total, excluding unauthorized irrigation	...	155,311	103,531	76,355

It is observed, however, that though the figures used in the statements in this and the preceding paragraphs, which give a total of 159,292 acres as the area irrigated, are those adopted by the Superintending Engineer throughout his report of the year's operations, yet it is stated that the area actually under lease at the close of the year was 146,046 acres only. The difference thus observable between the area irrigated and that leased is described by the Superintending Engineer "as due to the areas provisionally entered in the leases of some of the canals, the lands commanded by which have not as yet been cadastrally surveyed, having been smaller than they were afterwards found to be when the measurements of the area actually watered came to be made." And the Deputy Revenue Superintendent summarises the results of the year as follows:—

	Rs.
Area leased and assessed during the year	1,30,258
Unauthorized irrigation	3,981
Assessed area of which measurements were completed after the close of the year	25,053
Total ...	1,59,292

1888-89, AN ANXIOUS PERIOD FOR THE PROSPERITY OF THE CANALS.

16. With the close of the year 1882-83 ended the first period of five-year leases which had been introduced in these canals in 1878-79; and since during that period it was deemed desirable to cause all the leases to end at the same time, with a view to permitting of an alteration of the rate simultaneously over the whole of the Orissa system. Should such alteration be considered advisable, all the leases given subsequently to 1878-79 were given nominally for five years, that is to say, at the five-year lease rate, but they really expired simultaneously on the 31st March 1883. With 1883-84 therefore commenced a new period of five years, and the year happening to be one somewhat favourable to canal irrigation, a considerable area was leased, all the leases for which lapsed on the 31st March 1888, causing the year under review to be opened with a leased area of 45,716 acres only. Up to the end of June very few fresh leases had been entered into, and matters began to wear a serious look so far as the interests of the canals were concerned; and it was not until the demand for canal water arose in July that any good start was made. During that month and August, notwithstanding the heavy rain at the close of the latter month, leases were obtained for some 43,000 acres of either new irrigation or renewals of old leases. A small increase in September and the drought in October added some 40,000 acres more, bringing the total by the end of November to about 131,000 acres. Subsequent measurement and the correction of estimated areas in the leases eventually raised the area to that given above.

RANGE I, HIGH LEVEL CANAL, A SPECIAL CAUSE FOR ANXIETY.

Range I of the High Level Canal was the subject of special anxiety, since leases for no less than 13,000 acres out of the 14,605 acres shown as leased in 1887-88 lapsed at the close of that year. It was feared that many of the leases would not be renewed, but the scantiness of the rainfall in October had a most marked effect, and the area now leased is larger than it has been in any previous year.

17. At first sight the area now reached seems to lead to the conclusion that all the land under lease at the end of 1882-83 had now been re-leased. Such, however, is not the case, and dates given in the Superintending Engineer's Report show that though the area leased up to the end of 1888-89, viz. 146,046 it is fairer to take this figure than 159,292 acres, since the latter is the result of careful measurement which was wanting in 1882-83), is 13,018 acres more than the area leased up to the close of 1882-83, yet that, if the areas by canals be compared, it appears that even if none of the leases on the older canals be for entirely fresh irrigation, *i. e.*, for land which had not been irrigated up to 1882-83, a considerable area of lapsed irrigation has still to be recovered, the increase of 13,018 acres being practically wholly due to increase in the High Level Canal, and especially Range III thereof. The remaining canals have not yet recovered the depression which followed the expiry of the first set of five-year leases as will be seen from the following table:— LAPSED IRRIGATION STILL TO BE RECOVERED.

Name of Canal.	Area leased.		More.	Less.
	1888-89.	1882-83		
	Acres	Acres.	Acres.	Acres.
Kendrapara, including Gobri	53,867	60,374	...	6,507
Gobri Extension	1,499	...	1,499	...
Pattamoondi	10,549	12,094	...	1,545
Taldundah	10,285	10,719	...	434
Machgorig	27,241	34,012	...	6,771
High Level Ranges I and II	19,162	14,244	4,918	...
Ditto Range III	23,443	1,585	21,858	...
Total ...	146,046	133,028	28,276	15,257

18. It is clear from what has been said above that the Orissa Canals are very dependent on the nature of the season at a critical period for their prosperity; and there is no doubt but that, from the point of view of canal interests only, the drought of October 1888 was the most opportune occurrence that could have taken place, inasmuch as it happened just as the former leases had expired and there was no interval during which the cultivators might have come to think that they could do without canal water and to doubt whether it was to their interest to insure their lands against drought by a small yearly payment. The drought made them thoroughly appreciate the benefits of canal irrigation; and, as a matter of fact, it was in the real interests of the cultivators themselves that no such interval should occur; for nothing but continuous irrigation will enable them to be prepared with the means and method of irrigating with success and with universal benefit when drought really comes. THE DROUGHT OF 1888-89 VERY BENEFICIAL IN EVERY WAY.

19. The information regarding five-year leases is not sufficiently exact to permit of a correct conclusion being formed as to how the area under five-year leases is progressing, especially whether lapsed leases are being renewed. It would be as well if this point were properly taken up by the Superintending Engineer and Deputy Revenue Superintendent in their reports for the year now in progress, since the renewal of leases will be a better proof than anything else that the Ooriya is at last taking kindly to canal irrigation. RENEWALS OF LEASES.

20. At the commencement of the year under review the accounts showed an unrealized balance of Rs. 96,567, of which Rs. 92,110 was for water-rates, and Rs. 4,457 for miscellaneous revenue. The additional assessments which fell due within the year on account of previous years, as well as the year under review, came to Rs. 2,04,535, of which Rs. 1,96,765 was for water-rates. Thus, including arrears, the gross amount, which was liable to be collected during 1888-89, was Rs. 3,01,102, of which Rs. 1,60,328 was realized and Rs. 24,003 either remitted or written off as irrecoverable. Accordingly, the year closed with an unrealized balance of Rs. 1,16,771, of which Rs. 1,14,597 was for water-rates. ASSESSMENT AND COLLECTIONS.

This balance is larger than that at the end of the previous year. The increase is due, in a great measure, to the large increase on the assessments during the year. The outstanding balances, however, include considerable demands on account of irrigable but unirrigated beali rice lands—a class of lands which, in cases where beali rice is the only crop grown on them, it has now been decided to strike out of the assessments of the blocks in which they are situated. The outstandings, therefore, will undergo some reduction when these

orders are carried into effect, as well as from the remission recommended by the Deputy Revenue Superintendent, of submerged and damaged leased areas, till now assessed at full rates. The actual realizations during the year, though larger than those of the previous five years, would have been much better, but for the damage to crops caused by drought and abnormal cyclonic weather. The attention of the Deputy Superintendent has, however, been drawn to the steady increase in the outstanding balances, and he has been requested to submit a special report on the measures he would propose for the reduction of these arrears, and on what hopes may be entertained of effecting the reduction at an early date. A detailed account of the balances is given below:—

Year in which amount fell due.	Water-rates.	Miscellaneous.
	Rs.	Rs.
1881-82	327	76
1882-83	108	246
1883-84	435	456
1884-85	1,123	476
1885-86	2,642	458
1886-87	8,040	463
1887-88	32,907	...
1888-89	69,015	...
Total arrears ...	1,14,597	2,175

21. The results of the year as regards water-rate collections are shown below:—

	Outstandings of all years up to and including 1887-88.			Demands due in 1888-89 for the irrigation of that year.		
	Rupees.	Percentage of demands outstanding on 31st March 1889.	Rupees.	Rupees.	Percentage of demands for the year.	Rupees.
Outstandings to end of 1887-88, with assessments made in 1888-89 ...	...	100·0	1,61,837	...	100·0	1,27,033
Adjustments made in 1888-89 ... { Collections ...	93,402	57·7		57,963	45·6	
Adjustments made in 1888-89 ... { Remissions ...	22,851	14·1		62	0·04	
Total adjustments ...	...	71·8	1,16,253		45·7	58,025
Outstanding on 1st April 1889 ...	...	28·1	45,584		54·3	69,013

The percentage of adjustment for old outstandings is 71·8 against 73 6 of the last year, but that for the current demand is 45 7 against 45·1. The proportion of remissions is greater, being 14·1 against 5·7; it was mentioned in last year's report that considerable remissions would have to be made. So far as current demands are concerned, the percentage is the same in both years, being 0·04. The percentage of balances of old arrears still remaining to be collected at the close of the year has risen from 26·4 to 28 1, but the collection of the current year compares favourably with that of the year previous, as the unrealized percentage has fallen from 54·9 to 54·3.

Complaints.

22. The number of complaints received and the progress made in settling them is shown below:—

	Number pending from last year.	Number filed during year.	Total.	Disposed of during year.	Balance left pending.
Complaints against assessments	1,503	3,789	5,292	4,110	1,182
Miscellaneous	129	887	1,016	957	59
Total ...	1,632	4,676	6,308	5,067	1,241

The diminution in the arrears is satisfactory, and it is stated that all complaints arising out of the assessment of unauthorized irrigation have been disposed of as far as the Canal Revenue office is concerned. The number of new complaints was swollen by applications based on the recent orders of the Bengal Government regarding the remission of beali lands in five-year blocks, and by hose relating to fully assessed lands which had been damaged by inundation.

23. The Superintending Engineer thus compares the kharif duties obtained from the several canals with those obtained in the previous year:— DUTY OF WATER.

NAME OF CANAL.	Rainfall during the kharrif season.		Duty of quantity entering canal per cubic foot.		Duty of quantity utilised per cubic foot.	
	1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.
	Inches.	Inches.	Acres.	Acres.	Acres.	Acres.
Kendraparah Canal System ...	37·07	28·93	92·48	67·39	100 25	71·42
Ditto Canal	36·65	25·59	86·22	89·38	97·92	93·77
Pattamoonda do.	41·19	33·10	84·04	30 20	119·16	37·73
Gobri do.	37·91	25 63	92 33	41·36	99·81	81·62
Taldanda Canal System ...	44 39	28·59	82·60	79·60	217·40	98·70
High Level Canal, Range I ...	38 78	26·48	70·73	57·02	112·03	77·72
Ditto ditto, II ...	42·72	27·98	30 99	40·05	80 99	74·24
Ditto ditto, III ...	44·56	30·15	200·07	64·67	200·07	64·67

So that, except in the case of the High Level Canal, Range II, a higher average duty for the whole season was obtained; a natural consequence of the greater rainfall. In the case of the exception noted, a very high discharge was passed into this canal during October, partly in order to raise the level of the pool above the Byturni weir, for the purpose of benefiting the irrigation on Range III, but principally in order to facilitate irrigation from Range II by raising the level of the water. In the return of the Executive Engineer the whole of this discharge was represented as having been utilised, which, as the Superintending Engineer points out, can hardly have been the case. In future, care will be taken to show the quantity utilised by deducting the discharge at the outfall of the canal into the Byturni river.

During October, when the demand for irrigation was at its highest, and great pressure was brought on the canals, the average duty obtained was 53·48 acres per cubic foot entering the canals, and 60·32 acres per cubic foot utilised.

24. During the year 256 experiments on the outturn of crops were made, half on irrigated and half on unirrigated lands. On lands irrigated during 1888-89, the average weight of paddy per acre is 16·23 maunds and of straw 20 12 maunds, against 16·83 and 25·62, which are the respective averages of the five previous years. On unirrigated lands the figures for the year are 11·02 maunds of paddy against 12·46 maunds obtained in previous years, and 14·02 maunds of straw against an average of 19·05. The average yield per acre during the year therefore from irrigated as well as from unirrigated lands, though greater than it was in 1887-88, must both for grain and straw be considered but moderate. CROP EXPERIMENTS.

The difference in favour of irrigation, as shown by these experiments, is 5·21 maunds per acre in grain and 6·10 maunds in straw, the figures obtained from the averages of previous years being 4·37 and 7·57 respectively.

25. The cost of revenue establishment of the year was Rs. 43,161. The following statement shows the details of the year under review with those of the three previous years:— REVENUE ESTABLISHMENT.

	1888-89.	1887-88.	1886-87.	1885 86.
Establishment under Collector.	Rs.	Rs.	Rs.	Rs.
Superior officers and permanent and temporary establishment, including travelling allowance	31,389	28,749	26,007	24,028
Contingencies	2,889	2,218	2,625	1,948
Headmen's fees	1,680	2,208	1,209	1,229
Establishment under Executive Engineer.				
Permanent and temporary establishment ...	3,052	2,964	2,942	2,854
Contingencies	...	...	...	...
Water-regulation establishment ...	4,151	4,161	4,222	4,245
Total ...	43,161	40,300	37,005	34,304
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	1,60,328	1,46,039	1,05,775	1,16,940
Percentage ...	26·9	27·6	34·98	29·3

26. The management of the navigation of the canals and the collection of the revenue from this source is in the hands of the engineering staff. The NAVIGATION.

receipts, which are tabulated in statistical table ID, include tolls collected on boats and rafts using the canals, and the earnings of the transport service maintained by Government between Bhuddruck on the High Level Canal and Cuttack, a distance of 74 miles. The collections from tolls and transport service for the last ten years are shown below:—

	Tolls.	Transport service.	Total.
	Rs.	Rs.	Rs.
1879-80	62,389	35,686	98,075
1880-81	41,297	30,105	71,402
1881-82	53,219	29.987	83,206
1882-83	66,736	41,737	1,08,473
1883-84	61,602	48,550	1,10,152
1884-85	52,784	27,018	79,802
1885-86	64,093	19.919	84,012
1886-87	58,664	8,384	67,048
1887-88	66,628	4,376	71,004
1888-89	69,830	8,078	77,908

The cost of the establishment employed in collecting tolls during the year was Rs. 9,474, or Rs. 319 in excess of the previous year, due partly to the opening of the Jajepore Canal for traffic in August 1888, on which Rs. 156 was incurred, and partly to the Toll Collector at the Jumboo lock of the Kendrapara Canal having been employed there for a complete year instead of only for a portion of a year, as was the case in 1887-88.

TRAFFIC. 27. The following statement compares the traffic (excluding the transport service) of all the canals in Orissa during the year under review with that of the previous year:—

CANALS.	Miles open.	Tollage on boats and rafts.		Number of boats plying cargo and passengers.		Tonnage of cargo and passenger boats.		Value of cargo and rafts.		Tollage per mile of canal.	
		1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.
	No.	Rs.	Rs.	No.	No.	Tons.	Tons.	Rs.	Rs.	Rs.	Rs.
Taldundah and Machgong Canals ...	31	4,310	6,267	926	1,430	25,280	44,566	1,02,110	99,605	139·0	202·1
Kendraparah and Gobri Canals (including extension) ..	75	53,786	46,650	5,160	5,011	81,677	83,718	34,18,030	30,11 925	717·1	622·1
High Level Canal, Range I	83	6,642	8,306	2,058	2,975	22,080	24,118	6,28,530	8,76,100	201·3	251·7
Ditto, ditto II	14½	3,392	4,085	1,542	1,905	16,732½	17,378	2,85,812	3,71,472	271·4	326·8
Ditto, ditto III	19	1,601	1,311	786	673	7,394½	6,216	1,30,472	1,22,511	84·3	69·0
Jajepore Canal*	6½	99	..	103	...	534	...	24,003	...	15·2	...
Total ...	177	69,830	66,628	11,475	12,094	153,674	175,996	45,99,957	50,38 603	394 5	390·7

* This canal was opened to traffic on the 11th August 1888.

This return only takes count of laden boats, of which there is a decrease both in number and tonnage. Of empty boats, on which reduced tollage rates are charged, the number which made voyages is 1,473 more than last year. The gross receipts from tollage are accordingly greater by Rs. 3,202, the total number of boats by 864, and the total tonnage by 30,267 tons. There is a decrease in rafts. Moreover, as the receipts from Government traffic have declined by Rs. 3,183, or 36 per cent., in consequence of the completion of the public works for which materials were boated in the previous year, the general traffic by private boats on the whole shows improvement, for though the actual weight of cargo, as exhibited in statistical table IID, appears to have slightly declined, the data on which that table is based cannot be depended on for accuracy. The classes of goods which show increases are grain, piece-goods, and building materials, while metals and salt have declined.

The number of passengers carried has increased by 10,015, being 17·21 per cent. in excess of the number who travelled in the year previous.

The fluctuations on the various canals are considerable. The increase on the Kendraparah Canal is larger by 7,319 than the decrease which occurred in 1887-88, so that the passenger traffic on this canal appears to have completely recovered from the temporary depression ascribed to the loss of the two ocean passenger steamers running between Calcutta and Chandbali; but the passenger traffic of the High Level Canal although increasing has not yet recovered itself. On the Taldandah Canal there is a still greater decrease than there was last year due to the same cause apparently, viz., that the passengers are not carried the short distance from the head of the canal at Jobra to the canal bridge situated on the crossing of the Pilgrim road.

28. The transport service maintained by Government between Bhuddruck and Cuttack was worked at a loss of Rs. 4,585 as against a loss of Rs. 5,712 in 1887-88. The number of passengers and the weight of goods carried were about double what were carried in 1887-88, but the line was worked at an increased cost of Rs. 3,383, steamers instead of accommodation boats being employed. TRANSPORT SERVICE.

29. The miscellaneous receipts during the year under review are compared by sub-heads with those of the previous year in the following statement:— MISCELLANEOUS RECEIPTS.

SOURCE OF REVENUE.	YEAR IN WHICH RECEIVED.		DIFFERENCE.	
	1888-89.	1887-88.	Increase.	Decrease.
	Rs.	Rs.	Rs.	Rs.

* Indirect charges are now, by the suggestion of the Government of India, included in this statement of financial results.

It will be noticed that the deficit which was so great in the years 1886-87 and 1887-88 has now been reduced to one comparable with the years 1884-85 and 1885-86, owing chiefly to the absence of expenditure on account of the breaches in the Mahanadi weir, but also to an improvement in the receipts. If the earnings of the two years 1887-88 and 1888-89, be compared, the deficit of Rs 2,45,842 is found to be reduced to Rs. 70,282; but it must be remembered that, in addition to the causes given above, in the former year the assessments did not include amounts not legally due until after the close of the year, whilst such are included in the year under review.

MAINTENANCE. 31. The outlay on maintenance, exclusive of that on the transport service which amounted to Rs. 6,403, during the year under review and the two preceding years is distributed under the sub-heads as follows:—

	1888-89.	1887-88.	1886-87.
	Rs.	Rs.	Rs.
Head works	71,168	1,94,272	2,34,500
Main canals	1,11,712	76,219	83,735
Distributaries ...	31,451	25,594	21,458
Drainage and protective works ..	15,960	10,778	6,690
Total	2,30,291	3,06,863	3,46,383

HEAD WORKS. Out of a total expenditure of Rs. 71,168 on head works, Rs. 62,796 represents the cost of maintaining the weirs, divided as follows:—

NAME OF WEIR.	Length.	EXPENDITURE.		RATE PER RUNNING FOOT.	
		1888-89.	1887-88.	1888-89.	1887-88.
	Feet.	Rs.	Rs.	Rs.	Rs.
Narajo	3,833	10,140	26,106	2·64	6·81
Mahanadi	6,349	26,539	1,32,941	4 18	20·93
Beropa	1,980	5,573	5,015	2·81	2·53
Brahmini	4,000	7,471	7,692	1·86	1·92
Pattia	783	5,698	6 526	7·27	8 34
Byturni	1,026	1,440	977	1·40	0 95
Burrah	526	5,935	7,165	11·28	13·62
Total of all weirs ...	18,497	62,796	1,86,432	3·39	10·08

As the rebuilding of the portions of the Naraje and Mahanadi weirs which had been carried away in 1886 was completed in 1887-88, the repairs necessary in 1888-89 were again of a normal character. A portion, however, of the apron of the Mahanadi weir was again injured by floods, involving a special outlay of Rs. 7,658 on its reconstruction.

The maintenance of the remaining head works, including river protective works, embankments and buildings, amounted to Rs. 8,372. Of these the buildings, on which quadrennial repairs were carried out, show an increase of Rs. 1,665.

MAIN AND BRANCH CANALS. 32. The following statement gives the cost of maintenance of each main and branch canal separately for four years:—

CANALS.	Miles.	1888-89.		1887-88.		1886-87.		1885-86.	
		Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile.
	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Kendrapara...	39	30,370	1,000	17,430	446	21,004	538	30,780	789
Ditto extension ...	15	2,611	174	2,385	159	2,741	182	2,996	200
Gobri	15	6,434	429	4,500	300	3,975	265	7,806	520
Do. extension	6	4,725	787	4,047	674	3,599	600	9,101	1,517

Taldanduh	27	17,067	630	8,993	333	9,971	369	14,213	526
Machgong	19	8,360	440	4,163	219	4,041	213	2,901	152
High Level, Range I ...	33	13,771	417	12,220	370	12,862	389	15,892	481
Ditto, do. II ...	12½	4,315	345	4,429	353	5,265	421	6,653	532
Ditto, do. III ...	19	6,330	333	6,806	358	6 216	327	10,021	559
Tota ...	23-½	1,11,712	480	76,319	328	86,736	360	1,19,601	514

The average mileage rate of maintenance, therefore, shows an increase of more than 46 per cent., in which nearly all the canals have shared. On the Kendraparah canal, where the increase is greatest, gate renewals were carried out on three locks, and both on this and other canals navigated by steamers, a great deal of earthwork was carried out in order to repair the erosion of the banks which were in many places protected by bamboo revetments. On the canals generally there has been a great increase in the amount of earthwork carried out, as well as in silt clearance and the removal of weeds. The quantity of silt cleared by hand was 9,904,436 cubic feet, and the cost Rs. 26,217, giving an average rate of Rs 2·65 per thousand, while in the previous year only 3,586,859 cubic feet were cleared at an average rate of Rs. 2·77. The amount of silt dredged was 304,077 cubic feet, and the cost Rs. 2,751, an average rate of Rs. 9 per thousand cubic feet. The cost of repairs to the canals, taking them all together, is far higher than in the two previous years, but is still below the cost in the somewhat abnormal year 1885-86; and an examination of the above figures and of those given in greater detail in the Superintending Engineer's report appears to show that a very large proportion of the increased cost as compared with the previous year is due to the effects of steamer navigation on the canal banks, or to outlay on navigation works, or in meeting the requirements of navigation. This remark applies with more or less force to all the navigable channels of the Kanchraparah system. It may be that the lower expenditure in the two previous years was due to a comparative neglect of the necessary repairs, but there appears to be grave reason for doubting whether these narrow channels are suitable to a heavy steamer traffic. The repairs during the year under review have certainly been effected with care; and should the experiment of planting the screw-pines along the water's edge have the anticipated result, the money will have been well spent, and a great saving in earthwork generally may be anticipated. But the experiment has not been tested sufficiently as yet, and should it not prove a success, either an entirely new method must be adopted for protecting the banks or little or no diminution in cost can be looked for.

The damage caused by steamer traffic cannot, however, be given as an explanation of the high rate on the navigable channel of the Taldandah canal nor on the Machgoing canal which has not yet been made navigable; and yet on both these the expenditure, as will be seen from the statement above, is double that of the previous year. In both cases the increased expenditure is ascribed to the larger amount of dressing and turfing required on the slopes and to increased charges for silt and weed clearing. The conclusion apparently to be drawn is that either these necessary repairs have been neglected in past years, or that a somewhat excessive zeal has been exhibited in "polishing." No special explanation is given for an abnormal collection of silt or an abnormal wear and tear to the slopes.

Of course some of the increased charges are beyond control, such, for instance, as the damage done to buildings by the cyclone of September 1888.

33. The cost per mile for repairs of distributaries for the last four years is shown below:— DISTRIBUTARIES.

	Miles.	1888-89.		1887-88.		1886-87.		1885-86.	
		Cost.	Per mile.	Cost.	Per mile.	Cost.	Per mile	Cost.	Per mile.
DISTRIBUTARIES.	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Kendrapara Canal System	334½	13,530	40·53	13,510	40·48	11,073	33·17	13,150	39
Taldunda Canal	71½	2,950	41·25	2,242	31·35	2,232	31·21	2,297	32
Machgong Canal	122½	5,725	46·83	5,183	42·38	4,071	33·30	3,743	30
High Level Canal, Range I	117½	9,246	78·35	4,660	39·74	4,081	34·80	5,325	45
Total ...	644½	31,451	48·77	25,594	39·69	21,457	33·27	24,521	38

On the High Level Canal, Range I, the quantity of earthwork and turfing required for the repairs of the distributary banks was much larger than usual—

an increase in which all the other canals share, though in a less degree. It is possible that this was due to the abnormal heavy rainfall of August, but this is not stated.

DRAINAGE AND PROTECTIVE WORKS.

34. There was also an increase during the year in the cost of drainage and protective works, amounting in all to Rs. 5,182; and occurring on the Kendrapara, Machgong and Gobri Extension Canals, and upon Ranges II and III of the High Level Canal. Besides greater outlay on clearing the drainage channels of silt, expenditure of a special character took place on the repairs of a large stone groyne above the Brahmini weir, and on the slopes and crests of the protective embankments.

NECESSITY FOR CAREFUL CONTROL OF THE EXPENDITURE.

35. As mentioned above, the increased expenditure both on canals and distributaries may have been due to a certain extent to natural causes, heavy rainfall, cyclone, &c., but a careful examination of the figures appears to show a distinct tendency to increased expenditure of a nature which may be guarded against and controlled. There is a happy mean between allowing works to fall into disrepair and a lavish expenditure in aiming at excessive trimness of banks and slopes, and there appears to be reason for doubting whether this happy mean has yet been found on the Orissa Canals, and the Superintending Engineer's earnest attention must be directed to this matter, as the only hope of ever making these canals pay even their working expenses appears to be in reducing expenditure as well as increasing receipts.

FLOODS.

36 The floods in the Mahanadi and Byturni rivers were moderate ones, but the flood in the Brahmini was slightly higher than the flood of 1879, although it was lower than the high flood of 1881 below the weir at Janapore. The highest flood in the Mahanadi river rose to 85 80 on the gauge at Naraje, as compared with 87·70, which was the highest reading obtained during the floods of the previous year, and with 92·10, which was the level reached at the same place by the great flood of 1872. The highest flood of the year in the Byturni river stood at a height of 5·40 feet above the reading of the flood of 1887 below the weir at Acquapadda.

MIDNAPORE CANAL.

CAPITAL ACCOUNT

37. The Capital, Interest and Revenue Accounts of this Canal are given below:—

I.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1888-89.	Outlay to end of 1888-89.

Profit	41,706	(—)49,577			
Total ...	2,51,510	34,14,021			

* These are now shown under the suggestion of the Government of India.

The capital outlay during the year was Rs. 2,665, and to the end of the year Rs. 82,66,010 against Rs. 83,16,768, the amount of the estimate sanctioned by the Secretary of State.

The period allowed for the completion of the estimates sanctioned by the Secretary of State for the Midnapore canal expired on the 31st March 1888. At that date, however, certain works, which were regarded as falling within the scope of the original project, and therefore as properly chargeable to capital, still remained to be carried out. In these circumstances, the Government of India decided that no further extension of time for the completion of the project, as such, should be allowed, but, following the procedure laid down in Public Works Code, volume II, Chapter XV, paragraph 156, directed that a schedule of the works chargeable against capital, which it might be found necessary to carry out, should be annually submitted for sanction, and application for funds made in accordance with the provisions of the paragraph quoted.

EARNINGS.

38. The revenue account calculated on "earnings" of the year and expenditure is given below :—

EXPENDITURE.	Amount.	Earnings	Amount.
DIRECT CHARGES.	Rs.		Rs.
I.—Maintenance and repairs.			
Works (extensions and improvements) ...	...	Water-rates	1,31,433
Repairs	1,06,139	Navigation	1,46,760
Compensation	...	Miscellaneous ...	14,019
Establishment, including direction and accounts	36,111		
Tools and plant	24,335		
Total ...	1,66,585	Total ...	2,92,212
II.—Revenue management.			
Irrigation establishment	25,927		
Navigation ditto	7,550		
Total ...	33,477	*Less*—Refunds of revenue	285
Total direct charges ...	2,00,062	Net total receipts ...	2,91,927
INDIRECT CHARGES	9,742		
Total working expenses ...	2,09,804		
Profit	82,123		
Total ...	2,91,927		

Under the rules of the Midnapore canal, water is only supplied, as a general rule, from June to November, and the ordinary water-rates fall due on the 1st February, or within the limits of the year in which the water is supplied. Under ordinary circumstances, therefore, the amount of the 'earnings' of any year should coincide with the assessments of the year. In practice, however, a small portion of the assessments do not fall due till after the close of the year to which they belong; for instance, in cases of boro rice irrigation, where the whole of the assessment cannot well be completed before the close of the official year, or of lands illicitly irrigated, where the justice of the demand is disputed by the cultivator, and the assessment is consequently delayed. It may be stated that, of the sum of Rs. 1,31,433 shown above as the amount of water-rates earned during 1888-89, Rs. 1,18,243 are assessments completed within the year, Rs. 11,900 are assessments completed after the close of the year, while Rs. 1,290 is the estimated amount of the assessments which for various reasons it has not yet been possible to complete.

RAINFALL.

39. The following table shows the rainfall for the year 1888-89 and the four previous years at five registering stations in the Midnapore district:—

STATIONS.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	Average of 19 years previous to 1888-89.
	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
Midnapore	68·00	55·38	49·39	76·20	57·19	55·97
Panchkoorah	59·47	56·21	50·56	80·03	48·84	56·27
Luchmapore	60·93	47·00	56·35	81·84	Not available.	
Mowah	60·14	49·76	55·93	81·07	Ditto.	
Contai	59·24	54·41	48·24	76·45	77·30	69·20

Of these stations, the first four only are within or contiguous to the area commanded by the Midnapore canal. The rainfall of the year, though up to

the average, was very unequally distributed, as an examination of the quantity recorded in each month from June to November will show:—

		Inches.
June	1888	3·67
July	,,	18·57
August	,,	21·16
September	,,	6·58
October	,,	1·08
November	,,	0·29

The rainfall here shown for each month is the average of the quantities recorded at the four stations which lie within the irrigated tract.

LEASES AND IRRIGATION.

40. The area of all crops leased and irrigated is returned by the Deputy Revenue Superintendent in charge of the assessments at 69,777 acres. Of this area 62,374 acres were kharif lands leased for five years; while of 4,034 acres of kharif leased for one year, 122 acres were voluntarily leased, and 3,912 acres assessed on the ground of having been surreptitiously irrigated. Lastly, though the right of Government to use the water of the Cossye during the rabi months is restricted, arrangements, such as have been common of recent years, were made for the irrigation of a limited area of boro rice, and 3,369 acres were so irrigated under annual leases.

The Superintending Engineer returns the area leased and irrigated at 65,865 acres, thus differing from the return of the Deputy Revenue Superintendent by 3,912 acres. The explanation appears to be that the latter area was illicitly irrigated, and the assessment was not completed until after the close of the year. For this reason it was not included in the final month's irrigation returns of 1888-89; and the Superintending Engineer appears to have made a mistake in saying in his report that it was included.

The five-year leases in force during 1887-88 amounted to 66,628 acres, of which 32,875 acres expired on the 31st March 1888. During 1888-89 the renewals were 28,620 acres. The area of the leases which lapsed on the 31st March 1889 was 11,377 acres, an error having been made in the figures given in last year's note.

Of 69,777 acres assessed, 60,263 acres were irrigated from the Midnapore weir, 8,914 from the Panchkoorah weir, and 600 from the tidal reaches. Similar information for three years is supplied in the following table, where the percentage which the area irrigated in each year bears to that commanded and provided with distributaries is shown:—

Particulars.	Totals provided for in the revised estimate.	Midnapore Weir, Ranges IV & V.			Panchkoorah Weir, Range III and Tidal reaches, Ranges I and II.			Total.		
		1888-89.	1887-88.	1886-87.	1888-89.	1887-88.	1886-87.	1888-89.	1887-88.	1886-87.

Area irrigated ... ,,	...	60,363	50,302	61,225	9,514	6,502	7,537	69,777	56,864	68,762
Percentage of area irrigated to that commanded ...	...	60·26	50·30	62·22	37·9	26·01	30·15	55·82	52·04	55·81

In his summary of the irrigation season, the Superintending Engineer quotes as follows from the Executive Engineer's report:—

"The improvement on the previous year's irrigation, though slight, is still satisfactory, when the adverse circumstances under which we were placed last year is taken into consideration. The rains as stated before began to fall from September and ceased altogether in October. The demand for irrigation became general; but with the failure of the rains the discharge of the river Cossye began to diminish until in October only 800 or 900 cubic feet were available to irrigate over 65,000 acres. In November, when the crops were greatly in need of irrigation, the river discharges went down to 300 cubic feet. With careful regulation, this was made to irrigate the area leased, and it is a matter for congratulation that no general failure in the irrigated rice crops occurred on any distributary."

The conditions here described, a demand becoming more intense in proportion as the supply failed, are such as to severely test the administration of any canal; and the dual system of administration in force at Midnapore, where the negotiations with those who require the water on the one hand and the actual control of the supply on the other, rest with distinct and independent officers,

would appear to be inherently weak when subjected to such a strain. As the Collector remarks with much force:—"There was a great rush for water in September and October, and a large number of leases were executed on the mere chance of getting it." And, to quote the words of the Deputy Revenue Superintendent, "this" (the Revenue) "Department was found fault with for taking more leases than the Engineer officers could supply water with." The expediency of a change of system, under which leases should be controlled by the Engineers who already control the supply, has been strongly urged by the Revenue officers, supported by the Engineers. Such a system has, however, been already in force on the Sone canals, where its efficiency has been severely questioned, and has been the subject of prolonged and exhaustive enquiries, the report on which is now about to be submitted to the Government of India. Until a final decision has been pronounced on that report, it would be obviously premature to amend the Midnapore system after the Sone pattern.

In connection with the remarks in last year's note (paragraph 35) on this same subject, the following remarks by the Superintending Engineer are worthy of consideration when any new system is proposed to be introduced:—

"The matter of making the leases of all land irrigable from the same outlet or same distributary terminable on the same date was under consideration, and it is probable that if this system is adopted, and the rate successively year by year increased for subsequent leases entered into on the same distributary, that irrigation would become more general.

"At present the disinclination to renew until forced by absolute failure of rainfall leads largely to surreptitious irrigation, which must be very largely in excess of that reported, at the expense in a dry season of those who have leased honestly. Penalty rates are not enforced, and the dishonest irrigator finds himself admitted to a lease for the remaining years of a five-years' lease or a five-years' lease as the case may be on the same yearly rate as a lessee for the whole term, or at any rate on no worse terms than the applicant for a lease.

"This is the system on which irrigation has been worked for years in Midnapore, and a greater premium on declining to enter into leases till the last moment could not be afforded. The fact is very well appreciated by those who have entered into leases, and it is no matter for surprise if they fall into similar ways as soon as their leases expire. By insuring their crops for five years, they get no corresponding advantage.

"Were the proposed system adopted, it might be possible to apportion water more fairly in years of scanty rainfall by first attending to the wants of the lessees on the oldest leased distributary."

COMPLAINTS. 41. The number of irrigation complaints was 1,731, of which 1,647 were filed during the year and 84 pending from the previous year. 1,218 of the complaints were objections to certificates issued under the Public Demands Recovery Act, most of them in cases of surreptitious irrigation, while in other cases the applicants alleged either that no water was supplied or that the water-rates were excessive. The remaining complaints appear to have been of an ordinary character. Of 1,492 claims disposed of, 216 were decided entirely in favour of the petitioners, while the remainder appear to have been either rejected or in some cases compromised by the applicants entering into leases. The number left pending at the close of the year was 239.

DUTY OF WATER. 42. The kharif duty calculated on the discharge utilized was 16¼ acres per cubic foot for the area under Midnapore weir and 18¼ acres for that under Panchkoorah weir. The former figure, which gives a much higher duty than what was obtained last year, must be received with caution, as the calculations of the discharges on which it is based are not trustworthy.

ASSESSMENTS AND COLLECTIONS. 43. The following comparative statement shows the balances, assessments, and recoveries of water-rates on the Midnapore canal since the year 1884-85:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1884-85	1,44,691	1,22,321	2,67,012	1,16,807	88,993	1,11,212
1885-86	1,11,212	1,10,868	2,22,080	1,08,709	43,399	69,972
1886-87	69,972	1,06,750	1,76,722	1,08,834	17,139	50,749
1887-88	50,749	1,02,532	1,53,281	90,837	5,951	56,493
1888-89	56,493	1,23,337	1,79,830	91,016	4,041	84,773

Thus, while the whole amount recoverable, including arrears, was Rs. 26,549 more than in 1887-88, the collections were only Rs. 179 more; the percentage of collections being 50·6 as against 59·3.

Out of the sum of Rs. 1,23,337 shown in the above table as falling due within the year, Rs. 1,18,243 were water-rates of the year itself. On this the collections were Rs. 39,863 and the remission Rs. 9, the total adjustments 33·7 per cent.

The amount recoverable on account of previous years was Rs. 61,586, of which Rs. 56,498 were arrears, properly so called, while Rs 5,093 were water-rates earned in previous years, but not recoverable till 1888-89. The amount adjusted was Rs. 55,185, or 89·02 per cent.

This large reduction of arrears and the smallness of the sum (Rs. 4,041) which it was found necessary to treat as irrecoverable are satisfactory features in the returns of the Deputy Revenue Superintendent. A different view must be taken of the collection of the current demand, from which a balance of Rs. 78,372, or 66·9 per cent., is left unsettled. In partial explanation, it is stated that Rs 39,302 had of necessity to stand over; of these, Rs. 5,053 were water-rates on boro rice, which is only reaped at the end of the year, Rs. 19,338 were demands contested by the ryots which could not be collected till the objections were heard and settled, and Rs 14,911 were demands which it will probably be necessary to strike out, as good reasons for remission, in some cases insufficiency of supply, in others loss of crop from breaches in the Cossye embankment, are known to exist.

MISCELLANEOUS RECEIPTS.

44. In miscellaneous revenue, the demand was Rs. 18,870, of which Rs. 5,503 were for arrears. The collections were Rs. 12,287 and the balance Rs. 6,035. The miscellaneous receipts collected by the Executive Engineer amounted to Rs. 1,731.

CERTIFICATES.

45. The number of certificates undisposed of at the end of the previous year was 5,310. In addition, 11,201 new certificates were filed, 5,017 being for surreptitious irrigation and 6,184 for satisfaction of demands under kabulyats: 9,326 were disposed of—in 3,847 cases by the realization of the demand, while the other 5,478 cases were struck off; 7,185 cases, of which only 661 were more than six months' old, were left unsettled at the end of the year, and with these good progress has since been made. It is stated that no certificates were issued for the realisation of the current demand.

REVENUE ESTABLISHMENT.

46. The cost of revenue establishment was Rs. 24,728 against Rs. 21,600 of the year preceding. The percentage of cost on the total collections is 23·93 against 20·34. The increased expenditure is chiefly accounted for by the payment of Rs. 2,135 as headmen's fees, on which nothing was spent in the previous year. The Commissioner remarks that in the report of the Deputy Superintendent nothing is said of the effect produced by the payment of commission to headmen. The Collector says the same, and notes further that, on the other hand, an attempt has been made to reduce expenditure by eliminating one collection with and making over its work to the others; but as this was done on the assumption that the leased area would not extend beyond its then existing limit, the success of the experiment has yet to be assured. Judging by the results the experiments have not so far answered since the collections have fallen off, and the percentage of cost of collection on the demand has increased.

NAVIGATION AND TRANSPORT SERVICE.

47. The receipts under navigation increased from Rs. 1,26,574 in 1887-88 to Rs. 1,46,760 in 1888-89. The usual particulars regarding the traffic carried during the last ten years in vessels other than those of the Calcutta Steam Navigation Company are given below:—

DESCRIPTION.		1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
Miles open	No.	53	53	53	53	53	53	53	53	53	53
Toll collections ...	Rs.	91,861	77,143	98,060	1,00,157	1,08,931	1,19,797	1,25,331	1,01,054	1,08,..10	(a)1,25,332
Rate of toll per mile	,,	1,733	1,455	1,850	2,002	2,055	2,260	2,364	1,906	2,040	2,365
Number of boats, including empty boats	No.	36,044	45,461	51,408	52,554	52,069	47,653	42,240	45,799	49,628	54,214
Tonnage of boats ...	Tons	320,927	292,452	332,325	360,973	382,979	412,379	372,008	387,440	409,866	470,806
Passengers carried	No.	180,294	166,286	201,089	181,251	170,745	...	...	208,582	160,367	(b)167,259

(a) Exclusive of Rs. 21,428 tolls paid by the Calcutta Steam Navigation Company.
(b) By private boats, 81,940, and by the Calcutta Steam Navigation Company's steamer, 85,319.

The tollage receipts both from boats and steamers continue to advance, and are now higher than in any previous year, the increase being distributed over the whole year except for the month of August, when navigation was stopped owing to the excessive accumulation of silt at the Panchkura works. The Superintending Engineer shows that the export traffic in rice and paddy is steadily on the increase in the districts of Midnapore and Hooghly, and appears to be stimulated by a bad harvest, such as that of 1888-89, when the superiority of irrigated over unirrigated crops is more marked. Other goods of which greater quantities were carried are raw cotton, salt, piece-goods, building materials, fuel, timber and miscellaneous.

The Calcutta Steam Navigation Company continue to maintain a double daily service of steamers on the Midnapore canal. The discomfort of these vessels is made the subject of a complaint by the Executive Engineer. The tolls paid by the Company rose from Rs. 18,114 to Rs. 21,428.

FINANCIAL RESULTS.

48. The following statement shows the receipts on revenue account and working expenses of the Midnapore canal since the year 1879-80:—

PARTICULARS.	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-889.

* These are now shown under the suggestion of the Government of India.
If allowance be made for the increase in the establishment charges under the new method, the year under review would compare favourably with any year since 1880-81 at any rate.

EXPENDITURE ON REPAIRS.

49. The actual cost of repairs during the year 1888-89 was less than that in the previous year, and is distributed by sub-heads as shown below:—

	1888-89.	1887-88.
	Rs.	Rs.
Head works, including buildings ...	13,903	11,667
Main canal and branches ...	65,216	89,238
Distributaries	22,464	20,687
Drainage and protective works ...	2,113	1,990
Steamers	2,443	7,599
Total	1,06,139	1,31,181

HEAD WORKS.

The expenditure on the Midnapore head works was Rs. 10,551 and on the Panchkoorah head works Rs. 3,352. The expenditure on weirs was Rs. 2·70 per foot run of the Midnapore weir and Rs. 3·34 of the Panchkoorah weir against Rs. 1·48 and Rs. 5·30 respectively last year. The cost of clearing silt from the locks and lock entrances situated above the two weirs was considerable. A large sum also was expended in replacing the apron of the Midnapore weir and on the shutters on the Panchkoorah weir sluices.

There is a decrease of Rs. 26,819 on the repairs of main canal and head works taken together, and an increase of Rs. 1,777 on those of distributaries. Mileage rates are worked out below:— MAIN CANAL

YEAR.	MAIN CANAL AND HEAD WORKS, &c.			DISTRIBUTARIES.		
	Length of canal, exclusive of river crossings.	Total cost of work.	Rate per mile.	Length of distributary channels.	Total cost of work.	Rate per mile.
	Miles.	Rs.	Rs.	Miles.	Rs.	Rs.
1881-82	48	1,03,910	2,164	277	11,854	42
1882-83	48	1,01,821	2,121	277	20,407	73
1883-84	48	1,06,425	2,216	277	21,195	76
1884-85	48	1,15,171	2,399	277	18,865	68
1885-86	48	1,10,350	2,299	277	14,424	52
1886-87	48	1,20,135	2,503	283	17,617	63
1887-88	48	1,10,494	2,301	283	20,687	74
1888-89	48	83,675	1,743	283	22,464	79

The mileage rate of the main canal is much lower than in previous years, economies having been chiefly effected in earthwork charges, which fell from Rs. 59,161 to Rs. 49,758, and in repairs of navigation works, which fell from Rs. 19,162 to Rs. 4,008. In earthwork 4,176,765 cubic feet of silt were cleared by dredgers and removed at a cost of Rs. 26,387, or at an average rate of 6·31 per thousand, which compares favourably with the rate of 7·63 obtained in the previous year, and 1,931,281 cubic feet were cleared by hand and excavators at an average rate of Rs. 5·32 per thousand, which is slightly higher than in 1887-88. In addition 1,755,000 cubic feet were cleared at an average rate of Rs 8-12-6 per thousand from the first three reaches, which were closed for that purpose during April.

The cost of repairs to distributaries was Rs. 22,464 against Rs. 20,687 in the preceding year. The mileage rate for the year was Rs. 79 per mile, which is higher than that of former years; but it is explained that an expenditure of Rs. 8,039 for 4,493,278 cubic feet of earthwork had to be incurred in raising banks and clearing silt and in closing the breaches caused by the excessive floods of July and August. A certain amount of silt clearance and repairs to banks must always have to be done, whilst even if we exclude the whole sum, the balance falls at a rate of Rs. 51 per mile, which was about the rate in 1885-86, when it was Rs. 52 per mile. Since then the yearly rates have been Rs. 63, Rs. 74 and now Rs. 79, and there appears to be sufficient ground for a searching enquiry as to whether the expenditure under this head cannot be reduced, since even Rs. 51 per mile appears to be higher than the rate ought to be. DISTRIBUTARIES.

The expenditure on tools and plant amounted to Rs. 24,335 against Rs. 31,409 of the previous year, and was incurred principally on repairs to the dredging plant. REPAIRS TO DREDGERS.

50. The highest flood in the Cossye river, the result of heavy rainfall following in cyclonic storm in the Bay, occurred on the 25th August, when the gauge reading above Midnapore weir was 88·80 and below it 87·50, against 92·30 and 91·55 respectively, the highest recorded in 1868. Several minor floods came down the river, which caused serious silt deposits both at Mohunpore and Panchkoorah. Though very considerable damage by floods was caused to embankments both north and south of the canal by which irrigated crops are reported to have been destroyed, no damage occurred to the canal or works. FLOODS.

HIDGELLEE TIDAL CANAL.

51. On this canal, which is a major work, no capital expenditure was incurred during the year under report. The expediency, however, of incurring further expenditure on works designed for the most part to overcome the accumulations of silt, which at present interfere with the financial success of the canal, was indicated in the Chief Engineer's note of last year, and it was stated that estimates for remodelling the canal were then under the consideration of the Government of India. These estimates, amounting to Rs. 7,91,963, have now been sanctioned by the Secretary of State, and funds will be assigned as required for the completion of the improvements, with the condition, which has been

accepted by the Lieutenant-Governor, that the province shall accept financial responsibility for the work by agreeing to pay interest at the rate of 4 per cent. on all allotments made from Imperial revenues under this arrangement. The remodelling of the canal, therefore, as opposed to the original project, will be classified as a minor work.

CAPITAL ACCOUNTS.

52. The capital, interest, and revenue accounts of the Hidgellee Tidal Canal are given below :—

The receipts from tolls during the year under review amounted to Rs. 53,910 against Rs. 40,406 for the previous year, thus showing an increase of Rs. 13,504. The previous year was a year of partial closure of canal for silt clearance.

54. The only receipts other than tolls are miscellaneous. These amounted to Rs. 1,260 against Rs. 1,452 of the previous year. MISCELLANEOUS

55. The following statement shows the receipts on revenue account and working expenses of the canal for the last ten years:— FINANCIAL RESULTS.

The deficit in the year's working, notwithstanding a substantial increase of Rs. 13,239 in the receipts, was anticipated in the Chief Engineer's note of last year, where it was stated that of the charges incurred for the thorough clearing of the channels in 1887-88, a large sum would not be paid till the following year. The actual amount of these payments was Rs. 39,580. The influx of silt was largely due to the deterioration which has taken place in the condition of the Russulpore river, from which the canal was formerly supplied. Since the completion of the last silt clearance the feed has been exclusively taken in at the Huldee river, and it is hoped that another closure may not be found necessary for three seasons.

56. After the heavy rains at the end of August, the southern portion of the district of Midnapore was visited by floods of great severity, and the incapacity of the natural drainage channels to relieve the inundated tracts was investigated by a committee of enquiry. The brunt of the inundation fell on the tract of country adjoining range III of the Orissa coast canal. Regarding the Hidgellee canal, it appeared that though the drainage of parts of the affected area had been to some extent obstructed by it, yet this obstruction was not one of the main causes of the floods, and any injury so caused was more than counterbalanced by the enormous benefits conferred on landlords and ryots by the protective works constructed by Government. The defects in the arrangements for passing drainage water across the canals are now being remedied, and it is hoped that by the lowering of the bed, which is a feature in the recently-sanctioned scheme for remodelling the canal, complete facilities for drainage will be afforded. The damage done to the canal was not such as to require special expenditure beyond that provided in the regular maintenance estimates. FLOODS.

SONE CANALS.

CAPITAL ACCOUNT.

57. The Capital, Interest and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT.

* These are now shown under the suggestion of the Government of India.

The expenditure on capital account during the year was Rs. 1,48,443. The principal works carried out were docks at Bedadi, Nasriganj, and Daodnugger; a warehouse at Bedadi, a syphon aqueduct at mile 10¾, Domraon Branch canal, and numerous permanent outlets in all divisions. The following works were all but completed at the close of the year:—Docks at Baroon Urwal, and Deegah; the Tejpoora distributary taking off from the Patna canal and the Bacheri drainage cut; Telegraph offices at Baroon, Nasriganj and Ugeon; the Rewah escape, and several minor works.

EARNINGS.

58. The income calculated on "Earnings" of the year and expenditure are shown below:—

EXPENDITURE.	Amount.	Earnings.	Amount.
DIRECT CHARGES.	Rs.		Rs.
I.—Works, Maintenance and Repairs.		Water-rates	8,05,790
		Navigation	57,829

The water rates now shown as "earned" are the assessments on the irrigation of the year, and include for the first time those assessments which were not completed until after the close of the year.

LENGTH OF CANALS AND DISTRIBUTARIES.

59. The following table shows the lengths of canals and distributaries open and the areas commanded and irrigable:—

DIVISION.	Navigable canals.	Branch canals.	Distributaries.	Gross area under command.	Maximum discharge of canal.	AREA WHICH CAN BE IRRIGATED.		
						Kharif.	Rabi.	Total.
	Miles.	Miles.	Miles.	Acres.	Cubic feet per second.	Acres.	Acres.	Acres.
Eastern Sone	86½	...	358	406,155	1,613	129,040	180,000	309,040
Arrah	74½	71½	467½	618,356	4,342	347,360	360,000	707,360
Buxar	58	77½	343	704,000				
Total ...	28½	148½	1,168½	1,728,500	5,955	476,400	540,000	1,016,400

An addition of 1¾ miles has been made to the length of distributaries during the year. There are, besides the distributaries included in the

above return, 14 miles of village channel maintained at the cost of Government in the Buxar Division. There is no change in the areas commanded and irrigable; the provision of parallel channels along part of the Buxar canal has, however, enabled land in their neighbourhood to be more easily and satisfactorily supplied with water, and will eventually result in some increase in the area under irrigation.

VILLAGE CHANNELS AND OUTLETS.

60. The following table shows the progress made with village channels and outlets:—

Division.	Total length of village channels completed.	Total number of temporary and permanent outlets.	Number of permanent outlets.
	Miles.	No.	No.
Eastern Sone	204½	2,083	320
Arrah	768½	2,330	737
Buxar	511½	984	274
Total, 1888-89 ...	1,484½	5,397	1,331
Total, 1887-88 ...	1,525	5,999	828

Of the village channels now in use, 185½ miles have been constructed by Government agency and 1,299 by villagers. The figures as regards channels constructed by villagers are only approximate, and the decrease in the total length is partially due to this cause; it is, however, mainly owing to the reduction in the number of outlets from 5,999 to 5,397, which has been accompanied by an increase in the area under irrigation. The construction of permanent outlets was pushed on during the year, 503 having been built in carefully chosen situations with a discharging capacity proportioned as nearly as possible to the area under lease or likely to be irrigated.

RAINFALL.

61. The following statements furnish the rainfall statistics of the Sone canal system and the distribution by canal divisions for the last five years:—

		Average of 22 stations.

1884-85	17·11	0·49	30·67	18·84	0·54	31·63	20·96	0·69	31·37

The Superintending Engineer reports:—"The rainfall for the year (45·43 inches), average for all stations, over the area commanded by the Sone Canals was, it will be noted, considerably in excess of that which fell in the year preceding (40·18 inches), and it was also in excess of the average for 20 years (41·25

inches). The chief characteristics of the season, as regards rainfall, were—*First*, the late date at which the rains commenced. No rain fell at Arrah until the 2nd July, and the rains throughout the area irrigable may be said to have commenced on this date. *Secondly*, the favourable rainfall during July, August, and the first ten days of September. *Thirdly*, the almost entire cessation of the rains from the 11th of September to the 29th of November, the average fall over all canal stations for that period being 1·47 inches only. *Fourthly*, the wide variation in the falls at different stations ranging for the year from 39·03 inches at Sikroul to 52·07 inches at Nasrigunge. This variation had only a comparatively small effect on the area irrigated, as up to the 10th of September the rainfall may be said to have been generally favourable."

62. The following statement shows the area leased and irrigated during the last four years :— AREA LEASED AND IRRIGATED.

Description.	1888-89.		1887-88.		1886-87.		1885-86.	
	Leased.	Irrigated.	Leased.	Irrigated.	Leased.	Irrigated.	Leased.	Irrigated.

Total annual leases ...	145,447	155,867	72,980	105,216	52,393	73,618	105,174	152,786
Grand total ...	345,682	355,969	283,515	315,380	246,812	268,204	279,003	332,570
Percentage of leased to irrigated area	97·12		89·89		92·02		83·89	

The area irrigated was in excess of any year to date, except 1884-85, when the area irrigated was 370,661 acres. The area under annual leases during the kharif season exceeds the area irrigated. This is partly due to areas leased late in October, to which water could not be supplied in time to be of service, but mainly to the strenuous efforts which were made to confine the water within the leased areas. Unauthorized irrigation in the kharif season has practically disappeared.

It will be noticed that compared with the previous year there has been a decrease of 10,260 acres under five-years' lease. It is not to be inferred that there has been any reduction on the area actually irrigated. Applications for five-year leases for 15,050 acres were either declined by the Canal Officers or withdrawn, chiefly the former for reasons given in the extract from the Sub-Engineer's report quoted in the next succeeding paragraph.

The Sub-Engineer was given authority to cancel five-year leases with the result that no single application was declined, and leases for 1,456 acres only cancelled. This may be taken, with leases for 529 acres subsequently cancelled, as the full area on which the lessees were dissatisfied with their bargain.

Out of the 200,102 acres irrigated under five-years' lease, it is estimated that 154,825 acres, or 77·3 per cent., were cultivated under kharif; 27,408 acres, or 13·6 per cent., under rabi; and 17,869 acres, or 8·9 per cent., under sugarcane crops.

The statement below shows the area irrigated during the year and the two preceding, as well as 1884-85, the largest on record, classified by crops—

	1888-89.	1887-88.	Difference.	1886-87.	1884-85.
	Acres.	Acres.	Acres.	Acres.	Acres.
Kharif	224,453	220,428	+ 4,025	177,510	246,740
Rabi	97,225	56,090	+ 41,135	45,361	99,280
Sugarcane	22,469	25,007	— 2,538	30,055	23,682
Total ..	344,147	301,525	+ 42,622	252,926	369,702
Add—Hot-weather irrigation ...	11,762	13,855	— 2,093	15,278	959
Grand Total ...	355,909	315,380	+ 40,529	268,204	370,661

In 1887-88 there was a sharp demand for canal water during the kharif season checked by a copious fall of rain on the 13th October which had an important effect in limiting the area under rabi irrigation during that year. The year under review is perhaps more fitly comparable with 1884-85, in which 14,752 acres more were irrigated. The rainfall in 1888-89 was 45·43 inches for the year and 24·61 inches during the kharif season, the corresponding figures for 1884-85 being 30·26 inches and 18·00 inches; the period of great demand being during October in 1889 and during August and September in 1884.

63. The system pursued was not altogether the same. In 1884-85 but little attempt was made to restrict the supply of water to the area under lease, and irrigation previous to the issue of a permit was not rigorously suppressed, nor were the rules regarding the existence of proper village channels enforced. In 1888-89 the most strenuous efforts were made to prevent unauthorized irrigation, and generally to enforce the provisions of the law and rules. The procedure adopted is detailed in the extract from the Superintending Engineer's report quoted below:—

"Up to the middle of September the season, though the rains were late in commencing, was not unfavourable, but from the commencement of the *Hathia*, the 26th of September, rain was eagerly looked for, and none falling by the beginning of the *Chitra*, the 9th of October, the demand for canal water became urgent and pressing Applications for permits poured in from all sides, and the greatest eagerness to irrigate leased areas was manifested.

"It had been determined at the beginning of the season to abstain from in any way pressing cultivators to enter into leases. Whilst every possible assistance was given, if desired, they were left to decide the matter entirely in accordance with their own view of their own interests. When applications were tendered, the size of outlet allowed was fixed as nearly as possible in accordance with the discharge required to irrigate the area proposed to be leased, so that unauthorized irrigation on any considerable scale would not be possible. It was explained that a *tatil* would be enforced These measures were in some localities not popular, and several applications were in consequence not completed Many applications for leases, five-year and annual, were refused until proper channels were provided, and altogether declined where there was doubt as to the supply of water available, or where the block proposed was such that unauthorized irrigation was certain to occur. These causes and the hope that holding off from applying for leases might induce Government to reduce the water-rates had considerable effect in lessening the area under lease when the urgent demand for water commenced about the 3rd of October. In many cases it was then too late; channels could not be provided in time, nor could water be given within the few days during which the crop could live without irrigation."

The area irrigated in October was in fact practically limited only by the quantity of water available, and the facilities which existed or could be improvised for leading it to the fields From the 16th to the 25th of October, an average of 2,415 cubic feet of water per second were passed down the Arrah canal, which was designed to carry 1,660 cubic feet per second only. In 1884-85 the sharp demand occurred in August and September, so that the time during which irrigation could be usefully effected was more protracted, and under the same circumstances, the area irrigated in 1888-89 would probably have been in excess of the results of that year. Of the late irrigation about 5,000 acres reported as leased or irrigated chiefly in the Arrah Division could not be assessed on various grounds, and if the financial interests of the canals were the only consideration, there is little doubt that it would be best to refuse permits after the 20th of September. It is a matter for consideration whether under such circumstances previous payment in part at least should not be insisted on. The area noted above, having been decided not to have been irrigated in a legal sense, has been excluded from all the returns.

There was a general failure of the rains in Behar, so that it was considered desirable that an account of the kharif irrigation of the year for the Sone canals should be published at an early date for general information. A note on the subject was accordingly published in the *Calcutta Gazette* for the 9th January 1889.

The large increase in the rabi irrigation was chiefly due to there being no rain in October and November, though the reduction in rate of from Rs. 2-8 to Rs. 2 per acre for flow irrigation for the year only had some influence in inducing applications, the major part of which must in any case have been filed, as the ground was so dry that the seeds would not germinate without artificial irrigation.

64. Whatever difference of opinion may exist as to the procedure to be adopted as regards irrigation or the rates to be charged, the advantage reaped by the country generally from the Sone canals during 1888-89 is unquestionable, and the Superintending Engineer appears to have full justification for the observations made in the extract from his report which follows:—

"There can be no doubt as to the benefits the Sone canals conferred on the districts which they traverse during the year 1888-89. The failure of the rice crop outside the area commanded by the Sone canals was nearly complete; the aharas in which there was any water in the first week of October being few and far between. The situation was complicated by the necessity of blocking early in October four vents in the Dehree river sluices of the Sone weir. As narrated in an extract from a report on the kharif irrigation of the year, quoted in paragraph 4, this operation was carried out in 15 hours, during which time only was the supply of the canals partially shut off. There was at the time considerable sickness amongst the sectional officers, and substitutes, even inefficient, could not be procured. The brunt of the work fell on the Subdivisional officers, amongst whom were one European and three native upper subordinates, and sick or well, they threw themselves into the work with a vigour which in my opinion deserves the commendation of Government. The Divisional officers were no less energetic and self-sacrificing in directing operations. The result of the efforts made is generally admitted to have been successful. A pamphlet by a native gentleman, a pleader and landowner, in which a view, certainly not favourable to canal irrigation, is taken, thus speaks of the operations of the year:—'It is almost admitted that in the year under review the canal authorities have worked better in all the departments than in previous years. The supply of water was satisfactory, the prayers of the cultivators were attended to, and, generally speaking, the arrangements were good.' It is fair to say that he adds:—'In fact, the successful management of this year carries with itself condemnation of the system.' The main difference between the system adopted during the year and that previously in force was the determined effort made to prevent water being taken until permits had been granted. The supply of water was rigorously limited to the area leased, and criminal prosecutions instituted, wherever possible, when water was misappropriated. The system was somewhat relaxed after the 10th of October with decidedly unfavourable financial results to Government, but some benefit to the cultivators. It was remarked in last year's report that efforts were made to remove all well-founded grounds of complaint brought to light during the sittings of the Sone Canal Committee, and this policy was continued during the year. It is fully recognized that lasting contentment will only result by securing irrigating cultivators full crops, and that anything short of this standard will, whatever may be the measure of the benefits derived compared with the water-rates paid, lead to complaints which, though ill-founded, are to be avoided."

65. The areas actually irrigated in each of the executive divisions during the last five years are shown below:—

Eastern Sone Division.				Arrah Division.				Buxar Division.				Total for all Divisions.			
Annual leases.				Annual leases.				Annual leases.				Annual leases.			
Kharif and rabi.	Sugarcane and hot-weather.	Five-year leases.	Total.	Kharif and rabi.	Sugarcane and hot weather.	Five-year leases.	Total.	Kharif and rabi.	Sugarcane and hot weather.	Five-year leases.	Total.	Kharif and rabi.	Sugarcane and hot weather.	Five-year leases.	Total.
Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
46,831	1,328	25,136	73,295	97,490	4,556	82,573	184,619	64,998	4,337	43,801	113,047	208,980	10,721	151,510	370,601
20,294	1,041	27,945	49,280	54,998	6,821	95,232	157,021	50,149	13,522	56,607	120,279	137,102	21,384	179,784	332,570
11,869	1,218	34,194	47,279	21,710	20,309	98,737	140,747	13,105	5,288	61,625	80,078	46,744	26,904	194,556	268,204
29,309	679	40,123	61,261	25,982	13,079	102,423	141,484	38,715	6,362	67,618	112,695	85,026	20,120	210,164	315,380
29,470	408	37,117	66,995	53,200	11,591	101,489	165,549	57,700	4,363	61,436	124,505	139,445	16,362	200,102	355,909

The reduction in the area under five-year lease is due as has been mentioned in paragraph 62 above to leases being refused where the channels were not in good order or the blocks unsuitable. In some cases applications were withdrawn, as the cultivators were unwilling to accept the outlets proposed which are now recorded in the permit.

The proportion of *flow* to *lift* irrigation for the last five years is shown below:— Flow and lift.

	1888-89.		1887-88.		1886-87.		1885-86.		1884-85.	
	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.
Proportion	93·4	6·5	95·2	4·8	96·5	3·5	95	5	93	7

DUTY OF WATER

66. The following statement shows the duty obtaining in the year under review and in the years 1887-88 and 1884-85:—

				Eastern Main Canal Series.	Arrah Canal System.	Buxar Canal System.	Western Main Canal Series.	Sone Canals.
1888-89	Kharif	Acres		55,559	120,758	70,605	191,363	246,922
		Duty on gross supply		48·4	68·7	80·1	71·8	65·2
	Rabi	Acres		15,547	47,165	56,982	104,147	119,094
		Duty on supply utilized		56·5	73·01	94·9	83·5	78·7
1887-88	Kharif	Acres		54,733	112,505	78,197	190,702	245,435
		Duty on gross supply		54·4	85·5	81·2	82·4	73·9
	Rabi	Acres		11,111	31,590	38,396	69,986	81,097
		Duty on supply utilized		43·9	65·9	84·9	75·09	68·5
1885-86	Kharif	Acres		39,532	1,24,441	80,661	205,102	244,634
		Duty on gross supply		45·4	88·7	97·0	93·6	79·9
	Rabi	Acres		12,324	44,946	47,371	92,317	104,641
		Duty on supply utilized		42·6	128·0	116·1	121·7	99·0
1884-85	Kharif	Acres		61,849	133,307	75,266	208,573	270,422
		Duty on gross supply		47·1	79·1	74·3	74·2	65·6
	Rabi	Acres		13,103	64,125	45,734	109,859	122,962
		Duty on supply utilized		37·2	142·5	157·7	148·4	112·6

N B.—Sugarcane is included in both kharif and rabi.

As the year 1884-85 was that in which the largest area was irrigated, it has been selected for comparison in place of 1886-87, which was a year of such plentiful rainfall that as stated last year its results are not of much value as standards of comparison.

The main result for 1888-89 the duty in the kharif season for the Sone canals, 65·2 acres, per cubic foot per second of gross supply approaches very nearly to 65·6, the figures for 1884-85, although in the latter year the rainfall was much more favourable.

For a short base, ten days (11th to 20th October 1889) against fourteen days (29th September to 12th October 1887), the duty *on the rice crop alone* for the Sone canals falls to 42·3 acres in 1888-89, against 45 acres in 1887-88.

In the Arrah Division the quantity of canal water utilized in irrigation during the four months July to October is calculated by Mr. Inglis, Executive Engineer, Arrah Division, to be equivalent to 2·93 feet over the area watered in 1888-89, and 2·6 feet in 1887-88. Taking the drainage area, it is equivalent to 7·2 inches of rainfall of effective rainfall, against 5·7 inches in the previous year.

The Superintending Engineer gives the particulars tabulated below regarding some experiments carried out in the Arrah Division on the quantity of water used in irrigating definite areas from specified outlets:—

Distributary.	Size of outlet.	Number of days discharging.	Average discharge.	Area irrigated.	Area irrigated per cubic foot per second.	Date from which open.
Bichiaon	9″×12″	11	2·8	54·15	2·76	2nd October 1888.
Kaithi	9″ diam	11	2·37	45·6	1·74	6th August ,,
Kaithi	Same outlet	11	2·72	42·28	1·41	23rd Sept. ,,
Kaithi	6″ diam.	12	1·09	21·0	1·6	Ditto ,,
Behcea R P. C.	15″×18″	9	3·46	116·4	3·46	3rd October ,,

The results are discordant, and the omission of information as to the nature of the soil, the distance of the outlet from the block irrigated, the number of days elapsed since the last irrigation and since the last rainfall, and the extent of the latter in inches, &c, prevents any useful deductions being made. At the same time the experiments point to a direction in which much useful work can be done, as with a demand in the kharif season, which even now the canals are unable to meet it, is imperative that whilst a sufficient supply of water shall be allowed the utmost economy, which can only be effected at the outlet, should be practised.

The duty in the rabi season was slightly higher than in the previous year. The matter is not of practical importance, as the area of rabi crops irrigated did not nearly approach that for which water was available.

CROP EXPERIMENTS.

67. The results of experiments carried out by canal officers on the outturn of crops irrigated by canals and otherwise have been noticed in former reports The evidence given before the Sone Canals Committee showed that the value of these experiments was questioned, and accordingly in 1888-89 the matter received more than ordinary care. The extract from the Superintending Engineer's report quoted below deals with the difficulties experienced in obtaining comparative results, and narrates the course pursued during the year under review:—

"Former reports have compared the yield of crops irrigated by the canals and those matured without their aid. It has always been recognized that crop experiments, whilst valuable as showing the quantities of grain and straw produced in each case, could not be relied on as an absolute test of the producing power of the land under canal and non-canal irrigation. It was not possible to select plots cultivated under precisely similar conditions, differing only in the means of irrigation employed, and in many parts of the country it was difficult to find rice crops not under canal irrigation. Again, it had been asserted before the Sone Canals Committee that not only was the crop produced by the aid of canal water inferior, but that the longer the land was irrigated, the less the produce became. Complaints were also made that the experiments were not conducted under conditions where the public could have the opportunity of being present and watching the process. Independently of the circumstances of the year, it had been determined to confine the experiment for the most part to canal-irrigated crops, and, as a matter of fact, no other course would have been possible, as rice crop over the area commanded failed where canal irrigation was not available.

"The services of a Covenanted Civilian were placed at the disposal of the Public Works Department, so that the result of a series of experiments carried out by an officer not belonging to the Canal Department might be recorded. The co-operation of Messrs. Burrows, Thomson and Mylne, who have always been ready to assist, in every way, the officers of the Irrigation Department, was solicited, and the Collectors of the districts concerned asked to instruct Subdivisional Magistrates to themselves make a few experiments if possible. In the case of experiments carried out by canal officers, the nearest Magistrates, as well as zemindars and ryots, were asked to be present. The publicity thus given to the experiments did not, in all cases, meet with the approval of the cultivators, who would have preferred the matter to have remained a subject of controversy. The instructions issued were to the effect that the crops experimented on should be good crops, and that the weighment should take place on the field."

The results of the experiments are given in the table which follows, which is abstracted from the figures contained in Mr Luson's report:—

Crop.	Name of officer conducting experiments.	Number of experiments.	Average yield, dhan.	Number of experiments.	Average yield, straw.
			Mds. s.		Mds. s.
Transplanted ...	Mr. H. Luson, c s. ...	25	33 $39\frac{15}{25}$	25	47 $17\frac{11}{25}$
Aghani dhan ...	Messrs Burrows, Thomson, and Mylne	26	31 $5\frac{11}{13}$	26	52 $22\frac{8}{13}$
	Canal Subdivisional Officers	33	35 $6\frac{37}{44}$	31	68 $14\frac{15}{15}$
	Canal subordinates ...	138	31 $30\frac{175}{138}$	134	55 $38\frac{11}{13}$
Kartika dhan...	Mr. H. Luson, c.s. ...	3	35 $1\frac{1}{3}$	3	46 $36\frac{4}{75}$
	Messrs. Burrows, Thomson, and Mylne	25	26 $37\frac{7}{24}$	25	46 $5\frac{107}{225}$
	Mr. G. C. Maconochy, c.s. ...	2	31 $4\frac{1}{6}$	2	56 $29\frac{1}{6}$
	Subordinate, Agiaon ...	1	14 $19\frac{1}{3}$	1	33 6
Broadcast dhan	Mr. H. Luson, c.s. ...	2	22 22	2	31 $22\frac{6}{25}$
	Messrs. Burrows, Thomson, and Mylne	1	23 14	1	36 32
	Canal Subdivisional Officers	3	37 $11\frac{1}{9}$	1	54 0
	Canal subordinates ...	2	33 $7\frac{1}{3}$	2	39 $13\frac{1}{3}$
	Average ...	261	31 $32\frac{9}{16}$	253	54 $32\frac{1}{4}$

The figures given above are not the actual weighments, but the weighments reduced by one-twelfth in the case of dhan and one-third in the case of straw in those cases where the crop was weighed wet on the field, this representing the loss which Mr. Luson found by actual experiment to occur in drying.

It must not be forgotten that the experiments were not on the yield of average crops, which were those selected in former years, but of the yield of the best crops. Mr. Luson, however, states that after a personal inspection of

nearly half the whole irrigated area in Shahabad, Patna, and Gya, he estimates the average outturn of irrigated dhan for the year to be $18\frac{7}{10}$ maunds of paddy per acre, or $12\frac{7}{15}$ maunds of rice.

The average of 1,227 experiments made by canal officers and subordinates from 1880-81 to 1887-88 on the yield of *average* crops is $16\frac{5}{20}$ maunds per acre of paddy, against $18\frac{7}{10}$ maunds, the yield of *average* crops in 1888-89, as estimated by Mr. Luson, based on experiments on good crops. Of the 25 experiments carried out by Mr. Luson himself, 23 were on land which had been continuously irrigated for nine years and upwards, and 16, by either Mr. Luson or Messrs. Burrows, Thomson, and Mylne, were on crops produced on *kerail* soil which has been stated to be unsuited for canal irrigation; the average yield of good crops being, nevertheless, 34 maunds $15\frac{7}{16}$ seers.

The fact that almost any soil will under favourable circumstances if regularly irrigated produce 34 maunds of dhan per acre can scarcely for the future be questioned.

In wheat, 57 experiments were made, and the balance both in grain and straw is in favour of canal water; but this result is reversed in three experiments made on barley.

DEMANDS AND COLLECTIONS.

68. The following statement shows the demands, collections, and balance of water-rates for the last five years:—

YEAR.	DEMAND.			Remissions.	Net demand.	Collections.	Balance.	Percentage of collections to current demand.
	Arrears	Current.	Total.					
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1884-85	4,23,793	11,15,399	15,39,192	73,625	14,65,567	7,70,359	6,95,208	69·0
1885-86	6,95,208	8,07,702	15,02,910	1,26,266	13,76,644	9,78,323	3,98,321	121·1
1886-87	3,98,321	6,95,086	10,93,407	35,364	10,58,043	8,26,461	2,31,582	118·9
1887-88	2,31,582	7,25,810	9,57,392	26,525	9,30,867	5,19,586	4,11,281	71·5
1888-89	4,11,281	7,55,217	11,66,498	24,329	11,10,169	7,59,556	3,80,613	100·8

As usual, the figures given above are taken from those compiled by the Examiner of Accounts. The balance at the commencement of the year agrees exactly, and that at the close of the year very nearly, with the figures given by the Commissioner and Collector; there are differences in the remaining columns which approximately balance each other, the discrepancy at the close of the year being Rs. 4 only. The current demand includes Rs. 1,45,277 which, though due, are not legally recoverable until after the 1st of April.

ARREARS.

69. The extent to which not only the current demand, but also the arrears of 1887-88 and earlier years have been worked off, is shown in the statement following. The figures are obtained from statements attached to the Commissioner's report:—

	Demand of 1888-89 how composed.	Collected or remitted.	Percentage of demand adjusted.	Balance outstanding at close o year.
	Rs.	Rs.		Rs.
Arrears of 1885-86 and previous years... ...	33,330	16,648	49·9	16,682
„ 1886-87	25,848	17,066	66·0	8,782
„ 1887-88	3,52,103*	2,95,630	83·9	56,473
Total of arrear demand outstanding on 1st April 1888	4,11,281	3,29,344	80·0	81,937
Current demand of 1888-89...	7,50,340	4,51,660	60·2	2,98,680†
Gross demand, including arrears	11,61,621	7,81,004	67·2	.....
Total outstanding at close of year	.....	.....	.....	3,80,617†

* Includes Rs. 1,80,559 not legally recoverable within the year 1887-88.

† Includes Rs. 1,45,277 not legally recoverable within the year 1888-89.

There has been a small diminution in the arrear balance on the 1st of April 1889, as compared with that on the 1st of April 1888. The balance due on account of the year immediately preceding that current has increased from Rs. 25,846 to Rs 56,423, whilst the balance an account of previous years has been reduced from Rs. 33,329 to Rs. 25,464.

The effect of the agitation which led to the appointment of the Committee had an unfavourable effect on the collections of the year, the Collector of Shahabad giving it as his opinion that "the work was thrown back by nearly two years." He adds "that instances have come to the notice of our officers where the rate-payers of certain villages expressed their regret that they ever joined the agitation and withheld payment, inasmuch as the pressure of accumulated arrears was too much for them." As regards the current year's demand, the Superintending Engineer notices that the demand statements reached the Collector at a later date than usual, a result ascribed to two causes—1st, the detention of demand statements including items to which objections had been preferred until a decision had been arrived at, and 2nd, the increased area under irrigation. Complaint is made in the Collector's reports of the delay which, as noted above, occurred in the receipt of the demand statements, the reasons given by the Sub-Engineer for their late despatch must be accepted as fairly satisfactory.

70. The following statement compares by districts the operations of the year under review with those of the preceding year:—

District.	ARREARS DUE FOR IRRIGATION EFFECTED IN PREVIOUS YEARS.				DEMANDS FOR IRRIGATION EFFECTED IN 1888-89.			
	Percentage of total demand.				Percentage of total demand.			
	Demand.	Collections.	Remissions.	Outstanding at end of year.	Demand.	Collections.	Remissions.	Outstanding at end of year.
Shahabad—								
1888-89	100·0	78·7	4·8	16·3	100·0	66·2	0·3	33·4
1887-88	100·0	66·0	13·8	20·2	100·0	54·8	0·7	44·5
Patna—								
1888-89	100·0	53·2	8·7	38·0	100·0	18·0	0·02	81·3
1887-88	100·0	45·5	5·6	48·9	100·0	22·0	0·2	77·8
Gya—								
1888-89	100·0	88·4	0·3	11·2	100·0	48·6	1·0	50·3
1887-88	100·0	89·0	1·7	9·3	100·0	42·2	0·2	57·6
Average—								
1888-89	100·0	74·0	5·1	19·0	100·0	59·8	0·3	39·8
1887-88	100·0	64·8	9·7	25·5	100·0	50·7	0·5	48·8

The Commissioner of Patna makes the following observations on the percentage of the total demand, arrears and current, collected during the year:—

"From the above figures it will be seen that in Shahabad 72 per cent. of the total demand was adjusted during the year under report—a result which may be considered fair; while the adjustment in Patna was only 41, which is not satisfactory. The Collector of Patna states that the present circle officer has effected some improvement in the collections, but there is yet much room for further improvement."

The Executive Engineer of the Eastern Sone Division states that the delay in recovering arrears must cause loss of revenue to Government, and has generally a demoralizing effect on the cultivators.

If the demands received in March, which are practically not recoverable during the year, are excluded, the percentage of collections to the total demand, including arrear balances, is for Gya 65 per cent., Patna 38 per cent., and Shahabad 77 per cent.

The result of the year's collecting operations has been good in Shahabad, fair in Gya, but very bad in Patna.

REMISSIONS.

71. The remissions granted during the year are Rs. 2,196 less than those of the preceding year, as shown below:—

	1888-89.	1887-88.
	Rs.	Rs.
By canal officers	10,776	6,911
By civil officers	13,553	19,614
Total ...	24,329	26,525

The statement above is based on the figures contained in the Examiner's accounts.

For the purpose of comparing the accuracy of the demand statements of the year with those of that previous it is necessary to take into account refunds and cancelled demand statements not replaced by others of equal amount. Taking into account these items, which are equally remissions and excluding remissions by civil officers the figures for the last two years are shown below:—

	Rs.
1888-89	16,234
1887-88	18,813

Remissions by civil officers are those arrears which it was found necessary to write off as irrecoverable owing to the persons assessed having absconded or become bankrupt.

The remissions by canal officers may be divided thus:—

	Percentage of remissions and refunds to gross demand.	
	1888-89.	1887-88.
Eastern Sone Division	1·09	0·74
Arrah Division	0·72	1·95
Buxar Division	1·20	1·24

showing, except in the case of the Eastern Sone Division, a further advance on last year's results, which were considered to be satisfactory.

From the Examiner's accounts it would appear that the totals of refunds, remissions and irrecoverable item amounted to Rs. 36,940 in 1888-89 and Rs. 41,856 in 1887-88. These are *actuals* and include items of former years finally dealt with in 1888-89. On this question of remissions and refunds further information is necessary, so as to show what percentage of the assessments of any year are finally remitted, refunded or written off as irrecoverable. The percentage in Bengal on account of the peculiar circumstances under which irrigation there is effected, must always be considerable as compared with other Provinces, but undoubted progress is being made, and it is desirable to show this. The matter should not be lost sight of.

REVENUE ESTABLISHMENT.

72. The expenditure on the Revenue establishments employed during the last two years is shown below:—

	1888-89.		1887-88.	
	Amount.	Percentage on collections.	Amount.	Percentage on collections.
	Rs.		Rs.	
Permanent and temporary establishments, such as zilladars, ameens, &c. ...	(*a*)54,325	7·15	(*b*)53,254	10·25
Establishment employed under Collectors ..	33,316	4·38	30,466	5·85
Headmen's and patwaries' fees ...	70,608	9·30	51,523	9·92
Total ...	1,58,249	20·83	1,35,243	26·02

(*a*) Inclusive of Rs. 2,270 for water regulation establishment.
(*b*) Ditto 2,334 ditto ditto.

The above figures have been taken from the Examiner of Accounts' memorandum.

78. COMPARISON OF TRAFFIC. TRAFFIC.

		1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
Number of miles open ...	No.	218½	218½	218½	218½	218½
Toll collections ...	Rs.	52,412	51,542	49,936	41,719	37,395
Rate of toll per mile ...	„	240	236	229	191	171
Boats, including empties ...	No.	8,096	8,116	8,573	7,210	6,434
Tonnage of boats ...	Tons	103,788	95,082	104,835	77,006	61,744
Estimated value of cargo, including rafts ...	Rs.	58,04,029	56,80,508	64,65,651	36,41,863	41,10,598

The decrease in the tollage levied on the Patna canal system, which is wholly under the head Tollage on rafts, is more than covered by increased tollage assessed during the year in the other canal systems. The decreased tollage on rafts is stated to be due to the stock of bamboos at Patna being in excess of the demand. The remaining variations do not appear to call for remark.

79. The expenditure on navigation establishment was Rs 13,071, against Rs 13,212 in the previous year NAVIGATION ESTABLISHMENT.

80. There is no Government Steam Transport Service on the Sone canals, but three steamers, the property of Government, are hired to a contractor, who maintains a weekly service on the Patna canal, and a bi-weekly service on the Arrah and Buxar canals. The services are regularly maintained, and are understood to be popular, though the speed, owing to various considerations, is slow, barely averaging, including stoppages, four miles an hour. TRANSPORT SERVICE.

81. The miscellaneous receipts for the last five years are given in the following statement:— MISCELLANEOUS RECEIPTS

		1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
		Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water		387	370	702	1,742	582
Plantations		383	394	319	307	178
Other canal produce		1,816	2,145	2,904	2,424	1,339
Water power		835	708	668	469	488
Rent of buildings		8,247	7,197	7,198	7,213	6,409
Fines		224	317	169	653	734
Miscellaneous	Rent of lands	7,995	10,997	15,231	14,369	13,770
	Fisheries	734	502	565	421	732
	Cost of process	3,739	2,474	6,302	6,414	7,066
	Sale of old materials	102	60	443	355	405
	Other items	2,042	3,295	3,213	3,713	8,651
	Total	26,504	28,459	37,714	38,080	40,354

The only considerable decrease has been under the head rent of lands. It was last year explained that it had been found necessary to retain possession of land likely to be required for repair purposes owing to difficulties experienced in reclaiming it when required.

82. The state of the plantations in each division at the close of the years 1887-88 and 1888-89 is shown in the following statement:— PLANTATIONS.

Division.	1888-89.				1887-88.				Increase.	Decrease.
	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.		
	No.	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone	71,478	30,308	53,530	155,276	64,280	28,334	59,440	152,054	3,222	...
Arrah	35,871	23,379	61,014	120,264	31,503	15,274	54,944	101,021	19,247	...
Buxar	13,488	6,972	23,396	43,716	9,693	14,765	18,327	42,785	931	...
Total	120,737	60,719	137,854	319,360	105,476	58,373	132,911	295,860	23,500	...

The expenditure on plantations was Rs. 8,929, and the receipts Rs. 383 against Rs. 8,300 and Rs. 394, the respective amounts in the previous year The plantations have not yet arrived at a stage in which any substantial sum

can be expected to be received as earnings, but there is a satisfactory progressive increase in the number of trees which require little or no outlay in keeping up.

FINANCIAL RESULTS.

83. The receipts on revenue account and working expenses of the Sone Canals for the year 1888-89 and the nine preceding years are shown in the statement below:—

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.	1881-82.	1880-81.	1879-80.

Net revenue	36,846	(—)1,63,730	3,04,871	4,78,644	2,26,944	61,648	1,14,903	2,46,099	(—)25,564	1,47,065

* These are now shown under the suggestion of the Government of India.

Compared with 1887-88, the net revenue is Rs. 36,846 against a deficit of Rs. 1,63,730, which is mainly due to the increase in the total receipts from Rs. 5,88,618 to Rs. 8,31,278.

The working expenses during the year have exceeded those incurred in any year up to date, and, considering the small revenue derived from the canals, it is essential that any increase under this head shall be jealously watched.

In respect to the area irrigated, the year has been compared with 1884-85, and on referring to the table above it will be seen that the working expenses were Rs. 6,28,075 in that year, against Rs. 7,94,432 in 1888-89, showing an increase of Rs. 1,66,357, out of which Rs. 118,377 is in one item—"Establishment employed on maintenance, including direction and accounts." This increase in cost is apparent only. In 1884-85 a charge of 23 per cent. on the expenditure incurred on maintenance and repairs was made the balance being debited to the provincial establishment Roads and Buildings Branch, whilst at present the actual cost of the establishment employed, which is less than that actually engaged on the same work in the former year, is debited to this head. The new method of charging establishment has in fact added upwards of Rs. 1,10,000 to the permanent yearly working expenses of the Sone canals.

In 1888-89, Rs. 10,426 was expended on Extensions and Improvements, whilst in 1884-85 there was no expenditure under that head.

Under the head Maintenance, the expenditure in 1884-85 was Rs. 16,656 in excess of that incurred during the current year.

The expenditure on Tools and Plant was in excess in 1888-89 by the sum of Rs. 7,745, chiefly owing to the increased number of dredgers and mud punts now in use.

There is a small increase in the expenditure on the establishment employed under both the Engineers and Collectors, due to the larger area irrigated and the increased collections. The increased sum disbursed on account of headmen's fees includes Rs. 10,949 wholly in the Arrah Division of arrears previous to 1887-88 disbursed in 1888-89, and to that extent the expenditure is unduly high; the remaining increase is a consequence of the increase in the area irrigated and in the collections.

73. The following statement shows the approximate cost of measuring lands brought under assessment during the year under review and of preparing demand statements :— COST OF MEASUREMENTS, &C., PER ACRE.

DIVISIONS.	Areas measured during the year and assessed.	COST OF MEASURING CROPS.		COST OF PREPARING DEMAN STATEMENTS.	
		Total.	Per acre.	Total.	Per acre.
	Acres.	Rs.	Pies.	Rs.	Pies.
Eastern Sone	24,356	713	3·98	1,017	5 68
Arrah	70,483	2,838	7 73	2,518	6·85
Buxar	72,469	2,483	6 57	1,630	4·32
Total, 1888-89 ...	177,308	6,034	6·53	5,165	5 59
Total, 1887-88 ...	161,069	5,533	7 09	4,594	5·83

It will be seen from the above table that the increase in the area assessed has been followed by a reduction in the cost per acre of making the assessment.

74. The Superintending Engineer has attached to his report very complete lists of complaints and applications received during the year divided under three main heads:—(I) Objections to demand statements or ordinary applications for remission; (II) Complaints against orders actually passed other than those imposing an assessment; (III) Applications in connection with irrigation not involving complaints against orders passed by or the action of canal officers. Both complaints and applications are classified under numerous heads and sub-heads in appendices XIV and XV to the Superintending Engineer's report. In former years a less elaborate classification was adopted, but the numbers of complaints for the last two years can to a certain extent be classified under the main heads mentioned above, and figures showing the results are given in the subjoined table :— COMPLAINTS.

DIVISION.	(I.)—ORDINARY REMISSION.				(II TO IV.)—OTHER COMPLAINTS.			Total complaints received during year, excluding those pending from previous year.	Pending
	Received during the year and pending from previous year.	Disposed of.		Pending.	Received during the year and pending from last year.	Disposed of.	Pending.		
		Remission allowed.	Remission refused.						
	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone ...	1,512	493	550	470	56	47	9	1,518	479
Arrah	3,591	1,094	1,502	995	441	357	84	3,688	1,019
Buxar	1,867	624	939	404	220	207	13	1,864	417
Total, 1888-89 ...	6 970	2,201	2,990	1,869	717	611	106	7,070	1,915
Total, 1187-88 ...	6,748	2,385	3,838	025	Not recorded.				

Of the 5,161 complaints regarding assessment disposed of, remission was allowed in 42·6 per cent. of the cases, against 37 3 per cent. in the previous year. The Superintending Engineer remarks that the small increase in the number of complaints is apparent rather than real owing to the fact that not unfrequently the same complaint is made to the Subdivisional Officer, the Executive Engineer, the Collector, and the Superintending Engineer, each of which now appears as a separate number in the register. The demand for water in October for new irrigation also led to many complaints, as the cultivator is never satisfied to pay water-rates unless the crop is satisfactory, and this was necessarily not the case where water was applied for and received at the last moment. The explanation may be accepted as sufficient as regards the apparent increase in the numbers of complaints, there being no doubt that it is due to a more rigid enumeration of the number of complaints, and the character of the season being such as to induce objections to the assessments. The same cannot, however,

be said as to the number of complaints pending at the close of the year, especially in the Arrah Division, for which no sufficient reason has been given.

APPEALS. 75. During the year 23 appeals against the orders of canal officers were prefered to the Collector; of these 3 were allowed, 15 dismissed, and 5 pending at its close.

CERTIFICATE PROCEDURE. 76. The number of certificate cases filed and disposed of during the year under review, as compared with the year preceding, in the districts of Shahabad, Patna, and Gya, is shown below:—

	Shahabad.				Patna.				Gya.			
	1888-89		1887-88.		1888-89.		1887-88.		1888-89.		1887-88.	
	Number.	Amount.	Number.	Amount.	Number.	Amount.	Number.	Amount.	Number.	Amount.	Number.	Amount.
		Rs.		Rs.		Rs.		Rs.		Rs.		Rs.
Cases for disposal—												
1. Cases pending at the close of the preceding year.	967	17,943	6,092	44,195	4,045	21,154	2,421	14,058	167	2,991	48	417
2. Cases instituted during the year	2,948	36,974	1,617	25,295	1,129	6,103	3,802	13,811	139	9,044	244	3,230
Total ...	3,915	54,917	8,309	69,490	5,174	27,257	6,223	27,869	306	12,035	292	3,647
Cases disposed of—												
1. By being struck off owing to the demand having been remitted.	516	5,512	2,846	16,054	1,425	4,226	465	1,943	80	4,403	80	205
2. By being wholly satisfied ...	2,879	42,838	4,466	35,493	1,427	3,496	1,713	4,773	116	577	95	451
Total ...	3,395	48,350	7,312	51,547	2,852	7,722	2,178	6,715	206	5,040	125	656
Balance outstanding at the close of the year.	520	6,567	997	17,943	2,323	19,535	4,045	21,154	100	6,995	167	2,991

From the above it will be seen that inclusive of 5,179 cases pending at the commencement of the year, there were 9,395 for disposal, covering a sum of Rs. 94,207. In 2,031 cases for Rs. 14,200 the demand was remitted, whilst in 4,422 for Rs 46,910 the demand was fully satisfied. The number of cases pending at the close of the year was 2,942, the sum outstanding being Rs. 33,097. The Collector of Shahabad observes that remissions were mostly due to the cases covering bad and irrecoverable debts, and draws attention to the satisfactory decrease, compared with the preceding year, in the number of cases pending at its close. The excessive percentage of cases struck off in the Patna district is probably not unconnected with the delay in making collections, commented on in paragraph 65 of this note.

NAVIGATION RECEIPTS. 77. The tables below show the navigation revenue and tollage receipts for the last five years:—

NAVIGATION RECEIPTS.

Year.	Eastern Main Series.			Western Main Series.			Total.	Total tollage only.
	Number of miles open.	Tollage receipts.	Transport service receipts.	Number of miles open.	Tollage receipts.	Transport service receipts.		
	No.	Rs	Rs.	No.	Rs.	Rs.	Rs.	Rs.
1884-85	86½	23,055	1,304	132½	14,280	13,122	51,761	37,335
1885-86	86½	19,579	...	132½	22,133	4,531	46,243	41,712

1887-88	86½	27,622	96*	132½	23,363	4,823*	55,904	50,984
1888-89	86½	24,876	60*	132½	27,286	5,607*	57,829	52,162

* There is no longer any Government transport service. These receipts are on account of hire of steamers, boats, and sundries.

TOLLAGE (ASSESSED).

Year.	Patna Canal System—Eastern Main Canal Series.	Arrah Canal System.	Buxar Canal System.	Total.
	Rs.	Rs.	Rs.	Rs.
1884-85	23,142	10,316	3,937	37,395
1885-86	19,523	14,808	7,388	41,719
1886-87	22,646	18,289	9,001	49,936
1887-88	28,206	15,306	8,030	51,542
1888-89	25,165	18,421	8,826	52,412

Under the head Revenue Management irrigation establishment there is an excess of Rs. 28,941 in 1888-89 wholly on the item headmen's fees. The actual expenditure on irrigation establishment was Rs. 1,07,411 in 1884-85 and Rs. 85,371 in 1888-89.

There was a reduction of Rs. 2,720, compared with 1884-85, under the head Navigation establishment.

Setting aside former years, there was special expenditure in 1888-89 on the following items:—

I.—Substituting masonry arches in place of wooden platforms in the case of 14 bridges over the Chowsa and Gurra Chowbey Canals.

II.—Rebuilding the piers of the river sluices on the Dehree side of the Sone weir. On this work Rs. 50,024 were expended during the year.

III.—The payment of one year's arrears of headmen's fees, amounting to Rs. 10,949, for 1886-87 in the Arrah Division.

In future years, now that the whole of the piers of the river sluices of the Sone weir have been reconstructed, the expenditure on works (extensions and improvements and maintenance) should be kept within Rs. 3,00,000, and there ought also, compared with 1888-89, to be a reduction of Rs. 10,000 in the item headmen's fees.

84. The cost of repairs to head-works during the last five years is shown below:— REPAIRS TO HEAD WORKS.

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
	Rs.	Rs	Rs.	Rs.	Rs.
Sone weir	63,245	47,160	68,570	34,908	29,922
Other works	10,097	12,997	10,419	7,697	9,462
Total ...	73,342	60,147	78,989	42,605	39,384

The extra cost of maintaining the head-works was wholly due to special expenditure, amounting to Rs. 50,024, on the remodelling of the Dehree river sluices of the Sone weir. Work on rebuilding the piers was commenced in December, and the whole of the masonry work completed by the 31st March; the gates and fittings were finished before the present rains; the total expenditure on the new piers was Rs. 56,826. The whole of the piers of the river sluices of the Sone weir have now been rebuilt. Excluding special repairs to the river sluices, the expenditure on the head-works was Rs. 23,318 in 1888-89, against Rs. 25,139 in 1887-88.

85. The outlay on main canals and distributaries in each division during the last two years is shown below:— MAINTENANCE OF MAIN CANALS AND DISTRIBUTARIES.

	Arrah Division.		Buxar Division.		Eastern Sone Division.	
	1888-89.	1887-88.	1888-89.	1887-88.	1888-89.	1887-88.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs
Western Main canal	44,298	42,388	20,109	10,456	...	...
Eastern ditto	...	...	...	...	22,722	30,672
Canals	34,443	25,717	10,766	11,686	23,015	26,395
Branch canals	14,559	16,874	14,206	12,710	...	...
Distributaries	29,453	27,136	15,172	12,604	17,216	19,806
Drainage and protective works ...	2,358	3,044	153	888	2,753	2,944
Total ...	1,25,111	1,15,159	60,406	47,844	65,706	79,817

These figures are taken from the Superintending Engineer's report. The cost of maintenance, excluding head-works and telegraph lines, is Rs. 2,51,223, against Rs. 2,42,820 shown last year.

Both in the Arrah and Buxar Divisions the expenditure during the year was more than that of the year 1887-88. The increase is mainly due to special silt clearing in the 9th to the 13th miles of the Main Western canal and in miles 28 to 58 of the Arrah canal which had not been carried out for many years. The renewal of the Pakri bungalow roof with iron beams has also contributed

somewhat towards the excess expenditure. The outlay in the Eastern Sone Division was Rs. 14,111 less than in the year preceding.

SILT CLEARING AND DREDGING.

86. The quantity of silt dredged from the Eastern and Western Main canals, and the rate at which the work was done during the last two years, are given below :—

CANALS.	1888-89.			1887-88.		
	Cubic feet dredged.	Cost, including removal over spoil bank or discharge into river.	Rate per 1,000 cubic feet.	Cubic feet dredged.	Cost, including removal over spoil bank or discharge into river.	Rate per 1,000 cubic feet.
		Rs.	Rs. A. P.		Rs.	Rs. A. P.
Eastern Main and Patna	23,27,518	12,944	5 9 0	30,56,923	17,521	5 11 6
Western Main ...	75,44,478	49,724	6 9 5	77,69,055	46,049	5 14 10

The Superintending Engineer makes the following observations in the increase in rate per 1,000 cubic feet in the case of the Western Main canal, and on the charge for interest and depreciation adverted to in last year's report :—

The rates compare unfavourably with those of the previous year, when for the most important item, Main Western canal, the rate was Rs. 5-14-10 per 1,000 cubic feet of silt dredged. This is in part due to liabilities for 1887-88, amounting to Rs. 2,209,* having been paid in 1888-89. Deducting this amount from the whole expenditure for 1888-89 and adding it on to that of 1887-88, the rates for the Main Western canal become Rs. 6-5-4 per 1,000 cubic feet for 1888-89 and Rs. 6-2-11 for 1887-88. The rate for 1886-87 was Rs. 7-6-6 per 1,000 cubic feet. It may be added that during 1888-89 the work was spread over 13 miles instead of being confined to the first 9 miles of the canal as usual

* On 86,55,367 cubic feet dredged.

Turning to the cost of dredging only, leather belting and rope cost Rs. 3,693 in 1888-89 and Rs. 1,313 in 1887-88. The extra cost during the year was partly owing to silt having been to a greater extent than usual thrown into the river requiring an extra length of rope, and partly to the month in which the ropes and belting were renewed falling in 1888-89. The extra rate owing to this cause in the Main Western canal is annas 4-4 per 1,000 cubic feet Amongst other causes for the extra cost was Rs. 400 charged during the year for making a road through the spoil bank to the river.

The expenditure on repairs to dredgers was as follows :—

		Rs.
Fouracres' dredgers	(12)	7,704
Bruce's ,,	(2)	754
English ,,	(2)	4 300
Mud punts	(64)	2,870

If the total cost of dredging is required, the following sums, details regarding which are given in the Revenue Report for 1886-87, should be added to the rates mentioned above :—

	C. ft.	Rs. A. P.
For Fouracres' dredgers per	1,000	2 12 8
,, Bruce's ,,	,, 1,000	4 14 4
,, English ,,	,, 1,000	8 13 3
,, Mud punts ,,	,, 1,000	2 14 1

The dredgers are laid up during part of the year, but this will have no effect on the charge for interest and depreciation, as the number of dredgers and punts cannot be diminished, every dredger and mud punt at times during the rains barely sufficing to keep the canal open, and it is a question whether the dredgers do not suffer nearly as much when laid up as when at work : it is the difference between rubbing and rusting. In any case the interest would be the same, as the dredgers cannot be employed on other work. The dredging accounts are perhaps not in such detail as might be desired, but further minute accuracy would involve increased clerical establishment. Instructions will be given that in future liabilities and not payments only during the year are to be taken into account.

In future reports the actual cost based on liabilities should certainly be shown, and it would be well to show the number of days during which the dredgers have been employed and been laid up.

The quantity and cost of silt clearances by hand in the Eastern Main and Patna canals during the last two years is shown in the following table:—

	1888-89.			1887-88.		
	Cubic feet cleared by hand.	Cost.	Rate.	Cubic feet cleared by hand.	Cost.	Rate.
		Rs.	Rs. A. P.		Rs.	Rs. A. P.
Eastern Main and Patna canals ...	21,78,608	10,542	3 12 9	1,981,102	9,681	4 13 6

In the case of the Western Main canal, in addition to the charge for dredging, Rs. 3,460 was spent in the Arrah Division and Rs. 258 in the Buxar Division on silt clearing by hand.

In the Arrah canal silt clearing on a more extensive scale than usual was carried out during the year, the quantity removed by hand being 28¼ lakhs cubic feet at a cost of Rs. 8,282, and Rs. 1,444 was also expended on dredging silt accumulated in front of locks.

The expenditure incurred during the year on dredging and clearing silt in the branch canals and distributaries is shown below:—

	Rs.
Eastern Sone Division.	
Distributaries, Patna Canal System	1,359
Arrah Division.	
Doomraon branch canal	938
Behea branch canal	88
Distributaries	4,934
Drainage and protective works	813
Buxar Division.	
Buxar canal	453
Chowsa branch canal	56
Distributaries	479

87. The cost of weed-clearing for the last five years is shown in the following table:— WEED CLEARING.

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
	Rs.	Rs.	Rs.	Rs.	Rs.
Eastern Sone Division	217	558	314	2,115	1,589
Arrah Division	1,725	3,342	2,218	2,491	3,976
Buxar ,, ...	869	1,015	2,065	77	...
Total ...	2,811	4,915	4,597	4,683	5,565

It will be seen from above table that the cost of weed clearing during the year was about half of that incurred during preceding year.

This decrease in expenditure is attributed partly to the heavy discharge of the canals in October, which had apparently some effect in retarding the growth of the weeds, and partly to the silt clearance in the lower part of the Arrah canal previous to the rains which, for the time being, destroyed nearly all the weeds there. In the previous year the weeds in these miles had been very troublesome.

88. The mileage rates of cost of repairs are worked out below both for canals and distributaries, and compared with the rates of the two previous years in the statement below:— MILEAGE RATES OF REPAIRS.

Canal.	Division.	1888-89.		1887-88.		1886-87.	
		Number of miles.	Cost per mile.	Number of miles.	Cost per mile.	Number of miles.	Cost per mile.
		No.	Rs.	No.	Rs.	No.	Rs.
Eastern Main Canal	Eastern Sone	7¼	3,134	7¼	4,230	7¼	2,245
Western ditto	Arrah	5	8,859	5	8,477	5	7,386
	Buxar	16¼	1,218	16¼	633	16¼	540
Buxar Canal	Do.	45¼	238	45¼	258	45¼	406
Patna do.	Eastern Sone	79	291	79	334	79	305
Arrah do	Arrah	65½	527	65½	392	65½	455
Doomraon Branch	Do.	40½	187	40½	242	40½	152
Behea ditto	Do.	31	226	31	229	31	182
Chowsa ditto	Buxar	30½	246	30½	195	30½	200
Gurra Chowbey Branch	Do.	38	119	38	131	38	131
Distributaries	Arrah	467½	63	467½	58	467½	54
	Buxar	343	44	341½	57	333½	53
	Eastern Sone	358	48	358	55	357	45

The increase in the mileage rates, where such occur, is wholly due to the larger quantity of silt removed, which is itself a consequence of the larger area irrigated during the last two years.

CLOSURES OF CANALS.

89. The Western Main series of canals were closed from the 1st to the 12th June 1888, the Eastern Main series from the 17th April to the 25th May 1888, and the Arrah canal from the 28th mile downwards from the 2nd May to the 12th June 1888.

FLOODS.

90. There were high floods during the year both in the river Sone and in the river Ganges. Little or no damage, however, was caused to the canal works. The highest readings on the gauges are noted below :—

RIVER SONE.

LOCALITY.	1888-89—17TH AUGUST 1888.		1887-88—12TH JULY 1887.		HIGHEST KNOWN, 1876-77—7TH JULY 1876.	
	Above weir.	Below weir.	Above weir.	Below weir.	Above weir.	Below weir.
Dehree	340·50	339·50	338·40	337·40	342·10	341·00
Baroon	342·60	340·40	340·13	338·10	343·50	342·70

RIVER GANGES.

LOCALITY.	Date.	Reading.	HIGHEST KNOWN SINCE 1874.	
			Date.	Reading.
Buxar	20th September 1888 ..	119·21	6th September 1875...	200·71
Deegah	19th „ „ ...	168·53	14th August 1879...	169·20
Hajipore, confluence of rivers Ganges and Gunduck.	19th „ „ ...	165·60	August „ ...	166·20

The Dehree canal head sluices were closed for 58½ hours and the Baroon canal head sluices for 136 hours during floods to avoid the influx of water heavily charged with silt.

CALCUTTA AND EASTERN CANALS.

CAPITAL ACCOUNT.

91. The Capital and Revenue Accounts of these canals are given below :—

I.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1888-89.	Outlay to end of 1888-89.

92. The following statement shows the financial results of these canals for the last ten years. The figures are both for direct and indirect charges:— FINANCIAL RESULTS.

YEAR.	CAPITAL OUTLAY		RECEIPTS AND WORKING EXPENSES.			Percentage of net revenue to capital outlay to end of year.
	During the year.	To end of the year.	Gross revenue.	Charges (direct and indirect).	Net revenue.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1879-80	2,60,998	35,89,495	3,44,565	1,93,049	1,51,616	4·2
1880-81	6,26,886	42,16,381	4,14,145	2,19,323	1,94,822	4·6
1881-82	5,58,268	47,74,649	4,82,467	3,32,221	1,50,246	3·1
1882-83	3,21,351	50,96,000	5,64,194	3,26,897	2,37,297	4·6
1883-84	1,35,534	52,51,534	5,64,101	2,32,031	3,32,070	6·3
1884-85	9,013	52,60,547	(a) 5,69,726	2,91,214	2,78,512	5·2
1885-86	(—)42,566	52,17,981	(b) 4,79,484	1,96,209	2,83,275	5·4
1886-87	5,293	52,23,274	4,83,654	1,72,264	2,91,390	5·5
1887-88	15,842	52,39,116	5,79,034	3,24,056	2,55,278	6·7
1888-89	49,369	52,88,485	5,75,125	2,93,801	2,81,324	5·3

(a) Is Rs. 35,185 larger than it should be by reason of error of amount.
(b) Is Rs. 35,185 smaller than ditto ditto ditto.

The expenditure on Capital account was larger than it has been of recent years, and amounted to Rs. 49,369. Of this sum, Rs. 27,745 was spent on two wrought-iron caissons, to be used for closing the large locks at Dhappa and Chitpore, when these are under repair, and Rs. 12,258 on buildings, of which the chief are the new Dhappa toll-house, an inspection bungalow at Busseerhaut on the Eastern canals boat route, and a godown at Bhangore for the storage of goods recovered from wrecks.

The gross revenue, though less than that of 1887-88, is greater than that of any other preceding year since 1879-80, while the net revenue, though better than that of the first six years of the decade, is worse than that of either of the

three immediately preceding years. The receipts and working expenses for the last ten years are shown in greater detail in the following statement:—

	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.	1881-82.	1880-81.	1879-80.

* These are now shown under the suggestion of the Government of India.

COLLECTIONS.

93. As compared with 1887-88, the navigation receipts show a falling off of Rs. 5,174, or 0·9 per cent., corresponding to a decline of 622, or 0·4 per cent., in the number of boats which paid toll. Miscellaneous revenue has increased by Rs. 384. The fluctuations in receipts from each source are shown below:—

CANALS.	Number of boats and rafts.	COLLECTIONS BY COLLECTOR AND SUPERVISOR.						COLLECTIONS BY EXECUTIVE ENGINEER.	GRAND TOTAL, GROSS REVENUE.
		Tolls from boats and rafts.	Demurrage.	Ferry tolls.	Tolls from steamers and flats.	Rents of buildings, lands, and other miscellaneous receipts.	Total.	Rents of buildings, lands, and other miscellaneous receipts.	
	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern	90,090	4,22,860	4,748	3,500	4,670	3,224	4,30,071	1,780	5,75,144
Tolly's Nullah ...	78,210	1,32,202	912	807	...	222	1,34,293		
Total, 1888-89 ...	168,300	5,55,161	5,660	4,427	4,670	3,446	5,73,364	1,780	5,75,144
Total, 1887-88 ...	169,031	5,02,405	5,022	2,894	4,445	3,522	5,78,288	1,646	5,79,934

BOATS.

94. On the Circular and Eastern Canals, which is the chief outlet to the Eastern boat-route, the number of boats rose from 88,959 to 90,068:—

		NUMBER AND CLASS OF BOATS.					
		Up to 100 maunds.	Between 100 & 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.
Circular and Eastern Canals	1888-89 ...	36,376	31,020	20,492	2,100	72	90,068
	1887-88 ...	34,968	30,806	21,227	1,809	89	88,959

The tolls collected on this route also show an increase of Rs. 1,874. On Tolly's Nullah, however, the number of boats is less by 1,819, and the takings by Rs. 8,193:—

		NUMBER AND CLASS OF BOATS.					
		Up to 100 maunds.	Between 100 and 200 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.
Tolly's Nullah ...	1888-89 ...	18,766	24,104	6,067	56	...	48,993
	1887-88 ...	18,244	24,793	7,202	59	...	50,298

The shallowness of the channel is the chief cause of the falling off.

Besides the boats enumerated in these tables, the boats which are unclassified, being chiefly small boats of 100 maunds, paying toll at Russa on Tolly's

Nullah, numbered 29,127 against 29,641 in the previous year. Rafts show a decrease of 12 in number, and steamers and flats an increase of 45.

The traffic in rice was unfavourably affected by a disposition on the part of mahajuns to lock up their stocks in view of a rise in price. On the other hand, the jute trade was brisk.

TRAFFIC.

95. The following statement compares the traffic on the Calcutta canals and Tolly's Nullah during the year 1888-89 with the preceding year :—

		Number of boats.	Tonnage of boats by canal measurement.	Weight of cargo carried.	Value of cargo carried.	Tollage, including demurrage.	Percentage of toll on value of cargo.
		No.	Tons.	Tons.	Rs.	Rs.	
1888-89	Calcutta canals ...	90,068	2,005,703	701,543	5,48,07,758	4,32,288	
	Tolly's Nullah ...	78,120	796,275	259,456	1,82,07,771	1,33,203	
	Total ...	168,188	2,801,078	961,999	7,10,75,529	5,65,491	0·79
1887-88	Calcutta canal ...	88,959	2,065,967	696,752	4,78,97,746	4,30,417	
	Tolly's Nullah ...	79,939	914,938	259,775	1,56,04,747	1,41,455	
	Total ...	168,898	2,980,905	956,527	6,35,02,493	5,71,872	0·89

There is decrease in all heads except in value of cargo, which shows an increase of Rs. 75,13,036, attributable to the higher prices of goods.

MISSING TICKETS.

96. In the number of missing tickets there is a very satisfactory decrease of 348, or about 51 per cent.

RENTS OF SURPLUS LANDS.

97. The disposal of the revenue derived from the rents of surplus lands on these canals has recently been the subject of some discussion, and may be briefly referred to here. The income from this source aggregates about Rs 38,000, of which Rs. 28,000 has always been collected by the Collector of the district, while the collection of the remaining Rs. 10,000, which was formerly in the hands of the canal officers, was, in consequence of the recommendations of the Committee appointed in 1886, also transferred to the Collector. It has been decided by the Government of India, in the Finance Department, that, as the whole of this income is now collected by the Collector, it should be credited under the head of "Land Revenue," and, as a consequence of this decision, the further question has arisen of the propriety of making a reduction in the amount shown as capital expenditure in the accounts. It is true that the importance of this question is lessened by the fact that no interest is paid on capital in the case of these canals; but the financial position of any work cannot be said to be accurately stated so long as capital is debited with expenditure, the profits of which do not appear in the revenue account; and, for this reason, the Officiating Chief Engineer has recorded his opinion that the reduction in the capital account should be made; and further, as the value of the lands has been enhanced by the successful development of the canals, that the sum so credited to the capital account should be the present value of the lands, and not their original cost.

REVENUE ESTABLISHMENT.

98. The statement below compares the entire cost of the Revenue establishment under the Collector and Supervisor with the gross collections made by him for the last four years :—

	Gross collections made by Collector and Supervisor.	Cost of entire Revenue establishment.	Percentage.
	Rs.	Rs.	
1888-89	5,73,364	37,684	6·57
1887-88	5,78,288	38,920	6·73
1886-87	4,81,048	42,714	8·84
1885-86	5,13,839	44,751	8·70

Although the collections of the year were less than the amount of the previous year the Supervisor's commission was greater on account of the unusually heavy commission for March 1888 being paid in April. This was more than counterbalanced by the reduction under other heads on account of the transfer of an Inspector to the Nuddea Rivers and the pensioning of the head clerk, the places in both cases being taken by men on lower salaries.

Although there has been a small reduction in the number of boats entering the canals, yet the result of a further reduction in the cost of establishments is again a small decrease in the cost per boat measured from 3·68 to 3·58 annas.

WRECKS. 99. The total number of boats wrecked owing to various causes during the year was 106, against 128 of the previous year.

MAINTENANCE CHARGES. 100. From the statement already given in paragraph 86, it will be seen that the working expenses, including all charges, direct and indirect, have increased from Rs. 2,24,656 to Rs. 2,93,801, and that this increase has taken place mainly in the cost of maintenance and repairs, which has risen from Rs. 1,04,527 to Rs. 1,63,656. Under "Channels and Banks," on which the increase in the cost of maintenance is Rs. 39,158, is included the greater portion of the outlay on the Bhyrub and Assassooni khalls, two links in the chain of rivers and tidal creeks forming the Eastern boat route, both of which were laid dry and the work carried out at the end of 1887-88, the silt being cleared by hand. The clearance of the Tetooa khall and some extensive piling work near Hastings on Tolly's Nullah were also charged under this sub-head. Under "Towpaths," on which the increase is Rs. 5,616, much of the repairs carried out in 1887-88 was paid for in 1888-89, while on "Rustic Bridges," on which only ordinary charges had been incurred for some years, the renewals now found necessary caused an increase of Rs. 8,671.

DREDGING. 101. On "Dredging" the expenditure has increased from Rs. 4,254 to Rs. 10,979. 979,700 cubic feet of silt were dredged by two dredgers for Rs. 8,698; an average rate of Rs. 8-14 per thousand cubic feet. The quantity dredged in the previous year was 350,700 cubic feet, and the rate Rs. 9-8-4 per thousand.

ORISSA COAST CANAL.

CAPITAL ACCOUNT. 102. The Capital and Revenue accounts of this canal are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1888-89.	Outlay to end of 1888-89
	Rs.	Rs.
DIRECT CHARGES.		
I.—Works	70,302	32,19,103
II.—Establishment	24,963	7,26,121
III.—Tools and plant	3,464	1,74,816
IV.—Suspense accounts	(—) 911	37,311
Total	97,818	41,57,351
V.—*Less* receipts on Capital account ...	7	3,278
Net total direct charges	97,811	41,54,073
INDIRECT CHARGES.		
Capitalized abatement of land revenue	.....	784
Leave and pension allowances ...	3,495	1,01,572
Total indirect charges ...	3,495	1,02,356

A revised estimate for this canal was sanctioned by the Secretary of State in August 1889, and amounted to Rs. 43,46,873 (direct charges), or Rs. 1,92,800 over the total expenditure to end of the year 1888-89. The canal has been open throughout its entire length of 97½ miles during the year. The works in progress under "Original works" comprised the finishing up of the canal banks, locks, and ferry ghâts, and the completion of the Panchpara supply pipe.

The canal is practically complete, though certain details, such as the provision of accommodation for the tolls establishment, ferry ghâts, &c., remain to be carried out. Some 2,900,000 cubic feet too of earth has still to be taken out of the bed, but as it offers no serious obstacle to navigation, and to dredge it would be expensive, its removal has been deferred.

The expenditure has been entirely from Provincial Funds with the exception of Rs. 8,66,000 contributed from Imperial Protective Funds. There is no interest account.

2—REVENUE ACCOUNT (ACTUALS).

IRRIGATION.

108. These canals were, as last year stated, primarily intended for the supply of water for the manufacture of indigo. The water available is to a certain extent used for irrigation, but the areas returned as irrigated are not reliable, there being no special establishment employed to assess water-rates, which are collected by the gentlemen who have guaranteed a revenue of Rs. 21,850. There are no distributaries and but few village channels, and the guarantors are understood to have considerable difficulty in assessing lands watered direct from the canals, which are in fact the old nullahs of the country.

There was a complete failure of the *Hutia* rain, and in consequence a demand for water for rice irrigation, and also to a limited extent for rabi irrigation, as seeds could not be sown in many places for want of moisture without artificial irrigation.

The areas irrigated for all years since 1881-82 are shown below:—

	Acres.
1881-82	666
1882-83	1,741
1883-84	21,122
1884-85	7,223
1885-86	4,565
1886-87	2,146
1887-88	4,218
1888-89	7,213

COLLECTIONS.

109. The amount of the guarantee is recovered by the Collector of Sarun. The assessments, remissions, and recoveries for the canals are shown below:—

	Rs.
Balance unrecovered on the 1st April 1888	24,321
Assessment of the year's guarantee	21,850
Miscellaneous revenue collected by Executive Engineer ...	399
Total ...	46,570
Remitted	Nil
Net demand ...	46,570
Recovered on account of guarantee by Collector	...
Guarantee paid by canal managers	19,334
Fisheries	4
Miscellaneous	20
Realized by guarantors for water-rates	83
Realized by Collector for water-rate under Certificate Act ...	924
	20,415
Recovered by Executive Engineer	399
Total collections ...	20,814
Balance on 1st April 1889	25,756

The outstanding balance has increased slightly during the year.

PLANTATIONS.

110. The plantations are of but trifling extent. The number of trees in existence is shown in the table below:—

	1888-89.	1887-88.
	Rs.	Rs.
Trees over 12 feet in height	3,988	1,710
Saplings between 4 and 12 fee	1,751	694
Seedlings under 4 feet	3,693	1,915
Total ...	9,432	4,319

The expenditure on plantations up to the end of the year has amounted to Rs. 1,485.

FLOODS.

111. There were no floods during the year of any importance. The river Gunduck did not even reach the embankment; the highest flood was on 20th July 1888 when the gauge registered 240·50, which was 2·10 feet below the highest flood on record, viz., 242·60 in August 1883.

112. The guarantee expires on the 1st of April 1890. Preparations have been made to build a regulator at Hatpokur, but it will be necessary to determine what measures will be necessary to prevent the Rupan Chap *sota* forcing a passage into the river Gunduck at Chattahi before expending a considerable sum of money on a regulator below that place. GENERAL.

NUDDEA RIVERS.

113. The channels comprising the Nuddea rivers system are situated in the districts of Moorshedabad and Nuddea. Their approximate lengths are as follows:—

Bhagiruthee ...	...	... 167 miles to Nuddea.
Bhyrub-Jellinghee	...	... 41 ditto.
Matabhanga ...	...	... 138 miles to outfall on the Hooghly.
Hooghly ...	...	... 31 miles from Nuddea to Chogda.
		477 miles.

The management of the revenue has passed from the hands of the Board of Revenue to the Public Works Department. A revenue account also has been opened for these rivers. Both changes were effected at the commencement of the year under report.

The Revenue Account is given below:— REVENUE ACCOUNT.

	EXPENDITURE			RECEIPTS	
	During 1888-89.	To end of 1888-89.		During 1888-89.	To end of 1888-89.

* These are now shown under the suggestion of the Government of India.

MADHUBAN CANAL.

irrigated was 5,000 acres, including 3,000 acres of opium. The expenditure incurred on maintenance was Rs. 4,194 against Rs. 9,821 spent in the year previous, which, however, included Rs. 4,729 for special repairs against Rs. 582 required for this purpose in 1888-89.

GENERAL REMARKS.

NET REVENUE

121. The working of the canals classed as Major irrigation works in Bengal resulted in a net deficit of Rs. 23,721, as below:—

	Rs.
Gross direct receipts	13,94,369
Ditto charges	14,18,090
Deficit ...	23,721

The budget estimate of net revenue was (—) Rs. 42,000, and the revised estimate, which provided for an additional Rs. 26,000 in working expenses, was (—) Rs. 68,000.

In 1887-88 the revenue on the Sone canals had been seriously affected by the local agitation against the canal administration, and consequently the net result of the year on Major works had been a loss of Rs. 4,00,356. The budget estimate for 1888-89 was framed with the expectation that this adverse influence would gradually be brought to rest; and though many indications in the course of the year made it clear that this expectation was being fulfilled, and that the benefits of irrigation were being freely admitted by the users of water, still the state of the collections at the time the revised estimate was issued was not such as to justify any substantial advance on the figures of the original estimate. Ultimately the receipts exceeded the estimate by Rs. 36,369, while the working expenses were less by Rs. 7,910.

	Budget estimate.	Revised estimate.	Actuals.
	Rs.	Rs.	Rs.
Direct receipts	13,58,000	13,58,000	13,94,369
Do. charges	14,00,000	14,26,000	14,18,090
Net revenue ...	—42,000	—68,000	—23,721

EARNINGS.

122. The net income from Major works calculated on the earnings of the year is shown below—

	1888-89. Rs.
Orissa canals	(—)76,282
Midnapore canal	82,123
Hidgellee Tidal canal	(—)22,943
Sone canals	83,080
	71,978

The result shown in this statement is calculated on the actual navigation and miscellaneous receipts, as well as the whole amount of the water-rates assessable on crops raised by canal water supplied during the year. In the Revenue Reports of previous years, earnings have been calculated on the demand on which it was possible to make recoveries. In the present report the whole of the liability incurred, whether recoverable within the year or not, is taken as revenue earned, less actual refunds. This is in accordance with the instructions

of the Government of India, and is the same as the method followed in the Upper Provinces. On the expenditure side actual charges, direct and indirect, have been taken.

123. The approximate value of crops irrigated by Major irrigation works during the last two years is shown below:— VALUE OF CROPS.

CANALS.	1887-88.		1888-89.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
	Acres.	Rs.	Acres.	Rs.
Orissa canals	109,506	19,06,362	159,292	51,64,168
Midnapore canal	65,864	13,17,280	69,777	17,44,425
Sone canals	315,380	76,89,808*	355,909	1,10,07,607
Total ...	490,750	1,09,13,450	584,978	1,79,16,200

* This is the correct figure.

This statement is compiled from returns submitted for the Orissa and Midnapore canals by the Deputy Revenue Superintendents, and for the Sone canals by the Superintending Engineer. The percentage of increase shown in the area irrigated is 18, while that of the value of crops raised by canal water is 64; a result brought about by a general rise in prices, as well as a general improvement in the outturn from irrigated lands. Several glaring inaccuracies in the returns of valuation for 1887-88, some of which were noticed in the Chief Engineer's note of that year, have been corrected in the comparative statement given above. For instance, Rs. 12 per acre, given by the Deputy Revenue Superintendent as the value of the Orissa rice crop of 1887-88, is now admitted to have been much too low an estimate, and is raised to Rs. 18 per acre, which compares to Rs. 32 per acre, the valuation of the same crop in 1888-89. Similar errors noticed in the returns received from the Sone canals have also been corrected. The following abstract, compiled from the corrected figures, shows that on these canals there has been an increase in the value per acre of food-grains and sugarcane and a decrease in the value of opium:—

CROPS.	RATES PER ACRE.					
	1887-88.			1888-89.		
	Eastern Sone.	Arrah.	Buxar.	Eastern Sone.	Arrah.	Buxar.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Sugarcane	96·6	50	100	105·4	100	100
Wheat	28	17·5	28	28	24	28
Barley	22·5	12·5	22	22	15	22
Rice	24	19	22	30	29·8	28
Miscellaneous cereals	12·5	12	14	24	18·4	13·7
Opium	75	40	48	49	39·	48

124. The state of the canal plantations on Major works is shown in the following statement:— PLANTATIONS.

CANALS.	1887-88.			1888-89.		
	Trees 12 feet high and above.	Saplings between 4 and 12 feet.	Seedlings.	Trees 12 feet high and above.	Saplings between 4 and 12 feet.	Seedlings.

GRAND TOTAL ...	11,07,610	11,44,912	.....	.....	.....	.....

The revival of trade on the Midnapore canal, which had set in in the previous year, has continued to gain strength. The two river systems alone show decreased incomes, and it is probable that the introduction of lower rates on the railways which compete with these routes was beginning to make itself felt in 1888-89, since it is found to have caused a very sensible decrease on the boat traffic in 1889-90.

126. It has not been the custom, at least of late years, to bring to notice in the Revenue Report the names of members of the establishment who may have specially distinguished themselves by their conduct of their duties; and, finding such the case, I have hitherto refrained from altering the custom, although I have by no means failed to appreciate the good work of those who have been serving under me. Where officers, as a body, are so earnest, conscientious, self-sacrificing, and hard-working, as those with whom I have been connected during my stay in the province, and where the men who do not give satisfaction are so few and far between, it must always be felt a somewhat invidious duty to select officers for special mention, and the custom of omitting all individual notice has, I confess, afforded me a sense of relief. Now, however, that I am about to sever my connection with the province, I feel that I ought not to lose this opportunity, when submitting the last Revenue Report of the province which will issue under my signature, of showing my appreciation of the more special services which some members of the establishment have rendered, and of thanking all, with but few exceptions, for their excellent work, and all without exception for their good-will, kindliness and thorough loyalty towards one, who, however anxious he might be not to appear in that character, could scarcely fail to be considered as somewhat of an interloper.

The officers in charge of Circles during my tenure of office have been:—

Orissa Circle—Major McArthur, Mr. Rhind.

South-Western Circle—Messrs. Wickes and Vertannes (now retired) and Major McArthur.

Sone Circle—Mr. Odling and Major McArthur, the latter for a short time only.

One and all have conducted their duties to my entire satisfaction; but if any one is to be specially noticed, I would mention Mr. Odling for the exceptionally able manner in which he has managed his Circle at a most trying period in the existence of the Sone Canals.

Amongst officers who have been in charge of divisions during the same period, whilst nearly all have conducted their duties in an excellent manner, I would specially mention Messrs. Faulkner, Horn, Inglis, Livesay, Scotland, Shawe, Stephen, Frost, Carter; and amongst sub-divisional officers, Messrs. A. S. Thomson, Lees, Coy, Frost, Carter, C. A. White, Arnott, Silk, Barlow, Clowes, Stawell, and Searight.

During the year under review and its predecessor, the strain on the canal officers, divisional and sub-divisional, has been specially severe, and excellent service has been rendered by all in a very trying season More especially has this been the case on the Sone Canals, where, owing to the system in force, the work thrown on the engineering staff is heavier than it is elsewhere, and the Superintending Engineer brings prominently to notice the excellent service rendered by the divisional and sub-divisional canal officers in an exceptionally trying season.

I travelled over the greater part of the main canals in 1888, just when the severe demand was commencing to subside, so that I have personal konwledge of the difficulties experienced. The Divisional Engineers, Mr. Horn, Buxar; Mr. Inglis, Arrah; and Mr. Frost, Eastern Sone, are distinctly entitled to praise for the successful exertions they made to extend the benefits of irrigation as widely as possible, and Mr. Stephen, the Executive Engineer at Dehree, is equally deserving of credit for the promptitude with which he conducted the difficult operation of closing the vents in the under-sluices at Dehree. The Superintending Engineer's commendation of the sub-divisional officers was well earned.

Lastly, I thank heartily for their good work the officers who have performed the duties of Under-Secretary—Major McArthur and Messrs. Buckley and Shawe. I have invariably found them most helpful and loyal, and of the greatest assistance in every portion of the duties of my office.

127. The date for the submission of Revenue Reports to the office of the Chief Engineer is the 15th September. The dates when the different reports were received are shown below:—

		In 1888.	In 1889.
Orissa Circle ...	Commissioner's report	... 26th October...	3rd October.
	Superintending Engineer's report	3rd ditto ...	9th ditto.
South-Western Circle	Commissioner's report	... 24th September	16th September.
	Superintending Engineer's report	24th ditto ...	28th ditto.
Sone Circle	Commissioner's report	... 6th October ..	28th September.
	Superintending Engineer's report	17th September	14th ditto.

The reports were punctual, with the exception of those of the Commissioner of the Orissa Division and the Superintending Engineer, Orissa Circle. The Finance and Administrative Accounts of the year 1888-89 due on the 1st were received from the Examiner on the 22nd August.

C. W. I. HARRISON, LT.-COL., R.E.,

The 6th January 1890. *Offg. Chief Engineer.*

IA.

PUBLIC WORKS DEPARTMENT.

	SOUTH-WESTERN CIRCLE.		
	For the rice crop.		
MIDNAPORE CANAL	I.—Under five-year leases	1 8 0	1 0 0
	II.—Under annual leases	2 8 0	1 10 0
	For winter crops.		
	III.—In exceptional cases when water is available	1 8 0	1 8 0
	IV.—The charge for the unauthorised use of canal water is Rs. 5 per acre per annum or such less sum as is fixed by the Collector.		

Canals.	Description of leases and crops.	Occupiers' rates per acre.	
		Flow irrigation.	Lift irrigation.
	SONE CIRCLE.		
	For water supplied between the 25th June and the 1st April.	Rs. A. P.	Rs. A. P.
	I.—Leases for one year.		
Sone canals ...	Rice	*3 0 0	2 0 0
	Bhadoi, except rice	2 8 0	1 10 8
	Rabi	*2 0 0	1 10 8
	Sugarcane	5 0 0	3 5 4
	II.—Leases for five years.		
	For all crops	2 0 0	2 0 0
	Note.—An extra rate in addition to the above rate is charged for water taken between the 1st April and the 25th June.		
	For water taken between the 1st April and the 25th June.		
	Annual leases only.		
	Special rate for hot months.		
	For all crops	4 0 0	2 10 8
	Note.—For indigo, water is allowed to be taken under this schedule from the 15th March without extra charge. Charges under this schedule are in addition to charges under the Schedules I and II.		
Sarun canals ...	The Sarun canals are not primarily irrigation canals, and the return to Government is in the shape of a guarantee amounting at present to Rs. 21,850 per annum. Guarantors are authorised to charge Re. 1 per acre irrigated, or in the case of water being used for manufacture, Rs. 2 per maund of indigo manufactured.		

* The rate for flow irrigation was reduced from Rs. 2-8 to Rs. 2 per acre for the current season only—*vide* Bengal Government Notification No. 50, dated 19th February 1889.

List of Officers in charge of Irrigation Circles and Divisions during 1888-89.

Circle or Division.	Name of Officer.	Period of charge.
	SECRETARIAT.	
Joint-Secretary, Irrigation Branch.	Colonel J. M. McNeile, R.E.	On special leave.
Officiating ditto, ditto ...	Lieutenant-Colonel C. W. I. Harrison, R.E.	From 1st April 1888 to 31st March 1889. [Acted as Secretary in the Public Works Department, in addition to his other duties, from 15th April to 1st June 1888.]
Under-Secretary, ditto ...	Major A. D. McArthur, R.E.	From 1st April to 3rd June 1888.
Officiating ditto, ditto ...	Mr. G. A. G. Shawe ...	„ 4th August 1888 to 31st March 1889.

Circle or Division.	Name of Officer.	Period of charge.
SUPERINTENDING ENGINEERS IN CHARGE OF CIRCLES.		
Orissa Circle	Mr. R. H. Rhind ...	From 1st April 1888 to 31st March 1889.
Ditto, Personal Assistant	„ J. T. Boase	„ 26th June 1888 to 31st March 1889.
South-Western Circle ...	„ T. H. Wickes ..	„ 1st April to 3rd June 1888.
	Major A. D. McArthur, R.E.	„ 4th June 1888 to 31st March 1889.
Ditto, Personal Assistant	Mr. J. T. Boase ..	„ 7th to 25th June 1888.
	Rai Sahib Krith Chunder Chowdry.	„ 17th December 1888 to 22nd January 1889.
Sone Circle	Mr. C. W. Odling ..	„ 1st April 1888 to 31st March 1889.
Ditto, Personal Assistant	„ K. H. Stephen ...	„ 14th January to 28th February 1889
EXECUTIVE ENGINEERS IN CHARGE OF DIVISIONS.		
Orissa Circle.		
Mahanuddy Division ...	Mr. G. W. Faulkner ...	From 1st April 1888 to 31st March 1889
Acquapada-Jajepore Division	„ A. Monies	„ 1st April to 15th July 1888.
	J. P. Cleghorn	„ 16th July 1888 to 31st March 1889.
Pooree Division	Rai Sahib Raj Kissen Banerjee.	„ 1st to 8th April 1888.
	Mr. J. R. Swinden ...	„ 9th April 1888 to 31st March 1889.
Brahmini-Byturni Division ...	„ C. Taylor	„ 1st April to 24th July 1888.
	„ A. Monies	„ 26th July 1888 to 31st March 1889.
South-Western Circle.		
Cossye Division	Mr. J. P. Scotland	From 1st April 1888 to 31st March 1889
Northern Drainage and Embankment Division.	„ R. E. Carter	„ 1st to 30th April 1888.
	„ T. M. L. Thompson ...	„ 1st May 1888 to 31st March 1889.
Nuddea Rivers Division ...	„ C. E. Livesay	„ 1st April 1888 to 31st March 1889.
Circular and Eastern Canals Division.	„ G. A. G. Shawe	„ 1st April to 3rd August 1888.
	„ C. Taylor	„ 4th August 1888 to 31st March 1889.
Balasore Division	„ A. Hayes	„ 1st April 1888 to 31st March 1889.
Sone Circle.		
Arrah	Mr. W. A. Inglis	From 1st April 1888 to 31st March 1889. (On privilege leave from 10th October 1888 to 10th January 1889.)
	„ K. H. Stephen	From 10th October 1888 to 13th January 1889.
Buxar	„ D. B. Horn	From 1st April 1888 to 31st March 1889.
Eastern Sone	„ M. J. Monckton... ...	„ 1st April to 30th June 1888.
	„ H. F. B. Frost	„ 1st July 1888 to 31st March 1889.
Gunduck	„ M. J. J. P. Norman ...	„ 1st April 1888 to 31st March 1889.
Canal Revenue Officers.		
Deputy Collector, Shahabad...	Baboo Sarada Prasad Chatterjee.	From 1st April 1888 to 31st March 1889.
Sub-Deputy Collector, Shahabad.	Baboo Siva Sunker Sing ...	Ditto ditto. (On privilege leave from 13th to 29th September 1888.)
	„ Jagdam Sahai ...	From 1st April 1888 to 31st March 1889.
Circle Officer, Patna district...	Syud Mahomed Kabeer ...	Ditto ditto.
Ditto, Gya do. ...	Baboo Moti Lall	Ditto ditto.
Deputy Revenue Superintendent, Orissa.	Mr. S. C. Roberts	Ditto ditto.
Ditto, Midnapore ...	Baboo K. C. Ghose	Ditto ditto. (On privilege leave from the 24th January to 31st March 1889.)
	„ Rajendra Nath Roy ...	From 24th January to 31st March 1889.
Collector of Tolls, Calcutta ...	Mr. W. R. Cooksey	„ 1st April 1888 to 31st March 1889.

FINANCIAL DEPT.,
FINANCE;
The 30th January 1890.

H. J. S. COTTON,
Offg. Secy. to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 1st February, 1890.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BENGAL.		
	Western Districts.		
1	Burdwan Feb. 1, '90	0·06	Weather—cold. Outturn of *amun* 10 annas. *Rubbi* not favourable. Sugarcane and potato fair. Prices of common rice :— Srs. Burdwan ... ... 16½ Culna ... ... 16 Cutwa ... ... 15¼ Raneegunge ... ... 20 per rupee.
2	Bankoora „ 1, '90	Nil	Weather—seasonable. Prospects of *rubbi* crops continue good. Course rice 20 seers per rupee at Sudder and 18 seers at Bissenpore.
3	Birbhum „ 1, '90	Nil	Weather—very cold. Prospects of cold-weather crops, especially sugarcane very good. Prices of rice 16½ seers per rupee at Sudder and 16 seers at Rampore Haut.
4	Midnapur „ 1, '90	Nil	Weather—seasonable. General prospects fair. Harvesting of rice going on in Contai. Indigo and *rubbi* doing well. Prospects of silk cocoons improved. Prices of rice :— Srs. Sudder ... ... 16 Contai ... ... 26 (new) Tamluk ... ... 18 Ghatal ... ... 19 per rupee.
5	Hooghly „ 1, '90	Nil	Weather—cold. Harvesting of paddy over. Outturn of *rubbi* very hopeful. Prices of common rice :— Srs. Sudder and Serampore ... ... 12½ Jehanabad ... ... 17¼ per rupee.
	Serampore ...	0·36	
	Jehanabad ...	0·45	
	Howrah „ 1, '90	Nil	Weather—cold. Prospects of crops good. Common rice sold at Howrah at 12½ seers per rupee during the week.
	Central Districts.		
6	24-Perghs. Feb. 1, '90	Nil	Weather—cool. Prospects good. Yield of *amun* has averaged 16 annas. *Rubbi* crops doing well. Price of ordinary rice 16 seers per rupee.
7	Nuddea „ 1, '90	Nil	Weather—cold. *Moong*, *kalai*, mustard, and sugarcane harvested with fair out turn. Other winter crops doing well.
	Ranaghat ...	0·30	
8	Khoolna „ 1, '90	Nil	Weather—seasonable *Amun* harvest nearly completed; outturn good. Prospects of *boro* and *rubbi* crops satisfactory.
	Bagirhat ...	0·98	
	Satkhira ...	2·03	
9	Jessore „ 1, '90	Nil	Weather—very cold. The rainfall of the week will be beneficial to the spring crops. Mustard being gathered. Price of rice stationary.
	Magura ...	0·17	
	Narail ...	2·51	
	Bongong ...	1·63	
10	Moorshedabad „ 1, '90	Nil	Weather—bright and cold. Wind N.-W. All the *rubbi* crops on the ground are doing well. *Haimanti dhan* nearly all harvested.
	Rajshahye Divn.		
11	Dinagepur „ 1, '90	Nil	Weather—getting cooler. Outturn of *amun* is estimated at 16 annas. Prospect of mustard not favourable. Pressing of sugarcane continues.
	Thakurgaon ...	0·34	
12	Rajshahye „ 1, '90	Nil	Weather—cold with fresh breeze. Condition of spring crops good. Harvesting of *amun* nearly over with good outturn. Sugarcane being reaped all over the district. Ganja and tobacco at Nowgong in good condition. Common rice sells at 16 seers 9 chittacks per rupee.
13	Rungpur „ 1, '90	Nil	Weather—seasonable. *Amun* rice is estimated to have yielded a 15-anna crop.
	Kurigram ...	0·65	Tobacco is flourishing. Sugarcane is being cut and crushed, and mustard
	Nilphamari ...	0·80	gathered with a fair outturn.
14	Bogra „ 1, '90	Nil	Weather—very cold; days somewhat cloudy. Reaping of *amun* almost finished;
	Sherpur ...	0·01	probably not more than one anna remaining to be cut. Other crops
	Nowkhilla ...	0·34	also being gathered. Common rice is being sold at head-quarters at 21 seers per rupee.
15	Pubna „ 1, '90	Nil	Weather—fine and cool. *Amun* outturn estimated at 13 annas. Mustard and tobacco expected to yield 12 annas. Sugarcane will not be above 8 annas. Prices slightly lower.
16	Darjeeling „ 1, '90	Nil	Weather—very cold and bright. Crops doing well and prospects generally good.
17	Jilpigoree „ 1, '90	Nil	Weather—cold. Cutting of *haimanti* paddy completed; 14 annas outturn obtained. Winter crops doing well. Some damage to tobacco reported from Falacutta owing to recent hailstorm. Prices stationary.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
Dacca Divn. 18	Dacca Feb. 1, '90	2·54	Weather—very cold. Heavy rain in the Sudder subdivision. Sowing of *boro* paddy nearly completed. Mustard and pulses being gathered. Rain has done good to the standing crops. Fodder is available. No special change in the prices of food-grains. Common rice sold at from 13 to 16 seers per rupee.
19	Furreedpur „ 1, '90	Nil	Weather—colder and clearer. Produce of date trees below average owing to floods of rainy season. *Boro* rice being sown on churs. Sugarcane being cut. Prospects of cold-weather crops on the ground fair. Tillage for early rice and jute progressing.
20	Backergunge „ 1, '90	Nil	Weater—cool with foggy mornings. Prospects of crops good. Harvesting of *amun* nearly completed; outturn estimated at 16 annas. Common new rice selling at 16 seers per rupee.
21	Mymensingh „ 1, '90	0·22	Weather—very cold. Prospects of crops good. Common rice sells at 14 seers per rupee. Transplantation of *boro dhan* continues.
Chittagong Divn. 22	Chittagong „ 1, '90	Nil	Weather seasonable. State of miscellaneous crops good.
23	Noakholly „ 1, '90	0·02	Weather—seasonable. State of *rubbi* crops good. Rain has done good to them. Price of rice stationary.
24	Tipperah „ 1, '90	0·35	Weather—seasonable. Winter crops doing well. Transplantation of *boro dhan* still going on.
25	Chittagong Hill Tracts. Jan. 31, '90	Nil	Weather—very cold and foggy up to 10 A.M. in the morning, Wind steady from N. Gathering of mustard commenced. Tobacco and chillies progressing.
	Hill Tipperah Feb. 1, '90	Nil	Weather—cold. Chillies and tobacco doing well. *Jum*-cutting commenced in the hills.
BEHAR.			
Patna Divn. 26	Patna „ 1, 90	Nil	Weather—cold. Prospects of *rubbi* continue good. A shower of rain would, however, much benefit the crops Peas and mustard are in pods. Wheat in ear in some places. Poppy is flowering and looks well. Prices of food-grains almost stationary.
27	Gya „ 1, '90	Nil	Weather—cold. Harvesting of paddy nearly finished. Prospects of *rubbi* and poppy favourable. Food-stocks sufficient.
28	Shahabad „ 1, '90	Nil	Weather—very cold and bright all the week, but milder and rather cloudy to-day (1st). Cutting of peas commenced. Other *rubbi* crops and poppy doing well. Sugarcane being pressed. Prices stationary.
29	Durbhunga „ 1, '90	Nil	Weather—very cold with west wind. The late rain has greatly benefited the *rubbi* crops. Mustard is being harvested in places Prospects of poppy continue good. Common rice selling at 19 seers per rupee.
30	Mozufferpur „ 1, '90	0·06	Weather—seasonable. All standing crops doing very well. Mustard being cut. Prospects of poppy good, except the late sowings in Hajipur.
	Hajipur ...	0·05	
	Sitamarhi ...	0·39	
31	Sarun „ 1, '90	Nil	Weather—clear and cold; very seasonable with west winds. *Rubbi* prospects excellent. Poppy rather backward, but fair. Sugarcane pressing going on.
32	Chumparun „ 1, '90	Nil	Weather—cold, with passing clouds. Rainfall of the past week has been decidedly beneficial to all crops, and has caused no damage to wheat according to latest reports. Early poppy plants coming into flower. Prices stationary.
33	Monghyr „ 1, '90	Nil	Weather—cool and cloudy at times. *Rubbi* crops doing well, but want rain, especially in the Begusarai subdivision, where the standing crops on high lands do not look very promising, and mustard has been damaged by *lahi* insects. Poppy flowering.
Bhagulpore Divn. 34	Bhagulpur „ 1, '90	Nil	Weather—cool with west winds. Prospects of crops promising, but rain wanted for wheat. Mustard harvested; yield about 12 annas. Linseed flowering and weather favourable.
35	Purneah „ 1, '90	Nil	Weather—cold. Mustard still being harvested with good outturn. Tobacco and other *rubbi* crops have benefited, especially in Kissengunge, from recent rain. Tobacco a good crop. Ploughing going on.
	Kissengunge (on 24th Jan.)	1·30	
	Arrarcah (ditto)	0·14	
36	Maldah Feb. 1, '90	Nil	Weather—somewhat colder. Gathering of *kalai* and mustard continues; in thana Kharba it is just over. Other *rubbi* crops (wheat, barley, gram, &c.) doing well, but require rain. Transplantation of *boro* paddy going on. Common rice selling at an average of 17 seers per rupee
37	Sonthal Pergha. „ 1, '90	Nil	Weather—very cold and dry; warm in the day time. *Rubbi* crops doing well. Mustard is a short crop in Pakour, estimated at 8 annas. Mungoes are in blossom.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.			
Orissa Divn. 38	Cuttack Feb. 1, '90	Nil	Weather—seasonable. Estimated outturn of *guru sarad* is as follows :— Jajpore ... ... 17 annas. Kendrapara ... ... 12 „ Sudder ... ... 13 „ On the whole a 14-anna crop has been reaped over the whole district.
Orissa Divn. 39	Pooree ...	...	Report not received.
Orissa Divn. 40	Balasore „ 1, '90	Nil	Weather—unusually cold. Outturn of *guru* rice estimated at 14 annas in the Bhuddruck subdivision and 11 annas in the Sudder subdivision. Outturn of *rubbi* crops averages generally about 12 annas.
CHOTA NAGPORE. *South-West Frontier Agency.*			
Chota Nagpore Divn. 41	Hazaribagh Feb. 1, '90	Nil	Weather—seasonable. Crops in good condition everywhere.
Chota Nagpore Divn. 42	Lohardugga „ 1, '90	Nil	Weather—seasonable; mornings very chilly. Prospects of *rubbi* crops good at head-quarters. In Palamow they are somewhat affected by want of rain.
Chota Nagpore Divn. 43	Singbhoom „ 1, '90	Nil	Weather—seasonable. Prospects of winter crops favourable. Prices stationary.
Chota Nagpore Divn. 44	Manbhoom „ 1,, '90	0·06	Weather—cold. Mustard fully harvested, with 16 annas outturn. Sugarcane being pressed; outturn about 10 to 12 annas. *Rubbi* crops doing well; probable outturn 14 annas. Price of rice falling.

Published for general information.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...		0·45

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Explanation.—Indicates that no rain has fallen If the return for any day has not been received, the corresponding space is left blank. are wanting, the corresponding spaces in the total rainfall columns are left blank.

CALCUTTA, *the 4th February* 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 31ST JANUARY 1890.

It was noticed in the report for the previous week that on Friday, the 24th January, a disturbance which had originated in Northern India had commenced to pass over the province, moving in a south easterly direction. The disturbance consisted of an area of low pressure, or perhaps of two distinct areas accompanied by a feeble form of cyclonic circulation of winds. On the Friday there thus appeared to be a tendency to two distinct whirls, one of which had a centre in South Behar, while there was a second in Chutia Nagpur. On the first day of the present week, or on Saturday morning, the 25th instant, the disturbance had again moved in a south-easterly direction, and there was a distinct barometric depression lying over South-East Bengal which was accompanied by a well-marked circulation of winds the centre of which was a little to the south of Dacca. A second feeble depression also appeared to exist off the Ganjam coast, and there also was a tendency to cyclonic circulation along the coast. With the passage of these disturbed conditions through the province, numerous rain showers, in many instances accompanying local storms and in some instances with hail, occurred over the province, and on the 25th rain was generally reported in East Bengal, while very numerous stations in South-West Bengal, North Bengal, and Orissa and a few stations in North Behar also, received rain. On the 26th the disturbance had advanced over Burmah, and rather heavy rain was reported at such stations as Bassein Rangoon, etc., but in Bengal with the disappearance of the depression, weather conditions rapidly improved, and a rather strong northerly wind current set in, bringing with it a great reduction of temperature, the rapid fall of temperature being due to the fact that a moderately heavy fall of snow had been brought to the line of hills to the north and north-west of the province, which caused a cold wave of northerly winds to establish itself completely over the province. So rapid was the fall that the mean temperature of the 24 hours ending at 8 a m of the 26th was at many stations 5°, and at some stations as much as 9° and nearly 10° below the temperature of the previous 24 hours. At this time, therefore, the cold weather conditions set in over the province in a very pronounced form, and they have continued to exist till quite the end of the week. From the 26th, therefore, temperature has been decidedly low, while humidity was also only moderate in amount; pressure became steadily higher, and was by the middle of the week very high, though it fell somewhat towards its close. Skies were almost cloudless, and after the disappearance of the disturbed conditions absolutely no rain fell

Pressure.—Notwithstanding the very high pressure which occurred in the middle of the week after the disappearance of the depression, the mean pressure for the period has been somewhat below the normal at almost all stations. The usual defect has not been larger than about two or three-hundredths of an inch, but at some of the stations in North Bengal it equals four-hundredths, and at Chittagong it even equals six-hundredths of an inch. These larger defects are probably connected with the depression above referred to

Temperature—As stated previously, fell very rapidly on the 26th, and for the remainder of the week it has been decidedly low The mean temperature of the whole province for the week has been 2·4° below the normal, and in such districts as Chutia Nagpur and Orissa the defects have almost equalled four degrees.

The actual temperatures during the week, the range from day to night, and their variation from the normal values are best seen in the following table, where the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province are given, together with the normal values From the figures given it will be seen that the night temperatures have generally been in larger defect than those of the day, and that the mean minimum temperatures of the week have been decidedly low.

The lowest temperature recorded during the week was 37·9° at Ranchi :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 31st January 1890.

	Normal mean maximum temperature for the week ending 31st January.	Actual mean maximum temperature for the week ending 31st January 1890.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 31st January.	Actual mean minimum temperature for the week ending 31st January 1890.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 31st January.	Actual mean daily temperature for the week ending 31st January 1890.	Variation of actual mean from the normal.
Cuttack	80·2	82·2	−4·0	60·3	55·5	−4·8	73·5	68·8	−4·7
Calcutta	78·1	74·7	−3·4	57·9	53·5	−3·5	67·0	64·0	−3·0
Dacca	79·0	76·0	−3·0	55·5	53·1	−2·4	67·3	64·6	−2·7
Burdwan	78·7	81·3	+1·6	55·4	51·8	−3·6	67·4	66·8	−1·0

Purneah	75·1	72·7	−2·4	49·0	44·4	−4·6	62·0	58·5	−3·5
Hazaribagh	73·4	70·9	−2·5	51·4	46·4	−5·0	62·5	58·6	−3·9
Darjeeling	42·8	53·3	+10·5	33·5	32·7	−0·8	38·4	43·0	+4·6

The rainfall of the week has been rather important, and the falls in South-West and East Bengal have averaged about half an inch. In other districts the falls are much smaller, and Orissa and North Bengal only average about a tenth of an inch, while in North Behar it is only about half this. Chûtia Nagpur and South Behar report no rain at all.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Friday, the 31st of January 1890 :—

Meteorological Divisions.	Temperature						Rainfall									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 15th May 1889.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal Average.	Average	Normal average.

C. Little,
For Meteorological Reporter to the Govt. of India.

Meteorological Office, India;
The 3rd February 1890.

MEMORANDUM.

THE returns from the principal Municipalities in Bengal presented, during the week ending 18th January 1890, the following results :—

1. Births were registered in them at the rates of 23·1 per 1,000 of population, as opposed to very nearly the same proportion, viz., 22·8 per 1,000 in the preceding week ending 11th January, and deaths at 21·8 against 25·9 per 1,000, indicating a falling off in the registration of these events.

2. The following Municipalities returned the highest proportions of births and deaths :—

Births.

	Ratio per *mille.*
Arrah	49·1
Naraingunj	41·4
Monghyr	38·0
Utterpara	37·7
Serampore	37·3
Bali	31 6
Comillah	30·8
Chittagong	30·5

Deaths.

	Ratio per *mille.*
Poori	65·0
Naraingunj	58·0
Jessore	49·0
Ranaghat	47·9
Utterpara	47·2
Serampore...	41·2
Chittagong	37 6
Darjiling	37 0
Burdwan	36·6
Comillah	34·7
Hughli and Chinsurah ...	32·8
Rampore Beauleah	31·5

3. The only noticeable point, in connection with the incidence of the specific death-causes in comparison with the outcome of the preceding week, is a diminution of mortality from fever and the maladies classed under the head of "Other causes"—*vide* subjoined table :—

	Ratio per *mille* during the weeks ending—	
	18th January 1890.	11th January 1890.
Cholera	2·3	2·4
Small-pox	·6	·4
Fever	8 9	11·5
Bowel-complaints	3·1	3 1
Injury	·3	·4
Other causes	6·6	8·1

4. Of the death-causes above indicated, while small-pox continued to prevail with added severity in the Poori Municipality (mortality 18·9 per 1,000 of population, against 14 7 per 1,000 during the preceding week ending 11th January), cholera, fever and "other causes" proved conspicuously fatal in the following Municipalities :—

Cholera.

	Ratio per *mille.*
Jessore	30 6
Naraingunj	20·7
Hughli and Chinsurah ...	9·8
Chittagong	9·4
Dacca	5·2
Howrah	4·6

Fever.

	Ratio per *mille.*
Ranaghat	29·9
Darjiling	29·6

Other causes.

	Ratio per *mille.*
Poori	25·2
Naraingunj	20·7
Comillah	19·3
Serampore	17·7
Burdwan	16 8
Chittagong	11·7

5. The death-rates in relation to *Sex*, *Class* and *Age* stood as noted below :—

According to Sex.

	Ratio per *mille.*
Males	23·3
Females	20·3
Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population ...	115

According to Class

	Ratio per *mille.*
Christians	14 9
Hindus	21·5
Mahomedans ...	22·8
Buddhists	51·4

According to Age.

	Ratio per *mille.*
Under 1 year ...	159 8
1 and under 5 years ...	23·5
5 „ 10 „ ...	8 9
10 „ 15 „ ...	8·6
15 „ 20 „ ...	9 6
20 „ 30 „ ...	14 8
30 „ 40 „ ...	13·9
40 „ 50 „ ...	20 3
50 „ 60 „ ...	22 8
60 years and upwards ...	68·0

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

ANNUAL AWARD OF A MEDAL TO THE MOZUFFERPORE ZILLAH SCHOOL.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 5th February, 1890.

RESOLUTION.

READ—

A letter from the Commissioner of Patna, No. 180G, dated the 22nd March, 1889.

Read also—

A letter from the Director of Public Instruction, No. 2023, dated the 5th April, 1889.

IN commemoration of the visit of the Lieutenant-Governor to Sursund in the district of Mozufferpore, Mussamut Dulhin Golab Kuer and her son-in-law, Babu Damodar Deb Narain Singh, have paid into the Mozufferpore Treasury the sum of Rs. 900 for investment in Government securities as an endowment for the annual award of a medal, to be designated the "Bayley Medal," to the student of the Mozufferpore Zillah School obtaining the highest marks in Sanskrit at the University Entrance Examination of each year. The Lieutenant-Governor is pleased to accept the donation, and tenders his thanks to the donors for their liberality. The Magistrate of Mozufferpore will be the administrator of the fund.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Commissioner of Patna for information and for communication to the donors, and to the Director of Public Instruction for information.

Ordered also, that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,

Secretary to the Government of Bengal.

INCIDENCE OF TOLLS IN THE CIRCULAR AND EASTERN CANALS.

PUBLIC WORKS DEPARTMENT, BENGAL,—IRRIGATION.

RESOLUTION.

No. 238 *I.A.*

Dated Calcutta, the 11th February 1890.

READ—

(1) Memorial from the Bengal National Chamber of Commerce, dated 17th November 1887.
(2) Letter No. 2455T., from Agent, Bengal Central Railway, dated 24th November 1887.
(3) Bengal Government Notifications Nos. 349-350, dated 17th September 1889.
(4) Letter from Manager, Eastern Bengal Railway, No. 821, dated 19th October 1889.
(5) Bengal Government Notification No. 382, dated 21st October 1889.
(6) Letter from Secretary, Young Men's Association, Senhati, dated 6th November 1889.
(7) Letter from Messrs. Hoare, Miller and Company, No. 904, dated 10th December 1889.
(8) Bengal Government Notification No. 455, dated 17th December 1889.

In regard to the complaints which have been made against the tolls charged on boats using the channels included in the "Circular Canal Route," the Lieutenant-Governor has arrived at the conclusion that it is advisable to enquire into the system of measurements and incidence of tolls charged under the rules and notifications now in force.

2. *It is resolved* therefore to appoint, for the above purpose, a Commission consisting of—

Major McArthur, R.E. ... ... *President.*
Mr. W. C. Boyce, District Traffic Superintendent, Eastern Bengal Railway ... ... } *Members.*
Baboo Sitanath Roy, Honorary Secretary, Bengal National Chamber of Commerce ... ... }

3. The enquiry will embrace the following points—

1. Present system of boat measurement, and whether it can be improved in the direction of (*a*) greater accuracy of gross tonnage or (*b*) ascertaining net tonnage.
2. The incidence of existing rates on the goods carried in the Canals; whether the rates should be revised; and whether differential rates should be introduced or not.
3. The boundaries within which the tolls are levied.
4. The practicability of levying tolls on the basis of "challans" of the merchants or others whose goods are carried.

ORDER.—Ordered that copies of this Resolution be sent to the President and members named to serve on the Commission for information and guidance, and to the Revenue, Appointment and Financial Departments of this Government, the Board of Revenue, the Commissioner of the Presidency Division, and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,
Secretary to the Government of Bengal,
P. W. Dept.

RESOLUTION ON THE REPORT OF THE COMMITTEE APPOINTED TO ENQUIRE INTO THE ADMINISTRATION OF THE SONE CANALS.

No. 2061.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

Dated Calcutta, the 4th February 1890.

RESOLUTION.

READ—

1. Resolution No. 1884I., dated Calcutta, the 11th of November 1887, by the Government of Bengal, Public Works Department, appointing a Committee to enquire into the Administration of the Sone Canals.
2. Report, dated the 13th March 1888, of the Committee appointed to enquire into the Administration of the Sone Canals.
3. Note, dated the 14th of January 1890, by Colonel C. W. I. Harrison, R.E., Chief Engineer, Bengal, on the above-mentioned report.
4. Minute, dated the 15th June 1888, by the Hon'ble F. M. Halliday.
5. Letter, dated the 25th June 1888, from the Board of Revenue, Lower Provinces.
6. Letter, dated the 30th June 1888, from Mr. L. H. Mylne, of Behoea, Shahabad.
7. Note, dated the 10th July 1888, by the Hon'ble Mr. Nolan, on the report of the Committee appointed to enquire into the Administration of the Sone Canals.
8. Letter No. 849I., of date the 31st August 1888, from Mr. A. B. Power, Collector of Shahabad.
9. Note, dated the 14th of December 1888, by Mr. C. W. Odling, Superintending Engineer, Sone Circle, on irrigation operations from the Sone Canals during the *kharif* season of 1888-89.
10. Note, dated the 4th of February 1889, by Mr. H. Luson, C.S., upon crop experiments in canal-irrigated *dhan* taken in the Sone Circle during the *kharif* season of 1888-89.
11. Report, dated the 20th of March 1889, by Mr. H. Luson, C.S., upon certain points connected with the administration of the Sone Canals.
12. Pamphlet by Baboo Kandhji Sahai, B.A., B.L., on certain aspects of the Sone irrigation question, Dinapore, 1889, received with a letter, dated 26th June 1889.
13. Revenue report, dated the 18th September 1889, by the Superintending Engineer, on the Sone Canals for the year 1888-89.
14. Note, dated the 12th of January 1890, by Mr. C. W. Odling, Superintending Engineer, Sone Circle, on irrigation operations from the Sone Canals during the *kharif* season 1889-90.
15. Note, dated the 14th January 1890, by Mr. C. W. Odling, Superintending Engineer, on Drainage Works carried out and still required in connection with the Sone Canals.

The Lieutenant-Governor, when on tour in Behar in November 1887, received a memorial, signed by certain leading residents of the Shahabad and Patna districts, complaining of the system under which lands irrigated by the Sone Canals were assessed and the water-rates collected. Sir Steuart Bayley travelled by road through the part of the area irrigated in which complaints were most numerous and by steamer down the Buxar Canal. On a full consideration of the allegations made in the memorial and those contained in separate letters received from influential landholders, His Honour came to the conclusion that it was desirable to appoint a Committee to examine into the working of the entire system, with a view to provide remedies, where possible, for admitted defects, and to improve the rules and, if necessary, the law under which the system was administered.

2. The Committee, which was composed of Mr. H. J. S. Cotton, C.S., as President, with Mr. C. W. Odling, M.E, M.I.C.E., and Rai Jai Prokash Lall, Bahadur, as Members, met at Arrah on the 1st of December 1887, and, after local investigations extending over those parts of the Shahabad, Patna and Gya districts traversed by the canals, submitted a report, dated the 13th March 1888, signed by all the Members of the Committee, but accompanied by

dissents by Mr. C. W. Odling and Rai Jai Prokash Lall, Bahadur, on material points. The report may be taken to be in the main that of Mr. Cotton, the President, who is, however, in regard to most of the recommendations supported by the Departmental member of the Committee.

3. The report of the Committee is clear and well arranged and accompanied by a series of appendices containing a record of the evidence, written or oral, on which the conclusions drawn and recommendations made are based. Very considerable delay has occurred in dealing with the report. The recommendations made were submitted to the criticism of various local officers, but important action was taken at once to carry out some of the Committee's proposals concerning which there was no room for doubt. A series of practical experiments touching on the question of yield of crops and indirectly on that of profit obtainable from irrigation were carried out under the superintendence of Mr. Luson. The Chief Engineer has paid two extended visits to Shahabad to watch the working of the system at different seasons, and he has now recorded the note quoted at the head of the Resolution. In that note he has explained the origin of the system pursued, and has noticed* the changes which have been introduced since the Committee was appointed—changes which suffice to justify the appointment of the Committee, and which show how beneficial their principal recommendations have been. The note brings together on various points the facts and considerations justifying the action of the Department where it has been impugned, and after explaining the important effect which the use of canal water has had in substituting paddy cultivation for that of *rabi* crops over a large area, and the bearing of this fact on the main questions at issue, it discusses the proposed alterations and explains how far, in the opinion of the Chief Engineer, the recommendations of the Committee are in themselves feasible and desirable as the law now stands.

* Paragraphs 17, 24, 56, 64, 69, 72 and 116.

4. The area irrigable by the Sone Canals, in the *kharif* season at least, is practically measured by the water supply procurable. Some 1,300,000 acres are commanded, of which it would be possible, with the supply of water ordinarily available in the river Sone, to irrigate 300,000 acres in the *kharif* and probably the same area in the *rabi* season. When the canals were in course of construction it was found that the lands commanded were about equally divided between *kharif* and *rabi* crops, and it was not anticipated that any change in the nature of the crop would follow the advent of irrigation with canal water. It was, in fact, assumed that of the area irrigated half would be cultivated with *kharif* and half with *rabi* crops. Indeed, the fear expressed by Sir G. Campbell in 1871 was that there would not be a sufficient supply of water available for the irrigation of the winter crops, and he urged that the canal should be designed with reference to the minimum supply procurable from the river Sone in that season in the driest of years. It was expected that a higher water-rate would be obtainable from *rabi* than from *kharif* cultivation.

5. The canals and distributaries were ordinarily run on the ridges, the lands bordering which, being high, were usually cultivated with winter or *rabi* crops. So soon as irrigation from the canals was commenced, there was a rapid change in the character of the cultivation. Wherever canal water is regularly available *rabi* crops have disappeared, and rice has taken their place. In the opinion of a landholder peculiarly well qualified to judge on the point, nothing but the absolute refusal of canal water for paddy would compel the ryots now to forego the cultivation of that crop. This change, which in the earlier years of canal irrigation was in process of development, added much to the difficulties necessarily experienced by canal officers in introducing a satisfactory system of irrigation.

6. An endeavour was in the first instance made to follow, as far as the law admitted, the system adopted in the Upper Provinces. There no written application for water is necessary, but, an outlet once fixed, cultivators are, subject to a system of rotation as regards supply, permitted to take water much as they please. The discharge of the outlets of a village are fixed and ordinarily do not admit of more than one-seventh of the cultivated area being under *kharif* crops requiring canal water. If a greater proportion is so cultivated it is at the risk of the villagers, who are consequently careful to limit the cultiva-

tion within the area for which the supply allowed is in dry years, with the utmost economy, sufficient.

In Bengal no attempt was made to limit the area to be irrigated in any village, and whilst written applications were required, but little care was taken to restrict the supply of water to the areas included therein. The departmental arrangements failed to provide against waste and against the water finding its way to the lands of other persons than those who had applied for it. The cultivators themselves took little thought in the matter, but relied on the supply which was enough for rice transplantation being equally sufficient for maturing the crops originally watered, irrespective of rainfall. If no rain fell in the *hatiya*, not only was more water required for crops already irrigated, but there was a further demand for rice sown on low lands, which then also looked to the canals for a supply sufficient to save the crop.

Whenever the supply of the outlet did not suffice for the entire area requiring irrigation, the complaint was of 'deficiency and irregularity of supply.' If rain fell whilst the crops were being or had lately been watered for the first time, disputes arose as to whether water-rates were leviable. The objection was emphasized when the fields assessed were not included in a written application since the case then became one of 'unauthorized irrigation.'

7. The recommendations made by the Committee involve not only changes in the system of administration followed, but reductions on various grounds in the sums charged as water-rates. It is argued in the report that the experiments yearly made as to the yield of crops irrigated by the canals and other means cannot be relied on, that the productive powers of certain descriptions of soil deteriorated after canal water had been used for a few years, that crops produced by the aid of canal water are inferior compared to those yielded on lands irrigated from *aharas*, and that the natural irrigation facilities formerly available had been destroyed or injured by the canals. Those were points which could only be satisfactorily investigated by an officer who could devote his whole time to the detailed investigations necessary and under whose directions a complete series of crop experiments could be carried out.

8. The services of a covenanted civilian, Mr. Luson, were made available. That officer had previously acted as Joint-Magistrate of Shahabad, and was at the time of his deputation Officiating Collector of Gya: so that he already possessed some knowledge of the districts traversed by the canals, and was therefore at once, when relieved on the 21st October 1889, able to commence the detailed work required. His report is dated the 20th March 1889. There was a total failure of the *hatiya* and *chitra* rains in 1888—in fact there was practically no rain from the 7th of September to the 29th of November, so that the strain on the canals was as great as it is possible that it can ever be in future, affording an excellent opportunity for determining the area they can satisfactorily irrigate under the most unfavourable circumstances. There has again in 1889 been a partial failure in the autumn rains, so that the result of two years' irrigation operations, in which the most prominent errors originally committed had been corrected, can be considered. Colonel Harrison spent October 1888 and May 1889 in studying the subject on the spot.

9. There were, however, certain defects brought to light by the Committee which admitted of reform at once. The chief of these were the failure of canal officers to exercise sufficient control over the supply of water through the outlet, and to take effective measures to prevent irrigation without permit. With the approval of the Chief Engineer, the Superintending Engineer, on the 21st of March 1888, issued circular orders pointing out in what respects an alteration in practice was required, and also in what points sufficiently minute attention had not been paid to the law and the rules. Canal officers were directed, when at head-quarters, to receive complaints daily and to register each complaint separately, though several might be received on the same day from the same village and raising objection to the demand for identical causes. Instructions were given that five-year leases were not to be granted unless proper village channels actually existed when the lease was sanctioned, and that even the deposit of funds for their construction would not be accepted as a sufficient compliance with the rule, since from various reasons there might be delay in completing them. Directions were given

that the position and size of the outlets from which water was to be supplied should be endorsed on the permit. No alteration was to be made in the capacity of any outlet during the currency of the lease. The orders regarding unauthorized irrigation were of a nature to almost entirely stop assessments under that head. It was required that 'benefit' should be established, and also that the person by whose act or neglect the unauthorized irrigation occurred could not be identified. Assessment was prohibited where canal servants were at fault, or where unauthorized irrigation was effected from aharas filled or partly filled with canal water. The responsibility of the Canal officer for the supply through the outlet was affirmed, and permits were directed to be refused where the blocks proposed to be leased were so situated that unauthorized irrigation was probable. It was directed that a discharge through the outlet sufficient only for the area to be irrigated should be arranged for. Attention was invited to the desirability of obtaining the signature of the *lambardar* to the shudkar or register of irrigation when the first watering was completed.

These orders were sufficient to rectify the chief defects pointed out by the Committee, and their enforcement has almost put a stop to complaints regarding 'unauthorized irrigation,' in respect of which most feeling had been shown. They suffice to justify the work of the Committee and the utility of most of its recommendations. Moreover, though the rainfall during the two following seasons was scanty, the supply of water was, with few exceptions, admittedly sufficient. Thus the causes of the complaints made before the Committee regarding the proceedings of assessing officers were completely or nearly completely removed. The Collectors concerned took similar precautions to prevent the continuance of abuses on the part of the collecting staff.

10. The point in which the greatest interest was manifested is the rate to be charged for rice irrigation. The present charge for annual leases is Re. 1-14, while for leases for five years the charge is Re. 1-4 per bigha or Rs. 2 per acre, and it is recommended by the Committee that this latter rate shall be reduced to Re. 1 per bigha and that of the annual lease shall also be modified. In a pamphlet on the subject, written by the Secretary of the Landholders Committee, lately issued, this reduction is described as being "the most important, and without which, in the words of the Commission, no improvement will be accepted as an adequate outcome of the results of the Commission." The grounds on which the reduction is advocated are those described in paragraph 7 of this Resolution, and are thus summarized in paragraph 276 of the Report:—

> In deciding this question, all the circumstances of the Sone irrigation must be considered. It must be remembered that canal irrigation is unpopular. It is alleged that Sone water is injurious to the soil, to man and beast. It must never be forgotten that an old system of irrigating from aharas and pynes prevailed before its introduction, which the ryots declare was more beneficial to them than the present system which has superseded it. It is admitted that well irrigation is more beneficial to the crops than canal water. The country is said to be water-logged; the health of the people is said to have suffered. The vigorous and often injudicious assessment of water, combined with the energetic realization of the existing rates has embittered both zemindars and ryots.

11. It is probable that the Committee were right in supposing that, at the time when they made their enquiry, there was considerable bitterness of feeling both in regard to the assessment of unauthorized irrigation (which has since for practical purposes been abandoned), and in regard to the rigour with which, owing to arrears having been allowed previously to accumulate to a most injudicious extent, collections had recently been enforced. This bitterness has, owing to the reforms recently introduced, now subsided, and a careful consideration of all the circumstances in the light of Mr. Luson's enquiry of subsequent experience, and of the opinions of the local officers, convinces the Lieutenant-Governor that in the paragraph above quoted the Committee were to some extent misled upon questions of fact, and that the recommendations which followed are consequently not such as the Government should accept.

So far from canal irrigation being unpopular, the area irrigated in the *kharif* season of 1888-89 was only circumscribed by the quantity of water available. During the current year, 1889-90, the demand has been practically of the same character. Despite the lapse of five-year leases for 65,500 acres, the area so leased has increased. The area for which leases have been cancelled, though no single application has been refused, is altogether insignificant. In the face

of these facts it is difficult to see how canal irrigation can still be considered to be unpopular.

The experiments in regard to *good* crops conducted by Mr. Luson, by Messrs. Burrows, Thomson and Mylne, and the Canal officers, show that crops exceeding 30 maunds of paddy per acre are produced from all varieties of soil, including *kewal*, which was stated to be injured by canal water. These crops were produced on lands which had been under irrigation almost since water from the canals was available. The estimate by an independent officer of the *average* crop of paddy on the irrigated land in 1888-89, when at the most critical time there was no rain to assist the canals, was $18\frac{7}{10}$ maunds, or two maunds per acre of paddy in excess of the results arrived at by the annual series of experiments carried out by Canal officers, and affords strong corroborative proof of their substantial accuracy. It is at least doubtful whether well irrigation is more beneficial than canal irrigation except for opium and barley; and the consideration has no weight in regard to *kharif* crops, which form two-thirds of those irrigated from the canals: *kharif* crops are not irrigated from wells.

12. In the preceding paragraph reference has been made to facts and figures which conclusively show that canal irrigation is not unpopular and that it is not injurious to the soil. Its advantages compared with irrigation from *aharas* will now be briefly adverted to. There are doubtless places where irrigation from *aharas* cannot be so conveniently effected since the canals came into operation, but there are also others, far more numerous, where, provided the *ahara* is kept in repair, the cultivator can still exercise a real choice in the matter. As stated in the quotation contained in paragraph 43 of the Chief Engineer's note, the constant and ample supply of water available from the end of June to October presented advantages over the uncertain supply from *aharas*, which failed either in the beginning or close of the season. The facility offered for early sowings should not be lost sight of. Even where, as in the exceptional case of Belgaon, an efficient *ahara* provided with masonry escapes existed, the cultivators, who are themselves the contractors and who have used canal water since the beginning, have hitherto preferred to subject themselves to a heavy yearly tax for the convenience and regularity of canal irrigation. There are in the three districts few *aharas* so efficient as the one at Belgaon, and the records of the criminal courts and the experience of former Civil officers show that there was no more frequent cause for riots and affrays than quarrels over *aharas* and *pynes*. If, on the whole, it is advantageous for cultivators occupying lands commanded by such an *ahara* as that at Belgaon to take canal water, how much greater must be the benefit where, as in the majority of cases, the *ahara* has a small gathering ground and is commonly inefficient because it is not kept in repair owing to the expense which must be incurred.

The water contained in the *aharas* is stagnant, and therefore like canal water, practically pure. It does not, even for barley and opium crops, possess the superior qualities which, it is not denied, for these crops only can be claimed for well water, especially where the well is old.

The *aharas* certainly impound water, which should not be the case with properly aligned canals, and must have considerable influence on the water-logging of which complaint is made. Malarious fever is as rife in the unirrigated portions of Gya and Shahabad, more especially Babooah, as in those irrigated, and the canals are certainly of use in supplying man and beast with pure drinking water for which no charge is made.

13. Of the reasons alleged by the Committee for reducing the water-rate, many have little real bearing on the point. If the system is at fault, it should be altered where defective; if individuals are to blame, they can be punished; but, even if true, the allegations made are not relevant to the point at issue. The public health is a matter of the highest importance, and it is right that such remedial measures as are practicable should be taken, but it does not follow that special advantages should be given to that portion of the community who use canal water and pay water-rates. It is certain that, except in a few cases, the fact of canal water being available more than compensates for injury which occasionally may have accrued to individual land-holders owing to *aharas* on their property being rendered less efficient, and in probably more numerous cases the extra supply of water poured over

the country has increased the efficiency of *aharas* belonging to the same or other proprietors.

14. In the pamphlet, written by Baboo Kandhji Sahai, it is even alleged that, compared with 1874, the import of piece-goods into Shahabad has fallen off, and that this fact indicates a deterioration in the material condition of the people, the result, it is implied, of canal irrigation. The assertion is made on the strength of statistics extending over four months only. A reference to the table, contained in paragraph 138 of the Chief Engineer's note, giving complete figures for 13 years, shows that within this period the imports have doubled. The increase has been very steady throughout this period with two exceptions only: about the year 1882 there was a slight falling off, and in 1886-87 an abnormal bound upwards.

15. The considerations enumerated in the quotation from the Committee's report in paragraph 10 above might have weight in determining the question whether a system of canal irrigation should be introduced for the first time or not, but they have little bearing on the question of what price should be charged for water when such a system has for years been in full operation. The water-rate to be charged should clearly be fixed as nearly as possible at the sum which, taking one year with another, the cultivator finds it profitable to pay. The experience gained, which is fully set forth in the Chief Engineer's note, shows conclusively that existing rates, so far as *kharif* crops are concerned, are not too high, and that it would be an injustice to the general tax-payers to burden them with the deficiency in the public revenue which would result from any lowering of the rates mentioned.

16. It is at the same time recognised that any increase in rate which might possibly be justified by the increasing demand for canal water would at the present time be unwise as calculated to lead to undesirable friction with the cultivators who have become habituated to its use. His Honour has, therefore, determined to keep the rate for *kharif* irrigation on long leases at its present figure, Re. 1-4 per *bi ha* or Rs. 2 per acre, but to extend the term of the leases from five to seven years and to give an undertaking that no increase shall be made in this rate in respect to leases entered into before the close of the year 1895-96. This favourable rate will, however, only apply where the channels are in good order and the waste of water small. For annual leases the rate will be Re. 1-14 per *bigha* or Rs. 3 per acre, as at present. There will be cases where the cultivators will be unable, for some time, to comply with the conditions which it is necessary should be fulfilled if Government is to be bound to supply water for so long a term as seven years, and to meet these it is contemplated, though the Lieutenant-Governor is not in favour of differential rates, to charge Re. 1-9 per *bigha*, but not to give leases for more than three years.

17. Modifications all in favour of the cultivator will be made in the case of *rabi* leases, involving a reduction of from 20 to 40 per cent., in the hope that the supply of water now running to waste in that season will be more generally utilized. The arrangements under which water is given for sugarcane will be revised with the view of more precisely defining the conditions under which water is supplied for that crop, and where the consolidated yearly rate is paid remissions will be allowed if the crop fails, whether such failure was due to the deficiency of canal water or not. Provision will be made for the supply of water by volume in October to unleased areas should a surplus be available after all leased areas have been fully watered. Under certain conditions, canal water will be supplied to *aharas* between November and March.

18. The rules will be amended providing that in the *kharif* season water will only be supplied to associations of ryots cultivating blocks of land to which water can be supplied without the probability of unauthorized irrigation occurring. The selection of the block, under certain restrictions, will, as recommended by the Committee, be left to the canal officer, who will be allowed to exclude land not commanded by the canal without special arrangements or not irrigable by flow. The canal officer will be required to specify in detail, in the permit, the size of the outlet and the approximate discharge, and to be responsible for the supply through the outlet. The discharge through the outlet will be mainly determined with reference to actual experience in 1888, when there were no autumn rains. The *tatil* will be limited to five days after ten days' consecutive supply.

The assessment of lands irrigated beyond the boundaries of the leased area will be absolutely and entirely prohibited, though power will be reserved to cancel leases, on the joint authority of the Superintending Engineer and Collector, where water is habitually wasted or misused. Where unauthorized irrigation occurs, not by water being abstracted from leased areas, but through a village channel being cut or a criminal offence committed, the Canal officer will be permitted, with the previous sanction of the Collector, to impose water-rates under section 79 of the Act. In this case, and in this case only, where the facts will be placed before an independent tribunal before any measurement is made, will any assessment for unauthorized irrigation be allowed in the *kharif* season.

The Committee recommend that no change shall be made in respect to the present method of assessing *rabi* irrigation, regarding which complaints were not received. This recommendation is accepted.

19. The non-assessment of unauthorized irrigation materially affects the subject of objections to demand. The cases in which most exception is taken to canal officers dealing in the first instance with complaints are those in regard to unauthorized irrigation. In no others are appeals ordinarily preferred. The remainder relate to errors in demand, and the decision arrived at is usually at once acquiesced in by the complainant. Many of them refer to changes in occupiers disposed of by alteration statements, the preparation of which will in future be entrusted to the Deputy Collector. Nearly half the complaints made are at once decided in favour of the complainant, and the demand statement is now generally corrected before it is sent to the Collector for realization. It would obviously be a hardship in these cases to require the complainant to prefer his objection at a different office from that in which the demand statement is prepared. But it is only in the sense of giving the sub-divisional canal officer an opportunity of correcting his assessment that the Lieutenant-Governor proposes to leave the disposal of objections with canal officers. The appeal will be direct from the sub-divisional canal officer to the Collector. It will, however, be required that reasonable expedition shall be used in preferring the complaint in time to admit of a satisfactory investigation being made. The *lambardar* and subordinate canal officers will further be required to bring to notice cases in which objections are likely to be taken, so that such may be enquired into before the crop is cut or the demand statement prepared.

20. In regard to minor matters the recommendations of the Chief Engineer are accepted. The cost of road crossings for village channels will in future be borne by Government. Minor distributaries will be provided in lieu of long village channels, and leases for land at too great a distance from the distributaries will not be accepted. The Superintending Engineer will be required to specifically define the areas within which water is available for irrigation in various seasons. He will also be required to advise the Collector in the case of appeals regarding village channels, or when a permit is refused owing to the unsuitability of a block. The joint and separate liability clause in long-term leases—an arrangement to which great objection was taken by the Committee—will be abolished. Selected landholders will be supplied every year with a copy of the Revenue Report, and invited to submit any suggestions they may desire to make for the improvement of the administration for the consideration of Government. The magisterial powers already conferred on canal officers will not be withdrawn, but in future all Engineers will be required to pass an examination before being so vested. The desirability of prompt orders being passed in cases where extraordinary remissions appear to be called for is recognized, and the Superintending Engineer in this respect will be vested with limited powers to be exercised without previous reference to Government. Water will, as already indicated, be supplied during certain months of the year to *abaras* on payment. The dates for the payment of water-rates have been fixed so as to be convenient to the cultivators, and payment by instalments in certain cases allowed.

21. The measures narrated in the two preceding paragraphs have as their main object the protection of the cultivator. But whilst desirous of securing to the ryot a full supply of water at proper times and on reasonable considerations, it is necessary that means shall be taken to secure payment of water-rates justly due. There are cases of villages where realizations are never made with-

out coercive processes of one kind or other, and power will be taken to shut off the supply of water to such villages altogether until all arrears are paid up, and in extreme cases to prohibit further supplies unless half the amount which will become due as water-rates is paid in advance. These extreme measures will be adopted only with the joint approval of the Collector and the Superintending Engineer.

22. On the important question of transferring the execution of certificates from the Special Deputy Collector to the regular Revenue establishment, the Lieutenant-Governor finds a great difference of opinion between the Collector and the Board on this subject. He has no doubt that the Board's view is in accordance with the intention of the law and should be carried out. The Board will be asked what changes in establishment are necessary for giving effect to the decision, and how the delay, &c., anticipated by Mr. Power can best be obviated.

23. The changes noted above will not be introduced without some loss to Government. The charge for water under long leases is much less than that charged under annual leases, and the growing popularity of the former has already had a marked effect in diminishing the supply of water available for the latter, and thus reducing the assessments. The lower rates for *rabi* will probably in the end be recouped by the increased area regularly irrigated; but for two or three years at least there will on this account be a diminution in the receipts.

The Lieutenant-Governor accepts the opinion expressed by all the local officers that in some shape or other fees must be paid for the duties performed by the *lambardars*, and also the recommendation contained in the Chief Engineer's note as to their amount and the duties for which they are to be payable.

Circle officers will be replaced by zilladars permanently appointed, provided no increase in the expenditure hitherto incurred on collecting establishment is thereby caused. It appears to His Honour that, despite the extra work thrown on the collecting establishment by the powers it is proposed to vest in the Deputy Collector to sanction alterations, and, in certain cases, remissions in demand, the spread of five-year leases involving to a large extent fixity of demand should admit of some reduction in the establishment formerly necessary. Some saving will result by the substitution of fixed fees for a percentage in cases where putwaris are called on to render assistance in the matter of assessments.

Drainage works, estimated to cost Rs. 2,82,271, have been sanctioned from 1884-85 to date, and investigations in regard to works still reported to be required are in progress. A statement showing all cases in which it is possible that drainage may have been interfered with is contained in Appendix I to the Chief Engineer's note; in but few of the instances mentioned have remedial works not been carried out, and in these cases investigations are in progress.

The magisterial powers vested in some of the canal officers have admittedly been but sparingly exercised; and though the Lieutenant-Governor is, on general principles, opposed to permitting canal cases to be dealt with except by the ordinary tribunals, he is unwilling to weaken the hands of canal officers in times of great demand for water.

24. The rules under Act III (B C.) of 1876 at present in force will be amended in the sense indicated in this Resolution and forwarded to selected officers for opinion. The replies received will be considered and draft rules published in the *Calcutta Gazette* for general criticism before being enacted under section 99 of the Act.

25. The Committee make certain proposals for changes in the law. These are mainly that an application for water by a large majority of interests in a given block should bind the minority; that the law should bind the zemindar in *bhaoli* tenures to share, either directly or indirectly, the burden of irrigation charges; that the water-rate should be declared an encumbrance on land of the same character as rent: in other words, that it should be binding on the applicant's successor in interest. These three recommendations have the Lieutenant-Governor's concurrence, but legislation to give effect to them requires the approval of the Government of India, and the question of revising the law on these as well as on other minor points will be separately dealt with.

26. It will be seen that the great bulk of the Committee's recommendations have been accepted either wholly or in part; that in some the object

aimed at has been secured by a modification of the proposed methods, and only in regard to the rates charged for *kharif* irrigation has the Lieutenant-Governor been obliged altogether to reject their recommendation. The work of the Committee has not been unfruitful; it has, on the contrary, been of the highest value, and the thanks of the Lieutenant-Governor are due to Mr. H. J. S. Cotton, C.S., the President of the Committee, and to Mr. C. W. Odling, M.E., M.I.C.E., and Rai Jai Prakash Lall, Bahadur, Members, for the care with which they have carried out their investigations, and especially to the President for the very lucid report submitted. The Lieutenant-Governor also desires to record his thanks to Colonel Harrison, late Chief Engineer, for the valuable note submitted by him on the report.

His Honour further recognises the assistance rendered by the Maharaja of Doomraon in providing the Committee with facilities for carrying out their enquiries.

Special thanks are due to the firm of Messrs. Burrows, Thomson and Mylne for their co-operation in the crop experiments carried out, and for a long course of assistance to the Irrigation Department, in no way interrupted by the criticisms they considered it their duty, in the public interest, to make on the system of administration pursued.

Sir Steuart Bayley notices with pleasure the very thorough manner in which Mr. H. Luson, C.S., carried out the enquiries committed to him.

27. The Chief Engineer has selected from amongst the names mentioned by the Committee those of Mr. L. H. Mylne, Baboo Kandhji Sahai, B.A., B.L., Mr. W. A. Inglis, and Baboo Sharoda Prosad Chatterjee as having, both during and subsequent to the Committee's proceedings, rendered valuable assistance in arriving at a satisfactory solution of the difficulties which led to the appointment of the Committee. To the gentlemen mentioned above and in the Committee's report, and to all others who, though not specially named, aided in the enquiry, the acknowledgments of Government are due.

ORDER.—Ordered—

1. That a copy of the Resolution and the Chief Engineer's note and Appendix I be published in the *Calcutta Gazette*.

2. That a copy of this Resolution, of the Committee's report and of the Chief Engineer's note thereon, and all attached papers, be submitted to the Government of India in the Public Works Department for information.

3. That a copy of this Resolution and the documents referred to therein be forwarded to the Appointment, Judicial, Financial, Revenue and General Departments of this Government; to the Board of Revenue, Lower Provinces; to the Commissioners of the Burdwan and Orissa Divisions; to the Superintending Engineers of the South-Western and Orissa Circles, and to the Director of Land Records and Agriculture for information.

4. That a copy of this Resolution and the documents referred to therein be forwarded to the Commissioner of Patna; the Superintending Engineer, Sone Circle, and the Collectors of Shahabad, Patna, and Gya, for information and guidance.

5. That a copy of this Resolution and the Chief Engineer's note be sent to Mr. H. J. S. Cotton, C.S., to Lieutenant-Colonel C. W. I. Harrison, R.E., to Mr. C. W. Odling, to the Maharajah of Doomraon, to Rai Jai Prokash Lall, Bahadur, to Messrs. Burrows, Thomson, and Mylne, and to Mr. H. Luson, C.S., with reference to paragraph 26 of the Resolution.

6. That a copy of this Resolution and the Chief Engineer's note be sent to Mr. L. H. Mylne, to Baboo Kandhji Sahai, B.A., B.L., to Mr. W. A. Inglis, and to Baboo Sharoda Prosad Chatterjee, with reference to paragraph 27 of the Resolution.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,

Secy. to the Govt. of Bengal,

P. W. Dept

NOTE BY LIEUT.-COL. C. W. I. HARRISON, R.E., CHIEF ENGINEER, BENGAL, ON THE REPORT OF THE COMMITTEE APPOINTED TO ENQUIRE INTO THE ADMINISTRATION OF THE SONE CANALS, DATED 14TH JANUARY 1890.

Appointment of Committee and Report.

Vol. II, page 5.

(1). In a Resolution No. 1884*I.*, of date the 11th November 1887, issued by the Public Works Department (Irrigation Branch) of this Government, a Committee was appointed to enquire into the allegations contained in a memorial numerously signed by many of the leading residents and landholders of the Shahabad district, complaining of imperfections in the system of assessing lands irrigated by the Sone Canals, as well as of oppression in collecting the water-rates charged. It was also alleged that injury had been caused to the general health of the district by obstructions to drainage caused by the canals and distributaries, and other causes of complaint were mentioned. A copy of the Resolution was forwarded to the members of the Committee—Mr. H. J. S. Cotton, C.S., President, and Mr. C. W. Odling, C.E., and Rai Joy Prokash Lal Bahadoor, members—with a letter No. 1886*I.*, dated the 11th November 1887, in which the complaints made in the memorial were detailed, as well as probable faults of system which had been brought forward by officials, and the remedies suggested.

Vol. II, pages 5 to 10.

The Committee was instructed to report on the points noted below—

I.—All classes of complaints and erroneous procedure which are brought to notice either in the memorials or in the various memoranda and reports submitted to them.

II.—The following points on which questions have arisen in the course of working the Act:—

(*a*)—The definition of a village channel.

(*b*)—The liability to water-rate as affected by the use of the words "supplied through a village channel" in sections 79 and 80 of the Irrigation Act.

(*c*)—The alteration of section 74 of the Irrigation Act.

(*d*)—The necessity for legislating for a more summary mode of realizing water-rates than is permissible by the Certificate Act.

III.—The great difficulty experienced in arranging for a proper distribution of water and assessments on irrigation in the absence of village channels and the mode of overcoming this.

IV.—The advisability of making any changes in the existing system of assessments and collection, and of the distribution of duties regarding the assessments and supply of water between the Engineer and Revenue officers. In connection with this, it should be considered whether, since the professional establishment would still have to be maintained at about its present strength for the work, it would not be a waste of strength to abstain from utilizing their services as far as this is possible in the interests of the public for other branches of canal work. Moreover, the gradual and steady progress which is brought out by the reports and notes of the Canal officers should have its due weight in determining whether such progress does not point to its being preferable to build up and improve the existing system, with its gradual growth of ten years, rather than to aim at an entire change.

V.—Changes in the rules to remedy the defects brought to light by the various complaints.

VI.—The necessity for further provision for drainage, and in connection with this the effect of the altered conditions under which the "aharas" now hold water all the year round, instead of as formerly for only a few months, to which reference is made in paragraph 10, clause (18) of the observations; and whether any practical remedy can be found for the difficulties connected with the "aharas."

It was stated that the Lieutenant-Governor hoped that three months would suffice for the completion of the enquiry and submission of the report.

(2). The enquiry was as directed carried out as expeditiously as possible, and the report is dated the 13th March 1888. It is signed by all the members of the Committee, subject, however, in the case of Mr. C. W. Odling, to a dissent, dated the 31st March 1888, and in that of Rai Joy Prokash Lal Bahadoor to a dissent, dated the 4th April 1888. In both cases the reservations embodied in the dissent are material, and the report may be taken to be that of the President, Mr. H. J. S. Cotton, C.S., supported, however, in many respects, chiefly as regards the recommendations for the future, by the departmental member of the Committee.

(3). The report was forwarded to the officers mentioned in the margin for criticism. The date of their replies is noted. The Revenue Secretary, the Hon'ble Mr. Nolan, who had been Collector of Shahabad from 10th May 1880 to 3rd March 1885, was, by order of the Lieutenant-Governor, specially asked to comment on the report, and has furnished a most valuable note, dated the 10th of July 1888. Mr. L. H. Mylne of Behea was also good enough to forward for consideration a number of remarks on the report, dated the 30th June 1888. As the firm of Messrs. Burrows, Thomson and Mylne have had much experience in the matter of canal irrigation, and have invariably endeavoured to co-operate with the canal officers in regard to improved arrangements for distributing water and in other matters, the opinions expressed by Mr. Mylne are specially valuable.

Board of Revenue, Lower Provinces, 25th June 1888.
Collector of Shahabad, 31st August 1888.
Baboo Saroda Prosad Chatterjee, Special Deputy Collector, 25th May 1888.
Mr. W. A. Inglis, Executive Engineer, 21st June 1888.
Mr. D. B. Horn, Executive Engineer, 2nd July 1888.
Mr. H. B. Frost, Executive Engineer, 16th July 1888.
Mr. C. A. White, Assistant Engineer, 6th July 1888.
Baboo K. C. Banerjee, Subdivisional Officer, 3rd July 1888.
Mr. K. H. Stephen, Executive Engineer, 20th June 1888.
Mr. H. Barlow, Assistant Engineer, 4th July 1888.
Mr. M. H. Arnott, Assistant Engineer, 2nd July 1888.

The notes of the Engineers were mainly replies to statements made by various witnesses.

(4). As might have been expected, the proceedings of the Committee and their report not only brought vividly to the notice of the canal officers the grievances it was alleged that the irrigating cultivators had suffered at their hands, but also threw light on weak points in the system pursued, more especially those in which the exact provisions of the law had not been observed. The season 1888-89 proved to be one in which the rainfall, though abundant, was not, as regards the rice crop, well distributed, and the Superintending Engineer, Sone Circle, who, in Bengal Government orders No. 1821*I.* of the 19th November 1887, had been informed, in reply to a suggestion to that effect that the services of a civil officer would, should circumstances render it desirable, be placed at his disposal, asked that a junior civilian might be appointed to report on the state of the irrigated crops and on certain other points. The officer selected, Mr. H. Luson, C.S., who had previously acted as Joint-Magistrate of Shahabad, and who was at the time Officiating Collector of Gya, commenced his enquiries on the 24th of October 1888, on the termination of his acting appointment.

Mr. Luson submitted a preliminary report on the 5th of ember 1888, which was published in the *Calcutta Gazette* the 9th of January 1889, as an appendix to a note by the erintending Engineer, Sone Circle, dated the 14th of ember 1888.

Mr. Luson himself carried out a large number of experi- ats as to the yield of the irrigated crops, and a note by , dated 4th February 1889, on the subject was published in *Calcutta Gazette* for the 3rd of April 1889.

This note embodied not only the results of the experiments ried out by Mr. Luson himself, but those carried out by al officials and by Messrs. Burrows, Thomson and Mylne, had, with their usual public spirit, rendered all the assist- e in their power.

5). Considerable public interest was evinced in the pro- lings of the Committee, and the landholders and others rested associated themselves together to render such istance as they were able in bringing forward evidence of grievances complained of, and suggesting remedies for the e. The Secretary of this Co-operating Committee has e published a pamphlet, of which I received a copy on the h of June 1889. The pamphlet mentioned above may, in junction with the dissent of Rai Joy Prokash Lal Baha- r, be taken as the statement of the case which commends lf to the landholding portion of the community.

6). The report on the revenue administration of the Sone cle for the year 1888-89 was received on the 14th of tember, and contains statistics and general information arding the progress of irrigation during the year. In the antime, another *kharif* season, 1889-90, in which the late s, so essential for the proper maturing of the rice crops, e failed, has passed away; and before this note is concluded s probable that the Superintending Engineer, Sone Circle, l be able to furnish a report giving the main facts con- ted with this season's *kharif* irrigation. The weekly gation notes received from Canal Divisional and Sub- isional Officers have already in a somewhat diffuse form ced on record the chief characteristics of the season.

7). I was travelling about the Sone Canals during the ght of the demand for canal water in 1888-89, 17th tober to 2nd November 1888, in company with the erintending Engineer and Mr. Power, the Collector of ahabad, and I spent a month (May) last year in the circle lecting further information.

8). The delay in considering the Committee's report ugh in some respects possibly unfortunate, unquestionably nits of its being dealt with in a more comprehensive man- than would have been possible if it had been disposed at an earlier date.

ain heads of report, Vol. ages 1 to 4.

(9). The report of the Committee is divided into four parts, as noted low—

Part I—Historical and descriptive.
Part II—Complaints against the canal system.
Part III—Complaints against administrative procedure.
Part IV—Recommendations of the Commission.

It will be convenient, after considering Part I of the ort, to briefly refer to the provisions of the law and the es passed under it and the actual administrative system rsued. Such an examination will show that the difficulties d complaints to a large extent arose from an endeavour to graft rules and a system of procedure, in accordance with ich the Northern India Irrigation Act was drafted and sed, on an Act differing from it in many respects and ntaining at least one section distinctly hostile to a very portant feature in the rules and system taken as a guide. e system followed, it will subsequently be made clear, was opted with no view of enhancing the revenue derived from e canals, but simply with the object of levying water-rates those cases only where irrigation with water taken from the canals had actually been practised, and where benefit had been reaped.

Part I.—Historical and Descriptive.

(10). It is unnecessary to follow the historical and descriptive account of the canals contained in the report except from two special points of view—(I) anticipated revenue, (II) crops to be irrigated.

Part I, Historical and descriptive, Vol. I, pages 1 to 11.

As to the former, it must be admitted that the forecasts of revenue submitted by the Engineers who designed and carried out the works have not been realized, and that the anticipations of commercial success, which were founded on facts regarded by the Government of India as incontrovertible and accepted by the Secretary of State, have been falsified. The fact is to be regretted, but there are no grounds for believing that these mistaken estimates have had any practical effect on the canal administration.

Vol. I, page 4, and note, page 5.

The responsible local manager, the Superintending Engineer, has not, for many years, encouraged Government to expect more than a modest surplus over working expenses. An extra charge for establishment, imposed as a matter of arrangement between the General and Irrigation Branches of the Public Works Department, has to a certain extent vitiated his calculations, and allowance must be made for the effect of the sittings of the Committee: if this be done it will be found that his estimate has been substantially not far from correct, both as regards net revenue and area likely to be irrigated.

The latest forecast which is specially referred to above is that contained in the Superintending Engineer's letter No. 2432 of the 13th July 1886, the figures included in which were relied on in arranging the financial contract between the Bengal and Supreme Governments for the five years commencing with 1887-88. The letter was written long previous to Sir Steuart Bayley's visit to Arrah in August 1887, and before here were any signs of the agitation which culminated in the memorial leading to the appointment of the Committee. Reference will be made to the forecast later on; here it is sufficient to say that Government deliberately accepted a moderate estimate of revenue for the five years ending with 1892-93, and that it is this estimate,* and not the more sanguine ones framed before any actual experience on the working of the canals had been obtained, which must be taken as the financial results that were expected.

Vol. II, page 245.

* Estimated area to be irrigated—	acres.
1887-88 ...	325,000
1892-93 ...	375,000
Actuals—	
1887-88 ...	315,880
1888-89 ...	355,909

The second point mentioned in the preceding paragraph—crops to be irrigated—will now be considered.

(11). The connection between the revenue derived from the canals and the substitution of *kharif* for *rabi* crops may not at first sight appear to be close; but in the course of this note will be made clear, and the spread of rice cultivation on lands formerly devoted to *rabi* crops will therefore be now briefly referred to.

Vol. I, pages 24 to 31.

When the canals were projected, it was assumed that, as was then approximately the case, half the area commanded would be cultivated with *rabi* and half with *kharif* crops, the former mostly filling the high lands in the immediate vicinity of the canals and distributaries, and the latter those lying at a lower level. The change in the character of the crops raised on the land—generally high—on which the canals run is remarkable. *Rabi* crops have practically disappeared. The character of the soil and the presence or absence of wells seems to have had little or no effect on this result, which was due to one cause and to one cause only—the possibility of getting a full and regular supply of water. On this point there can be no possible doub,

as will be evident from the subjoined extract from a letter from Mr. L. Mylne, dated the 3rd June 1884, commenting on the report with particular reference to its applicability to the Jugdispore estate, italics are mine.

Note on page 30, paragraph 86 of report.

"For the irrigation of the jungle portion* there were no *aharas*, but we constructed between 500 and 600 masonry wells which, till the advent of canals, sufficed for all the requirements of the cultivators. *There was hardly any paddy cultivation.* * * * The adoption of canal irrigation was rapid and general all over the jungle mehal, resulting after a few years in an almost entire change from dry weather to wet weather crops which *could not*† *be raised by well irrigation.* The transformation has been so complete and thorough that only the absolute refusal of canal water for paddy would compel the ryots now to forego the cultivation of that crop."

* About 13,000 beegahs.

† Worthy of note, as in the complaints it was frequently asserted that rice had been irrigated by wells.

(12). As stated in the report, it may be that the change has been "not altogether in the best interests of the people." I am myself of opinion that restrictions—which would not have been popular—in the quantity of water supplied in each distributary in the *kharif* season should have been applied, and Mr. Mylne, senior, has‡ expressed a similar view; but there surely must be decided financial advantages, or so overwhelming a change would never have been made by a people notoriously conservative in their methods of agriculture. There was no necessity for the alteration, as ample means for irrigating *rabi* crops with well water, if there were objections to canal water existed in the Behea estate.

‡ Vol. II, page 195.

(13). Sir G. Campbell, who was by no means sanguine of the success of the canals, was apparently just as much mistaken as the Engineers: his fear§ was that there would not be sufficient water in the river to supply the canals with the water required for the winter crops. As a fact, there has hitherto been always enough to spare in that season; and with the view of inducing the people to take advantage of it, the Committee propose to reduce the rates for *rabi* irrigation. The exact bearing of the change in the character of the crops on the revenue derived from the canals has been that the higher sandy lands near the canals, which the projectors of the scheme anticipated would be cultivated with *rabi* crops, have been covered with rice, and the *rabi* water rates which it was expected would be realised have been lost. The water utilized in the manner described is not available for the lower lands further from the canals and more suitable in themselves for rice crops besides requiring less water. The attached map will show how concentrated the irrigation is, and how much *kharif* irrigation could be developed if the water-supply was sufficient during that season.

§ Vol. I, page 5. Latter part of quotation.

It is also an open question—and something more on this head will be said later on—whether the canals by increasing the quantity of drainage water have not, so far from injuring existing *aharas* used for the irrigation of rice lands, improved their supply.

(14). An extra 100,000 acres of *rabi* irrigation would make all the difference in the financial prospects of the scheme, and if in one estate 13,000 acres of *rabi* cultivation, a large part of which might reasonably have been expected to take water for that crop, have disappeared, it scarcely seems extravagant to suppose that this area alone has not only been lost, but absorbed a supply of water which could have been more profitably disposed of in irrigating lands naturally better adapted for rice crops.

From what has been said above, it will be seen that the change from *rabi* to *kharif* cultivation, which dates from after 1877-78, when *rabi* crops irrigated by canal water mostly failed, was neither contemplated nor welcomed by canal officers. It is right to distinctly traverse the statement made in the report—

Vol. I, page 10, section 26.

"The conviction which impressed itself on Colonel Rundall's mind that the canals must be maintained from rice cultivation and not from *rabi* has moulded the whole subsequent policy of the department."

The action of canal officers has been limited to accepting such changes as the cultivators have in their own interests carried out; and as a matter of fact the water-rate on rice crops was raised by about 20 per cent. on the 1st of April 1881 in the case of annual leases.

Part IA.—Actual Administrative System pursued.

(15). Turning now to the actual administrative procedure followed, the Act, section 74 (page 188 I.M.), provides that "every person desiring that water *shall be supplied* to his land from a canal shall present a written application to that effect to the Canal officer in the form given in Schedule B hereto annexed, or in a similar form, binding himself by the rules made by the Lieutenant-Governor under the powers vested in him by this Act."

Actual administrative system followed.

The words *shall be supplied** are of doubtful meaning, and will be adverted to further on. Schedule B (page 192 I.M.), is obviously intended to be filled in and presented to the Canal officer by individual cultivators. This will be evident on inspection. The name of the applicant is to be put at its head, and there are columns below in which the number of the fields in the revenue survey maps, the acreage of each field, and the crop to be grown, are specified. Leases for compact areas by the occupiers of the various fields included in the block are not contemplated, though in practice it is only to such blocks that water can be delivered. The permit Schedule C (page 193 I.M.) is also in a form obviously intended for issue to individual cultivators only. Sections, 74 and 75 of the Act (page 188 I.M.), in which the forms comprising these schedules are prescribed, fortunately give some latitude in the matter to the Lieutenant-Governor, allowing similar forms to be enacted as part of the rules. The discretion thus given was taken advantage of, and the application form prescribed in the rules (page 212 I.M.) which, under section 99 of the Act (page 192 I.M.), have the force of law, is for a convenient block including usually the fields of several cultivators.

* *Vide* Vol. II, page 251.

The signature or mark of each cultivator is required, and the area, more or less, he proposes to irrigate, but the application must be presented through a *lambardar* appointed by the applicants (in the manner provided in Rule 6, page 208 I.M.) to act on their behalf, and the permit is issued in his name. There is nothing illegal in the procedure above detailed, though dealing with associations of cultivators instead of individual ryots, is not expressly authorized in the Act itself.

(16). It has already been stated that practically water can only be delivered to blocks more or less compact, and that the application, instead of being for specified fields, is for areas more or less, in the occupation of cultivators who have signed the application. The statement of water-rates due is except in the case of five years' leases, prepared after the fields have been irrigated, and the manner in which the measurement is to be effected, the demand statement prepared and published, and objections thereto decided, is elaborately provided for in Rules 38 to 48 (pages 210-11 I.M.). This procedure is to some extent justified by section 78 of the Act which states that "the rates to be charged for canal water supplied for purposes of irrigation shall be determined by the Lieutenant-Governor, and all persons *accepting* the water shall pay for it accordingly."

Paragraph 2 of Instructions for Canal Officers (page 223 I.M.) states that the "application constitutes an acceptance of water within the meaning of section 78 of the Act."

In practice, however, the actual area irrigated is measured, lands applied for but not irrigated have not been charged. This procedure was approved of in Colonel Harrison's letter No. 1334I of the 9th August 1881, contrary orders having been given by Colonel Haig, but seldom, if ever, acted on.

7). The Rules, pages 207-215 I.M., and Instructions Canal Officers and Subordinates, pages 223-228 I.M., very much on the lines of those issued in the North-tern Provinces under the Northern India Canal and inage Act, in which no written application for water required. Persons entitled to use a village channel in those provinces the right to take water whenever they se, and an endeavour was made to, as far as was legally ible, assimilate the procedure in Bengal to that which had eeded in the Upper Provinces. It is stated in paragraph the instructions for Canal Officers (page 223 I.M.) that basis of all demands is the application form, but as a ter of fact water-rates are (paragraph 3) to be levied in rdance with the *khasra* prepared by the ameen under e 38 (page 210 I.M.). A permit is not issued, nor are any ngements made to supply the cultivators with water il a written application has been filed. Once, however, a nit was issued, the cultivators were permitted to take er pretty much as they liked, and the actual area irrigated measured and charged.

he past tense is used in the paragraph preceding, as erly, more especially since the Committee at, the ply of water has as far as practicable been limited to required for the area to be irrigated, and active measures n to prevent lands outside those mentioned in the applica- continuing to receive water. It was in previous years held either the area irrigated was covered by the written lication, or the cultivators were liable to be charged, under ion 79 of the Act (page 189 I.M.), the water having been l in an unauthorized manner. It is a question what is the e of the words in section 74 of the Act (page 188 I.M.) pplied to his land with the permission of the Canal Officer." active aid was given to admit of lands, not covered by a nit, being irrigated, and unless water was taken from an et which it was necessary to keep open to supply leased s, the outlet was closed so soon as it was reported to the al Officer that unauthorized irrigation was in progress. the other hand, if the definite was properly and necessarily n, but little care was taken to prevent irrigation extending ond the boundaries of the land for which a permit had n issued.

8. As the application is required to be in writing, it has n suggested that the permission must also be in writing, at any rate definite (vol. II, page 251). The applica- was *de facto* treated more as a notice that water was ired in a certain locality than as actually giving the to be watered, though considerable regard was paid to latter in fixing the size of the pipes when a temporary let was required. The applications were nearly invariably an area considerably less than the cultivators intended rrigate.

he instructions for Canal Sectional Officers, paragraph 5, e 224 I.M., which distinctly forbade them to close an let once irregularly opened without the sanction of the -divisional Canal Officer, show clearly that it was sidered more important that the supply of canal water uld not be stopped than that unauthorized irrigation should prevented.

he Canal Officer usually, before closing the outlet, gave cultivators a further opportunity of filing an application.

9. It is here that the question of supply comes in. In definition of village channel, section 3 of the Act (page I.M.), the sluice or outlet through which the channel is plied is expressly excluded; it follows that the owner of channel or the *lambardar* is not responsible for the open- and closing of the outlet, though it has been the practice most cases to permit the cultivators to regulate the supply ater as they pleased. In fact, until permanent outlets ld be constructed, no other course was practicable, as the pipe let was stopped with a wisp of straw which could at once pulled out without difficulty. It was not possible to fix position of permanent outlets until it was known not only re they would be required, but the average area to be irrigated by each, so that the size of the opening required could be ascertained.

The Act throughout—sections 74 and 78 may be taken as examples—contemplates the supply of water being regulated by the canal officer, and Mr. Mylne* has right on his side when he objects to this burden being thrown on the lessee. At the same time the cultivators prefer to have the power to open and shut the outlet at their discretion without having to seek for the canal subordinate entrusted with the key.

* Vol. II, page 182, paragraphs 5 and 6.

10. In the case of unauthorized irrigation, there is no question that the first point for decision is—Was the supply passing through the outlet required for leased areas and improperly diverted to lands not covered by a permit? It will be gathered from what has previously been said that until this point was brought forward in connection with the memorial, it was seldom or ever considered. It sufficed if it could be shown that the land had been irrigated through a village channel, and that the crop had derived benefit therefrom; benefit was usually assumed if the crop were a fairly good one, and it may here be mentioned that we have lately been advised that temporary benefit is sufficient to justify an assessment. The fact is that under the system of measurement prescribed in rule 38 (page 210, I. M.), the objection would only occur in cases where liability to water-rates rather than the fact of irrigation or benefit was disputed, and such cases were not common, though perhaps those in which most feeling was shown.

The blots in the system described above, viz. (I) the transfer of responsibility for the supply through the outlet from the Canal Officer, to whom it legally appertained, to the *lambardar*, and (II) the failure, in cases of unauthorized irrigation, to take into account the *lachés* of the Canal Officer in permitting a supply of water through the outlet in excess of the legitimate requirements of the leased area, though less strongly commented on in the report than other aspects of the case, are in fact the most serious faults established in the system of canal administration pursued. They are strongly animadverted on by Mr. L. Mylne, who is, I think, justified to the extent already admitted in saying that "Canal Officers shirk all responsibility in the matter of preventing 'waste' and 'unauthorized' irrigation." The word *all* should be omitted, as endeavours were always made to prevent an outlet being opened until a lease was executed, and the tendency to check and restrain irrigation without permit was each year becoming more and more fully developed. It is possible that the *lambardar* might, even with the law as it stands, be required to close an outlet when water is no longer legitimately required for the irrigation of *leased* areas.

Vol. II, page 181, paragraphs 5 and 6.

It was indeed becoming clear that, despite the obvious advantages of permitting cultivators to take water, as in the North-Western Provinces, when they liked, and then measuring the area irrigated, the practice led to undesirable disputes when the lands were assessed. One element of success in any such system was from the first wanting, inasmuch as an endeavour was made to supply all the irrigable lands in a village with water even in the *kharif* season if required, whilst in the North-Western Provinces not more than 40 per cent. of the culturable lands of a village is supposed to be provided with irrigation in the *kharif* and *rabi* seasons together. If the supply of water had been thus strictly limited the following advantages would probably have been gained. In the first place the control of the outlet could have been given to the cultivators who would most likely have taken it willingly; secondly, having this control and knowing that the supply was limited, they would have had every inducement to make it go as far as possible; and, thirdly, the limited supply would have rendered it obligatory on them to confine the irrigation within well defined limits, and thus disputes regarding assessment would have been very rare.

It is doubtful whether, unless the area to be irrigated in each village was limited, any system not involving restricting the supply in accordance with the area applied for, could continue to have been permanently followed with financial advantage to the canals or contentment to the cultivators.

The chief benefit Government reaped by the system actually pursued was that irrigation spread more rapidly than it would have done had a strict system of written applications for definite areas of lands previously measured been insisted on, and the quantity of water rigidly limited to what was required for these. The financial disadvantages to Government of the system followed were in no wise evaded. As has previously been stated, no attempt was made to measure lands for which applications had been filed, but for which water was not required.

21. The system followed was practically that led up to by the rules and instructions which had been approved by Government; and, as will be shown later on, the administration was in the main considerate, almost beyond the limits of the authority confided in the officers to whom it was committed.

These remarks apply wholly to *kharif* irrigation. It is expressly stated in the report that there were no complaints of unauthorized irrigation in regard to *rabi* crops.

Vol. I, page 67, section 209.

It is perhaps as well to describe as succinctly as possible the duty which devolves on the Canal Officer under a strict construction of the Act. He is practically by the Act and rules, though not so specifically stated therein, required to supply a definite area of land with just so much water as is necessary to ensure the crop being brought to perfection, and at the same time to ensure that the supply shall be so restricted that water shall not be available for the irrigation of lands beyond the boundaries of the area leased. The quantity of water required will vary each year in proportion to the rainfall, and not only the quantity, but the time when wanted. The problem is a difficult one even in the initial stage of laying down rules, which will admit of the Canal Officer, on the one hand, as far as practicable, protecting the public interests by preventing canal water being used without payment being legally enforceable, and, on the other hand, conforming to the standard above laid down that leased areas shall receive such a full and timely supply of canal water as is required for the crops.

PART II. COMPLAINTS AGAINST THE CANAL SYSTEM.

22. This part of the Committee's report will now be considered. The Sone Canals scheme on the 1st of April 1889 consisted of 218 miles of navigable canals, 149 miles of canals for irrigation only, and 1,167 miles of distributaries. It is obvious that in constructing such a network of channels injury to private rights could not be avoided, and that inconvenience, and in some cases actual loss, would be suffered by individuals, which would not be adequately recompensed by any pecuniary compensation admissible under the law, however considerately and even liberally administered. Generally compensation beyond the actual value of the land acquired was not claimed. Whatever benefits might accrue would in the course of a few years be taken as a matter of course, whilst the injuries suffered by individuals or their ancestors would by no means be forgotten, especially in those cases where the inconvenience was still felt, such as a canal running through a village. So far as the points above mentioned are involved, and parts of the administrative system are concerned, to which detailed reference will presently be made, but which may here be stated to include, amongst other matters, 'unauthorized irrigation' and its consequence 'deficiency of supply' and the collection in a short time of heavy arrears, it may be admitted that the agitation was to a large extent real.

Volume I, page 12, section 29.

The complaints brought forward included both classes, cases, those where individuals had suffered injustice, balance by others where the only real grievance was that water w not supplied at the valuation of the lessee.

23 Mistakes could not fail to be made by officers who ha no previous experience of work of the kind, and no experien in other parts of India would have enabled either revenu officers or engineers to deal successfully with conditions pecu liar to the districts served. Frequently, as in the case of th substitution of *kharif* for *rabi* crops, the conditions were them selves an effect of canal irrigation—only gradually developing the effect of which was not at once realized either by the cult vator or the engineer. That these difficulties were not at one fully met can be no matter for surprise. That efforts no wholly unsuccessful were made to meet them is unreserved admitted by the Committee in paragraph 96 of their repor It must not be forgotten that, except in the case of one miner firm, the canal authorities could count on no active aid fro either landholder or cultivator in preventing or detecting th misappropriation of the water which had cost Governmen much and which the cultivator never forgot might, if timel rain fell, be dispensed with. The article was in fact looked o as one which in the *kharif* season of the year at least was a common that payment was in every case more or less of a hard ship to be evaded if practicable.

24. From paragraphs 15 to 21 of this note it will be see that the rules and instructions adopted for the guidance canal officers, though admirably adapted to the circumstance of other provinces, have not been found to be altogether suite to irrigation as practised from the Sone Canals. Difficultie had been experienced which could not be adequately cope with by canal officers, and for which a thorough investigation whether by a committee or a single qualified officer, was necessity.

So far from complaining of the conduct of the gentlemen who interested themselves in th memorial presented to the Lieuten ant-Governor, I am free to admit that the time for such a enquiry was opportune, and that it was desirable that a landholders they should take the opportunity of which they availed themselves of putting their views on the questio before His Honour. The advantages which have resulte from the enquiry, from one point of view, can scarcely b overrated. It has placed prominently before canal officer the popular view of alleged grievances, and enabled them t remove causes of complaint which they were perhaps no disposed to consider of any great importance till so strongly animadverted on. The reforms have been effective, and car will be taken that the improvements already made are main tained.

Volume 1, page 12, section 30.

25. It is only fair to the superior canal officers—th Superintending Engineer and Collector—to say that th grievances so much complained of were never fairly brought t their notice. A communication from gentlemen in the positio of Messrs. Burrows, Thomson and Mylne could neither hav been lightly dealt with nor ignored. The matter is not o practical importance; it is admitted that a systematic enquir was necessary, and the redress of particular grievances coul but have postponed it.

26. The manner in which the enquiry was conducte may now perhaps be noticed. Both the Collector of Shahabad and th Hon'ble Mr. Nolan have taken strong exception to the Com mittee's proceedings in not having verified the statement made by properly sifting the evidence on which they were based. There is much force in the objection if the statement are to be taken as embodying anything more than th popular view of the grievances suffered. There are, however other aspects of this question apart from the limited time fixed for the completion of the enquiry. It was absolutel necessary that the Committee should rigorously abstain fro any appearance of exercising appellate or other authority ove canal officers, and investigations into individual cases coul

Volume 1, page 2.

scarcely have failed to have led to the expectation that actual orders would be passed on complaints brought forward.

27. As it was, the proceedings of the Committee interfered not only with the collection of the demands then due, which could be realized subsequently, but also with the measurements and assessments which could not be postponed. Investigations requiring the personal attendance of canal officers would have seriously interfered with these pressing duties. They were called on for reports on the more important cases, some of which, with all or nearly all the replies by the Deputy Collector and his subordinates, are printed in Volume II of the report, whilst others were received after it was submitted, and will, when necessary, be referred to in this note.

For the purposes of the Committee the method adopted was, under the circumstances, suitable, and except that possibly in a few of the more important cases it would have been well to have dealt more completely with both the complaint and reply, I do not take exception to it, further than that at times it seems to have been forgotten, in commenting on alleged individual grievances, that it was possible that the account given of them might not be accurate and that it was certainly unsafe to treat them as undisputed facts. It is stated in the report that replies to some of the complaints have been printed in juxtaposition with the complaints, but they are seldom or ever alluded to therein, an omission which has since been to a certain extent supplied by the reports enumerated in paragraph 4 of this note.

Vol. 1, page 2, paragraph 3.

28. The first point taken up is "CANAL *versus* AHARA IRRIGATION FOR RICE."

Volume I, page 13.

It is stated by the Committee that the one aspect of the canals which forces itself upon the people more than another is—

"That irrigation from the canals has superseded and rendered impossible within the area commanded by the canals the old system of irrigation by ahars and pynes. The zemindars complain that the ahars constructed by them have been destroyed and rendered useless without the payment to them of compensation. * * * The cultivators complain that they have now to use canal water and pay for it, whereas formerly they had the ahar water for nothing. They have now to pay an annual tribute of, say, eight lakhs of rupees for water-rates, whereas formerly they were supplied with the old means of irrigation without any payment. It is true that in some cases a small ahar rent of one, two, three or even four annas a bigha was charged by the zemindars, but in many cases nothing at all was charged. * * * These are simple facts. The question is whether they are sufficiently met by the allegation that by the use of canal water the yield of paddy is larger than when the land is irrigated by other means. This answer would be a satisfactory one, if it were true that the increased yield was sufficient to enable the cultivator to pay the additional water-rate. The canal officers assert that this is so, and departmental experiments are made every year to show the increased yield per acre of land."

It will perhaps be convenient to take up the question of the yield of irrigated crops, and then to pass on to the alleged interference with the old system of irrigation by aharas, which it may be remarked were generally inefficient and frequently useless. Such as they were they cost a great deal of labour, usually unpaid, to maintain. The Hon'ble Mr. Halliday remarks* that the administration of the *ahara* system of irrigation by the people themselves was not a success.

* Minute, dated the 15th June 1858.

29. Before discussing the subject, it is right to remark that crops were not selected for experiments with a view to establish any particular result. It was expected by canal officers at least that any set of experiments would show that the yield of rice crops regularly irrigated would exceed those which depended on the rainfall or an *ahara* also practically so dependent as being supplied from a catchment basin of a limited extent.

30. The result of the experiments made by canal officers in each year up to 1886-87 is shown in a table in the Sone Canals Committee's report. In 1887-88 the results were as shown in the table below—

Volume I, page 13, Section 32.

IRRIGATED WITH CANAL WATER.			IRRIGATED FROM OTHER SOURCES.		
Number of experiments.	AVERAGE YIELD PER ACRE.		Number of experiments.	AVERAGE YIELD PER ACRE.	
	Grain.	Straw.		Grain.	Straw.
169	Mds. s. 17 27	Mds. s. 39 18	165	Mds. s. 10 30	Mds. s. 23 27

The results from the year 1880-81 to 1887-88 are as follows, taking grain only into account :—

I.—Canal irrigated dhan—1,227 experiments, average yield per acre of unhusked dhan—$16\frac{5}{20}$ maunds.

II.—Irrigated from other sources—1,030 experiments average yield per acre of unhusked dhan—$12\frac{9}{20}$ maunds.

These experiments, it must be noted, were both as regards canal irrigated dhan and dhan otherwise irrigated intended to show the yield of *average* crops.

31. Whilst not claiming that every experiment was conducted with such precautions as would ensure absolute accuracy, the Superintending Engineer maintains that taken together the experiments made represent "very fairly the actual state of things." It should be noted that in 1880-82 the advantage in favour of canal irrigation was very trifling in other years it was more considerable, and the Superintending Engineer's contention is that these results are substantially correct.

Volume I, page 98.

32. In 1888-89 there was a general failure of the rain throughout Behar, and the good result of canal irrigation is thus described by the Commissioner of Patna :—

No. 5976. of the 26th September 1889.

"The Sone-Canals have been a great boon during the year to the districts irrigated by them. But for them there would have been distress and scarcity, the inevitable result of the failure of the rain in September and October. The crops generally, where canal water reached them, were good, but they failed almost entirely elsewhere."

Such is the opinion of the chief Civil Officer in the Patna Division, based on reports from district officers, which were necessarily more than ordinarily carefully observant of this point to which the scarcity in Behar had drawn public attention.

33. The above is an opinion. There are, however, solid facts to go on. It was felt, in view of the hesitation expressed by the Committee in accepting the results of experiments carried out by canal officers, that it was desirable, for one year at least, to have experiments carried out by an officer independent of the Irrigation Department. Mr. H. Luson, C.S. was the officer selected to report on this and other matters connected with the advantages or disadvantages resulting from irrigation. The Superintending Engineer asked for the co-operation of Messrs. Burrows, Thomson, and Mylne, and canal officers were instructed to invite zemindars, ryots, and others interested to attend the experiments carried out by canal officers, and, as a matter of fact, they did so, the Sub-divisional Magistrates being also frequently present. The instructions issued were that *good crops* should be selected and that ordinarily the crops should be weighed on the field.

34. The results of the experiments are shown in the table following:—

Crop.	Name of officer conducting experiments.	Number of experiments.	Average yield, dhan	Number of experiments.	Average yield, straw.
			Mds. s.		Mds. s.
Transplanted Aghani dhan	Mr. H. Luson, C.S. ...	25	33 39½	25	47 17½
	Messrs. Burrows, Thomson, and Mylne ..	26	31 6½	26	52 12⅝
	Canal Sub-divisional Officers	33	35 8½	31	68 14⅞
	Canal subordinates ...	138	31 30 1/16	134	53 8½
Kartika dhan	Mr. H. Luson, C.S. ...	3	35 1½	3	46 36⅝
	Messrs. Burrows, Thomson, and Mylne ...	26	26 37 5/16	25	46 6 1/16
	Mr. G. C. Macconchy, C.E.	2	31 4½	2	56 29½
	Subordinate, Arsion ...	1	14 10½	1	33 0
Broadcast dhan	Mr. H. Luson, C.S. ...	2	23 23	2	31 32⅝
	Messrs. Burrows, Thomson and Mylne ...	1	23 14	1	36 33
	Canal Sub-divisional Officers	5	37 11⅝	1	54 0
	Canal subordinates ...	2	33 7½	2	39 13½
	Average ...	261	31 32 5/16	253	54 32½

The above table is abstracted from a note by Mr. H. Luson, dated the 4th February 1890, which was published in the *Calcutta Gazette* for the 3rd April 1889, in which the whole of the experiments, whether made by himself or others, were analysed.

Of the 261 experiments made on the yield of dhan, 80 were carried out by Mr. H. Luson and 52 by Messrs. Burrows, Thomson, and Mylne. The remainder were carried out by canal officers and subordinates.

35. The evidence recorded by the Committee is wholly to the effect that the yield of dhan is less—considerably less*—half what it was under the old system, Mr. Mylne alone† stating that he refrained from giving an opinion on the question because he had no data to enable him to speak positively on the subject, but adding:—

* Volume I, page 15, complaint 37.

† Volume II, page 203.

"I may state, however, that the general opinion of our tenants is that since the introduction of canal irrigation the produce of all crops has been considerably reduced."

The statements made were not infrequently emphasized by the declaration that the witness would be glad to cancel his five-year lease.

Volume I, pages 15, 16, and 17.

The evidence recorded by the Committee is, as a matter of course, to some extent at least influenced by the consideration that the witnesses were mainly the buyers of the commodity sold by the canal officers. They naturally desired to purchase at a low rate and on conditions favourable to themselves, and the unanimity of the testimony which is commented on by the Committee is, from this point of view, not remarkable. In other matters it is not infrequently found that would-be purchasers are not undesirous of obtaining what they require as cheaply as possible, and that it is not their habit to extol the merits of the contemplated purchase.

Volume I, page 17, paragraph 38.

36. It may be that there is a prejudice against the use of Sone water for irrigation which has been handed down from generation to generation, but the prejudice did not, as is expressly stated by Dr. Buchanan Hamilton 80 years ago, prevent "industrious persons watering their lands from the Sone with the utmost success, though the land is poor," and it has equally little practical effect now.

Volume I, page 17, section 36

The Committee remark that—

"The impression entertained by the cultivators is apparently due to their involuntary comparison of it with other fertilizing agencies of superior quality. The only way to test the correctness of the impression is by systematic experiments scientifically conducted by independent agency."

Volume I, page 17, section

The fertilizing agencies mentioned are the river Ganges and old wells; the former is inaccessible for kharif lands commanded by the Sone Canals, and the latter are not used, to any extent, if at all, for rice irrigation.

37. An attempt has been made to satisfy the demand for experiments carefully conducted by independent agency with the results already shown.

The assertions made before the Committee were to the effect—

Complaints 37, 79, 92, 110, 112, 113, 136, Volume I, pages 15 and 16.

I. That abundant crops could not and never were produced by land irrigated by canal water.

Complaints 53, 90.

II. That the producing power of the land had deteriorated owing to the use of canal water.

Complaints 43, 53, 109, 111, 113, 117, Volume I, pages 16 and 17.

III. That certain descriptions of soil, especially *kewal*, are not suited for irrigation by canal water.

These allegations will now be considered in some detail in the light afforded by the experiments carried out in 1888-89.

38. The first assertion is, it is considered, sufficiently disposed of by the table already given. An average yield of 31 maunds 32 9/16 seers per acre over all descriptions of dhan, all kinds of soil, and all methods of cultivation can scarcely be taken as other than positive proof that good crops can and are, under certain circumstances, produced by canal water. In the case of superior cultivation, *i.e.* transplanted *aghani* dhan, the average yield was within a fraction of 34 maunds in the case of the experiments carried out by Mr. Luson, and 35 3/20 maunds on those carried out by Canal Sub-divisional Officers, evidently, Mr. Luson remarks, "because, taking a very small number of experiments each, they were mostly able to choose the very best crops." Instances of lands yielding crops producing a yield of 39 maunds and upwards per acre were not rare, the greatest yield being 44 maunds 8 seers. It must not be forgotten that these experiments were avowedly on *good* crops. The question of *average* yield will be considered in connection with rate. Here it may be mentioned that Mr. Luson estimates the average yield of canal irrigated crops for 1888-89 at 18 7/10 maunds, which is two maunds in excess of the result of canal officers' experiments to date.

Mr. Luson's note, dated 4th February 1889, paragraph 6.

39. *II.*—The experiments referred to in the paragraph above were on lands under long lease. In 23 out of 25 of the experiments carried out by Mr. Luson on the yield of *aghani* dhan, "canal water had been continuously taken for nine years or more. Of the remaining two, in one canal water had been used for three years and in the other never before. The results of these two are slightly below the average of the 25."

In the great majority of the remaining experiments water had been used for seven years and upwards, Mr. Luson concluding his remarks* on this subject by observing that—

* Note, dated 4th February 1889, paragraph 12.

"In fact the experiments upon transplanted *aghani* dhan have been generally upon lands continuously irrigated by canal water for a number of years, and it is therefore impossible from the returns to compare the results of the continued use of canal water with those for lands to which it has not before been applied."

The only possible conclusion seems to be that the benefits produced by using canal water have been so great that when once they have been experienced the cultivator is unwilling to forego them.

40. *III.*—Turning to the third allegation, the unsuitability of certain descriptions of soil for canal irrigation, the fault—if there really has been a falling off in the yield of fields belonging to particular cultivators—appears to be more with the cultivator than with the canal water. In the case of 16 experiments carried out by either Mr. Luson, Messrs. Burrows, Thomson, and Mylne, or Canal Sub-divisional Officers, the average yield of *aghani dhan* grown on *kewal* soil was 34 maunds 15 7/8 seers per acre. It is true that a yield better by about 10 per cent. was obtained from 30 experiments on the soil

Mr. Luson's note, paragraph 11.

ows as *baimat*, but there is nothing to justify the allegation the *kewal* soil had ceased to be productive. The fact is no bt as stated by Mr. Luson—

From these tables it is clear that sandy soils are somewhat better the cultivation of dhan than clayey soils: they would seem also e better than loamy soils. The results are in accordance with general opinion throughout these districts. They prove also that y good dhan can be grown upon clayey soils."

41. It was very generally stated by the witnesses whose evidence is alluded to in* paragraphs 35 to 37 of the Committee's report they were desirous of cancelling their five-year leases llowed to do so. The Superintending Engineer has been ted with powers to cancel these leases provided all the natories apply to that effect. From the revenue report the Sone Circle for the current year, it appears that nine ses only, covering 1,456 acres, had been cancelled up to the April 1889, and five for 529 acres have since been cancelled. single application has been refused, nor, provided it is ferred by the 25th June, before the season has commenced, would it ordinarily be declined in future. An offer† by the Superinding Engineer on the 15th October 1888, to cancel a se for 512 acres at the end of the Kurmuri distributary, to ich water could not be supplied owing to the criminal duct of adjoining villages, was indignantly refused, as it olved the loss of canal water in the year following.

Volume I, pages 15 16.

† *Calcutta Gazette*, 9th January 1889.

42. Specific replies to the complaints quoted at pages 15, and 17, Volume I, will be found in the Engineer's reports. regards Nos. 34 and 35, a subordinate of the Department s imprisoned in 1888 for being concerned in illicitly ing water to these villages, which consequently could not assessed, and in nearly every one of the remaining cases ther five-year leases have been applied for. Adverting to ness No. 136, the following extract from a report by . Stephen, dated the 20th June 1888, deserves attention :—

As regards the evidence quoted by the Commission in support of general opinion as to the deterioration of crops by canal water, desire to call particular attention to the evidence of witness 136, Shah Mahomed Wahidudin (page 16 of report), who has n described as a respectable Mahomedan zemindar of good ily. At the very time this witness gave his evidence before the mmission, he had applied to the Executive Engineer, Eastern e Division, under section 50 of Act III (B.C.) of 1876, to acquire d and construct a village channel for him at an approximate cost Rs. 400, to irrigate about 400 bighas of land, which at present not be irrigated from the canal. The water-rates on the 400 has will be at least Rs. 500 a year. It seems to me passing strange t, if Shah Mahomed Wahidudin derives no benefit from canal ter, he should be desirous of introducing canal irrigation into his age, when he might construct an "ahra" with the cost of the posed village channel, and save the yearly tribute of Rs. 500 ich he will have to pay as water-rates.

43. In connection with this subject, the only further point which it appears necessary to bring forward is the extension of rice ltivation. That this change is in some respects not bene- al may be admitted, but, as remarked by the Committee, s fact is unquestionable, and there must have been some ry strong reason to induce so conservative a class as the bar cultivator to so radically diverge from his previous stoms. The cause of the alteration is thus explained by r. L. Mylne in a letter, dated the 30th June 1888 :—

Volume I, page 31, Section

It is necessary to explain here why canal water has been appreciated by the cultivators on the Jugdispore estate, and for this purpose attach to these remarks a tracing of this estate. It will be seen at the area is divided into two portions—

(1) That coloured green which, under forest 27 years ago, was rapidly cleared and brought under cultivation within a few years subsequently.

(2) The former settled portion coloured crimson.

For the irrigation of the jungle portion there were no ahurs, but were constructed between 500 and 600 masonry wells, which, till the vent of canals, sufficed for all the requirements of the cultivators. here was then hardly any paddy cultivation.

In the second or village portion we put into thorough repair and extended existing ahurs, which had become well nigh useless, besides constructing entirely new ones.

The adoption of canal irrigation was rapid and general all over the jungle mehal, resulting, after a few years, in an almost entire change from dry weather to wet weather crops, which could not be raised by well irrigation. The transformation has been so complete and thorough that only the absolute refusal of canal water for paddy would compel the ryots now to forego the cultivation of that crop. In the settled villages surrounding the jungle mehal canal irrigation was not extended or developed so rapidly because of ahur irrigation. But when, in seasons of deficient and uncertain rainfall, ahurs failed, the cultivators of these villages made a general and persistent demand for canal water, and we were compelled to extend our system of channels to meet their wants

The fact that an efficient canal, such as the Behea Branch, was constructed through the entire length of the Judispore estate, so compact as it is, was a potent factor in the development of canal irrigation and the disuse of ahurs. "Here is a constant and ampel supply of water," thought the ryots, "available from the end of June to the end of October: let us give up the uncertain irrigation from ahurs, which fail us either at the beginning or the end of the season, and take canal water." It frequently happened that these villages would not apply for canal water till the ahur failed in respect of one watering. They were then supplied with canal water, and, finding that they had to pay as much for one watering as if they had irrigated throughout the season, they naturally decided to depend entirely upon canal water and forget their ahurs. The question arises—would ahur irrigation have been put aside if a small charge had been levied for one watering or for refilling the ahurs?

The case in this estate at any rate appears to lie in a nutshell. Is it credible that *rbai* cultivation would have been exterminated and *ahara* irrigation abandoned unless the yield of canal irrigated rice was satisfactory—in fact, unless the alteration involved a profit to the cultivator at least, and indirectly to the zemindar?

44. So far the yield of canal irrigated rice has chiefly been considered. The main head "Canal *versus* Ahur irrigation" will now be examined. A continuation of the extracts from Mr. L. Mylne's remarks will show the grounds on which canal irrigation is preferred :—

For some years past a number of these villages have managed without canal water, but the bulk of them, for various reasons, cannot. Our policy as regards these villages has been to co-operate with the ryots, by strengthening and improving the ahurs when and where they can, with confidence, forego canal irrigation, and revert to their former methods.

One of the advantages of canal irrigation has not been anywhere mentioned, that is, the comparative certainty of the supply, in most places easily accessible to canal water, for raising paddy seedlings and their subsequent transplantation. With the aid of canal water the ryot may do this work whenever it suits him and whenever the time is seasonable and auspicious, whereas formerly he was dependent upon uncertain rainfall.

45. There is a further special case quoted by the Committee which appears to go to the root of the matter, and is accordingly quoted with the Committee's remarks at length—

* Page lxvii, Appendix III.

"And in regard to a particular village, he writes* :—

"I may mention here that when visiting mouzah Belgaon, one of our villages, the other day, the ryots asked me to thoroughly repair the village ahur so as to relieve them of the necessity of paying Rs. 6,000 yearly in water-rates. They have no complaint against either the assessing or collecting departments, for they have always had a full supply of water, and they pay rates without difficulty. They have entered into a five-year lease among themselves, as contractors, for nearly the whole cultivated area held by them. We are not parties to the contract. The area of the village is nearly 7,000 local bighas, and the gross yearly collections, including Government cesses and putwaries' *neg*, is Rs. 19,000. It would seem that they have begun to doubt whether, if the ahur is thoroughly repaired by us, it would be necessary for them to purchase Rs. 6,000 worth of canal water every year. The village ahur was exceedingly efficient and reliable, but fell into disrepair owing to the adoption of canal irrigation. It is probable, however, that in order to save to the village the large sum of Rs. 6,000 annually, we will put the *ahur* into thorough order. Our only fear is that the ryots may miss the regularity and convenience of the water-supply given by the canal to this village.

"We invite particular attention to this evidence. The village of Belgaon is one to which the Canal authorities have always pointed as a specimen illustration of the benefits conferred on the country by the canals. The outturn of rice is ample, the supply of water sufficient, and there is no friction with the Collection Department,

Here, if anywhere, it may be supposed that the ryots are contented with the present arrangement. But we now learn that in their own opinion and in the opinion of the zemindars of the village it is a matter for consideration whether the advantages of canal irrigation are not purchased at too high a price. To avoid the water-rates it is proposed to recur to the system of irrigation which prevailed before the canals were constructed."

The question which cannot fail to occur to the reader of the Committee's report is—How great must be the advantages derived from canal water when an efficient *ahara* is practically abandoned and Rs. 6,000 paid yearly for canal water? Irrigation in this village is not a thing of yesterday. Water has been continuously taken since the canals came into operation in 1876, so that the villagers, who are themselves the contractors, have had ample opportunity of appraising the value of the commodity bought. If in such cases it is profitable to use canal water, how much more must be the resulting advantages where, as in the vast majority of cases, the *aharas* have an insufficient gathering ground and are not kept in proper order. The Belgaon *ahara* is one of the very few provided with masonry escapes. There are probably not half a dozen others so furnished in the whole of the Shahabad district.

The inference is irresistible that canal irrigation must, even after the payment of water-rates, be highly profitable to the cultivators, especially to those who have not enterprising landlords like Messrs. Burrows, Thomson, and Mylne, able and willing to construct such works *aharas, &c.*, as are necessary for their prosperity.

Vol. I, page 17, section 41.

It is perhaps necessary to observe that Belgaon is situated on the last reach of the Kunteya distributary, from which water is supplied in the *kharif* season, and that the canal water used in that village could probably within a short time be equally profitably utilised elsewhere. The demand for canal water in the *kharif* season is already practically in excess of the supply. The cultivators are not improbably reckoning on canal water being available as a *'dernier resort'* should the *ahara* fail. It is quite likely that such would not be the case, and that they would find that exemption from even a tribute of Rs. 6,000 a year had been purchased at too high a price.

46. Against Mr. Solano's opinion may be quoted that of Mr. Nolan, contained in a note, dated the 10th July 1888:—

"I may say that when I was Collector of Shahabad—an office which I held during the five years ending with 1884-85—no one appeared to doubt that irrigation had on the whole been profitable to the district. The system was then extending; indeed the area irrigated doubled during the period; and coincident with its extension was observable a degree of comparative prosperity clearly distinguishing the inhabitants of north Shahabad from the poverty-stricken population of the surrounding districts."

Even now the difference in the appearance of the villages on the Patna-Gya Railway and the Patna Canal cannot fail to strike the most casual observer, and Mr. Solano's practice does not, from the following extract from a report by Mr. Stephen, appear to be in accordance with his recorded opinions:—

Irrigation from ahurs.—I am not aware, with one single exception, of any ahurs which have been destroyed by the canals in the Gya district. More than 75 per cent. of the lands irrigated from the canals are very high and cannot be irrigated by flow from *ahurs*. These lands are all now sown with rice, whereas formerly only inferior crops such as *rahar, kodo*, &c., were grown on them. Where ahur water has been abandoned by the ryots for canal water, it is because they prefer canal water and can depend on a constant supply. Last year it was at the special written request of Mr. G. L. Solano, of Arwal, that I executed a five-year lease in, and supplied water to, village Bugpore, pergunnah Arwal. This village in former years used to take canal water and had a five-year lease, but in 1885-86 and 1886-87 it was unable to get water, as the village is situated far down the Malli distributary. There is an ahur in this village. In a second village of Mr. Solano's, Pooran, where also Mr. Solano asked for a five-year lease, I was unable to grant the lease as I could not supply water to the village, it being situated very far down the Khojassa distributary.

47. The complaint that *aharas* were injured by the can and that no compensation was paid, is supported by t specific instances only—

I.—That of the Ghoosia bund. This embankm was ordered to be cut by the Collector un the provisions of Act II (B.C.) of 188 dangerous to life and property, not be provided with masonry escapes and no lon protected by embankments higher up the ri Kao, the embankments having disappear There would have been a strongly contes legal question as to the compensation paya and the persons liable when the zemindar hi self settled the matter by altogether declin to receive any compensation which might charged to the public revenues. The remova the embankment had no immediate connect with canal irrigation. The liberality and pul spirit displayed by the zemindar in the mat were cordially acknowledged by Sir A. Eden.

II.—That of the Domraon bund which was remov by the Maharajah himself as dangerous to t town, when all the bunds across the Kao abo it, by which it was formerly in some measu protected, had been abandoned. There w always the risk of a breach, in which case t town would have been flooded.

The Superintending Engineer's statement that no spec action has been taken by Canal offic in reference to *aharas* with the exce tion of the two mentioned above can scarcely be impugn though it is not denied that in many cases inconvenience, a occasionally even actual loss, resulted from the construct of canals and distributaries. Such injuries as were suffer were occasioned from 10 to 20 years ago, and compensati should have been claimed at the time. It is impossible say now without careful enquiry whether compensation w paid in all cases. There is no doubt that in some it w neither claimed nor paid.

Volume I, page 121.

48. One other instance, which is given as an examp of how the *aharas* have been "inte cepted and destroyed," will be refe red to under the head Drainage; an when the question of rates is discussed, it will be show that there are strong grounds for believing that the irrigatin capacity of many of the *aharas* has actually been increase by the canal water which drains f from irrigated rice fields, and is inte cepted by these *aharas* and again us for irrigating crops not liable to assessment.

Volume I, page 24, paragraph 64.

Sone Circle Revenue Report for 1889-90, page 11.

Two other points may perhaps be mentioned—

I.—That as regards the village of Ekwari, prominent referred to in a note to page 13, Volume I the report, and again at pages 22, to 56, M Geo. Fox (who has been Messrs. Moran a Company's Agent since they acquired t village), states (paragraph 27 of Mr. Odlin di-sent) that no application for a syphon h been made by them.

II.—That the three villages referred to by Mr. Solan are unfortunate beyond the area f which water is ordi narily available in the *kharif* season. Two o of the three have, however, had one crop or oth under irrigation every year, 1,828 bigahs havi been watered during the four years endi with 1888-89.

* Volume I, page 17, section 41.

49. The Sone Canals have developed into channels chief utilised for the irrigation of rice, not altogether in accor ance with the expectations of the Engineers who design

them, and, possibly, not in the best interests of the people if other than financial considerations are taken into account. It is, however, submitted that the facts brought forward show that for this purpose they are efficient, and that the contention that canal irrigation is other than voluntary, or, as compared with *ahara* irrigation, not profitable to the cultivator, rests on no solid foundation.

Canal versus Well irrigation for Rabi.

50. The Sone Canals have so far not been successful in regard to the irrigation of *rabi* crops. These crops form approximately 10 per cent. of the area under five-year lease, and to this extent *rabi* crops are probably regularly irrigated; but the annual leases which vary in amount from 15,000 to 70,000 acres have always been disappointing. Taking into account five-year leases the largest area ever irrigated was 129,012 acres in 1887-88 which is scarcely one-third of the area to which water could without difficulty be supplied. *Rabi* irrigation has never recovered from the disappointment which the cultivators suffered in 1877-78. They gave it a trial, and the result, partly owing to their own inexperience and partly owing to natural causes, was disastrous. The water was easy to get and the land was flooded to the injury of the crops. There was a pest of caterpillars which destroyed the pulse crops and the wheat was injured by blight. Barley in fact was the only crop which escaped. Large remissions of water-rates were made by Government, but the landlord's rents were, except in a very few cases, exacted as usual.

The water-rate for *rabi* is unquestionably high, and has doubtless an injurious effect both in respect to Government and the people in preventing water which is available being turned to account.

In suitable localities canal water is used for irrigation even at the cost of considerable labour. Lands bordering the Jehanabad Distributary are every year irrigated, though the water has to be lifted twice and in places three times, entailing a cost in labour probably equal to the water-rate.

51. The result of the experiments made to date on *rabi* crops is as follows:—

Crops.	Number of experiments.	Canal irrigated crops, average yield per acre.	Number of experiments.	Irrigated from other sources, average yield per acre.
		Mds. srs.		Mds. srs.
Wheat ...	495	11 1	473	10 31
Barley ...	57	10 34	58	12 21
Wheat and barley ...	117	9 25	106	9 37

Wheat therefore apparently produces as much grain if irrigated by canal water as by the wells usually available, whilst in the case of barley canal water does not seem to give good results. So far as the experiments go, there is, however, nothing to show that as regards one staple crop canal water might not be much more largely utilised, and probably will be if the rate is made more favourable.

52. That canals in places where there is much percolation render the construction of *cutcha* wells in their proximity impossible is admitted. It is, however, only in parts of the Patna Canal that this difficulty occurs, whilst on the other side owing to the percolation such lands frequently require no irrigation at all. There is no remedy: the canals, it may be hoped, will gradually become more watertight.

Volume I, page 20.

53. The difficulty with the Opium Department was not general: it was most felt in Patna and Gya and the east of Shahabad. The number of aqueducts applied for—and the application comes through the Opium Department—has not been very considerable, and many of them are at little used. The objection entertained to these by Canal officers had little reference to the irrigation of opium. The crossings can be, and, as a matter of fact are, used for irrigation generally; artful contrivances of one kind or other being resorted to. There is the temptation, which the late Sub-Deputy Opium Agent of Shahabad had to admit was generally irresistible, of taking the first and sometimes the second watering from the canal, a course leading to disputes the canal officers were anxious to avoid. Experience has proved that the Canal officers were right in considering that there was no general demand for crossings, but it certainly would have been better if they had provided such as were actually required without pressure from another department.

Marginal note, Volume I, page 20, paragraph 44.

Obstruction to Drainage.

54. This matter has throughout received the most careful attention from all the Engineers who have been engaged in the project.

That all drainage works rendered necessary by the canals should be carried out is admitted. On this point there is no difference of opinion, Mr. Odling observing* that—

* Volume I, page 119.

"Any actual obstruction is remediable, and ought to be remedied, provided always that as a matter of fact it exists. Anything like impeded drainage is under all circumstances and under any conditions an evil from an irrigation point of view, as tending to water-log the land. Liberal provision was made on the general estimates for any drainage works that might be found necessary. The fact of drainage being impeded cannot be hidden, though it may happen that it does not at once come to light, the flow in years of ordinary rainfall being absorbed or utilised before it reaches the canal bank."

The fact is, and it cannot be too strongly insisted on, that the Engineer's objection to *aharas*, which is alluded to several times in the Committee's report, is based not on their capabilities as irrigating agencies, but because as a *condition of existence* they must obstruct drainage. Injurious as the influence of embankments, necessarily aligned across the drainage of the country and, except in rare cases, not provided with escapes must be at present, it would be greatly intensified if canal water was regularly poured into them as suggested in section 232 of the report, and it is for this reason that the Superintending Engineer* advocates caution in dealing with such applications.

* Volume I, page 96.

55. One special case is referred to by the Committee in paragraph 64 of their report. In this instance it is not denied that drainage was interfered with; but, as stated by the Committee, it also—

Volume I, page 24.

"Affords evidence of the action taken by the Engineers to remedy the obstruction which their own works had in the first instance occasioned"

Our sins have certainly found us out. There is, however, no other such case in the whole system. There has equally been no hesitation in remedying the evil appalling to an Engineer as the number of works required to counteract the mistake made has been. One of these only would have been wanted if the correct alignment, *i.e.*, an extension of the Sikrour Distributary, had originally been preferred.

The only condition required precedent to the construction of a syphon is that water shall actually be impounded: wherever this can be shown to be the case, even to a slight degree, there will be no hesitation in providing such a work: where, however, there is no obstruction, no possible good can result from expending public money on the construction of works which, when finished, would be useless.

No trace can be found of most of the petitions for syphons referred to in the report. In a matter of the kind where influential landholders are concerned, it is surely not asking too much if, in cases where their wants are asserted not to be attended to, they are asked to communicate with the Superintending Engineer.

56. In August 1888 the rainfall was exceptionally heavy, and whatever defects in drainage provision existed became apparent. A note by the Superintending Engineer, giving, as suggested by Mr. McNamara,† a list of all cases where the canals or

† Volume II, page 330.

distributaries were breached or cut is attached. The note also contains information as to the drainage works that have been carried out since the date of the Committee's report, and as to what works are known to be still required. A perusal of the note will show that the Committee's recommendation, expressed in the concluding part of section 25 of their report, has received that full attention which it is quite admitted it deserves. Material progress has been made without neglecting the care and caution expressly stated to be necessary, and which has been the real cause of any apparent delay in dealing with the question.

57. Before concluding my notice of this part of the report, it is perhaps desirable to allude to the fact that the drainage works carried out are in many cases of immense benefit to unirrigated tracts of country, it being necessary to deal with the whole area to be drained irrespective of the precise parts thereof affected by the canals. Such a case is the Bachere drainage cut which has cost Rs. 57,763, and which includes a weir by which the water in the *aharas* above can be kept at any desired level. A similar work has just been sanctioned in connection with the Chowsa canal.

Obstruction to District Communications.

57. The Committee refer to the obstruction to district communications stated to have been occasioned by the canals. The case is thus put by the Magistrate:—

"Existing roads are injured by the side cuttings being used as village channels, by unauthorised channels being made across them, and by flooding from surplus canal water. Potential roads are affected by the canals and distributaries occupying the water sheds wherever practicable."

Of actual injuries stated to be caused to the roads, the road authorities are to a certain extent responsible for the first two, which can only be stopped by criminal prosecutions. Should there be real fear of scarcity, the local pressure is such that they are indisposed to object to any means of irrigation. It has been decided that permanent road crossings will for the future be provided by Government. It is unlikely that any considerable addition will be made to the length of the roads in the district; in fact some roads made in the famine of 1874 have been practically abandoned. The fact that the canals have, as far as practicable, been kept on the ridges, which might possibly in future years have been utilised as roads, is hardly a sufficient reason for the District Board claiming what is *de facto* heavy pecuniary compensation. It is essentially a case of "first come first served."

58. The Committee observe—

"We have seen for ourselves that the canal embankments and towpaths are now largely used as means of communication by the people, and that the convenience of the canals in this respect is appreciated. They are suitable for foot-passengers only, for as a rule the banks and berms are too narrow for wheeled traffic. During the rainy season only it is necessary to impose certain restrictions for the protection of the canals which cannot be relaxed.

To the statement of policy contained in the above extract, the canal officers have never taken exception, but as berms vary in width from 5 to 10 feet only, and would soon be absolutely destroyed by heavy carts, they have been compelled to object to wheeled traffic except in a few cases in which, as a matter of public convenience, the berms of some distributaries or parts of distributaries are kept open during the dry season for light vehicles only, such as ekkas. That a very distinct assertion of the right of Government to control the use of the lands acquired and roads formed at its expense is sufficiently obvious from the following resolution of the Shahabad District Board:—

Extract from the Proceedings of a Special Meeting of the Shahabad District Board, held on the 27th of March 1888.

"Read the application of Syed Mohamed Jan and others for a bridge over the Kao Nuddi, and the papers connected therewith.

"Resolved that a sum of Rs. 2,000 be provided in the budget estimate for 188 -90 for making a road from Koath village to the Doomraon Canal, and that representations be made to the Irrigation Department to throw open the Doomraon Branch Canal spoil bank, between Tendoni on the one side and a point opposite Karanserai on the other, to public traffic as of right."

In this case an arrangement for light traffic was arrived at, though the claim to the use of the berms as of *right* was necessarily repudiated.

The Superintending or some other Engineer connected with the canals would, in the light afforded by the Committee's remarks, probably be a more efficient representative in the District Board than the Irrigation Deputy Collector, who has, for some reason not known to me, been selected apparently to represent the Public Works Department.

DETERIORATION OF PUBLIC HEALTH.

59. The statistics available on this subject are not in themselves very reliable, and there is the further difficulty that the divisions into which the resulting figures are abstracted are by no means conterminous with the irrigated area.

The actual facts are probably tolerably fairly put in the following extract from the report of the Civil Surgeon, dated the 13th January 1880, which was furnished at the request of the Committee:—

Volume II, page 319-25.

"*Effect of canal irrigation.*—In conclusion, it seems to me from a study of such statistics as are forthcoming on this subject that the canal irrigation of this district has without doubt intensified pre-existing disease-producing influences.

"It is a mistake to assert, as is sometimes done, that malaria fevers were almost unknown previous to the canal period. The fact is that the district has been subject to malarial fevers for a very long number of years, and it is also, I believe, a fact that in recent 'epidemic years' the district suffered, certainly to a greater degree, but in common with neighbouring districts.

"I fear it cannot be denied that obstructions to drainage have been caused by canals: but numerous other obstructions exist from bunds and embankments, leaving water after heavy rainfall stagnating in barren channels.

"Then it is said that water is wastefully used, and I can vouch for its being *injuriously* used. The cultivation of crops, such as sugar cane, requiring very frequent flushing, has enormously increased since the canals were made. I saw a village a few days ago close to the canal, about 20 miles from Dehree, on the side almost hidden by jungle and undergrowth, and surrounded so as to be almost lost to view by dense crops of sugarcane. Any one with any knowledge of hygiene must know that it is impossible to retain health with such surroundings.

"I think it must be recognised that land surrounding towns and villages must not be irrigated from canals. I need hardly point out how injurious to health damp dwellings are.

"*Summary.*—To sum up, I should say that the effect of the canal system has been of a mixed nature. On the one hand they are said to have placed the district beyond the danger of famine (although I do not think this to have been proved, if population goes on keeping pace with production, as before last census, when an increase of nearly one-fourth of a million was found); by offering a means of sowing the crops in years of drought, they have increased productiveness, and made fertile what was previously barren.

"They have without doubt benefited the people by affording means of easy communication throughout the district, and one chief element of good has been the introduction of a good supply of water to places where formerly it was of very inferior quality.

"On the other hand, they have brought about such conditions as without doubt, promote the spread of diseases such as malarial fevers &c. These conditions can to some extent be improved. I have not been asked for an expression of opinion as to the remedies which suggest themselves. Much has already been done, I am told, to improve drainage channels, remove obstructions, and to prevent injurious use of water; more can still be done. But when all has been done that can be done, I fear that conditions favourable to malaria will continue to exist in years when the rainfall is above the average.

The extent to which drainage can still be said to be obstructed by canals is shown in the Superintending Engineer's note. Such obstructions never were numerous, and counted for nothing besides the *aharas* which have been in existence for generations. The main drainage channel of the district, the river Kao, was almost obliterated, there being no less than 14 bunds across it when the canals were commenced. Fever has followed—not immediately, but many years after—such blocking up of drainage channels

ough Bengal, and it would be no matter of surprise
ie usual result was experienced in Shahabad. There
were, as noted by Mr. McNamara,* in the extract quoted below, mitigating
stances which, however, by no means accord with the
l statement of the efficiency as irrigating agencies of
aras which pervades the Committee's report.

* Volume II, page 337.

ıst Mr. Cameron evidently referred are the numerous *aharas*
anked reservoirs that abound in the district. These have
possibly from prehistoric time—most certainly they were in
ce in the days of our earliest surveys of the country. How
ın these ancient reservoirs have so suddenly produced the new
eviously unknown results now attributed to them? It might
ered, because they have been put to new uses. In the old
s their limits were strictly defined as to area and time. The rain-
ber that drained into them was limited to the months of the rainy
son. As a rule, the supply was too scant for the requirements,
l in the case of abnormally heavy rainfall, when the surplus water
not pass off round the embankments, in the manner provided for
purpose, it almost invariably burst the embankment, leaving only
imited quantity of water in the reservoirs. And the water that
s subsequently used for irrigation had to be *lifted* for the purpose.
e labour exerted in the process was tedious. The area under irri-
ion and the duty of the water were strictly limited. There was no
ste and no indiscriminate flooding of the country. Long-establish-
custom had created ways and means for the distribution of the
er that are remarkable for the smoothness with which they work-

Now the irrigation season is indefinitely prolonged. Water
plied by the high level canals and distributaries commands every
rs, long after the cessation of the rainy season. There is no need
ift it, and there is not the same inducement to economise it."

The *aharas* are more efficient than before, more and better
ps can be raised, and rice cultivation has to a large extent
perseded financially less profitable *rabi* crops.

10. It is probable that districts under wet cultivation are
years of heavy rainfall less healthy than those in which
crop does not require that for many months the land
ll be covered with from 4 to 6 inches of water. To the
ent the health of the district has suffered by this sub-
ution, it may be partially ascribed to the canals which
e rendered rice cultivation on such a scale possible. On
other hand, as pointed out by the Civil Surgeon above, the
als have helped to meet an equally pressing danger, the
reased population which may even render the increased
ductiveness of the soil of no avail. The effect of the
ension of wet cultivation on the hygienic conditions of the
trict as opposed to obstruction of drainage, which *de facto*
rcely exists apart from the remaining *aharas*, cannot be too
ongly insisted on.

The Committee, it is noticed, are of opinion—

"That a stronger case is needed than now exists to justify inter-
nce by rule with the discretion which the cultivators now exercise
rrigating their lands as they please."

I am not prepared to recommend coercion in this respect,
, as stated by Mr Mylne, it is unlikely that anything
rt of—

"The absolute refusal of canal water would compel the ryots now
forego the cultivation of that crop."

Water is not now supplied for the purposes of irrigation
r Arrah, and there would be no objection to the Superin-
ding Engineer being vested with power to restrict or direct
refusal of permits for irrigation generally, or for irriga-
n in the *kharif* season only in specified places where proper
inage facilities do not exist, or where flooding to an objec-
nable extent is persistently carried on, or where the public
lth is apparently suffering.

11. There is another side to the question, as will be evident
m the following quotation from a note, dated the 10th July
8, by the Hon'ble Mr. Nolan:—

"The canals have given what was much wanted in many villages, a
ply of pure drinking water, and have so far been of great sanitary
. This must be taken as some set-off against the fact that they
ease moisture and probably facilitate the spread of malarious
r."

It should also not be forgotten that the wave of malarial
er, to which reference is made by the Committee, is not
fined to irrigated tracts, but is as rife in Bhuboah, where
there are no canals, and on Gya, where the tract irrigated is only a narrow slice along the Sone, as in Shahabad generally and it has now shown itself in Bhagulpore.

VALUE OF THE CANALS TO THE PEOPLE.

62. In the preceding paragraphs the value of the canals to the people has been more than once incidentally referred to, and there probably has never been a more striking instance of the benefits they have conferred than was experienced during the year 1888-89. There was scarcity approaching to a famine in Behar generally, and this is what Mr. Luson, C.S., who was specially deputed to report on the subject, says regarding the crop on the land irrigated by the Sone canals. It "has reached on the average a high standard of excellence, and stands out in high contrast with the sad picture of the almost total failure of the crop which depended upon rain-water alone, or rain-water stored in *aharas* with small local catchment basins."

He observes—

"As soon as I received my instructions, I rode, before the time of *dhan* harvest arrived, through a large number of villages unaffected by the canals. In the cases of small *aharas*, as the great majority are, I found a complete failure of the crop. Very little of it was worth cutting, even for the sake of the straw. In the cases of *aharas* with somewhat larger catchment areas, a few fields only were sufficiently watered (these were chiefly the malik's *zirats* and the higher caste cultivators'); and in the cases of some of the very large *aharas*, such as those at Belkhara in Gya, Hitampur in the Jagdispur estate, and Udwantnagar near Arrah, the area commanded by the *aharas* was all watered and produced a good crop, though more water would have improved it. But such large *aharas* as these latter can be counted upon the hand. The *dhan* crop dependent upon *aharas* this year, as far as I saw it, was a great failure. It was upon the whole much under 4 annas—probably about 2 annas—of the crop on canal-irrigated lands."

63. The value of the rice and wheat crops on the area irrigated by the Sone canals in 1888-89 alone exceeded 76½ lakhs of rupees, and it is not too much to say that half at least of this sum would have been lost to the people but for the canals. In the sum mentioned above no account is taken of other crops, such as sugarcane and barley of the value of 33½ lakhs of rupees, which benefited materially by canal irrigation. The total amount leviable as water-rates on crops of the value of 110 lakhs of rupees was 8 lakhs only, or about 7½ per cent. on the value of the crops irrigated.

PART III.—COMPLAINTS AGAINST ADMINISTRATIVE PROCEDURE.

64. The Committee commence by acknowledging that improvement has been effected in both the assessment and collection departments during the past two years. They say:

Volume I, pages 33, sec. 96.

"The improvement is admitted by several of the witnesses who gave evidence before us, and as a fact we find that the great majority of the individual complaints we have received relate to the events of past years."

It is in fact only necessary to refer to the complaints in which names are mentioned, when it will be found that reference is frequently made to events which occurred eight or nine years ago, into the merits of which any kind of investigation was impracticable. The improvement mentioned has since been more than maintained.

COMPLAINTS AGAINST THE ENGINEERING STAFF.

65. Under this head both "Assessment and blackmail," and "Unauthorised irrigation," separately noticed in the Committee's report, will be considered.

It has been explained (paragraphs 17 to 21 of this Note) that in the earlier years of irrigation in Behar an attempt was made to follow, as far as practicable, the system pursued in the North-West Provinces, that is, to depend on the patrol's register or *shudkar* as the basis of the demand statement. The introduction of five-year leases was the first decided attempt to dispense with the services of subordinates of this class in the assessment of irrigated land. The area under five-year lease for the last three years has averaged 200,000 acres,

out of an average of 313,000 acres irrigated yearly, so that approximately two-thirds of the area irrigated has been altogether withdrawn from the cognisance of the patrol for some years past. As will be explained later on, the procedure in the case of annual *kharif* leases has, to a large extent, been assimilated to that followed for five-year leases, and irrigation beyond the boundaries specified in the application has ceased to be assessed, so that the patrol's functions have been much restricted; in fact, so far as the assessment of *kharif* crops, his influence, which was always more restricted than would be inferred from the report, has altogether disappeared.

66. The complaints, to a certain extent endorsed by the Committee, have been that unirrigated lands have been assessed, that blackmail has been levied, and that the law and rules have been oppressively interpreted to the detriment of the people of the country. On the other hand, there is the conviction of the Engineer referred to by the Committee in paragraph 157—

Volume I, page 59.

"that Government is more ill-used by the cultivators than the cultivators by Government, and that instead of the cultivators being themselves oppressed they are rather the persistent trespassers and offenders upon the patience of a long suffering department."

The opinion given is quoted by the Committee as evincing a want of sympathy with the people, though (paragraph 180) it is not denied that—

"In some villages, especially Brahmin and Rajpoot villages, there is an everlasting struggle carried on to get water without paying for it."

Volume I, page 57.

It must be obvious to any one reading the report that a large number of the witnesses more or less resent having to pay anything more than a nominal amount for so common a commodity as water. As observed by Mr. Power,* the great majority of the witnesses before the Committee were Rajpoots and Brahmins—

* Letter No. 8491 of date the 31st August 1888.

"Castes who always claim special priviliges and resent being placed on an equal footing with working cultivators."

With regard to the assessment of unirrigated lands, the same officer observes that—

"Nearly all appeals have reference to unauthorised irrigation. When there is proper evidence in support of the assessment, it must of course be upheld. My conviction in such cases is that in most such cases the canal underlings have been bribed to wink at the malpractice, and that the Canal Sub-divisional Officer's vigilance alone has defeated the fraud; they come chiefly from the Bhojepore pergunnah."

The Canal officers were quite aware that efforts would be made to bribe these subordinates, and doubtless, as stated by Mr. Power, exception was taken when the unauthorised irrigation was detected and the people had to pay twice over, especially where an unsuccessful appeal was preferred.

67. The evidence on the subject of blackmail labours under two disadvantages: first, that it mostly consists of statements which were in no way sifted; and secondly, the bribe was frequently avowedly given with the object of obtaining some illegal object. That the statements made are far too sweeping is obvious from the appendices to the report: for instance in section 105 a pleader's evidence is cited as to the corruptness of the overseer, which was expressly denied by witness No. 74, who is believed to be his own servant. Other witnesses, Nos. 86 and 90 may be taken as examples, refer to the incorruptibility of a particular sub-overseer. Another pleader (section 122 of the report) was equally mistaken, the village mentioned having been irrigated, in the first instance without permit, in the very next year.

The subordinate staff employed on the canals are probably neither better nor worse than those employed in other departments: whatever power they originally possessed has been, as already pointed out, largely reduced, and it is evident from Mr. Power's remarks quoted above that the bribes when given were, owing to the close supervision exercised, of little real use.

68. Replies more or less conclusive to the allegations made regarding assessments and unauthorised irrigation will be found in the reports of the Canal officers quoted in paragraph 3 of this Note; and as the remedy taken is of a nature to altogether exclude the possibility of the recurrence of such cases, it will probably be sufficient to allude briefly to the three cases brought forward by Mr. Mylne and commented on in sections 117, 118, and 119 of the report.

Volume I, pages 28-29.

In the case of the village Kishwa the Collector by no means admits the justice of the Committee's remarks. He points out that the assessees were in a position to know the proper procedure, and there was no apparent reason why they should deliberately allow the period of appeal to lapse and then seek a re-opening of the question. The Assistant Engineer concerned observes that at Rumnugger, between the 24th September and the 20th October, the only rainfall was one-tenth of an inch on the 9th of October, and that water was certainly required. The Collector, with all the facts before him, declined to interfere, and it can scarcely be fairly contended that the case was not considered by an independent tribunal.

Letter No. 8491, dated 31st August 1888. Note on paragraphs 157 to 163 of Committee's Report.

Note, dated 4th July 1888.

In the case of Banwar no appeal to the Collector was apparently made, the assessees accepting the Executive Engineer's order modifying the amount originally charged.

In the case of Chukwa, the Assistant Engineer points out that in the two years succeeding 1884-85 land was admittedly irrigated, and that his assertion is not that water escaped from five-year leased lands into the village, but that the water of about four channels was entirely diverted into the *ahara*. Under any circumstances, and whoever might be the appellate officer, the Sub-divisional Officer had an undoubted right to prepare a demand statement, and it was for forcibly resisting a Government officer in the execution of his duty that a prosecution was instituted. Different defendants were tried by three different Magistrates, with the result, upheld on appeal by the Judge, that convictions were in every case obtained: in fact, three independent tribunals took a different view of the case from that which commends itself to the Committee.

Different as is the aspect which these cases present from different points of view, there can be no question that it is neither in the interest of the people nor of the Canal authorities that such disputes should arise: there is the further fact, admitted in paragraph 21 of this Note, that the Canal officers were also to blame in permitting a supply of water through the outlets in excess of the requirements of leased areas, and the actual remedy taken has been to impose conditions which practically forbid unauthorised irrigation in the *kharif* season being assessed at all.

69. The instructions quoted at length below were issued by the Superintending Engineer with my concurrence, on a consideration of the most prominent defects noticed in the Committee's report. The Circular refers to other subjects beyond the one under discussion which will be referred to as occasion requires:—

Circular No. 1, dated Arrah, the 21st March 1888.

To Divisional Engineers.

The proceedings of the Irrigation Committee having shown that in some cases an alteration in practice is desirable and in others that the rules are not strictly adhered to, I have the honour to request that particular attention may be given to the following instructions:—

I. *Complaints.*—A separate receipt must be given for every complaint; those belonging to one village or for the same cause must not be lumped together in one receipt. One day in each week is to be fixed by the Sub-divisional Officer for receiving complaints, and it is expected that he will be present on that day to receive them, unless unavoidably prevented, in which case the silladar will be

thorised to receive petitions. The Sub-divisional Officer must also ceive petitions on any other day on which they are tendered, if sent at head-quarters. Executive Engineers must make arrangements to receive complaints daily, and petitions sent through the st are not to be refused on that account.

II. *Village channels.*—Great complaint was made that five-year ses were granted where no proper arrangements for the supply of ter existed. In future no permit is to be issued until proper and fficient village channels have been provided. No exception in s respect is to be made owing to money being deposited for a annel to be made by Government agency.

III. *Lands on bhaoli tenure.*—In the case of lands held on bhaoli ure, the zemindar's signature is to be obtained before that of the ots, and if it is refused, the ryots are to be informed in writing that ive-year lease will not be granted. Every such case is to be erted to this office.

IV.—*Five-year leases.*—No proliminary application for five-year se is to be received after the 1st of July; and in cases where, after ee months, the signatures of all the ryots cannot be obtained, the cial orders of the Executive Engineer are to be taken as to ether the lease should not be definitely refused All applications a five-year lease must be accompanied by an application at annual es if water is required to be given before the five-year lease permit issued. The number and size of the outlets will be specified in permit issued for a five-year lease, and no reduction in their mber or size made during its currency.

V.—*Unauthorised irrigation.*—The provisions of sections 78, 79, 80 of Act III (B C.) of 1876 are to be strictly observed. No authorised irrigation is to be assessed without the written order the Executive Engineer, and in passing this order it must be explily stated—

.—That the person by whose act or neglect the irrigation occurred not be identified, and

i.—That benefit has been derived. Where unauthorised irrigan has occurred through the negligence or with the connivance of anal servant, no assessment can be made. Irrigation from aharas, ich may have been filled or partly filled with canal water, is not be assessed. The aim of Canal officers must be to prevent unhorised irrigation rather than to detect and assess it when it urs.

VI.—*Outlets.*—In the definition of village channel the outlet is pressly excluded. It follows that the Canal officer is responsible the opening and closing of the outlet, and unauthorised irrigation urring through the outlet not being properly looked after cannot assessed. In the case of permanent outlets permits should be used where unauthorised irrigation is likely to occur, and in the e of temporary outlets their size should be adjusted to the areas plied for.

VII.—*Shudkors.*—The signature of the lumberdar should be en when land is for the first time entered in the shudkar, and the rol should make all entries in his register in the presence of the mberdar, or, where his attendance cannot be procured, in the prece of two or three leading villagers whose names should be noted. e shudkar should be frequently examined by the Sub-divisional icer, the silladar, and the sectional officer, and orders recorded rein.

It will be noticed that paragraph V clearly lays down the nciple that prevention, not punishment, should be aimed at, d paragraph VI affirms the responsibility of the Canal Officer the proper regulation of the supply through the outlet.

70. One result of the orders given was that in 1888-89, ,794 acres were leased whilst 69,621 acres only were assessed that it is clear that written applications had been filed where ter-rates were levied. These areas are those assessed at nual rice rates. There may be more criminal prosecutions future as recommended in paragraph 304 of the Comtee's report; but, so far as unauthorised irrigation is ncerned, it is proposed that in future, before water-rates der section 79 are imposed for *kharif* irrigation, the charge all be approved of by the Collector. In such cases more an ordinary rates should usually be imposed.

THE FIVE-YEAR LEASE SYSTEM.

71. The deliberate opinion of the Committee may be said be summed up in paragraphs 143, 144, which are quoted low—

"143. It is tedious to enter into such details; but it is necessary, order to justify our assertion, that some portion at least of the tension of five-year leases is due to other causes than the popularity the system.

"144. We are able to fully recognise the comparative advantages ich are enjoyed by the holders of five-year leases. These advanges are appreciated by cultivators who possess no other sources irrigation than those which the canal supplies. Among these the five-year lease system has extended by a healthy and natu process. But to the lands of others, who are not dependent on canals for irrigation, the five-year lease system has been extend by other means. The procedure followed has been marked by c stant pressure."

The individual cases quoted by the Committee will be commented on presently. In the meantime the following fa afford perhaps the most conclusive evidence that the Committ were in error in concluding (paragra 135) that the area under five-year le was due to any other cause than the increasing favour wi which the system was regarded by the people. The Superi tending Engineer was, in Bengal Government orc No. 1921. of date the 8th February 1888, vested wi power to cancel five-year leases. No single applicati has been refused. There leases, aggregating 1,456 acres, were cancelled in 1888-89, and five leases, aggregating 529 acres, in 1889-90. The area under five-year lease in 1888-89 was 200,102 acres against 210,555 acres in 1887-88, but applications for 15,050 acres were refused or not completed owing to the more stringent conditions as to channels and suitability of block insisted on. This year, 1889-90, the area under five-year leases will show a further increase. In fact, since the Committee sat, five-year leases for 65,500 acres have been concluded, and except where the Canal officers have raised objections, nearly every lease which has lapsed has been renewed. It is not denied that formerly assessments in cases of unathorised irrigation, a species of pressure not necessarily improperly applied, had some effect in inducing the cultivators to make a regular application for a five-years' lease.

Vol. I, page 42

72. Turning to the instances quoted. Nonnur is selected by the Committee as a very special case showing the pressure exercised by Canal officers. The case appears in a very different light the Hon'ble Mr. Nolan, whose remarks, dated the 10th July 1889, are quoted below:—

"The only investigated case on which Mr. Cotton and Baboo Jai Perkash Lall rely to establish the fact that coercion has been exercised of a nature to justify the general reduction of rates is that of the Nonhur villagers, described in paragraph 140 of the report. 'Could anything,' they ask, 'show more conclusively than the circumstances of this case the extraordinary pressure which is being put on the people to induce them to take five-year leases?' 'We can imagine,' they add, 'no clearer case than this, to use Mr. Solano's words, of "forcing five-year leases down the throats of the people." The sole witness examined in support of this case, Bishoshur Roy, No. 50, opens his statement by saying: 'There are no means by which our village can be irrigated; there is no channel.' With reference to this, we must consider the Committee's observations:—'It is true that the village is situated by the side of the Bhojepore distributary, and that it is bounded north and south by villages which are already under five-year lease.' Now if the village lies actually on the side of a distributary, and not, like many less fortunately situated, some miles off, what are we to think of the witness who says there are no means of irrigation? He goes on to depose that he had never heard of any man of his village having applied for a five-year lease, whereas it was ascertained from other sources that no less than three such applications had been made, one for 400 bighas, in the previous month. In addition to this oral statement, there is the documentary evidence of a petition presented to the Engineer in charge, which contains the words described in the report as 'pathetic'—'we accept the five-year lease to avoid your annoyance.' The annoyance consisted in charging cultivators for surreptitious irrigation charges against which they could appeal, if so advised, to the District Collector. And their subsequent conduct proved that an overwhelming majority of the ryots, a majority to whom the Committee would give the power of binding the minority, really wanted the lease, as is shown by the following statement of Mr. Odling:—

The applicants have since had ample time to reconsider their position. Any influence which Canal officers might have possessed has, for the time being at least, disappeared, and the result is that since the sittings of the Commission at Dhungain, a formal application, signed by the holders of the 420 out of 450 bighas comprised in the block, has been signed, and will be submitted to me for sanction under rule 10, page 229, Irrigation Manual. The holders of the 30 bighas who have declined to sign were probably the only real opponents of the lease, and able to a certain length to carry their co-villagers with them.

"Many persons will, perhaps, be inclined, under the circumstances, to answer by a distinct affirmative the question of the members of the Committee—Could anything show more conclusively than this

rose the extraordinary pressure which is being put upon the people to induce them to take five-year leases? And if after a protracted enquiry this was the best evidence which the Committee found; if, with all the results of their investigating before them, they could not, as they say, even imagine a clearer case, what must we consider to be the character of the evidence in support of other allegations of coercion?"

Mr. Mylne does not give the facts on which he considers pressure was put upon the village of Chukwa, but it is clear from his letter of the 12th August 1886* that a majority at least of the cultivators of Jugdispore desired a lease, the difficulty not being with his tenants, but with rent-free holders. The lease has since been renewed.

* Volume II, page 172; also Mr. Ochiing's dissent, Volume I, page 99, paragraph 24.

As regards the other cases, it is clear that the real object of the Canal officers was to prevent unauthorised irrigation, i.e., to prevent a valuable commodity, the property of the public, being used without payment. Whether the lease was annual or five-year was not a matter of concern What was aimed at was the assessment in some regular way of land the crop on which was benefited by canal water, and the cessation of irrigation without application or permit. The mistake made, which has been fully acknowledged, was the facilities given for unauthorised irrigation by permitting the cultivators to allow a supply of water to flow through the outlets in excess of the legitimate demand for leased areas. This error was being gradually corrected, and during the last two years the Canal officers have, as they are legally bound to do, themselves taken charge of the supply of water through the outlets.

COMPLAINT OF DEFICIENCY AND IRREGULARITY OF WATER-SUPPLY.

73. This complaint is admitted to be now practically non-existent. It has disappeared with unauthorised irrigation. The Engineers have adjusted the outlets to the areas to be irrigated, and have temporarily stopped the supply when it was found that water was being used beyond the leased areas: in some cases they have instituted criminal prosecutions. There are still difficulties with regard to individual holdings when there are village quarrels, or where the more powerful men are disposed to oppress their weaker brethren. The absence of complaint on this head in the Jugdispore estate was in truth more due to the care and trouble taken by Messrs. Burrows, Thomson, and Mylne to see that the supply of water was fairly distributed and economically used than to any special consideration in the matter of supply shown to them. It has at times taxed even their energies to secure a fair division of a supply of water which, properly and economically used, was ample. Unfortunately there are many non-resident proprietors and—resident or not—no others who have an establishment competent and willing to carry out distribution arrangements so effectively as the firm named.

Pamphlet by Baboo Kandjhi Sahni, page 34:—"The supply of water was satisfactory, the prayers of the cultivators were attended to, and, generally speaking, the arrangements were good."

Volume I, page 46, paragraph 147.

74. The Canal officers can secure a proper supply of water to leases (blocks), but ordinarily the internal distribution must be managed by the lessees: at times a subordinate has been deputed to insist in the water not being monopolised by one section of the cultivators; but as regards particular holdings there will always, in the absence of influential and fair-dealing *lambardar*, be a chance of individuals suffering. So long as *lambardars* are remunerated their responsibilities in this respect can be enforced, and default can be in most cases be punished, though inadequately.

75. There remains the important question whether the supply allowed should be calculated on a *total absence of rain*, such as occurred in 1888, or whether a low average, say half to three quarters of an inch in the first ten days of October, should be reckoned on. In the proposals which will be made later on, the experiences of 1888 will be for the most part relied on; but the avowed object will be that in such years which are not of frequent occurrence (though those in which there is a scanty rainfall are) there shall be a difficulty in obtaining a full supply. The quantity of supplied will suffice, but there will not be the ordinary margin for waste, which, indeed, is then less likely to be permitted to occur.

76. In the earlier days of irrigation, before the results of past experience were available, permits were issued in the *kharif* season for irrigation in villages which it is now known cannot be satisfactorily supplied in a season of pressure on the canals, and for which leases are consequently now refused. An example of this kind is referred to by Mr. Solano, who, however states (as is the fact) that no contract for irrigation in this season is now entered into within several miles of the place referred to. The Canal officers were unable, until they had experience to guide them, to determine with any approach to accuracy the irrigating power of the canals especially with indifferent channels and a system of cultivation which was itself in process of yearly change. There were therefore grounds for complaint—unavoidable under the circumstances mentioned above.

Volume II, page 230.

77. It will be noticed that the Committee* expressly state that the power vested in Canal officers of stopping the water-supply has been rarely exercised, and that in one case only, where redress was promptly given was there any ground for complaint.

* Volume I, page 147, section 149.

Volume II, page 16, paragraph 8 of memorial.

SYSTEM OF ENQUIRY INTO COMPLAINTS.

78. As stated by Mr. Power†—

"The great desideratum is to have a large proportion of objections disposed of in the quickest time possible by officers of an average high class."

† Letter No. 849I of the 31st August 1888. Note on paragraphs 252 to 259 of Committee's Report.

The nature of the complaints made is now analysed in great detail in the Superintending Engineer's Revenue Report. Every complaint made, though it may in point of fact be identical with others previously or simultaneously preferred, is separately numbered so that the information contained at page 18 and Appendix XIV of his report for 1888-89 may be looked on for all practical purposes as complete. The whole proceedings in the case of twenty consecutive complaints from the last sub-division inspected by the Superintending Engineer have been examined. In effect they are little more than requests for alterations, and eventually the decision arrived at is mostly acquiesced in by the person making the complaint. With some 200,000 different charges to be made yearly there are certain to be mistakes, and it appears to follow almost as a necessary corollary that the officer charged with the assessment should also have the power of correcting it. In fact in the words of Mr. Inglis—

"As regards the second point, the Canal officer who makes the assessment is primarily in the same position as any other merchant or trader who submits his account for goods supplied or for work performed. It appears to me only a matter of ordinary reason that any complaint as regards a charge in the bill should be made in the first instance to the person who prepared the account. It is true that the enquiry by the Canal officer into the assessment made by himself is termed a 'judicial proceeding,' but I do not see how this affects the question. What is desirable is that mistakes in the assessments should be put right as soon as possible, and this can, in my opinion, be done sooner by the person who made the mistake than by any one else. The Canal officer is no doubt in a different position to that of a private trader when the question of enforcing payment of a disputed item in the account is considered. The law that provides that in case of debts due to Government payment can be enforced without recourse to the civil courts applies to 'water-rates' as it does to other demands, such as rent of land, cesses on land, &c. But the decision of the Canal officer is not final. There is a right of appeal to the Collector, who is certainly not a prejudiced officer, under the present system of assessment."

Volume II, page 55.

79. There have as a matter of fact been comparatively more complaints in Orissa and nearly as many in Midnapore, where the assessments are not made by Engineers and a percentage admitted is even higher. The grievance ich is most strongly insisted on "unauthorised irrigation" is proposed to deal with in another and more drastic nner, and an alteration in the agreements regarding the pply of water in the hot weather which furnish the jority of complaints regarding insufficient supply will be made, so that little except ordinary mistakes will ain to be dealt with by the assessing officers under this d. In 1888-89 upwards of 2,000 complaints were at once posed of in favour of the applicant, and it is clear that any tem which would have entailed a reference to another hority would have caused needless expense and trouble to persons concerned.

Revenue Report, 1887-88, olution, paragraph 10.

All that is wanted is that the assessing officer shall be ormed of the objections raised, and have an opportunity of recting an error, if one has been made: after that it is in interest of both Government and the cultivator that an ily accessible appeal to an independent tribunal shall be ilable.

0. It is proposed to secure this end by allowing appeals ct from the orders of sub-canal officers to the Collector or Deputy Collector specially vested with the powers of a lector in this respect. This is apparently the course recommended by Mr. E. Solano in the following extract from his letter dated the 31st December 1887:—

lume II, page 222.

II.—Sub-divisional Officer to prepare *khationis* in the usual ; notices to be given to each assami, stating the quantity of land sured against him and the amount of demand.

III.—All appeals to be presented and disposed of by the Sub-sional Officers. If the objection is rejected, he is to give the oner a copy of this order.

IV.—The appeal from the Sub-divisional Officer's decision to be ct to the Collector."

his is the system proposed to be followed in future. Solano lays much stress on the number of Sub-divisional cers being increased. As a matter of fact there are nine -divisions as recommended by him, of which the two in the tern Sone Division are not by any means the largest.

he result of the appeals so far made to the Collector , as the statement below will show, not been unfavour- to Canal officers, and in cases requiring it further lence is called for and taken, should the record not be gether satisfactory:—

ement showing the result of appeals preferred to Collectors against orders of Canal Officers of the Sone Circle.

Year.	Number of appeals.	Appeals allowed.	Appeals dismissed.	Pending.
6	148	51	75	17
7	73	9	55	9
8	41	15	20	6
9	23	3	15	5
Total ...	290	78	165	37

he Collector of Shahabad's letter No. 849I. of the 31st August 1888, it is stated 161 complaints had been disposed of by him and his predecessors between 1879-80 888-89, of which 121 were dismissed, 29 allowed wholly and 11 allowed in part.

1. Mr. Luson, who investigated the subject, recommend- classification of complaints which has practically been wed. He was of opinion that the true method of dealing the subject was to anticipate objections, or rather to e their being preferred before the demand statement finally prepared. This is what he says on the subject:

I wish here to suggest a practicable means of discovering as as possible the areas in which there has been a failure of the crop owing to deficient supply. The Superintending Engineer has given his general approval of it. It is to insist upon a report by a certain date from each *sattadar* of the specific fields in which the crops fall below a certain standard, say that the outturn will be below 2 maunds a bigha. In the case of *dhan* these reports should be brought or sent into the canal office before November 1st; and if any *sattadar* neglects to send the report in time, he should be at once called upon to explain personally. The *sattadar* is overpaid for the work he does at present, and there seems no reason why this extra duty should not be imposed.

On receipt of the reports, the Sub-divisional Officer would be able to mark down the bad crops and to make arrangements for investigating the causes before the cutting; but in many cases he has a very good idea of where the supply was deficient, so that he could direct the measurements in these places first and commence enquiries before these reports come in."

In the part of this note dealing with the alterations recommended it will be proposed that *lambardars* shall be bound to report at the end of the *kharif* season, the 1st of November, what complaints require investigation, and a separate report will be required from sectional officers on the 15th October or thereabouts as to the state of the crop in each lease. These measures, it is thought, will ensure the Sub-divisional Officer being in a position to omit from demand statements or to include in remission statements any areas on which water-rates are not properly chargeable. The onus of ascertaining what remissions should be granted will in fact, to a limited extent, be assumed by Canal officers, with or without complaints.

It is hoped that the means taken will ensure speedy redress in cases where there are just grounds for complaint.

82. The exercise of magisterial powers by certain of the Canal officers is noticed in the concluding sections of this part of the report. The Committee remark:—

"We are glad to notice the very sparing manner in which these powers are now exercised, and we have no reason to doubt that, as a general rule, they have been exercised in the past with discretion. We are aware that the withdrawl of the powers will weaken the hands of the Engineer officers at times of crisis."

They add that in the Buxar Division the powers were not then exercised, and that as it was objectionable on principle that Engineers should exercise powers in departmental cases, they recommended that the powers should be withdrawn.

In the following year practically every Magistrate and every available constable in Shahabad was engaged in guarding the canals and distributaries, despite which they were cut in several places, and the leased areas of some villages injured and in some cases destroyed by their supply of water being cut off. One special case is mentioned in which the rice on 512 acres, worth approximately Rs. 16,000, was injured in this way. In the face of these circumstances it would appear to be preferable to leave matters as they are, the control of the Magistrate of the district, to whom every case is appealable, being sufficient to ensure that the powers are exercised with discretion. This is the opinion held by Mr. Power.

Superintending Engineer's Note of date the 10th December 1888, paragraphs 11 and 12.

It is desirable that Assistant Engineers should, as in other provinces, be called on to pass an examination in elementary law, and one of my recommendations will be to this effect. The examination will have reference to their work both as assessing officers and to the class of cases they are authorised to try when vested with magisterial powers.

COMPLAINTS AGAINST THE COLLECTION DEPARTMENT.

83. The Committee remark that the complaints against the Collection Department arose to a considerable extent from demand statements, in which it was known that alterations would have to be made, having been forwarded to the Collector for realization. Pressure was brought on the Assessing

Department to forward the demand statements by fixed dates with the result mentioned above. They add :—

	Rs.
1885-86 ...	87,344
1886-87 ...	84,640
1887-88 ...	16,313
1888-89 ...	16,284

Includes remissions disposed of by refunds or cancelled demand statements.

"We are glad to say that this matter, as soon as it attracted attention, was enquired into and stopped."

The progressive diminution in the remissions yearly allowed, which are marginally noted, wiill show that a marked improvement in the accuracy of the demand statements has ensued.

84. The realization of arrears of water-rates by the distraint procedure is referred to in section 173 of the Committee's report.

Volume I, page 54.

As the water-rate is a charge inferior to rent only on the crop, this method of recovery of which the legality is unquestioned appears *primâ facie* to have much to recommend it. The real grievance consisted in the costs, which it is stated averaged Rs. 8-12-10 per case, the average demand being under Rs. 3. The costs amounted to an enormous addition to a charge, however moderate, in itself.

The practice for reasons not clearly apparent, but probably owing to the heavy costs entailed, which are referred to in the following remarks recorded by one of the Hon'ble Judges of the Calcutta High Court has of late years been abandoned :—

"A continuance of the present practice must ruin the ryots. No doubt water-rates should be promptly paid, but it is not always that a ryot has cash in hand to meet such demands, however honest he may be. To make him pay tenfold is certainly not calculated to improve his position. I heard while at Arrah that a somewhat serious attack had been made upon the person of an irrigation officer. It is not improbable that these distraints may have provoked such conduct."

Volume I, page 54.

Apart from the question of costs, there does not appear to be any good grounds for abandoning what appears to be a peculiarly legitimate charge on the crop which was matured by the aid of canal water, and the law should, I think, not be changed in this respect unless some summary powers are given by law, as recommended by the Deputy Collector, for the recovery of sums under Rs. 10 in amount.

85. The Committee make the following remarks on what is known as the joint and several liability system :—

"The complaint which has been urged before us most frequently relates to the provision in five-year leases under which all the co-signatories of the lease are made jointly and severally liable for the payment of the whole of the amount due under the lease. This provision applies to leases in what is known as form C. In D form leases, under which collections are made by a contractor, there is no such provision. The object of rendering all co-sharers jointly and severally liable was apparently to instil into the minds of all a sense of joint responsibility under which the influence of all would be brought to bear upon each individual to pay up the amount which might be due from him singly. And this object is no doubt one of importance. The principle is calculated to work well in some cases. But it is obviously liable to abuse; and so we find that in its widespread operation in the case of water-rate leases, it has been applied as an engine of injustice."

Volume I, page 54.

Instances of oppression are adduced, and it is stated that the system is opposed by the Engineers who have found from experience that it deters cultivators from entering into five-year leases.

The soundness of the Committee's conclusions as to the oppression exercised is strongly questioned both by the Collector and Deputy Collector. An extract from the observations made by the former, Mr. Power, is appended :—

"*Paragraphs* 174 to 176.—I beg emphatically to protest against the conclusions arrived at in these paragraphs. Out of Rs. 3,44,945, to which the joint and several liability clause applied, a sum of Rs. 1,460 only was recovered from persons in excess of their proportionate share. In 1887-88 none of the demand was so realized; consequently the percentage recovered in excess is very small indeed. There is no reasonable ground for the imputations that the power has been used as an engine of injustice and to save the collecting staff trouble. It is true that in a few, a very few, cases the liability has been enforced, but under what circumstances? After each assessee had paid his individual share, a balance remained unrealized. the contracting body was known to be well able to pay, and it happened that defaulters were reasonably believed to be men of whose names were included in the lease by connivance of the le signatories in order that a remission might be granted on the g of their poverty. Is it not right that when a certificate has been out against the whole body, execution should be taken first a the leaders, that is, the zemindars, thikadars and headmen take out execution simultaneously against each co-signatory, proportionate share of the unrecovered balance, however equita theory, is totally impossible in practice. There is an excellent to the Committee's remarks on Debi Mahtow's case. It was enough for Debi Mahtow, thikadar of the village, to make his pay what the Irrigation Department tehsildar failed to collec tehsildar pays occasional visits only. Anyone who finds it inc nient to meet him can easily find it convenient to visit a tion at some distance until he has moved on. A resident t dar, however, knows exactly when a ryot is in a positio pay, when heh as received his poppy advances, when he sold his linseed to the itinerant bepari, and what the heifer he at the fair fetched Once a tehsildar is out of the village he is with temporarily at least; but the thikadar is always with hin need say no more to show that a resident zemindar or thikada means of applying for payment at the right time not open to a tehsildar, and more direct power of enforcing payment than is p ble for the collecting staff of the Irrigation Department to exer The Special Deputy Collector's explanation on this subject i pressed in rather forcible language, but I think his indignation i by any means unjustifiable."

Joint and several liability.

Letter No. 849L. of 31st August 1888.

86. The Deputy Collector is even more emphatic in objections to the conclusion drawn the Committee that—

Letter, dated 25th May 1888, paragraphs 9 to 13.

"Nowhere in Bengal has the law been more inconsiderately ministered with larger and more obvious opportunities of abuse in Shahabad."

He points out that in the two years, 1885-86, 1886 during which he applied the rule, Rs. 1,460 only was recove from other than real debtors, and avers that the cens bestowed by the Committee in individual cases were seld warranted by the circumstances which were not fully kn to them. The Committee state—

"We do not condemn the system absolutely; the power the implied may conveniently be held reserve for extreme cases, to be exerci with great caution; but when the opportunities for its misuse ar abundant as they now are in the collection of water-rates, we do think that the exercise of the power can be justified, or that it be possible to impose any system of check which will prove effecti

Vol. I, page 55, section 176.

87. It appears to be doubtful whether the condemnat pronounced by the Committee on both the system and results was not too sweeping. It is, however, hardly worth wh to retain a rule, which has some influence in deterring cul vators from joining in applications for water for the sake of t small amounts recovered under its operation. These amou would be further reduced if, as certainly would have to be t case in future, bad debts were recovered *pro rata* only from the signatories of the lease.

88. At present amounts due on five-year leases o are recovered by instalments, and the Committee, whi entirely approving of the principle on which the present s tem of collection is based, viz—

"That a receipt shall be given for a fixed and known amo specified in it," think that "the effect is somewhat hard on rate-payer; and while maintaining the rules substantially in th integrity, we consider that they should be adapted to the receipt two instalments of the rate every year in equal parts instead of on

The Collector and Special Deputy Collector both express t utmost repugnance to this proposal. They point out that will necessitate increased establishment, and the latter obser that on the whole of the 238 petitions, of which abstracts ha been given in the report, he has only been able to find o man who has applied for the change. Seeing that water-ra on two-thirds of the irrigation is now paid in two instalmen it is probable that the extra work would be less formidab than is supposed, but as it is proposed to lower the rates f *rabi* irrigation, and not to encourage annual leases for ri irrigation, no further alteration appears to be require Mr. L. Mvlne observes.—

"A great deal may be said against recovering rates in two instalments, and much in favour of payment in one instalment about harvest time, when the cultivator is in funds and can command cash."

Letter dated 30th June 88.

Certificate procedure.—The Committee (paragraph 79) state that, whilst there are no actual proofs of the fact, they—

"have no doubt that the same processes have been resorted to for the recovery of arrears of water-rates in Shahabad as are invariably adopted in other parts of India, and in other departments where large collections have to be made by the collecting authorities direct from an almost infinite number of cultivators."

Letter dated 30th June 88.

They, however, admit that—

"It is possible to establish a strong case on the other side In some villages, especially Brahmin and Rajput villages, there is an everlasting struggle carried on by the cultivators to get water without paying for it."

It is proposed in paragraph 266 of the Report to take away from the Special Deputy Collector his powers under the Certificate Act. The Collector strongly objects to this suggestion, as will be seen from the extract quoted below :—

"As pointed out by the Special Deputy Collector in his note, there is nothing illegal or unauthorised in the present procedure, and I am strongly opposed to any change. From experience gained in the Road Cess Department, I am certain that not only would there be great delay in disposing of the certificates, but ultimately the assessees would suffer. Supposing the change were introduced, what would happen? The certificates would be referred to the Deputy Collector in charge, who has already upwards of 2,000 on his file more than he can deal with effectively; when, after much inevitable correspondence and delay, sanction had been accorded to an increased establishment, the notices would be written up and made over to the Nazir for service; that officer is fearfully overworked as it is—see Report of Salaries Commission, pages 251-254. So what happens? Further delay occurs in serving them; then (after the defaulter has had a month's warning that he had better conceal it) commences the search for property to attach: the peon who is sent out reports none available; he has not the smallest interest in making adequate enquiries, and the defaultor is only too ready to pay a consideration for a report of "no effects." Then ensues a complication about recovery of process fees.' Altogether, I cannot conceive any procedure more likely to increase work, retard collections, involve loss of revenue, and cause harassment to defaulters than to transfer execution of certificates to the Collectorate General Department."

Certificate procedure.

Letter No. 849I, of the 31st August 1888.

The proposal has no special connection with the other alterations proposed on the system of irrigation administration now under discussion, and it involves considerations not touched upon in the report. It is therefore reserved for separate treatment after the other changes proposed to be made have been carried out.

It may be mentioned that in Orissa and Midnapore the collections under the Certificate Act are not altogether satisfactory. The matter is obviously one in which the opinion* of the Board of Revenue is entitled to almost paramount consideration.

*Letter No. 634A. of the 25th June 1888, paragraph 11.

90. The enforcement of the payment of even just dues can never be a pleasant proceeding for the payees. It is certain that any faltering in pressing collections can only lead to the accumulations of arrears, a part of which will never be cleared off, and thus lead to loss to the public treasury. The remainder will eventually have to be recovered by the means which hesitation was felt in the first instance in employing. The Deputy Collector gives the following as the result of his experience in the matter :—

"Again, I tried the experiment of keeping separate registers of rates due from the biggest and the most intelligent zemindars of the district, and addressing them by letters to pay up, but without effect. Only in one exceptional case, viz., that of the Behea firm, it must be said to their credit, I have been successful. The biggest zemindar of the district, viz., the Maharajah of Doomraon, I regret to have to observe, has given us no inconsiderable amount of trouble. Letter after letter and reminder after reminder are sent to the *Dewan* calling for rates due, but still the money is not forthcoming, and even reply, except in rare instances, is not vouchsafed. A letter from Raj to pay up the full amount due from it. During the past three years, I was obliged, in a large number of cases, not only to file certificates and issue notices of demand against the Maharajah, but also to issue warrants of attachment. Similarly, the rates due by Baboo Baij Nath Sahai, a big zemindar and mahajan of the town, is never paid without coercive measures. It is a noteworthy fact that he always waits for a notice of demand, inasmuch as it gives him a month's time after the notice is served, and which he considers a great advantage. I can multiply such instances, but it is hardly necessary for me to do so here. Suffice it to say that when such is the conduct of the biggest and richest men of the district, what can be expected of the less favoured."

Note dated 26th May 88.

With such examples it is scarcely possible not to recognise the truth of the observations with which Mr. Power concludes his notice of this matter :—

"I would ask whether, in the face of the difficulties specified, any display of weakness, however amiable, would not result in loss of public revenue; in other words, in making less refractory people pay an undue share of general taxation? It is charged against our collection department that the aim of its policy is *Debellare superbos* (see written statement of Lalu Ram Paure, ex-Sub-Inspector of Police, Appendix IV. Part IV, section 13, page 212, Volume II). The allegation appears to me to involve an unconscious compliment. If the poor only had been rigorously kept up to their engagements, and favour shown to "the rich and the litigious," we should never have heard of a Commission being required to investigate grievances."

Letter No. 849I of the 31st August 1888.

PART IV.—RECOMMENDATION OF THE COMMITTEE.

91. I do not propose to discuss the recommendations *seriatim*. The points on which alterations in the system are considered to be desirable have been generally indicated, and they will now be specifically detailed. Several of the recommendations made by the Committee involve an alterations in the law which it may not be convenient to take up at present, and accordingly the system proposed will have reference to the existing law, the further changes possible, only after the law has been altered, being separately noticed.

The question of rates will first be considered. This is what the Committee says on the subject :—

"Although the present rates will not be considered high by those who are accustomed to irrigation in other provinces in India, we found in our enquiries that the most universal complaint against the irrigation system in South Behar was 'the excessive rate.' So general indeed and persistent were these complaints that we are satisfied that no remedies we may suggest, no improvements we may devise, will be accepted by the people as any adequate outcome of the results of this Commission, unless they are at the same time accompanied by a substantial reduction in the water-rate. In deciding this question, all the circumstances of the Sone irrigation must be considered. It must be remembered that canal irrigation is unpopular. It is alleged that Sone water is injurious to the soil, to man and beast. It must never be forgotten that an old system of irrigating from ahurs and pynes prevailed before its introduction, which the ryots declare was more beneficial to them than the present system which has superseded it. It is admitted that well irrigation is more beneficial to the crops than canal water. The country is to be water-logged; the health of the people is said to have suffered. The vigorous and often injudicious assessment of water, combined with the energetic realisation of the existing rates, has embittered both zemindars and ryots."

Necessity of some reduction.

Volume I, page 85.

Further on they say :—

"There are those who speak favourably of the canals and of the good they have rendered the country. But the preponderance of testimony, including that of the most moderate witnesses, is in favour of a reduction in the rate."

Volume I, page 83.

It would be strange if the purchasers were not in favour of reduced prices. The fact is that canal water is indispensable, and that the one matter in which there is still real interest in the proceedings of the Committee is in that of rate. In a late publication, to which reference is made in paragraphs 134 to 140, Baboo Kandhji Sahay, B.A., B.L., Secretary to the Co-operating Committee, observes :—

"Such is the summary of the recommendations of the Commission. I shall begin with the last, for the lowering of rates, first, as being the most important, and without which, in the words of the Commission, no improvement will be accepted as an adequate outcome of the

92. Practically, the discussion of rates may be confined to that for rice, which is comparatively of overwhelming importance, and the rate for five-year leases, which the Committee propose to reduce from Re. 1-4 to Re. 1 per local *bigah*, is that which must rule the other rates.

93. It must not be forgotten that the validity of every one of the reasons given by the Committee as a reason for reducing the rate is strongly contested.

It is stated that canal irrigation is unpopular. In the last two years practically the whole of the water available in the *kharif* season has been disposed of. It is suggested that this demand, which cannot be questioned, is partially at least due to the *aharas* having been rendered useless. The fact is that in the jungle portion of the Jugdispore estate, where there were no *aharas*, not only has the transformation from *rabi* to *kharif* cultivation in the land irrigated by canal water been complete, but the inhabitants of Belgaon, who could get water from one of the half dozen efficient *aharas* in the district for nothing, positively prefer to pay Rs. 6,000 a year for the regularity and convenience of canal irrigation.

One apparently strong instance illustrating the assertion made that *aharas* have been destroyed by the canals is repeatedly referred to as a convincing proof of the fact, though it is in the same page* of the report admitted that the Engineers took immediate steps to remedy their own mistake.

* Volume I, page 24, section 64.

94. It is stated that the Sone water is injurious to the soil, to man and beast. The crop experiments made by canal officers are derided. Experiments made by an independent civil officer and by an eminent firm of European zemindars show that exceptional crops averaging 30 maunds of paddy per acre are grown on almost every variety of soil, including *kewal*, which is repeatedly asserted in the report to be injured by canal water. The average of the Canal officers' experiments to date is two maunds per acre less than the estimated yield of average crops in a year in which there was no rain in the *hatiya*: so that the crops depended on canal water only, and more than ordinary loss might have been anticipated.

Volume I, page 24 section 64.

95. The injury to *aharas* is strenously denied by the Superintending Engineer, who even considers that their effective supply has been increased by the extra quantity of drainage water they must necessarily receive from the canal water poured over the country. It is not denied that well irrigation is superior in the case of opium, and the crop experiments show barley, but the chief crop, rice, is not irrigated by wells, and wheat appears to thrive equally with well or canal water.

Volume I page 121.

96. These in general terms are the replies of the Canal authorities. A special civil officer was deputed to investigate the subject with special reference to the rise or fall in the rent of lands irrigated by the canal. This is what he says on the subject:—

"I have recorded in my note-book statements gathered on the spot as to the increase of rents throughout the villages irrigated. I will give a few examples only. In experiment No. 2, the village Danwar has been held by————in *thika* from the Dumraon Raj for 30 years; the ryots are nearly all Rajpoots and claim that their holdings are *guzaskta* (*i.e.*, with a right of occupancy at a low rent); they say that————is demanding an increase of 5 annas a bigha rent, simply because the lands have been increased in value by the regular crops they now get from canal water in place of previous precarious outturn. In experiment No. 24, 15 annas of the village is held by Baboo————, an Arrah pleader, who filed a long written statement before the Committee asking for a reduction of rates. From the shareholder of 1 anna, the putwari and the ryots, I found that the *jamabandi* of this village has risen since the opening of the canals from Rs. 1,800 to Rs. 3,200. I was told that no ryot is considered to have any right of occupancy except those specially declared *guzashtadars* by the courts; no *pattas* are given, and rents are regularly increased. This village lies between the Koilwar branch and the Arrah main lines close to their junction. Experiment No. 25 bears more directly upon the question of the rate. The whole area under cultivation is only 22 bighas, most of the village having been acquired for canal works; the area being below 50 acres is too small for a five-year lease, yet a mahajan, who foreclosed a mortgage upon the cultivated lands, is content to irrigate *dhan* year after y paying Re. 1-14 a bigha. Similar instances to these will be fou throughout my note-book.

Mr. Odling in his minute of dissent from the Committee's rep in paragraph 19 stated:—'It was not to be expected that eit zemindars or cultivators would care to bring before the Commiss cases in which the value of their property had been increased. T road cess revalution will afford some means of estimating the eff of the canals on the value of the landed property in the distri affected.' I have accordingly endeavoured to analyse the figu filed before the Collectors under Act IX of 1880 and its predeces and to compare them with the areas upon which canal water been regularly taken.

"The periods when the road cess returns were filed are extrem convenient for comparison at the present time. The last retu were filed last year, and the former returns in 1876 A. D., when ca irrigation was just commencing.

"To make the comparison, I first obtained from the Engineer list of all the villages in which the areas now under five-year le exceed 400 bighas, and then identified them with the Collect maps. This was a work of some little difficulty, as in some ca I found that in order to secure a 'block' pieces of another vill had been included. I then consulted the original papers, filed the landlords or their representatives, referring to these villa As from my previous connection with the districts, I was person acquainted with the officers in the Road Cess Departments in S habad and Gya, I found little difficulty beyond clerical labo Summary valuation by the Collector I have taken no notice of, all returns which on comparison were obviously wrong, I h rejected. Little exception can therefore be taken to the figu given

* * * *

"We then get this result:—Taking canal water upon one-third the area of a large number of villages enables the zemindar increase the rents per bigha in these villages at least 10 per ce more than he could otherwise; in other words, regular canal i gation enables the landlord to obtain 30 per cent. more from the l than he would obtain without the canals.

These results seem to me to have a very important bearing u the question of the reduction or increase of the rates for water. the extra increase of rent is the true test in South Behar of advantage derived from canal irrigation. As the Rent Law Co missioners on page 73 of volume I (1880 A. D.) wrote:—'Enhan ment on the ground of increase in the value or price of the prod is a stern reality to the ryots of Behar. While in Bengal ryots are the stronger and the landlords the weaker party;' in Be it is just the reverse, the ryots being (save in some exceptio places) in a depressed condition, and incapable of maintaining agai their landlords the rights given them by law.. The Bengal Tena Act, 1885, is tending to improve this state of things, and the use the prescribed form of receipt is being adopted, though it is far fr general. But the figures comparing the irrigated and unirriga villages above mentioned relate to times before the Bengal Tena Act became law, and I have no hesitation in stating in regard to ————estate in particular, and to almost all the estates in Sone Circle, except the Dumraon Raj, where there are Raj *guzashtadars*, that any improvement in the amount or value of produce eventually finds its way into the pockets of the landhol in both *bhaoli* and *nagdi* tenures. Reduce the five-year lease four annas (*i. e.*, 20 per cent.), and the landlord, consciously unconsciously, will eventually get his rent-roll increased by 20 cent. on the land irrigated.

"I may here mention that in my opinion the improvement sh above is in no way due to the superior fertilising power of c water. I know of no material difference between the Sone w and the rain water stored behind bunds. Putting aside the incr of area under cultivation, improvement is due, it seems to me two things—(1) the substitution of the easily grown and more v able *dhan* for *rabi* and inferior crops; (2) the considerable raisin the *average* annual outturn by a full crop being always secu instead of outturns varying with unsatisfactory rainfalls.

"All the figures given in this paragraph practically relate to *d* only. In the figures for the three districts only five-year leases considered; in mehal————, *dhan* on annual lease is included, as the percentage of *dhan* in five-year leases is more than 83 per c (*cf.* Superintending Engineer's annual revenue report for 1887 paragraph 4, where he also writes that 'five-year leases are p tically long leases for the irrigation of kharif crops only'), co quently we are right in considrring *dhan* as the crop which caused the great increase in rents.

nuares, 30·69 per cent. of the pre
increased cultivated area would
been if it had only increased at the same rate as in the unirrigated villages.

'All the figures given above I can personally vouch for; the calations have been tested in the offices of the Superintending Eaeer of the Sone Circle and the Bengal Secretariat"

As regards the *aharas* he observes—

'If the majority of the Commissioners had seen the rice crop this r, which was not irrigated from the canals, I feel sure that they ld not have written in paragraph 276 of their report as one of the f reasons for the reduction of the rates that 'It must never be gotten that an old system of irrigation from *aharas* and paynes vailed before the introduction of the canals, which the ryots lare was more beneficial to them than the present system which superseded it.'

It is only by seeing the crop on the ground in a season like the , when the *Hathia* and *Chitra* rains entirely failed, that a clear parison can be made of the two systems."

Mr. Power, the Collector of Shahabad, is of opinion that case for reduction in the kharif rate has been made out. observes :—

"*Paragraphs 275 to* 290.—Admitting the force of the arguments summarised in paragraph 276, and adding that the history of the canals with their ensive head works designed for a very much larger scheme would admit of anything like a commercial rate, I am still of opinion that rate of Rs. 1-4 per bigah for leased areas is not too high, and that case has been made out for reducing it. The bulk of legitimate nplaints refer to 'unauthorised irrigation' charged for at Re. 1-14 a ah, or, if penalty rates are imposed, Rs. 3-12. There is no general complaint that the five-year lease rate of Re 1-4 a bigah is too high; the evidence cited in paragraph 277 does not prove anyng relevant to this issue. Owing to a number of causes irrigation the Dumraon estates has resulted in friction; it is unpopular, but in the Revenue and Public Works cess, so is the Income-tax, and is every institution to takes cash out of pocket without an immete return, no matter what benefit, past or potential, may attach to Mr. Selano's villages referred to were practically beyond the ch of canal water, and for a couple of years they suffered because regular supply was available: this is no reason for reducing the e in villages where water can be supplied, though it might be one differential rates. The Behcea firm does not press for a reduca of rates; it is obvious why tenants of their village mentioned uld request them to spend a large sum on repairing an ahar which l serve for irrigation in ordinary years, save Rs. 6,000 a year, and ve that sum available for payment of rent. It may be assumed as tain that if in a year of scarcity the villagers wanted canal water, water (though intended for others) was in the canal, they would it somehow: see also my remarks against paragraphs 41 and 42. all other rates proposed I concur with the Committee."

* Rates.

letter No. 849I, dated 31st August 1889.

98. The following remarks are taken from a note by the n'ble Mr. Nolan :—

"The whole report of the Committee seem to be directed towards ving that an exception should be made to this primary rule of financial justice in favour of Shahabad. As a former Collector of the district, having many associations with its people, my peral sympathies are by no means opposed to such a course; but I st own that it appears to me unjust and the reasons urged in its port unsound. These reasons, as summarised in paragraph 276 of report, headed "Necessity of some reduction," and opening with passage quoted above, are (1) the desire of the Commissioners that changes to be introduced should be accepted by the people as an quate outcome of the Commission; (2) that canal irrigation is opular; (3) that it is alleged to be unprofitable; (4) that it is said e injurious to health. On the first of these considerations comit has been made above, and I will proceed to deal with the other gations, in so far as they can be considered to be grounds for ng the water at less than its value.

ote, dated 10th July ,

"With regard to the unpopularity of irrigation, if the expression o be taken as synonymous with a failure in the effective demand water, it is obvious that, under a system of free sale, this consiation must be decisive If ryots do not consider that it pays them to Re. 1-4 an acre for canal water, and to suffer such inconvenience lealings with the Department entail, they will not send in written lications for leases, and the rates must be lowered. In that case uction is a commercial necessity as well as an act of justice. And o I may remark that if, as sanguinely suggested in paragraph 292 of report, a reduction in the rates is considered to be desirable in the mate interest of the revenue, as facilitating retrenchment and the ension of irrigation, there is no objection to the proposal, or rather hould be supported from a financial point of view. That is a hnical question, as to which I can only remark that, considering favourable character of recent seasons in respect to rain, there ms to be no falling off in the demand for water at existing rates, no supply of water available for the extension of operations at most important season of the year. But the unpopularity referred to by the Committee is of a different kind. It is consistent with brisk demand for water at current rates and under the existing system. It finds its expression in attacks upon the canal administration, made by those who would, nevertheless, resent the cutting of of their water as the greatest possible calamity. These attacks may be most just, or they may be altogether unfair, but as affecting rates I submit that they are irrelevant. If individuals are to blame, they may be punished; if the system is in fault, it can be altered when found defective: but the principle that fair rates should be levied in the interest of the tax-payer must, nevertheless, be maintained. These rates were not fixed with a view to attracting local popularity, and cannot properly be altered with that object. If they were reduced on this ground, we would soon hear of the unpopularity of irrigation rates elsewhere.

"With regard to the assertion that irrigation at the present rate is unprofitable to the cultivator, I fail to reconcile it with the fact that he applies for the water. He cannot do so for his pleasure only and the inference is that he does so for his profit. That he depreciates the article he buys is no matter of surprise: most purchasers act in this manner where by so doing they can hope to influence prices. I presume the members of the Committee did not expect to hear the purchasers of water state how it had converted barren sand into valuable estates with large profits to the owners, or to infer that the rates they paid should, therefore, be enhanced.

"I may say that when I was Collector of Shahabad—an office which I held during the five years ending with 1884-85—no one appeared to doubt that irrigation had, on the whole, been profitable to the district. The system was then extending; indeed, the area under irrigation doubled during the period. And coincident with its extension was observable a degree of at least comparative prosperity clearly distinguishing the inhabitants of north Shahabad from the poverty stricken population of the surrounding districts. Complaints of proper assessment and of the occasional failure of the water-supply were indeed rife, but the advantages of the system as a whole were at the same time acknowledged."

99. It appears that in the light of the facts brought forward by Mr. Luson's enquiry, the information given by the Civil officers consulted, and the fact that the demand for water in the rice season is quite equal to, if not in advance of, the supply, not only is no reduction called for, but the rate might without injustice to the cultivator be raised.

Mr. L. Mylne states that—

Volume II, page 199.

"Any raising of the present rates would very probably tend to a combination against canal water."

And taking all the circumstances connected with the appointment of the Committee and the alteration in system now proposed into account, it will probably be better, for the present at least, in the interests of both Government and the cultivator, to retain the present rate, regarding which Mr. Mylne makes the following observation :—

"I am of opinion Re. 1-4 per bigah for all crops under a five-year lease during all but the hot months a fairly moderate charge."

100. This favourable rate should, however, apply in the case of good registered channels only and in situations where suitable blocks involving little or no waste of water can be obtained. It is proposed, with the view of inspiring confidence and avoiding interference with the cultivators more frequently than is absolutely necessary, that the lease under such circumstances shall be for seven instead of for five years. Where the blocks are less suitable, and the channels, though not necessarily involving waste, are less substantial, it is proposed to reduce the term of lease to three years and to raise the rate to Re. 1-9 per *bigah*. A distinct advantage would thus be given to the proprietors of estates whose arrangements in the matter of canal irrigation were such as not to cause loss to Government. In annual leases the rate would be Re. 1-14 per *bigah* as at present, but even in their case a suitable block would be insisted on. In no case would irrigation beyond the limits of the block be assessed. The precautions to be taken to prevent the misuse of canal water will be detailed subsequently.

101. For *rabi* irrigation the general rate would be five annas lower than at present, viz., Re. 1-4 per *bigah* for flow irrigation and 15 annas for lift. In the case of land on selected distributaries not open for *kharif* irrigation the

rate would be 15 annas and 10 annas per *bigahs* for flow and lift irrigation respectively. Water would not, in the case of leases at the lower rate, be given before the 25th October, unless the season was one of seasonable rainfall, when the Divisional Engineer would be authorised to open these distributaries by the 7th October, and no water would be given to *rabi* crops after the 25th of March. It is never, as a matter of fact, wanted after that date except for sugarcane and hot-weather crops.

102. *Bhadoi* crops would, as at present, be charged Re. 1-9 per *bigah*, but it is intended to include *seerha* in this rate if further investigation shows that this class of rice can be separated from *kartika* and *aghani* without the risk of frequent disputes.

103. The rate for hot-weather irrigation between the 25th of March and the 25th June would be, as at present, Rs. 2-8 per *bigah*, but water would be allowed to be taken earlier for indigo and other crops requiring it, not before the 25th February, provided an equivalent number of days was cut off in May and June.

104. Sugarcane it is proposed to treat in a special manner. At present half the complaints refer to this crop, which is peculiarly liable to damage from other causes than want of water. In 1887 the crop was generally destroyed by rain. Permits would be given for sugarcane irrigation at Rs. 5 per *bigah*, flow or lift, payable about the time the crop was reaped, with the undertaking that, in the event of the crop failing through any cause, a proportionate remission would be made. This rate would include irrigation in the hot weather for which no extra charge would be made. Otherwise canal water taken during the different seasons—*rabi*, hot weather, and *kharif*—would be charged at the rate fixed for the season, without reference to the failure or otherwise of the crop, except so far the rates for the current season were concerned, which would be remitted in the event of failure of supply only.

105. The charges would in all cases be in *bigahs* and decimals of *bigahs*, any smaller area than one-tenth of a *bigah* being charged as a tenth. The Committee's proposal is similar, except that one-eighth has been replaced by one-tenth. The Government will reap a small advantage by *cottahs* being replaced by decimals of a *bigah*; but it is proposed to expend Rs. 75,000 of public money on bridges, over village channels crossing public roads, which will quite neutralise any financial advantages the alteration might give to the canals.

Volume I, page 88, section 289.

106. There will be some minor changes. When the five-year lease rate was fixed, it was partly with a view of avoiding interference with the cultivators and partly with the object of inducing applications to permit sugarcane included in the block to be watered without extra charge. No alteration in this respect is proposed. It was, however, never intended that water should be given to these blocks after the time when it is ordinarily required for *rabi* crops without extra charge, and the season will, therefore, end on the 25th March, after which water is required for sugarcane and hot-weather crops only.

Mr. Mylne says:—

"I am against hot-weather irrigation, believing that during May and June the land should have respite from canal irrigation;"

Volume II, page 202.

whilst in the paragraph immediately above he observes:—

"I am decidedly of opinion—and in this I agree with Mr. Solano—that, if for nothing else than cane irrigation, the canal should supply water till, at any rate, the end of April in each year."

In the case of cane irrigation the transaction is, at any rate, purely commercial. If the cultivator does not find it to his advantage to pay the extra rate for canal water, he can sink wells, and it is desirable that he should be driven to consider it in this light as early as possible, and not trust to keeping the cane alive until the 31st March by canal water and afterwards in April, May, and June by rain, which is pure lottery or surreptitious irrigation. This is what fi year lessees frequently do at present.

108. Adopting the proposals made in the preceding paragraphs, the water-rates for the future will stand as follows:—

Leases for a term of years.

For water supplied between the 25th of June of one year and the 25th of March of the next.	Flow or lift. Rate per bigha.	Flow or li Rate per ac
	Rs. A. P.	Rs. A.
For leases for seven years—all crops	1 4 0	2 0
For leases for three years—all crops	1 9 0	2 8

Season leases.

Name of Crop.	Date of supply.	Flow or lift. Rate per bigha.	Flow or Rate per
		Rs. A. P.	Rs. A
Rice and sugarcane for kharif season only	25th June to 25th Oct.	1 14 0	3
Bhadoi, sorha rice, or any other crops	Ditto to 15th Oct.	1 9 0	2

In the case of annual leases no extra charge will be m for a crop of *kesari*, linseed, or *gram* sown in rice-f watered with canal water, for these a supply will be all to be taken until the 15th November.

In the case of both annual leases and leases for a of years, water will be supplied for rice seed beds only an earlier date in June, if the supply in the river adm this being done.

The following will be the rates for *rabi* crops, inclu sugarcane leased for by the season, for water between 25th October and 25th March:—

Season leases.

Time of Supply.	Locality.	Flow. Per bigha.	Flow. Per acre.	Lift. Per bigha.	Lift. Pe
		Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs
15th October to 25th March.	Water supplied from distributaries open for *kharif* irrigation.	1 4 0	2 8 0	0 15 0	
25th October to 25th March.	Water supplied from distributaries or parts of distributaries from which *rabi* irrigation only is allowed.	0 15 0	1 8 0	0 10 0	

N.B.—In both cases Executive Engineers may, in years when the demand f for *kharif* crops admits of it, supply water for *rabi* on any date after t October.

The rate for sugarcane treated as an annual crop s as follows:—

Annual leases.

Time of supply.	Flow or lift. Per bigha.	Flow or lift. Per
	Rs. A. P.	Rs.
First of January one year until the crop is cut, which may be March in the following year ...	5 0 0	8

in the case of leases at this rate proportionate remission be allowed if the crop suffers from causes independent he water-supply, such as excessive rainfall or blight. tivators will thus have the option of taking water arately by seasons, in which case they will take all s except failure of supply, or taking water by the year, which case proportionate remission will be allowed if crop suffers from any cause; water-rates at the proper being charged in lieu in the event of another crop ng substituted. The total charge for separate water- s by seasons will be Rs. 1-14 + Rs. 1-4 + Rs. 2-8 (*vide* ow), or Rs. 5-10 for the crop.

The hot-weather rate will be as follows:—

Season leases.

	Flow or lift.	
	Per bigha.	Per acre.
	Rs. A. P.	Rs. A. P.
water supplied between the 25th March and the 25th June, or at the option of the applicant, between the 15th of February and the 25th of May, for all crops.	2 8 0	4 0 0

e rates mentioned to take effect from the 1st of April 90, except in the case of seven and three year leases, which l commence from the 25th of June 1891; five-year leases der existing conditions to continue to be entered into another year. The Superintending Engineer will have power to admit existing five-year leases fulfilling the essary conditions as part of a new seven-year lease, should circumstances of the case appear to require it. It is irable that the rates should be fixed for a term of years, an undertaking might be given that no increase will be de in the above rates before the 25th June 1896, which visо would fix the rate for long leases for the next seven welve years.

09. The water-rates will be due and payable on the es mentioned below:—

Seven-year leases	One moiety	... 15th December.
Three-year leases	One moiety	... 1st March.

Season or annual leases.

Bhadoi and crops classed as *bhadoi*, including sugarcane waterings from the 25th June to the 25th October...		... 1st November.
Rice		... 15th December.
Rabi and crops classed as *rabi*, including sugarcane waterings from the 25th October to the 25th March		... 1st April.
Hot-weather rate ...		... 1st July.
Sugarcane, full annual rate.	One moiety	... 15th December.
	One moiety	... 15th February.

The Divisional Canal Officer will endeavour to forward as ny of the demand statements as possible to the Collector een days before the dates fixed for payment, but accuracy the individual charges should be regarded as of more portance than a rigid adherence to dates.

10. Leases issued during the *kharif* season will be ject to the following general conditions:—

I. Preliminary applications for seven or three-year leases must be made by the 1st of April at the latest. The word preliminary is used, as the regular application cannot be prepared until the measurement is complete, so that the correct area may be entered opposite each cultivator's signature appended in the presence of a witness. Water will not be supplied until the application has been signed by all the occupiers of the land to be irrigated and a permit issued. If there is delay in obtaining the signatures and water is immediately required, it may be given on annual lease permits issued under the conditions noted below, which will be cancelled, provided the application for a seven or three-year lease is completed by the 30th of November, or with the special sanction of the Superintending Engineer the 1st March following.

II. Annual leases will be on the same conditions as regards the block being strictly defined, but the measurement will not necessarily be made before water is given, an area more or less being entered in the application in which the boundaries of the land to be irrigated will be specified. The application will state that the actual area measured within the boundaries specified will be charged.

III. The permit will consist in effect of a copy of the application with the permit endorsed on the back. In the permit the size and position of the outlet, head of water to be maintained, and approximate discharge will be mentioned. No alteration in the outlet will be allowed during the currency of the lease without the express consent of the lessees.

IV. The permit will state that water is to be supplied for the sole purpose of irrigating the lands mentioned therein. This, of course, includes the right to *nigar* or drain the lands at the proper season of the year. It will be expressly agreed in the application that water-rates will be chargeable whether or no rain falls, and water is required and supplied.

V. It will be noted in the application that no claim for remission will be entertained unless an application is filed 20 days before the crop is cut, on a form which will specifically state the names of the cultivators and the areas for which remission is claimed. A suitable form will be supplied at the cost of half an anna, but its use will not be compulsory, provided the required particulars are given.

VI. Leases, whether annual or for a term of years, will be granted for well-defined blocks only, and in the case of the latter the lease will be refused, unless the block includes all the land which would ordinarily or probably be irrigated. The block must therefore have well defined boundaries. The principle would be applied in the case of annual leases, but somewhat less strictly, as the lease need not be accepted in the following year if it is found that water is allowed to be wasted or to be used for irrigating unleased lands. On the other hand, land too high to be irrigated by flow will, at the discretion of the Canal Officer, be excluded from the lease, which will be for water at the level it can be delivered under existing circumstances, without its level being raised by cross bunds or other temporary appliances.

Mr. Mylne, volume II, page 191.

VII. Under no circumstances will unauthorized irrigation from water supplied to land under a *kharif* lease be *measured* or assessed. If water is found to be flowing beyond the boundaries of the lease, the outlet will be temporarily closed. In the case of leases for three or seven years, power will be reserved to the Superintending Engineer to cancel the lease with the concurrence of the Collector, if water is habitually wasted or used

for purposes of unauthorized irrigation, and also on the applications of all the signatories for good cause. Such leases will likewise be liable to be cancelled on the application of the Collector if, on the 1st of June of any year, water-rates are in arrear by more than half a year's demand. These conditions will be recited on the application form.

VIII. The only condition under which unauthorized irrigation in this season will be assessed, will be when a village channel has been cut and the perpetrators of the offence cannot be traced, in fact where a criminal offence has been committed. In such cases the papers will be submitted to the Collector before any measurement is made, and assessment only made on his order after such enquiry as he may consider to be necessary.

IX. The Divisional officer may, at the request of the Collector and with the sanction of the Superintending Engineer, refuse permits to the cultivators of villages where there have been constant difficulties in realising water-rates unless half the amount specified in the permit is paid in advance.

111. These conditions apparently fully meet those stated by Mr. Mylne to be necessary in the sentences quoted below :—

"No question of liability for rates would arise in the case of long leases. But because for various reasons considerable areas of the district are unlikely to come under long leases, safeguards must be provided to secure *equitable assessments* in respect of such areas, whenever canal water may be supplied. It is difficult to suggest any other plan than the following :—

"1. Sufficient water to be arranged for on written application for irrigation of the whole or major portion of well-defined blocks beyond which no charge for illicit irrigation should be made.

"2. Such application to render cultivators liable for rates on the crop, except on undoubted failure of supply, ascertained promptly by the aid of established gauges and from the appearance of crops. Liability to rates would remain whether or not rain fell during the irrigation of the block with canal water."

Volume II, page 191.

Unfortunately under the system mentioned, two evils will arise. Unanimity is required and a small minority may object, and in the words of Mr. Mylne—

"It has always been found that such minorities refuse to join any contract on application, believing they can enjoy the benefits of canal water without paying for them."

Volume II, page 19.

The other is that in most cases no punishment or penalty can be inflicted in the case of unauthorized irrigation, it being usually impossible to detect the actual offenders and to secure a conviction in a criminal court. A higher charge for the water, which is in many respects the most appropriate penalty, is deliberately abandoned, as on the whole this remedy leads to greater evils than the disease which it is intended to cure.

112. It might and frequently will happen that after the 1st of September there is a pressing demand for water, when, as frequently happens, the *hatiya* rains fail. The quantity of water available to meet this demand is at present and is likely to continue to be very limited. Crops supplied with water at this late period of the season, though greatly benefited, produce indifferent crops. There are always difficulties both as regards assessments and collections. Villages irrigated in October 1888, at the urgent request of the Collector, have failed to make any payment whatever, and in many, cases though canal water was used, no assessment was practicable. The whole available staff is required to distribute water to the leased areas, and they cannot be employed in examining blocks proposed to be leased. The only possible solution of the difficulty appears to be in such cases to sell the discharge of an outlet for a limited time after the leased areas have been supplied. In such a charge of four rupees for one cubic foot per seco twelve hours will be made, half being payable befor outlet is opened, and the other half secured by a without reference to the area to be watered. The proposed is rather less than one rupee per *bigha*, but will be considerable wastage.

113. The charges to be made for water supplied be the end of the *kharif* season, say, the 25th October an 25th March, require litt e comment.

A considerable reduction has been proposed to be in the rates for *rabi* crops. It is necessary to imp higher charge, where water required for *kharif* crops o utilized, as water is certain to be taken, and it will int with the supply required for the rice crop at the critical season. But the reduction in rate propos be made varies from 20 to 40 per cent. In the of sugarcane the rate proposed is somewhat less th present charged, and its realization will be depe on the crop coming to maturity. If the cultivator cl to take water for part of the year only, he will be ch the rate appropriate to the season, and no claim for r sion on grounds other than failure of supply lis to. *Serha* rice, which is harvested in September, has included under the head *bhadoi*, and the rate for irri it consequently slightly reduced, whilst the time which water can be given for the hot weather rate has made variable to suit indigo and other crops requiring in March.

114. The strict provisions proposed to be made rega unauthorized irrigation in the *kharif* season, 25th June 25th October, will not apply to irrigation at other tin the year, when the canal officers will exercise their p powers, regarding which there have been no real compl This is in accordance with the Committee's recommen quoted below :—

"But there is always ample water in the canals and distrib during the *rabi* season. The canal runs to waste into the Ganges: the never any complaints of insufficiency of supply at this time. N there any complaints of assessment of unauthorized irriga regard to *rabi* crops. The object of the fixed duty systen put an end to these complaints, but where there are no com there is no advantage to be gained by its introduction. Th and simplest arrangement for the *rabi* season will be, we to follow the practice which now prevails, and allow the hol the land under lease to take just as much water as they plea their *rabi* crops. If they abuse their privilege, and the w allowed to flow on the lands of others, those lands will b liable to assessment. But the experience of the past affor strongest reason for assuming that the privilege is not likely abused."

Volume 1, page 67.

115. In the existing rules it is provided that in the of land held on a *bhaoli* tenure the water-rate shall coverable from the cultivators and zemindar in the proportion as the produce is divisible among them.

It has been held as a matter of law that the zemind only be made responsible where the application has signed by him. There are great difficulties in obtainin signatures of zemindars, who frequently reside out district, and there are often numerous shareholders. La in many cases the ryots have made themselves responsib all the water-rates rather tha get water or wait an indefinite until the zemindars are willing to sign. An alterati the law on the lines recommended in paragraph 223 Committee's report is desirable, but in the meantime legal rule for the practical guidance of canal offic required.

Volume 1, page 70.

The matter is very fully dealt with in Mr. Luson's from which the following extract is quoted :—

"The position of affairs will be more clearly illustrated subsequent history of the case which led to the statement of now in question. It referred to one of the Doomraon village after it occurred the representatives of the Maharajah refi

with the ryots any leases last *kharif* season on *bhaoli* lands, notstanding that, hitherto they had paid half the rates, and notstanding that as far as I could ascertain, every other landlord ept one) in the circle consented to share the rate. The consece was that in a number of the Doomraon villages water for rice not taken by the ryots, and with the failure of the *Hathiya* rains rops died. It was the *rabi* sowing time when I commenced my iries: the sowing rains held off; still the representatives of the vere refusing to agree to half the charge of the water the ryots asking for, till the Collector of the district, at my request, l the case of the ryots upon the Dewan, and induced him to a tardy notice that the Raj would this season share half the f irrigation, so far as *rabi* only was concerned. In 15 *bhaoli* es belonging to the Doomraon Raj, *kharif* was irrigated by canal taken by the ryots last season on their own responsibility. In cy could, no doubt, afford to pay the extra tax of 15 annas, as were informed that by law the malik could not be charged; but eral I heard that they meant to deduct the value from the rent *danabandi* time—a state of affairs likely to lead to unseemly tes."

ere can be no question that the only settlement of the ion at present practicable involves possible injustice to enant, but it is better that he should be able to procure at even an enhanced price than allow his crop to fail. is proposed that in future the cultivator shall invariably himself responsible for the whole of the water-rates, that the canal officer shall be authorised to issue a it and supply water on his written application.

ovision will be made in the rules that on the written st of the zemindar any specified proportion of the -rate will be recovered from him, but it will rest with yot and not the canal officer to procure this authority the zemindár, or to take action under section 40 of the al Tenancy Act if he is so advised.

SUPPLY AND REGULATION OF WATER.

3. This point must be viewed from three different -points. In the *rabi* season there is always an ample y, and the tendency of cultivators has been towards irrigation. In the hot weather, April, May and June, arantee in regard to the supply of water can be given. e rains or *kharif* season the demand for water at n times is in excess of the supply, and it is necessary to ise great care both in granting permits and in regard e situation and suitability of the blocks to be irrigated. e bulk of the irrigation is in the *kharif* season, and only in regard to the supply at that time that are required. The principles to be followed are thus l by the Committee—

tion of irrigable to be let on lease.

is essential to the proposals we are making that the canal officer should be allowed to select his own area for irrigation. This area should be let on lease under conditions we shall tly explain. The canal officer would not grant a lease for a area than the outlet or outlets from the distributary could in each case, and he would refuse a lease if the area applied re insufficient to take the full supply of water which would be furnished by the outlet. He would be guided in his judgment by the fixed duty acres per cubic foot of water. It is of course not intended lease should be arbitrarily reduced or enlarged so as to bring in the exact area commanded by the outlet. A small margin side or the other would exist in all cases. It will be better to the side of liberality than of strictness. But the canal autho- must be allowed the power of refusing a lease at discretion."

mo I, page 65.

ring the last two years irrigation has been conducted e main in the manner suggested. The outlets have adjusted to discharge approximately the quantity of required (arrangements having been made to procure under six inches in diameter) and leases for blocks, in- g a strong probability of unauthorised irrigation, or ring a discharge which could not be efficiently arranged ave been declined.

7. Since the Committee's report was written valuable ience has been gained.

1888 there was practically no rain from the 7th mber to the 29th November, and the rice crop depended on canal water only. Practical results, the fruits of this experience, will be followed in preference to any particular scale of duty, and in all cases special care will be taken that the lessees shall know exactly what outlets will be allowed, the essential particulars regarding which will be entered on the permit. The rules will provide that general instructions issued from time to time on this subject must be followed. The ordinary base will, taking the rice area included in the block only into account, be for a duty of 50 acres per cubic foot per second on the discharge from the outlet with a *tatil* of five days in 15; but this duty will be liable in places to be reduced to 40 acres per cubic foot per second, or increased to 65 acres per cubic foot per second, where it has been found by experience that this latter duty can be obtained. Where the supply required is in excess of the lowest duty mentioned, the lease will ordinarily be declined. It would be an obvious loss of power to use the canals as a means of growing rice in soil which is practically in the condition of a filter bed. Such soil is suitable for *rabi* crops only.

The division of leases into seven-year at a lower rate and three-year at a higher will also afford a means of differentiating leases in unfavourable situations. Seven-year leases will only be accepted where it is positively known from former experience that a sufficient supply of water is always available, and that the quantity required is not excessive.

118. The department will accept and ordinarily exercise full control over and responsibility for the supply of water through the outlets. It will, however, be provided in the rules that, with the consent of the lessees, the custody and control of any outlet may, by an order in writing by the divisional canal officer, be made over to the *lambardar*, provided the latter is willing to undertake the charge. The delegation will not impose on the latter any responsibility with regard to unauthorized irrigation to which he is not otherwise subject. The *lambardar* will take charge as a matter of convenience to both the lessees and the canal department, and if the latter are not satisfied with his conduct they will resume charge of the outlet themselves. It will always be part of his duty to close the outlet in accordance with orders received from proper authority.

VILLAGE CHANNELS.

119. The Committee recommend—

Volume I, page 93, recommendation XII.

"That the construction of water channels be undertaken by the Canal Department, and that a suitable charge of from two to four annas a bigha be added to the water-rate as channel rent."

With this recommendation Mr. Odling found himself unable to agree. Very many of the leases are at present supplied with efficient village channels—not less than 185 miles have been made by canal officers at the cost of zemindars, and in the construction of much more than that length they have given advice and assistance. It is difficult to say what upwards of 1,000 miles of village channels would cost to construct, more especially as land would have to be acquired for maintenance purposes, and its price in the immediate neighbourhood of the canals has through their agency been largely raised. It has been ascertained that the road crossings alone will cost Rs. 75,000, and altogether it is not likely that less than three lakhs of rupees would suffice. The maintenance charges would be Rs. 20,000 a year, whilst in private ownership it is doubtful whether one quarter of that sum is expended, the cultivators being willing to carry out the repairs to a large extent without payment. The real difficulties are the road crossings and the length of some of the village channels which are *de facto* minor distributaries. It is proposed (I) to construct all road crossings required at the cost of Government; (II) to allow no village channel exceeding one mile in length to be constructed in future, and (III) except in the Jugdispore Estate, to take over and

Volume I, page 97.

maintain at the public cost any village channel already constructed which is in reality a distributary, provided it is made over to Government without charge.

120. There is no objection to its being laid down by rule that channel rent shall not be less than two or more than four annas a bigha, and, in the case of seven or three-year leases to recovering at the written request of the zemindar the channel rent together with the water-rates. But in such cases it will be necessary for canal officers to be placed in a position to keep the channels in a proper state of repair. It is not desirable to impose the collection of channel rent on the Canal Department as a duty. In some cases Messrs. Burrows, Thomson and Mylne may be taken as an example; the landholders have deliberately refrained from asking for channel rent from their own tenants, and in others, where the land is *bhaoli*, it is doubtful whether any rent can equitably be charged. Mr. Luson is of the contrary opinion, remarking that—

"Certainly he should at least pay for the construction of village channels."

121. The majority of the Committee look with much favour, not fully shared by the departmental member of the Committee, on the proposal to sell water for the supply of *aharas*. Mr. Odling considers that it is a matter in which great caution is required. It is recognized by the Committee that there is a risk of further water-logging the country, and that a supply could only be given when water is available without prejudice to leased areas.

Volume 1, page 78. Volume I, page 96.

The price proposed, one rupee for a discharge equivalent to a supply of one cubic foot per second for 12 hours though low, may be tentatively accepted, provided water is supplied from November to March only. To the supply of water in the months when the river is in flood, and the water heavily charged with silt, there is not only the grave objection of water-logging, but there is the imminent danger of the canal being silted up if constantly run at full supply. At present there are 14 steam dredgers at work, and it is with difficulty that the canals are at times kept open. Every extra cubic foot per second of supply deposits in the canal its quota of silt which must again be lifted out by steam power. It is therefore undesirable to fill *aharas* with canal water in this season at all, and, if allowed, a double charge sufficient to pay for the extra expense necessarily incurred should be levied. It is, however, in March, when the permission to take water for *aharas* will probably be most valued. The supply in the river in April, May and June is scanty, and generally there is no surplus water available for sale then.

Assessments and Collections.

122. The arrangements in these respects will remain much as at present, with the important exception that in the *kharif* season the areas included in the application will generally be measured at an earlier date than at present, and without reference to the patrols' *shudkar* or register of irrigation, which will be retained in a modified form to record the discharge through outlets. There will practically in this season at least be no unauthorised irrigation.

The Committee's recommendation has been followed except with regard to the increased number of Sub-Deputy Collectors it was proposed to employ partly for the purpose of disposing of complaints, and partly to admit of the localisation of the offices with the view of facilitating the collections.

Volume 1, page 78, section 250.

So far from it being likely that an increased revenue will be derived from the canals, it is nearly certain that the reverse will be the case. Though the area watered by the canals is steadily increasing, the assessments are decreasing owing to the extension of five-year leases. It is hoped that the work of the collection department will become lighter as these leases, which imply regular annual payments, extend.

The proposals of the Committee by no means sati the Special Deputy Collector, who is in favour of the or tion of the office of Deputy Revenue Superintendent the employment of four Special Dep Collectors, whose functions would pr tically be those discharged by the Sub-Deputy Collectors at present employed. Four sets of buildings for their residences and offices are asked and there would be extra office establishment in addit The addition to the work now carried out by the collec department proposed was the disposal of complaints and preparation of alteration statements.

Note dated the 25th May 1889, paragraphs 29-32.

123. It has been shown in paragraph 78 of this note nearly half the objections to assessment raised were at admitted by the canal officer to be correct and the ne sary orders passed A reference from another office w have led to the same result, but with a very appreci delay and extra trouble and work resulting in incre expense to Government in both departments. It was pointed out that on general grounds it was only that the canal officer should be given the opportu of correcting what was alleged to be an erroneous ch It is admitted that cultivators or others—

"Should be able to present any complaints or objections they have to make as to the effect of *orders* p by the Engineers before an indepe tribunal."

Volume I, page 79, section 253.

The word *orders*, which has italicised, is the key-note to the case. All that is ask that the Engineer should be given an opportunity of pa an order.

The actual alterations in the position of the colle department proposed are—(I) that orders regarding a ments passed by sub-divisional canal officers sha appealable direct to the Collector or to an officer v in this respect with the powers of a Collector, the int diate appeal to the divisional canal officer being aboli he will, however, continue to exercise revisional po (II) that the Deputy Collector shall be vested with to sanction alterations in the demand not affectin amount due, in certain cases remissions, and to finally with certain classes of irrecoverable items. It is be that this extension of the functions of the collecting d ment, which will materially lessen the number of compl can be carried out with the establishment as it at p stands, or at least without any material addition theret

124. I am altogether opposed to the creation of any class of Canal Deputy or Sub-Deputy Collector, or t increase in their numbers, which I do not think is call and as regards the former objection I find that supported by the Board of Revenue. The circle offic Daudnugger and Bikrum fill the same position a occupied by the Sub-Deputy Collectors in Shahaba their charges are materially less important and no imm alteration is called for. The expediency of placin collections in Patna and Gya under the Special I Collector, Shahabad, may be reserved for further co ation.

125. With the exception of a sanctioned office est ment, the Special Deputy Collector, Shahabad, is dependent on the amount placed at his disposal und for the payment of his mofussil establishment. W sanction of the Collector he appoints circle officers, *teh* &c., on pay from Rs. 50 per month and downward amount not exceeding 3½ per cent. on his collections year. On this subject the Committee observe—

"As a fact, what is realised as tehsildars' fees is, we beli paid away as commission, but is d the payment of fixed salaries to t and even to circle officers. Such a p may easily give rise to misunderstanding. We are of opi no value commensurate with the expenditure incurred is lik obtained by the payment of fees either to tehsildars or p It is a better arrangement not to allow fees. The collectio

Volume I, page 81.

e think, to be made as in other departments by establishments n a fixed salary without commission. We have therefore omitted ees altogether as an item of expenditure in future arrangements."

The only real objection which can be taken to the principle aid down by the Committee that fixed salaries shall be paid on the score of expense. The Deputy Collector makes the trongest objection to the limits proposed by the Committee, nd so far is supported by the Collector.

The matter is one which will have to be considered in letail with special reference to Mr. Power's remark that power hould be reserved to dismiss men at times of year when heir services are not required. The so-called circle officers hould certainly be appointed permanently and graded as illadars. Six zilladars as proposed by Mr. Power would replace the present establishment of seven circle officers. For the remaining establishment a limit should be fixed within which the Collector should be authorized to entertain such establishment as might be required, but the collections are diminishing and not likely to again show any important recovery, so that it is indispensable that the total expenditure shall not exceed that at present incurred The grant of a local allowance to the Special Deputy Collector has been repeatedly recommended by me. It should, I think, be attached to the appointment, which is very important, rather than be granted to the officer filling it at any particular time.

Volume II, page 27.

Intermediary Agency and Lambardars' fees.

126. When irrigation was first commenced, an attempt was made to appoint *lambardars*, who should both transact business on behalf of the cultivators with the Engineers and assist the Deputy Collector in collections. One moiety of their fees, then 10 per cent. on the assessments, was payable by each department. The arrangement was not found to be satisfactory; the canal officers and the collecting department were not always in accord as to the merits of particular *lambardars*, and eventually the fees, reduced to 6¼ per cent., were divided, the collecting department taking 3⅛ per cent., the sum now at their disposal for the payment of circle officer, *tehsildars* and others whom it was found expedient to retain on monthly salaries, and leaving 3⅛ per cent. to canal officers for the payment of *lambardars* who ceased to have any connection with the collections, but continued to act on behalf of the cultivators in matters connected with the presentation of applications, the receipt of permits, and the distribution of water amongst the signatories to the lease.

The *lambardars'* fees amount to a considerable sum, and their abolition would result in an appreciable saving to the State. Real work is, however, demanded from them, and it is proposed to increase both their duties and their responsibilities. They are required (I) to attend all measurements; (II) to obtain signatures to applications and to certify to the correctness of the same; (III) to attend to the distribution of water amongst the persons entitled thereto; (IV) to be present at the investigation of complaints by any canal officer or subordinate, and to give any information required in connection with irrigation.

It is now proposed that in addition they shall (V) distribute (*parchas*) to every ryot, and (VI) report at the end of the *kharif* season personally to the canal officer as to the state of the crops in the lease; (VII) report to the Deputy Collector all mutations in holdings; (VIII) to assist the collecting department by pointing out the residences of the persons assessed and identifying them. The duties are responsible and involve a considerable amount of physical exertion. It is probable and desirable that in most cases a Committee or *punchayet* will be appointed, but this will not diminish the amount of work to be jointly performed. It is absolutely necessary, in the irrigation season especially, that the *lambardar* shall devote a considerable amount of his time to his duties. He must be ready to trudge with the canal officers for several hours at a time in all weathers.

It is idle to expect that these duties will be performed b any one without remuneration—the are not the class of duties constitut ing an honourable burden for which remuneration is no found to be necessary, certainly not in this country.

Volume I, page 84.

On this point Mr. Mylne entirely agrees with Mr Odling, and his opinion is particularly valuable, as the firm themselves dis charge the duties of *lambardars* for large part of their estate, employing paid servants whos wages it is understood the allowance received in the way o fees is not sufficient to cover. The Collector is also o opinion that remuneration must be given, and refers to th prevalence of party spirit and factious opposition which, i is believed, has interfered with the successful working o the Chowkidaree Act.

Note dated 30th June 1883.

As the *lambardars* will in future be to a certain exten responsible to the Collector, it will b desirable that a portion of the fee levied shall be paid by him, but th duties to be performed in connection therewith will requir to be strictly limited. In particular they will have n concern with certificate cases. The total fees may in futur be limited to three per cent., of which two per cent. will b payable by the canal officer and one per cent. by th Collector, fractions of annas being omitted in payments.

Letter No. 8491 of the 31st August 1888.

127. The only practicable way of creating the interme diary agency so strongly insisted o by the Committee appears to be t extend the system under which leases are at present grante on the joint applications of a contractor and cultivators. Th contractor might be a zemindar or an association of three o four cultivators. It is essential that he shall have a benef cial interest in land included in the lease extending for i full term. The control of the outlet might ordinarily b made over to the contractor in these cases, and h might, if a resident zemindar, be himself allowed to pr pare the demand statements for hot weather irrigation, i which case only is there an extra charge. The remuneratio at present granted, 10 per cent., should not, however, be i creased, unless the contractor is prepared to take the risks bad debts, in which case 12½ per cent. might be allowe In leases of this kind the approval of the Collector to t contractors would be requisite. Long leases on the appl cation of the cultivators will continue to be granted; b in their case the *lambardar's* fees will be 5 per cent. on (on condition, of course, that it is earned), one per cent. which will be paid by the collecting department and t remainder by the canal officer.

Volume I, page 75.

128. It is proposed to abolish putwaries' fees, but it m be necessary to call on these men to attend measuremen or to attest the signatures to a lease, in which case th must be paid for the work done. A fee varying from annas to 2 rupees, in accordance with the time taken u will be authorized.

Administrative Control by Superior Officers.

129. It is not possible to permit appeals as a matter right to the Superintending Engineer. He has many oth duties besides the management of the Sone Canals, in whi his position is purely that of a controlling officer. H duties are in no respect of an executive nature, and it is u desirable that he should be called on to give decisions matters in which there is by law an appeal to the Collect Mr. Inglis says:—

"I think it is worthy of consideration whether the Superint Engineer should not be brought into immediate contact with the revenue work his subordinate officers."

Volume II, page 253.

It should certainly be expressly declared that the Supe intending Engineer exercises full revisional powers, a that orders passed by any canal officer shall be modified

ccordance with his directions. He should be required to ue definite orders regarding the limits within which leases various descriptions can be allowed, as the whole distribu- on of water from the canals must be arranged on one con- rted system.

There are also matters which might usefully be referred to e Superintending Engineer by the Collector. It is indis- nsable (recommendation VIII of the Committee) that the lection of irrigable blocks to be let on lease shall rest with ie canal officer. But it is not intended that this power shall e arbitrarily exercised. Leases cannot be granted in areas cluded by the Superintending Engineer; but outside these eas all persons complying with specified conditions have a oral if not a legal right to be supplied with water; in the se of an appeal to the Collector that officer should be ntitled to call on the Superintending Engineer to give his ritten opinion as to whether the grounds of refusal were his judgment sufficient. The same liberty should be iven in the case of village channels, where the matter is sually decided on professional considerations.

130. Remissions on other than legal grounds are at present anted by Government on the application of the Superin- nding Engineer. In most cases it is of importance that if ese remissions are granted at all they should be granted in me to prevent a demand actually being made. Whilst it necessary that the orders of Government shall be obtained here public money of large amount is involved, the Super- ntending Engineer might be vested with powers to grant xtraordinary remissions without previous reference to higher uthority, provided (I) that the water-rates shall not be re- uced below 10 annas per bigha, and (II) that the remissions n any one lease or for any single cause shall not exceed s. 500.

Summary.

131. The chief recommendations made are summarized elow—

I.—Five-year leases to be abolished, but to be replaced by leases for seven or three years, the former being sanctioned only where channels in really good order exist, the owners of which have been registered, and really suitable blocks can be obtained; the rate for these leases to be Re. 1-4 per bigha, the present five-year lease rate. Where the channels, though not necessarily involving waste, are not altogether satisfactory, or the block is not so good as is desirable, the lease to be for three years only, and the charge to be raised to Re. 1-9 per bigha.

II.—The lease to be in detail specifying all conditions, more especially regarding the outlets which the canal officer is not to be allowed to alter during the currency of the lease. The duty to be fixed as far as practicable on the results of past experience, the area under rice when the lease is entered on being mainly considered. Leases for seven years to be ordinarily refused for lands not previously irrigated, regarding which therefore *data* for fixing the discharge required is not available.

III.—Canal officers to be responsible for the supply of water through outlets, but to be allowed to delegate the custody of the outlet to *lambardars*, who will be required to close the outlets when water to the full extent required has been supplied, or in accordance with orders given by proper authority.

IV.—The *tatil* to be limited to five days after ten days consecutive supply.

V.—The assessment of lands irrigated without authority in the *kharif* season shall be prohibited except with the previous sanction of t Collector, where a criminal offence has be committed and the offender cannot be di covered.

VI.—The rates for *rabi* irrigation to be reduced a those for sugarcane modified.

VII.—No water to be supplied for *kharif* irrigation c applications filed after the 1st of Septemb except by volume, and in such cases half t amount payable to be recovered in cash befo water is supplied. The discharge of an ou let for a specified number of hours will l sold, and not a specified quantity of water.

VIII.—The length of village channels counting to t boundary of the lease to be in future limited one mile, crossings to be provided at t public expense, and existing village channe of more than one mile in length to be take over and maintained in future by Gover ment on certain conditions. The distanc mentioned will be measured in a straight lin

IX.—In the case of assessments or remissions a appeal to lie direct from orders passed by t Sub-divisional Canal Officers to the Collect or to an officer exercising the powers of Collector, who will be empowered to dire the Divisional Canal Officer to himself enqui and to report in the matter.

X.—The Superintending Engineer to be require to define the limits within which can water is available for (*a*) *kharif* irrigation c three or seven-year leases; (*b*) *kharif* irrig tion on annual leases; (*c*) *rabi* irrigation low rates; and (*d*) hot weather irrigation. Th it be expressly declared that Canal Office shall exercise all powers vested in them subordination to the Superintending Enginee and that they shall modify any order passe by them in accordance with his direction Subject to the revisional jurisdiction noted above, no appeal to lie to the Superi tending Engineer, but in any appeal to t Collector under section 91 regarding (*a*) village channels or (*b*) the refusal of a Can Officer to grant a permit on the ground c anticipated waste of water owing to the unsuit ability of the block proposed, the Collecto to be authorised to call on the Superintendin Engineer for his written opinion, which sha form part of the records of the case.

XI.—Water to be sold for the supply of *aharas* fro November to March only.

XII.—Joint and several liability to be abolished.

XIII.—Copies of the Revenue Report to be sent yearl to selected landholders, who will be asked favour Government with any suggestions fc improving the administration of the canal and, if it is considered necessary, a conferenc will be held with the Superintending Engine to discuss any possible improvements.

XIV.—In certain cases the Superintending Enginee with the concurrence of the Collector, to ha power to cancel leases or prohibit permi being given to particular villages unless a arrears of water-rates are discharged, or whe water is persistently and habitually wasted utilized for irrigating lands beyond the bou dary of the lease.

Recommendations involving a change in the law.

132. The following provisions appear to be equitable, b legislation is necessary to admit of their being carried out.

I.—It is certainly only right that in the case of *bhaoli* tenures the landlord should in one form or other be made to pay a share of the water-rates. The recommendation (section 223 of the Committee's report) meets the case.

Volume I, page 70.

II.—It should be made clear that water-rate is an encumbrance on the land of the same nature as rent, and any tenant should be allowed to create this encumbrance. At present this point appears to be doubtful, there being a presumption only (capable of being rebutted) in its favour.

Section 76(e) of the Act.

III.—Where water has been misappropriated, and the Magistrate is unable to detect the offender, the persons benefited should be assessed by the Collector without reference to whether the water was obtained by cutting a village channel or a canal or distributary. This is not recommended by the majority of the Committee; but, as a matter of fact, it is almost impossible to secure a conviction, as proof of the actual perpetrator of the offence is seldom forthcoming.

Volume I, page 92.

Volume I, page 100.

IV.—Provision should be made as recommended by the Committee. "That application of cultivators representing an area of 85 per cent. of a block shall bind all the remaining cultivators of a block whether they assent or not."

V.—The *users* not *owners* of village channels should be registered. This course would avoid difficult legal question as to ownerships.

ENT OF RAI JAY PRORASH LALL BAHADUR, DATED 4TH APRIL 1888.

133. The dissent* commences by assuming that it has been proved that *ahara* irrigation is generally more beneficial than igation from the canals, that former methods of irrigan have been actively interfered with by the Canal partment, that drainage has been obstructed and the blic health deteriorated by the canals, that the increased are nder cultivation is doubtful, that benefit from sugar cultivan has not been proved, and that the canals are no appreciale help in time of scarcity. No special grounds beyond neral references to the Committee's report are given for e conclusions drawn, which have been dealt with *seriatim* previous parts of the note, and will not be again referred

Volume I, pages 102-116.

The experience of 1888, if the Rai Bahadur had casion to visit the irrigated parts of the district, can rcely fail to have convinced him of the benefit which the ops received from the canals in that year, and the experiments Mr. H. Luson, C.S., and Messrs. Burrows, Thomson and lne, have at any rate set at rest any doubt that might be ertained, as to the productive power of any kind of land ll cultivated and sufficiently irrigated.

134. It is proposed by the Rai Bahadur, paragraph 46, that ases shall be granted under the control of the Agricultural epartment; paragraph 33, that no attempt shall be made to ve water to defined blocks, which is the key-note of Mr otton's proposals; paragraph 34, that no power shall be given canal officers to restrict the supply; and paragraph 21, that *tatil* shall be allowed. It is safe to say that under such onditions the value of the canals would approximate the Rai Bahadur's opinion of them. It would not be ible, where there was the least pressure, to get water ore than 20 miles from the head, and it would be impossible for canal officers, or indeed any one, to give limits ithin which it would be safe to grant leases.

135. The rates suggested by the Committee are paragraph 37 of the dissent and sections 283 and 285† of the Committee's report distasteful, and paragraph 43 of the dissent, five-year leases are stated to be unpopular. Objection is also, paragraph 35, taken to the system of occasional waterings, and annual leases at a higher rate suggested. In this latter particular it has been found possible to conform to the wishes expressed, provided application is made by the 1st of September. The area under five-year lease has not diminished, and the ryots are stated by Mr Luson to have shown, in 15 of the Deomraon villages, their opinion of the value of the water by, the tenure being *bhaoli*, agreeing to pay the landlord's share of the rates as well as their own.

† Volume I, page 87.

136. An endeavour has been made to remove all well-grounded causes of complaint, but the canal officers must conform to physical conditions; they have water for sale available at certain times only, and under certain restrictions which are not arbitrarily imposed, but necessary to admit of the supply through the canals not being interfered with by accumulations of silt.

It has not in practice been found that these conditions clash with the requirements of agriculture (paragraph 37 of the dissent), and canal water has in fact during the last two years been eagerly availed of, the dissatisfied cultivators being those to whom it was on sufficient grounds found necessary to refuse leases.

PAMPHLET BY BABOO KANDHJI SAHAI, B.A., B.L., ON CERTAIN ASPECTS OF THE SONE IRRIGATION QUESTION.

137. Baboo Kandhji Sahai, who, as Secretary to the Co-operating Committee referred to in section 4 of the report, gave valuable assistance in the enquiry, has written a pamphlet under the above title, of which I have received a copy, mainly with reference to the reports by Mr. Odling and Mr. Luson, published in the *Calcutta Gazette* for the 9th January and the 3rd of April 1889, referred to in paragraph 4 of this note.

138. The Committee are stated to have arrived at the following main conclusions:—

"(*a*). That the canals are on the whole beneficial to the country, now that they have rendered it impossible to revert to the old system of *ahar* irrigation.

"(*b*). That canal water is not beneficial to *rabi* or opium.

"(*c*). That the shudkar system is the root of all evil, and that it should make way for a better system in which the chances and opportunities of doing evil might be minimised to the lowest degree

"(*d*). That the magisterial powers in the hands of Engineers had not worked well.

"(*e*). That the collecting staff by its previous inaction and recent over-activity (put) gunpowder to the hidden flames,"

and brought the feeling of soreness and exasperation to a climax.

Statement (*a*) has been fully dealt with in the earlier paragraphs of this note. Statement (*b*) is probably, except as regards wheat, so far true that crops irrigated by well water give better results, much better in the case of opium watered from old wells. Statement (*c*).—It is proposed to abolish the *shudkar* system in the *kharif* season, where it has led to evils, and to in its place substitute the system recommended in page 35, under which—

"No water will be given, unless lease is executed beforehand, the tenants binding on the one hand to pay the water-rate, the Government binding itself on the other to supply the water timely."

As regards (*d*), the Committee's conclusions are not accurately stated. The Committee certainly on general principles recommend, section 169, the withdrawal of the magisterial powers, but they expressly state that they—

"notice the sparing manner in which these powers have been exercised, and we have no reason to doubt that, as a general rule, they have been exercised in the past with discretion."

Volume I, page 52.

The recommendation is in no way based on whether the powers had worked well or otherwise (*e*). The recovery of arrears was doubtless unpopular with the assessees, who had hoped to escape payment, but, as has been stated in the commencement of the note, the agitation was one of the results of the introduction of irrigation, without rules found by experience to be suited to the district.

It is stated that—

"Many other points have been found to which it is not necessary to refer to at present."

They are incidentally adverted to throughout the pamphlet, which it is right to say is obviously animated by a desire to improve the irrigation administration by suggestions offered in a spirit regarding which complaint cannot be made.

139. The main object of the pamphlet is, however, to show that the rates at present charged for water are unjustifiable. Paragraph 7 runs as follows :—

"Such is the summary of the recommendations of the Commission I shall begin with the last, for the lowering of rates, first, as being the most important, and without which, in the words of the Commission, no improvement will be accepted as an adequate outcome of the results of the Commission."

It is perhaps desirable that the arguments adduced in support of this contention shall be specially noticed; the other points have been fully commented on in previous pages of this note. Whilst the accuracy of the crop experiments which were carried out is not questioned, it is stated that the results are not such as would ordinarily be obtained—

"In ordinary course of business all the fields are not reaped at once, and generally a great amount is wasted in reaping, in threshing, in winnowing, before the grain is actually stored"

This loss is stated to reduce the yield to $\frac{8}{9}$ths of that estimated, and it is contended that Mr Luson's figures—

"should be reduced not only by what is called the co-efficient of shrinkage, but also by the co-efficient of wastage."

The objections raised are entirely met, as will be seen from the quotation below, in the experiments carried out by Messrs. Burrows, Thomson and Mylne, which gave an average outturn of 31 maunds 5 seers per bigah on grain weighed on the threshing floor at a distance from the field—

"The results obtained from the different sources are nearly identical. The figures of Messrs. Burrows, Thomson and Mylne are slightly lower than the rest, because a certain amount of wastage occurred from the method they adopted of drying the crop. They had it tied up in bundles and carried to head-quarters, so that some grain must have fallen out on the way. The wastage, however, would not be much greater than occurs usually when the cultivators carry the bundles from the fields. In my experiments there was absolutely no wastage, because as soon as it was cut the crop was sewn up in bags, which were afterwards opened only in my presence. Similarly in weighing wet crops upon the ground the canal officers would not make any waste."

In these experiments this particular source of error was certainly eliminated.

140. Further on in paragraph 9 it is suggested that it may be intended to infer that the average produce is 31 maunds an acre. Such is not the case; the above was the average of experiments on *good* crops; the average on the whole irrigated area for 1888 is $18\frac{7}{10}$ maunds per acre. The average of 1,227 experiments made by canal officers to date on average crops is $16\frac{3}{10}$ maunds, and it is contended that Mr. Luson's experiments go far to show that these were substantially accurate.

141. A number of calculations on the profits of cultivators, which afford no real information, are given, and it is then asked :—

"Is there any marked improvement in the export or import of the country? Is there any change in the condition of the people of canal tracts as distinct from non-irrigated tracts? These are questions which do admit of no equivocal answers. If we compare the export and the import of recent years with ten years back, we will find that increase in these items is not at all distinct from the general increase, which of course is due to the improvement of the yet undeveloped resources of the country.

"The export and import of a country have been truly regar the index of a country's material prosperity. If we would know whether a country has improved in its material wea should examine whether the import or the export has increased of the chief articles of import in this country is European piece With the spread of English education, and a desire to co Western ways of living in matters of convenience and com expected that the import of such goods would increase, even country did not improve in wealth. There is yet another fact always tends to increase the consumption of the articles of i The population is an increasing quantity which is attended increase in the value of imported articles in proportion to the incr the number of population. In this view of the case we would that the import of the district would show an increase in 188 that of 1874 in proportion to the two causes above referred to. I would compare the value of the European piece-goods impo the district in the year 1874, when the canals had no existence that imported in the year 1888, when they were placed in a fair ing order, and would prove that instead of showing an improv in the material condition of the people, as one would expect, canals were so beneficial to the country as we are led to beli shows a deterioration. If the contention of the other side correct, we should have found an increase in the value of the i more than what could be referred to the two causes above ment In the year 1874 during the first four months the value of the Eur piece-goods imported from Howrah was £128,568 (Statistical Rep Shahabad, page 269), but in the interval, i.e., from 1874 to 188 population increased from 17 to 18 lakhs; hence the import should increased in the proportion of 18 to 17, assuming every other ci stance to be the same—that is the value of the import whic would expect in 1888 is £140,441. If we now take into ac the other cause of increase which is an indeterminate quantit value of imported article would be more than the sum above But what do we actually find the value of European piece- imported in the district to be in the first four months of 1888 is not more than Rs. 16,15,410, which is equivalent to £1(at the present exchange rate (see for the value of the import, *cutta Gazette* Supplement, pages 721, 990, 1230, 1536, of Thus the consumption of the European piece-goods now is not is was in 1874."

142. The Statistical Department of this Governmen furnished the subjoined statement which gives the partic relied on by Babuo Kaudhji Sahai, not for four months, for 13 years :—

Statement showing the Imports into the Shahabad dis from Calcutta of piece-goods, European, during th years from 1876-77 *to* 1888-89.

Year.	Quantity.	Rate per maund.	Value
	Mds.	Rs.	Rs
1876-77	25,904	80	20,72,3
1877-78	31,198	80	24,95,8
1878-79	37,565	80	30,05,2
1879-80	39,125	75	29,34,3
1880-81	46,493	75	34,86,4
1881-82	46,101	75	34,57,5
1882-83	43,345	75	32,50,8
1883-84	46,537	72	33,50,6
1884-85	42,034	72	30,26,4
1885-86	55,162	68	37,51,0

1887-88	56,136	63	35,36,5
1888-89		63	42,16,1

The Statistical Department states that figures prev to 1876-77 are not available, but those given do not ap to bear out the contention that the import of piece-goods not increased, and the assertion that—

"In the face of this fact the friends of the canals have no nor can they ever justify its* case to exist on its own merits"

* *Sic* in original.

is not altogether in keeping with the facts. The statem that—

"Care has been taken always to allow the errors to be in favor the canal"

appears, under the circumstances, to be of more t doubtful accuracy.

143. Another consideration is put forward, which is, that—

"In more favourable years, which are by God's grace more numerous than unfavourable, the canal water is either not at all required, or required as a luxury. It is only at long intervals that dry season recur."

Again—

"Therefore it is useless to lay much stress upon the failure of the *Hathea* water when it is known that the *Chitra* came opportunely to supply the place of the *Hastha*."

Out of 19 years in nine there was less than one inch of rainfall in the first twenty days of October, which covers the greater part of both the *Hatiya* and *Chitra*.

144. The arrangements during 1888 appear to have met with general approval, except from one point of view, regarding which the following remarks are made :—

"If a system works well or badly according as the person in charge of it is good or bad, the system is imperfect. But if the system does not change with change of hands, the system is a model of perfection. Viewed in this light, the present system stands condemned. It is almost admitted that in the year under review the canal authorities have worked better in all the departments than in previous years. The supply of water was satisfactory, the prayers of the cultivators were attended to, and generally speaking the arrangements were good. It may be asked how is it that it was not so successful in previous years. The recent agitation may be said to have produced this salutary effect. But when things can be managed better or worse according to the will of the officer, which may be voluntary, forced or interested, they must be placed on a better footing. In fact the successful management of this year carries with itself condemnation of the system. The proposed scheme differs from the existing, in that it offers the least opportunity for the exercise of individual idiosyncracies."

Reference is made by the writer to the falling off in five-year leases in the Buxar Division, whilst those in the Arrah and Eastern Sone Divisions were mostly renewed. The leases in the Buxar Division have this year largely increased, and the report shows clearly that there were special difficulties in Bhojepore, due partly to the area of land held *bhaoli* and partly to the cultivators being to a large extent Rajpoots or Brahmins. But the experience of one year has been sufficient to overcome even their reluctance to pay water-rates.

General Remarks.

145. On one point I quite agree with both Rai Jai Prokash Lall Bahadur and Baboo Kandjhi Sahai, and that is as succinctly stated in the Superintending Engineer's Revenue Report for 1888-89 :—

"It is fully recognised that lasting contentment can only result by securing irrigating cultivators full crops, and that anything short of this standard will whatever may be the measure of the benefits derived compared with the water-rates paid, lead to complaints which, though ill-founded, are to be avoided."

The system now proposed will, I believe, secure this end in the largest degree possible.

146. In the report the Committee acknowledge the services of various officials and gentlemen, foremost amongst whom is Mr. L. Mylne of the firm of Messrs. Burrows, Thomson and Mylne. To the gentlemen comprising this firm the thanks of Government are due, not only for services rendered in the course of this enquiry, which were important, but for a long course of assistance to the Irrigation Department, which has been more than once cordially and fully acknowledged both by Government and by the local Head of the Department, the Superintending Engineer. The suggestions they have made have always been deserving of the most attentive consideration as based on reliable data, and having in view the equitable treatment of both the cultivator and the canal officers.

The name of Baboo Kandhji Sahai is amongst those mentioned; his efforts to put the popular side of the question before Government and the Committee in a fair and becoming manner deserves recognition. The Committee specially acknowledge the assistance received from Mr. W. A. Inglis, Executive Engineer, and Baboo Sarodá Pershad Chatterjee, Deputy Collector.

147. Mr. Luson's report on the subjects into which he was directed to enquire is very full and complete It would not have been possible to deal with these subjects with anything approaching to the same certainty in the absence of the very valuable information collected by him. Mr. Luson has thoroughly earned the commendation of Government.

148. Mr. Cotton, the President of the Committee, brings to notice the assistance rendered by the Maharajah of Doomraon and his Dewan Rai Jai Prokash Lal, Bahadur, who was one of the members. It would have been difficult to have obtained the facilities necessary for the meetings without the assistance of the Maharajah, who declined to receive even a reimbursement of the actual expenses incurred. Mr. Cotton also mentions the candour and moderation displayed by Mr. Odling, from whom I have received material assistance in preparing this note.

149. The report of the Committee is in point of clearness and desire to introduce improvements all that could be wished. Alterations in the system in force, all in the direction pointed out by Mr. Cotton, have led to a considerable departure from the recommendations made by the Committee of which he was President; but none the less does he deserve the acknowledgments of Government for the valuable services he has rendered in the enquiry.

C. W. I. Harrison, *Lieut.-Col.*, R.E.,

Chief Engineer, Bengal.

APPENDIX I TO NOTE, DATED THE 14TH OF JANUARY 1890, BY COLONEL C. W. I. HARRISON, R.E., CHIEF ENGINEER, BENGAL, ON THE REPORT OF THE COMMITTEE APPOINTED TO ENQUIRE INTO THE ADMINISTRATION OF THE SONE CANALS.

Note by C. W. ODLING, ESQ., *Superintending Engineer, Sone Circle, on Drainage Works carried out and still required in connection with the Sone Canals, dated the* 14*th January* 1890.

IN sections 46 to 65 of the Report of the Committee appointed to enquire into the administration of the Sone Canals, the complaints regarding obstruction to drainage occasioned by the canal are adverted to. It is stated that much has already been done, but that much remains to be taken up. The necessity for care and caution is admitted, but the paramount importance of the subject is urged as a reason for continuing to pay the utmost attention to it.

2. Since the Committee sat, the matter has continued to receive the fullest attention. There was an unusually heavy fall of rain in August 1888, and data have been obtained which has admitted of a large number of projects being sanctioned after full and thorough investigations based on reliable observations.

A list of drainage works sanctioned from 1884-85 to 1886-87 is given at pages 124-125 of Vol. I of the Committee's Report. Works estimated to cost Rs. 1,61,861 have since been sanctioned, and a complete list of these, as well as of those shown in the report, is appended to this note. Material progress, it can scarcely be denied, has been made.

3. The statement following gives particulars regarding the heavy fall of rain mentioned in the preceding paragraph.

Statement of rainfall for the period 26th to 29th August 1888.

STATIONS.	MONTH AND DATE.				
	26th August 1888.	27th August 1888.	28th August 1888.	29th August 1888.	Total.
Eastern Sone Division.	Inches.	Inches.	Inches.	Inches.	Inches.
Bankipore	2·50	2·90	0·25	0·00	5·65
Bikram	2·20	6·25	0·50	0·00	8·95
Daudnagar	1·70	5·85	1·75	0·00	9·30
Average ...	2·13	5·00	0·83	0·00	7·96
Buxar Division.					
Buxar	0·00	5·60	4·00	0·25	9·85
Sikroul	2·30	7·05	1·20	0·40	10·95
Jumrore	0·00	4·15	2·41	0·20	6·76
Basawan	0·00	4·07	1·27	1·11	6·45
Average ...	0·57	5·22	2·22	0·49	8·50
Arrah Division.					
Arrah	0·04	7·70	2·27	0·00	10·01
Ageaon	2·75	8·30	0·50	0·00	11·55
Nasrigunj	1·25	5·01	1·85	0·00	8·11
Ramnagar	0·58	6·90	2·90	0·60	10·98
Koath	0·00	9·00	0·60	0·00	9·60
Average ...	0·93	7·38	1·62	0·12	10·05
Sone Circle average of 12 stations ...	1·11	6·07	1·62	0·21	9·01

The average fall at all stations on the 27th of August exceeded six inches, followed by upwards of one inch and a half on the following day, so that the opportunities for observation were very favourable, and they were taken advantage of.

4. In the following statements all cases where drainage was found to be obstructed are mentioned, the action taken to remedy it being also noted:—

Eastern Sone Division.

Locality.	Nature of obstruction.	Size of cut or breach.	Action taken.
Patna Canal, 9½ mile ...	Water impounded against canal bank.	Nil ...	The existing drainage cut has been extended.
Ditto, 14th mile ...	Ditto ...	Nil ...	Drainage channel provided in sanctioned estimate for extending Weir II, Patna Canal.
Ditto, 16½ „ ...	Ditto ...	6′ wide ...	Culvert built.
Ditto, 28th „ ...	Ditto ...	Nil ...	Pipes 12″ in diameter fixed.
Ditto, 11th „ ...	Ditto ...	Nil ..	Two pipes fixed, 50 bigahs only affected.
Mali Distributary, 7th mile ...	Ditto ...	Nil ...	Estimate for works required nearly completed.
Khojassa Distributary, 22nd mile.	Ditto ...	Nil ...	Estimate for syphon under preparation. Drainage area ½ square mile.
Khojassa Distributary, 24th mile.	Ditto ...	6′ wide ...	Estimate for syphon under preparation. Drainage area ¾ square mile.
Emamgunj Distributary, 2nd mile.	Ditto, but to a very limited extent.	Nil ...	Inlet estimate being prepared.
Emamgunj Distributary, 5th mile.	Ditto ...	Nil ...	Two pipes fixed. Drainage area 1 square mile.
Emamgunj Distributary, 20th mile.	Drainage water impounded.	Nil ..	Estimate for syphon sanctioned.
Unna Distributary ...	Ditto ...	Nil ...	Two pipes fixed. A syphon will be provided
Shamshernugger escape ...	Ditto ...	Nil ..	Two culverts sanctioned.

Arrah Division.

Locality.	Nature of obstruction.	Size of cut or breach.	Action taken.
Arrah Canal, 24th to 25th mile	Drainage water impounded.	Nil ...	Existing drainage cut cleared and outfall improved.
Rajpore Distributary, 2nd „	Ditto ...	2′	A small drainage cut made.
Rajpore Distributary, 7th „	Ditto ...	Nil ...	Ditto ditto.
Mongrowlia Distributary ...	Ditto ...	Nil ...	Under consideration.
Mouna Distributary ...	Ditto ...	4′	Temporary inlet provided and small drainage cut.
Doomraon Canal, 7th mile ...	Ditto ...	17′	Two syphons have been constructed and an inlet and drainage cut are in progress.
Doomraon Canal, 9th „ ...	Ditto ...	17′	
Doomraon Canal, 17th „ ...	Ditto ...	12′	Estimate under preparation.
Sukunea Distributary ...	Ditto ...	20′	Apparently an accident, not the result of obstructed drainage.
Arrah Canal, parallel channel, 35th mile.	Ditto ...	9′	The Chouri drainage cut under construction provides for the drainage of this part of the country.
Panmaree Distributary, 5th mile.	Ditto ...	10′	
Panmaree Distributary, 6th mile.	Ditto ...	32′	
Panmaree Escape, 7th mile ...	Ditto ...	15′	Plans for remodelling this work are under preparation.
Dillia Distributary, 1st mile ...	Ditto ...	5′	Drainage culvert built.
Dillia Distributary, 4th „ ...	Ditto ...	8′	Apparently an accident; drainage not obstructed.
Jytpore Distributary, 1st mile	Ditto ...	6′	Estimate for drainage cut being prepared.
Jytpore Distributary, 5th „	Ditto ...	13′	Caused by village channels belonging to private owners; under consideration.
Arrah Canal, parallel channel, 43rd mile.	Ditto ...	5′	The breaches were cuts made by villagers. Obstruction doubtful.
Arrah Canal, parallel channel, 45th mile.	Ditto ...	6′	
Arrah Canal, parallel channel, 48th mile.	Ditto ...	18′	Inlet built.
Asni Distributary, 1st mile ...	Ditto ...	10′	Under consideration.
Koelwar Distributary, 14th mile	Ditto ...	Nil ...	Syphons being constructed.
Ekwari Distributary	Ditto ...	Nil ...	

Locality.	Nature of obstruction.	Size of cut or breach.	Action taken.
Behcea Branch Canal, 12th mile and parallel channel.	Flood water from Sydha syphon impounded.	25′	Under consideration. A proper outfall from the Sydha syphon is required, but there are many difficulties, as the natural drainage is intersected by *aharas*; an inlet into the canal for from 100 to 150 cubic feet per second is admissible.
Behcea Branch Canal, 13th mile	Flood water impounded.	12′	
Kuteya Distributary, 1st mile	Breached from canal.	25′	Caused by escape of water from canal.
Kuteya Distributary, 3rd mile	Water impounded against bank.	20′	Under consideration; outfall for discharge through syphons under Gudhani Distributary required. The necessary survey has been made and levels taken.
Kuteya Distributary, 4th mile	Ditto ...	10′	
Kuteya Distributary, 6th mile	Ditto ...	10′	
Gudhani Distributary, 2nd mile	Ditto ...	6′	Existing syphons apparently sufficient but outfalls, as mentioned above required.
Gudhani Distributary, 3rd mile	Ditto ...	10′	
Gudhani Distributary, 4th mile	Ditto ...	15′	
Gudhani Distributary, 5th mile	Ditto ...	6′	
Naranpore Distributary, 4th mile	Ditto ...	5′	Not yet taken up.
Naranpore Distributary, 3rd mile	Ditto ...	10′	
Gyanpore Distributary, 3rd mile	Ditto ...	5′	Syphons under construction.
Gyanpore Distributary, 4th mile	Ditto ...	6′	
Kuteya Factory Distributary, 1st mile.	Ditto ...	19′	Ditto ditto.
Kuteya Factory Distributary, 2nd mile.	Ditto ...	14′	
Bachire Drainage Cut, 4th mile	Ditto ...	25′	Inlets will be arranged for; possibly cuts on the bank will suffice.
Bachire Drainage Cut, 5th mile	Ditto ...	25′	

Bwxar Division.

Locality.	Nature of obstruction.	Size of cut or breach.	Action taken.
Bhojcpore Distributary, 3rd mile.	Drainage water impounded.	15′	A drainage cut of some magnitude required. Project approved by Chief Engineer; detailed estimate under preparation.
Saiyonhee Distributary, 4th mile.	Ditto ...	6′	Drainage water for the present passed down side cuttings. Under consideration.
Gurrah Distributary, 2nd mile	Ditto ...	10′	Small syphon required; estimate under preparation.
Salya Distributary, 3rd mile ...	Ditto ...	6′	Area affected small; all waste land.
Chousa Canal, 11th to 17th mile	Ditto .	Nil ...	Drainage cut sanctioned; work commenced.
Kochus Distributary, 1st mile	Ditto ...	Nil ...	Existing drainage cut will be improved. Funds available on sanctioned estimate.
Kochus Distributary, 8th mile	Doubtful ...	19′	It is stated that drainage is not impounded, but that breaches are due to nature of soil. Under enquiry.
Kochus Distributary, 9th mile	Ditto ...	15′	
Kochus Distributary, 11th mile	Ditto ...	15′	
Kurbasi Distributary, 1st mile	Drainage water impounded.	4′	Syphon under construction.
Khurghun Distributary, 1st mile.	Ditto ...	Not given	Under investigation.
Khurghun Distributary, 4th mile.	Ditto ...	Ditto ...	Extra opening in syphon being provided.

5. It will be noticed that in the majority of the cases mentioned, steps have actually been taken by which whatever obstruction existed has been remedied. It is only in years when there is an exceptionally heavy fall of rain in a limited time that minor obstructions become apparent, and any delay in carrying out the necessary work is due to this cause. The major works, such as the Chousa catch drain, estimated cost Rs. 57,448, the Doomraon drainage cut, estimated cost Rs. 18,201, and the Chowri drainage, estimated cost Rs. 22,412, have been the subject of prolonged investigations, and the exact plans adopted have been only settled after several discussions with the Chief Engineer, and the most careful consideration of all the interests involved.

6. The large works still required are those in connection with the Kuntiya Distributary, miles 1 to 5, the Burhowlie and Tar Distributaries, the Doomraon Canal, 18th mile, and the Bhojepore Distributary, 3rd mile. The main features of the plans for the latter work have been approved of by the Chief Engineer, and surveys and investigations regarding the remaining three are in progress.

C. W. Odling,

Superintending Engineer, Sone Circle.

List of Drainage and Protective Works sanctioned since 1884-85.

EASTERN MAIN CANAL SERIES.

PARTICULARS.	Authority.	Amount of estimate.	Total.	REMARKS.
1884-85.		Rs.	Rs.	
Estimate for a syphon under the head Khojasa distributary at 26th mile, 3,760 feet.	Superintending Engineer's No. 360, dated 24th January 1885.	344		
Estimate for two lines of Raneeganj pipes under the Khojasa distributary at 25th mile, 4,743 feet.	Ditto ditto ...	189		
			533

C. W. ODLING,

Superintending Engineer, Sone Circle.

The 14th January 1890.

No. 37Mne., dated Calcutta, the 10th February 1890.

The following report of the 11th quarterly inspection of the Dock Works at Kidderpore, which are being carried out by the Commissioners for making Improvements in the Port of Calcutta, is published for general information.

By order of the Lieutenant-Governor of Bengal,

W. B. BESTIC,

Under Secy. to the Govt. of Bengal, P. W. Dept.

QUARTERLY INSPECTION OF THE KIDDERPORE DOCK WORKS.

No. 963, dated Calcutta, the 6th-7th February 1890.

From—H. JOLL, Esq., and W. CONNAN, Esq.,
To—The Secretary to the Government of Bengal, Public Works Dept.

IN accordance with the order of the Government of Bengal, memorandum No. 1:0 (Marine) of the 27th ultimo, we have the honour to report that the 11th quarterly inspection of the Kidderpore Dock Works was made on the 5th instant.

2. The usual tabular statement and the index plan showing the work done during the quarter ending 31st December 1889, and the total amount executed from the commencement, which have been prepared by the Superintending Engineer of the Dock Works, are already with Government.

3. The progress during the quarter is under-noted.

PERMANENT WORKS.

Sixty-feet Lock.—The work is nearly completed, and only 6·8 per cent. of the masonry now remains to be done, 195,000 cubic feet of masonry having been built during the quarter.

Eighty-feet Entrance.—Completed nearly up to coping level. 72,792 cubic feet of masonry was built during the quarter, 10·7 per cent only remaining to be done.

Double Entrance to Dock No. 1.—The erection of the gates was commenced and 233,800 cubic feet masonry built during the quarter, only 13 per cent. remaining to be done.

Tidal Basin.—The graving dock entrance being ready, work was partially resumed during the quarter, and 12,000 cubic feet of masonry was built and 330,000 cubic feet excavation dug. About 22·5 per cent. of quay wall foundation and 18·7 per cent. of masonry remain to be done.

Graving Dock.—70,000 cubic feet of masonry and 85,000 cubic feet of earthwork were done during the quarter. 23·5 per cent. of the brickwork and 10·8 of foundation remain to be done.

Government Graving Dock.—Work on this dock was begun during the last quarter. 1,020,000 cubic feet of excavation were done during the quarter, and the timber trenching for the foundation is now in hand.

Dock No. 1.—363,385 cubic feet of the quay wall masonry and 3,528,992 cubic feet of excavation were done during the quarter. About 9·2 per cent. of brickwork and 24·3 of excavation remain to be done. During the quarter, 129 running feet of foundation was done, only 4·9 per cent. remaining to be done.

Boat Canal.—During the quarter, 774,093 cubic feet of excavation and 113,056 cubic feet of masonry were done, making in all about 70 per cent. of the total estimated amount. The erection of the main girders of the Diamond Harbour road bridge was nearly finished, and the rail arches for both this and the Tallygunge road bridge were completed. The erection of the gates of the lift lock is now in hand, and special measures are being taken for the excavation required in the Chetla Hât lock.

Subsidiary Works.—The hydraulic engine-house has been almost completed with the exception of the chimney shaft and the accumulator tower, and the engines and boilers have been erected in it. The foundations of the main pumping station are completed and ready for the erection of the machinery on its arrival from England.

Expenditure.—The total expenditure up to the end of the quarter under review is reported to be Rs. 1,62,15,553, of which Rs. 1,35,56,930 represents outlay on works and Rs. 26,58,623 outlay on account of land.

Sanitary.—A fever epidemic prevailed among the workpeople during the quarter which caused a considerable mortality and raised the death-rate to 48·61 per 1,000 per annum, against 12·56 in the previous quarter; the death-rate for the same quarter last year being 35·82. The average number of work-people employed during the quarter was 6,537, amongst whom there were 26·3 deaths.

GENERAL REMARKS.

We are of opinion that fair progress has been made with the works, and that, so far as we have been able to judge from a quarterly inspection, the quality of the work done is all that could be desired.

Rainfall, Weather, and State and Prospects of the Crops.

tatement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 8th February, 1890.

	Central Districts.		
PRESIDENCY DIVN. 6	24-Perghs. Feb. 8, '90	Nil	Weather—cool. *Amun* harvest completed. Threshing going on. *Rubbi* crops doing well. Ploughing going on in some parts. Common rice selling at 16 seers per rupee.
7	Nuddea „ 8, '90	Nil	Weather—seasonable. Prospects of crops now on the ground favourable. Harvesting of sugarcane and *arhar* still going on. Ploughing for *aus* rice has commenced.
8	Khoolna „ 8, '90	Nil	Weather—seasonable. Reaping of *amun* completed ; outturn 13 annas, as reported before. State of the *boro* crop, the transplantation of which is nearly completed, is good, and of *rubbi* fair.
9	Jessore „ 8, '90	Nil	Weather—very cold. *Amun* harvesting nearly over; outturn 12 annas in Jhenidah. Spring crops doing fairly well. Price of new rice 14 to 16 seers per rupee.
10	Moorshedabad „ 8, '90	Nil	Weather—bright and cold. Prospects of *rubbi* continue good.
RAJSHAHYE DIVN. 11	Dinagepur „ 8, '90	Nil	Weather—warm during the day and cold at night. Nights still very foggy and damp. Prospects of crops continue good.
12	Rajshahye „ 8, '90	Nil	Weather—cold and seasonable. Harvesting of winter rice nearly finished with good outturn. Prospects of *rubbi* crops also good.
13	Rungpur „ 8, '90	Nil	Weather—seasonable. Land is being prepared for *aus* and jute. Prospects of tobacco, wheat and other *rubbi* crops continue good. Prices stationary.
14	Bogra „ 8, '90	Nil	Weather—cold and pleasant. Foggy mornings. Reaping of *amun* finished. Other crops being reaped. Gram, *khesari*, *rai*, peas, and wheat promising. Rice sells at 22 seers per rupee at head-quarters.
15	Pubna „ 8, '90	Nil	Weather—fine and cold. Outturn of *amun* in Serajgunge at least 14 annas, and in Sudder subdivision 12 annas. Sugarcane 8 annas. Mustard deficient. Other cold-weather crops satisfactory. Price of rice slightly lower.
16	Darjeeling „ 8, '90	Nil	Weather—very cold and bright. Crop prospects generally favourable.
17	Julpigoree „ 8, '90	Nil	Weather—seasonable. Cutting of *haimanti* paddy completed and 14 annas outturn obtained. Condition of tobacco good. Prices stationary.

No.	District and date of return.	Rainfall at under Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded*.			
	Eastern Districts.		
DACCA DIVN. 18	Dacca Feb. 8, '90	Nil	Weather—seasonable. Winter crops doing well. Mustard, pulses and sugarcane are being cut. Fodder is available. No special change in the prices of food-grains. Common rice 13 to 16 seers per rupee.
19	Furreedpur „ 8, '90	Nil	Weather—seasonable. Prospects of *rubbi* crops fair. Sugarcane cultivation progressing. *Boro* being sown in char lands. Coarse rice selling at 14 seers per rupee at Sudder, 15 seers at Madaripore, and 17 seers at Goalundo.
20	Backergunge „ 8, '90	Nil	Weather cool and fair. Harvesting of *aman* completed; outturn estimated at 16 annas. Common rice selling at 16 seers per rupee.
21	Mymonsingh „ 8, '90	Nil	Weather—cold and bright. Transplantation of *boro dhan* nearly completed. Mustard is being gathered. Prospects of crops good. Coarse rice 14 seers per rupee.
CHITTAGONG DIVN. 22	Chittagong „ 11, '90	Nil	Weather—seasonable. Prospects of chillies good.
23	Noakholly „ 8, '90	Nil	Weather—seasonable. *Rubbi* crops doing well. Price of rice stationary.
24	Tipperah „ 8, '90	Nil	Weather—bright and cool. *Boro dhan* is being transplanted. Land is being prepared for *aus*. Tobacco, onions, and chillies are thriving. Mustard is being gathered.
25	Chittagong Hill Tracts. „ 7, '90	Nil	Weather very cold with dense fogs in the morning, and hot at noon, throughout the week. Gathering of mustard continues. Tobacco, chillies and other winter crops progressing.
	Hill Tipperah Feb. 8, '90	Nil	Weather—cold. Tobacco and sugarcane being cut. Cotton gathered; outturn fair.
BEHAR.			
PATNA DIVN. 26	Patna „ 8, '90	Nil	Weather—cold. Mustard and *aghani rabar* are being harvested. Other spring crops doing well. Prospects of poppy continue favourable. Prices of food-grains almost stationary.
27	Gya „ 8, '90	Nil	Weather cold. Harvesting of paddy in course of completion. *Rubbi* coming on well. Poppy progressing.
28	Shahabad „ 8, '90	Nil	Weather bright and cold, but getting slightly warmer. Prospects of wheat and barley good. Peas and mustard being cut. Sugarcane being pressed. Poppy in flower and forward, and promises well if there be no rain. Prices stationary.
29	Durbhunga „ 8, '90	Nil	Weather—cold and clear early in the week, slightly hotter at its close. Prospects of *rabi* continue favourable. Mustard is being harvested. Recent rain has done much good to poppy crop. Prices of common rice range from 19 to 23 seers per rupee.
30	Mozufferpur „ 8, '90	Nil	Weather—seasonable. Prospects of all crops continue very favourable.
31	Sarun „ 8, '90	Nil	Weather—clear and cold. Prospects of *rubbi* excellent. Harvesting of peas and mustard commenced; outturn favourable. Poppy looks well and continues to give a good harvest.
32	Champarun „ 8, '90	Nil	Weather—seasonable. Reaping of mustard nearly finished; estimated outturn 12 annas. *Rubbi* doing well. Poppy generally in flower; prospects excellent. Prices stationary.
BHAGULPORE DIVN. 33	Monghyr „ 8, '90	Nil	Weather—seasonable. Days getting hot. Prospects of *rubbi* crops continue favourable, and an outturn of 14 annas on the whole expected. A shower of rain would still benefit the crops.
34	Bhagulpur „ 8, '90	Nil	Weather cold and dry. Crops on the whole doing well, but would be improved by rain. In Soopool, crops said to be suffering from want of rain.
35	Purneah „ 8, '90	Nil	Weather—seasonably cold. Tobacco and other cold-weather crops doing well, having been benefited by the late rain.
36	Maldah Feb. 8, '90	Nil	Weather—cold. *Kalai* and mustard still being gathered. Transplantation of *boro* going on. Prospects of other standing crops good. Common rice selling at an average of 18 seers per rupee.
37	Santhal Pergha. „ 8, '90	Nil	Weather—seasonable. *Aghani* outturn in Godda 12 annas. *Rubbi* promises to yield 12 annas for the whole district. Prices falling.

	No.	District and date of return.	Rainfall at Sadder Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Dn.	38	Cuttack Feb. 8, '90	Nil	Weather—misty in the morning. The subdivisional officer of Jajpore reports that the outturn of *guru sarad* should be 16 and not 17 annas, as stated before. Prospects continue good.
	39	Pooree ...	...	Report not received.
	40	Balasore ,, 8, '90	Nil	Weather—warmer. Such *rabbi* crops as there are, doing fairly well.
CHOTA NAGPORE.				
South-West Frontier Agency.				
Chota Nagpore Dn.	41	Hazaribagh Feb. 8, '90	Nil	Weather—seasonable. Prospects generally good, except at Chatra and Chowparum, where a full crop is not expected. Rain would do good.
	42	Lohardugga ,, 8, '90	Nil	Weather—seasonable and very cold. Prospects of *rabbi* at head-quarters good. Hoar-frost has caused much damage to this crop in Palamow, especially to *rahar* pulse. Mustard is being now reaped.
	43	Singbhoom ,, 8, '90	Nil	Weather—seasonable. Prospects of crops favourable. Outturn of sugarcane 12 to 16 annas; *surguja* 10 to 16 annas; *mohua* 10 to 12 annas; other oil-seeds 10 to 16 annas. Gram doing well. Prices stationary.
	44	Manbhoom ,, 8, '90	Nil	Weather—getting warmer. Sugarcane is being pressed; outturn full average in Sudder subdivision and about 12 annas in Govindpore. *Arhar, khesari*, and wheat ripening; probable outturn 14 annas. Rice selling at from 20 to 24 seers per rupee.

STATISTICAL DEPARTMENT,
The 10th February, 1890.

P. NOLAN,
Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of January 1890.

	Inches.	Date.	Hour.
The mean pressure of the month	29·946		
The average pressure of January from 24 years' registers ...	30·014		
The highest pressure in the month	30·128	29th	10
The lowest pressure in the month	29·736	24th	16
The range of pressure	0·392		
	Hours.		
The total number of hours of bright sunshine during the month	273·7		
The maximum possible number of hours of sunshine ...	337·3		
	⊖		
The mean temperature of the month	66·3		
The average temperature of January from 24 years' registers	67·7		
The highest temperature in the month	81·7	24th.	
The lowest temperature in the month	47·6	28th.	
The range of temperature during the month	34·1		
The mean daily range of temperature	20·5		
The greatest range of temperature in one day	25·8	28th.	
	Per cent.		
The mean humidity of the month	74		
The average humidity of January from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·469		
The average vapour tension of January from 9 years' registers	0·467		
The mean cloud proportion of the month ...	0·82		
The average cloud proportion of January from 13 years' registers	1·46		
	Inches.		
The total rainfall of the month	0·77		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·76		
The average fall of January from 48 years' registers ...	0·43		
The greatest fall in 24 hours	0·77	25th.	
	Days.		
The number of rainy days in the month	1		
The average number of rainy days in January from 24 years' registers	2		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	130·9		
The mean difference of sun and air temperatures	54·0		
The greatest sun temperature	135·5	8th.	
The greatest excess of sun over air temperature	59·0	27th and 29th.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	48·7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	8·1		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	11·4	29th.	
	Miles.		
The mean movement of the wind per day	63·4		
The greatest movement of the wind in one day	131·0	25th.	
The greatest movement of the wind in one hour	14·0	24th	10 to 11 and 11 to noon.
The number of hours with winds from each of the 8 points—			

N. 204, N.E. 44, E. 5, S.E. 4, S. 29, S.W. 130, W. 105, N.W. 114, Calm 109.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 8 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·5° lower; and finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 7th February 1890.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, DURING THE MONTH OF JANUARY 1890.

THE normal meteorology of January in Bengal is very similar to that of the two previous cold-weather months, except that usually the cold weather conditions are more strongly developed in this month than in any other part of this season. Fairly strong northerly winds with practically cloudless skies, and with low temperature and humidity, rather high pressure, and an almost complete absence of rain obtain for the greater part of the month, unless these normal conditions are disturbed and almost reversed by the formation or appearance of barometric depressions over Northern India, which subsequently drift in a southerly or south-easterly direction through Central India and the North-West Provinces into Chutia Nagpur, Behar and Bengal. These disturbances give moist southerly and south-easterly winds to Bengal with heavily clouded skies and damp rainy weather, the day temperature remaining low, but the night temperature increasing largely. The heaviness of the rainfall brought up by these depressions varies considerably, but the rainfall is usually largest in Behar.

Practically the whole of the rainfall in January is brought about by these disturbances, and the amount is usually small, averaging from about a third of an inch in Orissa up to nearly two thirds of an inch in North Behar and Chutia Nagpur.

Meteorology of the month.—The chief features in the meteorology of January 1890 have been—

1. Pressure has been rather largely below the normal over the whole province, the defect usually ranging from six to eight-hundredths of an inch, and being comparatively small in the south of Orissa and largest in Western and Central Bengal.

2. The average temperatures for the month have been in excess of the normal in all districts, the excess being comparatively small in Orissa, where it is only about half a degree, while in the other districts and in Assam it varies from about one and-a-half to two and-a-half degrees.

3. Humidity has been above the normal by small amounts at almost all stations.

4. Cloud-proportion has been below the normal at almost all stations in Bengal and considerably above it in Assam.

5. The number of barometric depressions from Northern India which have passed through Bengal during January have been small, and all except one have been of such feeble nature as to scarcely call for any record. A very slight disturbance passed apparently along the line of the hills to the north of the province, giving a few showers of rain in and near the hills on the 7th and 8th of January. A second, and also a very feeble, disturbance passed through South-West and East Bengal on the 19th and 20th of January, giving rather numerous showers in these two districts and a few showers in North Bengal. The third barometric depression which occurred near the end of the month was decidedly influential and of very much greater importance than the other two. It was first formed or was first noticed in North-Western India on the 22nd, and then travelled in a south-easterly direction, reaching Bengal on the 24th and 25th of January, and on the 26th it had advanced over Burma, giving heavy rain in its advance; and from this storm moderate rain was received in all districts except parts of North Bengal and North Behar, and except the whole of South Behar and Chutia Nagpur.

6. By these actions rainfall has been fairly abundant and considerably above the normal amount in East Bengal, of about the normal amount in South-West Bengal and North Bengal, and decidedly deficient in North Behar. In Orissa the falls have been so small that rain may be said to have been practically absent, while in South Behar and Chutia Nagpur the rainfall has been entirely absent.

The weather conditions for the month therefore call for few explanatory remarks, for, except during the three brief periods mentioned in the fifth of the above clauses, weather has been generally of typical north-east monsoon character. Skies have therefore been generally almost cloudless during the greater part of the month, and rainfall has been entirely confined to a few showers during the periods of disturbance above mentioned. Owing to the comparative absence of rain and of the usual cold-weather storms in Upper India, temperature has been above the normal, and the northerly winds have been at certain times rather unsteady; the average humidity has also been rather high, owing perhaps to the fact that at one period of the month rather moist southerly winds set in for some days. During the last period of disturbance, and to a much smaller extent in the two smaller disturbances, the normal conditions became partially reversed, and skies clouded over, while the night temperatures rose very considerably.

Pressure—Was at the commencement of the month decidedly below the normal, and the average defect for about the first twenty days was from about five to eight-hundredths of an inch. With the depression which then passed through the province, this defect increased, and on the 24th and 25th pressure became from about a fifth to a quarter of an inch below the normal over a considerable part of the province. With the disappearance of the depression pressure rose rapidly, and by about the 27th and 28th of the month it had become very high, but before the close again it had commenced to fall. The average pressure for the whole month has therefore been decidedly in defect, the usual defect equalling about six to eight-hundredths of an inch. On the whole, the distribution of this defect of pressure has been fairly equal, but, if anything, the defects have been largest in the centre of the province, and least in such districts as Orissa, North Behar, and in parts of Assam such as at Sibsagor, &c.

Temperature—Continued generally decidedly above the normal up till the last week in January, when, under the influence of the rainfall in the plains, and with a moderate fall of snow along the Himalayas, a wave of cold northerly winds set in over the province, causing a very sudden reduction of temperature. So rapid was the fall that at many stations a decrease of 5,° and in some cases of even 9° and 10,° in the mean temperature of the day occurred on the 26th, and from this date to the end of the month very cool weather obtained. For the whole month consequently temperature was above the normal, the mean excess in Bengal equalling 1·8°. In Assam the excess temperature has been almost the same, and it there equals 1·7°.

The actual oscillations and variations of the temperature for the month from the normal are best shown in the following table, where the variations from the normal of the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province are given week by week :—

Stations.	Week ending 10th January 1890.			Week ending 17th January 1890.			Week ending 24th January 1890.			Week ending 31st January 1890.		
	Variation of actual mean maximum temperature of week from normal mean.	Variation of actual mean minimum temperature of week from normal mean. Rainfall—On the whole, has been deficient in quantity; South Behar and Chutia Nagpur have been rainless, and Orissa almost so; while the falls in North Behar are little more than a third of the normal amount. In South-West and North Bengal the falls are practically normal, but in East Bengal they are nearly twice as large as usual. Even in South-West Bengal, though on the average a fair amount of rain has fallen, only a few districts have received good falls, and these are 24-Pergunnahs, Howrah, Hooghly, Jessore, and Khoolna. In East Bengal the districts receiving the largest fall have been Furreedpore, Dacca, Comillah, and Mymensingh; and in North Bengal the falls have been practically confined to the districts of Bogra, Rungpore, Julpigoree, Cooch Behar, Darjeeling Hills, and Pubna.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of January 1890 :—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 15th May 1889.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in month.	Normal average number in month.	Variation.	Average.	Normal average.

* Means of six days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the ... The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The num... are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question during the ... stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least hundredth of an inch fell.

the week ending Friday, the 7th of February 1890.

at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	OF WEEK. Mean for district.	OF WEEK. Normal mean.	DISTRICT OBSERVATIONS. RAINFALL. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 1st May 1889. Mean for district.	Since 1st May 1889. Normal mean.	Since 1st May 1889. Variation.	Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.
